 Structural steel roof over dining room.  
 Owner—State of California.  
 Architect—None.

AT TENTH and K Streets.  
 IN SACRAMENTO.  
 THE OWL Drug Company.  
 HAVE A wonderful window display.  
 WHICH ATTRACTS much attention.  
 AND THIS display.  
 HAS SOLD a large quantity.  
 OF THE Owl's goods.  
 ONE WINDOW sign reads.  
 "FOOL YOUR friends.  
 WITH SANDY Pratt's rocks.  
 MINED AT Prattrock, California."  
 MANY SMALLER signs read.  
 "PRATTROCK, CALIFORNIA.  
 SPEED LIMIT.  
 99 MILES Per Hour.  
 FORDS DO Your Best."  
 AND THE Owl has "rocks."  
 IN THIS unique display.  
 AND YOU can buy them.  
 IN THE candy department.  
 THIS CANDY looks so much.  
 LIKE SANDY'S clean rock.  
 THAT MANY people argue.  
 WHETHER IT is candy.  
 OR SANDY'S wonderful crushed rock.  
 ALSO IN the window.  
 IS A rock delivery truck.  
 AND A steam shovel.  
 LIKE THE one.  
 THAT DIGS rock.  
 AT PRATTROCK (near Folsom).  
 IN THIS same window.  
 IS A model.  
 OF SANDY'S rock bunkers.  
 AT FIFTEENTH and A Streets.  
 IN SACRAMENTO.  
 WHERE CARROLL Stephens, Manager.  
 OF THE Golden Gate Atlas Company.  
 RETAILS THE clean sand.  
 AND CLEAN rock and gravel.  
 PRODUCED BY Sandy Pratt, President.  
 OF THE Pratt Building Material Co.  
 THIS BUNKER model was made.

BY MR. Oliver.  
 WHO BUILT the modern bunker.  
 THAT HELPS Stephens retail.  
 SANDY'S WONDERFUL sand and rock.  
 IN CLOSING this story.  
 SANDY FEELS quite flattered.  
 THAT A progressive firm.  
 LIKE THE Owl Drug Company.  
 GIVES SANDY'S advertisements.  
 GOOD OR bad.  
 AS THEY may be.  
 SO MUCH attention.  
 AND IF you, dear reader.  
 WILL TAKE a look.  
 AT THIS display of "rocks."  
 NO DOUBT.  
 YOU WILL join the multitude.  
 OF BUYERS.  
 THAT ARE flowing.  
 INTO THIS store.  
 TO PURCHASE "rocks."  
 GOOD ENOUGH to eat.  
 "I THANK you."

This is Mr. and Mrs. Ever Gree from Always Green, Rocky Mountain U. S. A., who were just married. Her husband (capital prize) gave her for wedding present a box of the Owl Drug Company's candy (Sandy's "rocks" now on display in their window at 10th and K Streets, Sacramento. The Newlyweds are now on their honeymoon trip through California, stopping at the Pratt Building Material Company's sand, rock and gravel producing plants at Sacramento, Marysville, Mayhew (Sacramento County), Pratt (Monterey County), and Prattrock (near Folsom). When the Ever Gree stop at the Pratt central office, the Hearst Building, San Francisco they will be presented with a ROCKING chair by Sandy.

LOS ANGELES, Cal. — The State Board of Control is considering a location at Exposition Park as the site upon which to erect a state office building in Los Angeles. Bonds in the sum of \$1,250,000 were voted at the last election for the erection of a state building in Los Angeles, but no funds were provided for a site.

# Official Proposals

### NOTICE TO BIDDERS

**(Coalinga Union High School District)**

Notice is hereby given that the Board of Trustees of the Coalinga Union High School will receive sealed proposals and bids for the furnishing and installing of a Frigidaire water-cooling and refrigeration system in the buildings of the Coalinga Union Junior and Senior High Schools. Specifications and particulars concerning said installation may be procured on application to the clerk of the board at his office, 129 West Elm Street.

Said bids will be received at the office of the clerk of the board on or before 4:30 o'clock P. M., Saturday, February 26, 1927, said board of trustees reserves the right to reject any and all bids.

J. A. FLUETSCH,  
Clerk, Board of Trustees, Coalinga Union High School District.

### NOTICE INVITING BIDS

**Delano Joint Union High School Dist.**

Notice is hereby given, that sealed bids will be received by the Board of Trustees of the Delano Joint Union High School up to 7:30 o'clock P. M., of Tuesday, March 1st, 1927, for furnishing the following named articles:

One (1) Lawn Mower, equipped with a 3 H. P. water cooled motor with power driven reel and a 30 inch cut.

To install one (1) 15 H. P. Pump and Motor in place of the present 10 H. P. pump and motor, and to make allowance for trade in for old pump and motor.

To furnish and install a seven (7) foot Cyclone Fence around the new athletic field.

Each bid must be in duplicate and accompanied by a certified or cashier's check, or bond with an approved Surety Company as surety in the sum of ten per cent of the amount bid, such check or bond to be made payable to the Chairman of the Board of School Trustees, as a guarantee that the bidder, if successful, will enter into a contract satisfactory to said Board. Such bids will be received at the Principal's principal's office of the Delano Joint Union High School, in the City of Delano, California, and will be opened at a meeting of the Board of School Trustees in the High School in the City of Delano, California, on the 1st day of March, 1927, at 7:30 P. M.

The Board reserves the right to reject any and all bids not deemed advantageous to the district.

By order of the Board of School Trustees.

H. A. BOWER, Clerk.  
Dated This 8th day of February, 1927.

### NOTICE TO CONTRACTORS

**(T. L. Heaton School—Fresno)**

Pursuant to an order of the Board of Education of the City of Fresno School District of the County of Fresno, duly made and entered in its minutes this 10th day of February, 1927, public notice is hereby given that the said board will receive up to 5 o'clock P. M. on the 10th day of March, 1927, at the office of the said board in the Hawthorne School Building, 2425 Fresno street, Fresno, California, sealed proposals for the furnishing of labor and material for the construction of the T. L. Heaton School, North Wing, as per plans and specifications prepared by Swartz & Ryland, architects, Rowell Building, Fresno, California.

Segregated bids will be received for his building, and reference is hereby made to "General Information to Bid-

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

ders." Building Form No. 6, for further particulars regarding all bids.

Plans and specifications together with forms for submitting all bids and further details regarding any and all bids may be obtained from the undersigned secretary of said Board of Education at the office of said board above designated.

A bidder's bond or certified check equal to at least 10 per cent of the amount of the bid submitted, must accompany all proposals.

The Board of Education reserves the right to reject any and all bids.

By order Board of Education City of Fresno School District.

L. L. SMITH, Secretary.

### NOTICE TO BIDDERS

**(Elementary School—Petaluma)**

Notice Is Hereby Given, that the Board of Education of Petaluma Grammar School District, of Sonoma County, California, will receive sealed bids for the furnishing of all labor and material necessary in the erection and construction of a Class C Elementary School Building to be erected on the premises situated between Prospect Street and Oak Street fronting on Keller Street, and extending back to Liberty Street, in the City of Petaluma, County of Sonoma, State of California.

Said building to be erected and completed in accordance with the plans and specifications therefor, prepared by Brainerd Jones, Architect, of the City of Petaluma, now on file in the office of said Board of Education at the City Hall, City of Petaluma, County of Sonoma, State of California, copies of which said plans and specifications may be procured at the office of said architect, in the City of Petaluma, upon depositing with said architect the sum of \$20.00, which said sum will be returned upon the return of said plans and specifications to said architect.

Sealed bids will be received up to 8:00 o'clock P. M. of the 28th day of February, 1927, by the undersigned Secretary of the Board of Education of the Petaluma Grammar School District, of Sonoma County, California, at which time said bids will be publicly opened at a meeting of the Board of

Education of Petaluma Grammar School District at the offices of said Board of Education of the said City Hall in the City of Petaluma, County of Sonoma, State of California.

Sealed bids must be accompanied by certified check in a sum equal to at least ten per cent (10%) of the amount of bid to do the work mentioned, which said deposit shall be forfeited if such bid is accepted and such bidder or bidders shall fail to enter into a contract for the construction of said building in accordance therewith within fifteen days after acceptance of such bid or bids.

No bids will be considered unless made out on blank forms furnished by said architect.

The successful bidder or bidders will be required to give bonds in the sum of fifty per cent (50%) of the contract price as security for labor and materials, and in addition thereto a bond of twenty-five per cent (25%) for a faithful performance of said contract.

The said Board of Education of Petaluma Grammar School District, as owners, reserve the right to reject any and all bids.

All bids must be addressed to John A. Olmsted, Secretary of Board of Education of Petaluma Grammar School District, of Sonoma County, California.

By Order of said Board of Education of Petaluma Grammar School District, of Sonoma County, California.

JOHN A. OLMSTED,  
Secretary.

### NOTICE TO CONTRACTORS AND DEALERS IN WIRE FENCING

Notice is hereby given that the Board of Education of the City of Alameda, and of Alameda High School District of Alameda County, California, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 9, City Hall, Alameda, California, until 8:00 o'clock P. M., Tuesday, the 1st day of March, 1927, at which time said bids will be opened, for all the labor and material necessary for the construction of a steel wire fence surrounding a portion of the Alameda High School Property, located on the block bounded by Central Avenue, Oak Street, Alameda Avenue and Walnut Street, Alameda, California.

These bids shall be presented in accordance with plans and specifications for said work on file in the office of the Secretary of said Board, Room 9, City Hall, Alameda, California.

On a deposit of ten (\$10.00) Dollars plans and specifications for said work may be had by any bidder on application to said Secretary, and may be retained for seven days.

Bids must be made on proposals obtained at the office of the Secretary of said Board, and signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Secretary, Alameda Board of Education, to be retained by the said High School District as agreed and liquidated damages should the party or parties to whom the contract is awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. Only surety bonds will be accepted by said Alameda High School Board. Said checks shall be for at least ten (10%) per cent of the amount of the bid.

Each bid shall be accompanied by an affidavit executed on a form obtained from the Secretary of said Board.

The Board reserves the right to reject any and all bids, or any or all items of such bids.

WM. G. PADEN,

Secretary, Alameda Board of Education, and Clerk, Alameda High School Board, Alameda High School District, Alameda, California.

**NOTICE TO CONTRACTORS****(Theodore Roosevelt High School—  
Fresno)**

Pursuant to an order of the Board of Education of the Fresno City High School District of the County of Fresno, duly made and entered in its minutes this 10th day of February, 1927, public notice is hereby given that the said Board will receive up to 5 o'clock P. M. on the 17th day of March, 1927, at the office of the said Board in the Hawthorne School Building, 2425 Fresno Street, Fresno, California, sealed proposals for the furnishing of labor and material for the construction of the Theodore Roosevelt High School Building, as per plans and specifications prepared by Trewitt-Shields Company, architects, Pacific Southwest Building, Fresno, California.

Segregated bids will be received for this building, and reference is hereby made to "General Information to Bidders," Building Form No. 6, for further particulars regarding all bids.

Plans and specifications together with forms for submitting all bids and further details regarding any and all bids may be obtained from the undersigned secretary of said Board of Education at the office of said board above designated.

A bidder's surety bond or certified check equal to at least 10 per cent of the amount of the bid submitted, must accompany all proposals.

The Board of Education reserves the right to reject any and all bids.

By Order

BOARD OF EDUCATION  
Fresno City High School District.  
L. L. SMITH, Secretary.

State of California

CALIFORNIA HIGHWAY COMMISSION

**NOTICE TO CONTRACTORS**

SEALED PROPOSALS will be received by the California Highway Commission, at the office of the Division Engineer, at Redding, California, until 2 P. M., Monday, February 28, 1927, at which time they will be publicly opened and read by the Division Engineer, for performing work as follows:

The clearing, grubbing and disposal of all stumps, brush and debris on approximately 51 acres of Highway Right of Way, alongside the pavement between Dunsmuir and a point 3 miles north of Weed, in Siskiyou County.

Maps may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the Commission. Each bid must be accompanied by cash, or a certified check made payable to the "Secretary, California Highway Commission," for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

CALIFORNIA HIGHWAY

COMMISSION,

R. M. MORTON,

State Highway Engineer,

By H. P. COMLEY,

Division Engineer, Div. II.

Dated February 11, 1927.

**NOTICE TO CONTRACTORS****(Well, Etc.—Red Bluff, Calif.)**

SEALED PROPOSALS will be received for the purchase and installation of a pump and motor to be installed in well No. 3 at the City waterworks in Block No. 75 of the City of Red Bluff, County of Tehama, State of California, said well cased with 12-inch O. D. screw casing; said casing can be removed from the well to a depth of 60 feet, making the well 16 in diameter, if a larger bowl pump would be more efficient, and according to specifications on file in the office of the city clerk.

The pump and motor must be of some well-known standard make.

Pump to deliver 700 gallons of water per minute, water to be lifted 165 feet from level of water in well; pump bowls to be set 60 feet below the surface of ground, with 20 feet of suction pipe below bowls.

Sealed bids to be submitted to the city clerk on or before **Thursday evening, February 24th, 1927, at 7 o'clock, P. M.**, and said bids to be accompanied by a certified check in the sum of ten (10) per cent of the amount of bid. The board reserves the right to reject any and all bids submitted.

Red Bluff, California, Feb. 9, 1927.

E. F. LENNON,

Clerk of said City of Red Bluff

**CALL FOR BIDS****(Fresno State College Association)**

Bids for the erection of additional wooden seats and steps at the Fresno State College Stadium will be received at the office of the Fresno State College Association, at the State College, Fresno, California, up to 4 P. M. **Wednesday, February 23, 1927.**

Plans and specifications may be obtained at the above address.

Each bidder is asked to submit two bids, one on the construction of the total number of seats which can be built on the present embankments, and one on the construction of only twelve sections of seats, adjoining the seats now erected.

A certified check for 10% of the amount of the bid must accompany the bid.

The Fresno State College Association reserves the right to reject any and all bids.

SARA McCORD,

Secretary.

**NOTICE TO CONTRACTORS****(Jefferson Union Elementary School  
District—Santa Clara County)**

NOTICE IS HEREBY GIVEN, That the Board of Trustees of The Jefferson Union Elementary School District, Santa Clara County, hereby calls for sealed proposals to be delivered to Walter Brown, Clerk of said Board of Trustees, until **Wednesday, the 2nd day of March, 1927, at eight o'clock, p. m.**, at the Milliken School, Lawrence Road, Santa Clara County, California, at which time said bids will be opened for the erection and completion of the Jefferson Union Elementary School, located on the North East corner of Lawrence Road and Reed Lane. These bids shall be presented in accordance with plans and specifications for said building on file with Wolfe & Higgins, Architects, 2-3-4 Realty Building, San Jose, California, and with Walter Brown, Kifer Road, Santa Clara County, California.

General work, including excavating and grading, concrete, carpenter work, interior equipment, miscellaneous ornamental and structural iron, sheet metal, built-up, roofing, tile roof, blackboards, painting work, electrical work, brickwork, lathing and plastering, plumbing and heating, etc.

Complete set of plans and specifications may be had by any bidder on application to said Wolfe & Higgins, Architects, or to said Walter Brown, at the places hereinabove mentioned, and in each case shall be returned within one (1) week after securing the same.

Bids must be made on proposals obtained from said Wolfe & Higgins, Architects, or from said Walter Brown at their addresses above mentioned, and must be signed by the bidder and accompanied by a certified check, certified by some responsible bank or banker and be made payable to Walter Brown, Clerk of the Board of Trustees of The Jefferson Union Elementary School District, to be retained by said school district as agreed and liquidated damages should the party or parties to whom the contract be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check

shall be for at least 10 per cent of the amount bid.

Bids will be opened by the Board of said district on **Wednesday, the 2nd day of March, A. D. 1927, at 8 o'clock P. M.**, at the Milliken School, Lawrence Road, Santa Clara County, California.

The Board reserves the right to reject any and all bids or any or all items of such bids.

WALTER BROWN,

Clerk of the Board of Trustees of The Jefferson Union Elementary School District, Santa Clara County, State of California.

**NOTICE TO CONTRACTORS****(Junior Officers and Nurses' Quarters  
Canacao, P. I.)**

The Bureau of Yards and Docks invites attention to the proposed work under Specification No. 5326, "Junior Officers Quarters and Nurses' Quarters, Naval Hospital, Canacao, P. I."

The work includes plain and reinforced concrete; asbestos shingle roofing and sheet metal work; steel and iron work; mastic flooring; metal lathing and furring; plastering; wood framing, doors, sash and trim; and plumbing and electrical systems.

In the event that this work is of interest to your firm, you should forward to the Bureau of Yards and Docks, Navy Department, Washington, D. C., to the Commandant, Naval Station, Cavite, P. I., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for \$20 payable to the Chief of Bureau of Yards and Docks, as security for the safe return of the drawings and specification.

Inasmuch as the specifications and accompanying drawings are nearing completion, it is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded when the specifications are received from the printer.

Prospective bidders on the West Coast should make application to the Navy Yard, Mare Island, Calif., for the bidding data.

**NOTICE TO CONTRACTORS****(Pumping Plant—Jefferson Union High  
School District)**

The Trustees of the Jefferson Union High School District will receive bids for the following material and labor:

1. For the boring of a well to be twelve inches in diameter and approximately 200 feet in depth, on the property of the above High School.

2. For the furnishing of labor, pumps, tanks, casings, etc., necessary for the installation of a complete well and pumping system in accordance with specifications on file in the office of the High School.

Bids will be opened in the office of the above High School in Daly City on the evening of **February 16th, 1927, at 8:00 o'clock.**

The Board reserves the right to reject any or all bids.

Signed:

ADOLPH GEHRINGER,

President.

STELLA L. JENSEN,

Clerk.

TRUMAN BENTLEY,

LEWIS W. STARK,

JULIA SAMPSON,

Trustees.

**NOTICE TO CONTRACTORS****Furnace and Oil Burners—Fort Mason**

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Calif. Sealed proposals will be received here until 11 A. M., Feb. 16, 1927, for remodelling furnaces and replacing oil burners in power house at Letterman General Hospital, Calif. Information upon application.

## THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room  
where plans and specifications may be filed by Architects, Engineers and  
Owners for the convenience of bidders in San Francisco and the Bay Coun-  
ties.

Architects, Engineers and Owners are invited to forward plans of  
their projects to BUILDING AND ENGINEERING NEWS. No charge for  
this service. The plans will be returned in good condition when contract  
for work is let.

Feb. 3, 1927—LOT 54 BLK 18, San Carlos. Empire Planing Mill to Municipal Properties.....\$108.15

## AIRPORTS AND CITY PLANNING

The possibility that the airport will shift the trend of city development of the future is broached by John Ihlder, Manager of the Department of Civic Development of the Chamber of Commerce of the United States in an address recently delivered before the City Planning Institute.

Calling attention to the open water spaces possessed by bay cities. Mr. Ihlder said: "It would be difficult to over-estimate the economic value of the breezes from the water that blow through the streets of New York and the bay cities.

"Awakening to the advantages which nature forced upon our fortunate members, we shall provide adequately for the new kind of harbor that is coming to us with the airplane. We doubtless shall, under stress of necessity, figure carefully how small an air field may be, how high the surrounding buildings may be permitted to rise, for we wish to bring the air harbor as far in town as possible in order to minimize change in existing values. But as the railroad induced our river towns to turn their backs upon the levees, so the airplane may induce them to face in a new direction, and those towns which make the most adequate provision are likely to reap a benefit.

"But air-harbors like water-harbors, will prove inadequate to our purpose and other uses, such as truck gardening and farming, will be found for these open areas."

## Better Buildings Are Urged As Means To Prevent Disasters

Practically all the loss of life, injuries to human beings and damage to property due to catastrophes arising from natural causes, such as hurricanes, tornadoes, and earthquakes, could be eliminated by the expenditure of 10 to 15 per cent more on the construction of buildings, and complete use of all the modern engineering knowledge and skill available.

This was the declaration made by Dr. Ford A. Carpenter, lecturer on meteorology of the University of California, and manager of the department of meteorology and aeronautics of the Los Angeles Chamber of Commerce, in an address before the Executives' club at Chicago, Feb. 18.

"From investigations at the scenes of past disasters," Dr. Carpenter said, "it has been scientifically established that if the same regard for safety had been taken in the construction of buildings that is customary in the building of ships and the operation of railroads, practically all loss of life, injuries and property damage could have been avoided. Ships are built to encounter severer battles with the elements than are experienced by structures in our cities, and ships are safer than our cities—the percentage of life loss and injury on them is very low. The work of the railroads for safety

has made the danger of accidents to a person on a train far less than that of a person walking on the streets of any of our large cities.

"In the Santa Barbara earthquake it was found that the better constructed buildings suffered little, the best suffered none at all. It was found that with 10 per cent more expenditure for protection against catastrophe, all modern buildings would have come through without damage, and if people were educated to remain inside such buildings at times of disaster instead of running into the streets, deaths and injuries could be eliminated, or at least reduced to a minimum.

"Ten to 15 per cent more in money, and application of all available engineering skill, would, I believe, have minimized the toll of the recent Florida hurricane to a small fraction of what it was. Education in the mechanics of a hurricane would have saved several hundred lives. After the first fury of the hurricane the sun came out and there was a dead calm. People joyously ran out into the streets, to be caught by the lashing tail of the hurricane which was bound to follow this period of calm. Had they been taught what a hurricane is like—that this lull was only temporary — they would have remained inside, and most of them would have escaped."

## \$20,000,000 To Be Expended By Electric Group In 1927

Approval of 1927 budget estimates by the North American Company of New York brought forth announcement recently that more than \$20,000,000 will be spent in construction and operation this year by its three Western subsidiaries, the Great Western Power Company of California, the San Joaquin Light & Power Corporation and the Midland Counties Public Service Corporation.

The announcement was made by A. Emory Wishon, vice-president and general manager of the three California utilities. In the apportionment \$10,506,135 is allotted to the Great Western Power Company, of which \$3,307,135 is to be spent in construction work to take care of new business demands. The remaining \$2,199,000 is budgeted to operating costs.

The projected construction program, according to Wishon, is one of the most extensive in the history of the company. It will include as one of its important items the building of a 220,000-volt steel tower transmission line 100 miles long from Brighton substation, near Sacramento, to Bucks Creek generating plant of the Feather River Power Company.

The output of the Bucks Creek plant has been contracted for thirty-five years, at the end of which time the plant becomes the property of Great Western. Completion of this line will give the Great Western company four

main feeds from its generating sources into the center of its territory. It will also strengthen connection with the San Joaquin system.

Nearly \$2,350,000 of the construction budget will be spent for new distribution lines and substations throughout the territory.

The San Joaquin budget provides for \$8,555,385, of which \$4,122,485 is for construction work and \$432,900 for operating expense. The construction budget is below that of 1926, but last year's program included the building of the Balch power plant on Kings river, which has just been brought on to the lines. This plant, with 40,000 horsepower capacity, gives the company ample power for the immediate future, and no new plant construction is required for this year.

The year just closed was the best in the history of the companies from the standpoint of new business obtained, said General Manager Wishon. The Great Western added 38,358 kilowatts, the requirements of 8117 new consumers to its distribution lines. The San Joaquin's increase was 62,722 kilowatts, with 6824 new consumers for all lines of service, while the Midland Counties' increase was 12,521 kilowatts and 799 consumers. We have a big budget, and a busy year is ahead of us. Every indication is that new business activity for 1927 will be even greater than that

## Will License Law Eliminate The Irresponsible Contractor

Two license laws for the construction industry are up for consideration. One has the backing of the Alameda County Builders' Exchange and another is sponsored by the Pasadena Builders' Exchange. The texts of both laws have been published in previous issues of B and E News. Inasmuch as both bills as proposed are topics of discussion in construction circles, the view of the editor of the American Contractor of New York with regards to contractors' license are interesting—and are published herewith.

—Editor.

One state to date has a license law in operation and in this state, North Carolina, the law seems to be growing in favor with contractors, architects and others.

A license law for contractors can not be predicated solely on elimination of irresponsible competition. It can not be predicated on the proposition of bringing into existence a monopoly sanctioned by law. It must be predicated on the ground of protection for the public—that and nothing else. Now everyone knows that a law may be so predicated and yet be consciously used to bring about a monopoly. Various instances of licenses pertaining to workmen, miners for instance, may be cited as working out that way.

But who in the business of contracting is seeking a law to so work out? We know of no one. H. P. Grier, Jr., who is chairman of the license board in North Carolina and a contractor of proportions and vision, not only states emphatically that the Carolina law is not aimed at any monopoly, but proves it by his works and the works of the board.

perly administered, has limitations. It

It is patent that a license law, pro-

may eliminate some irresponsible competition. It doubtless will do that; the proof lies in the Carolina law that good results have been accomplished. But the administration through the long years must keep its action above suspicion or the course of the good contractor may be hurt—some time when politics inject into the administration of the law men who forget the real purpose of the law.

Furthermore, a license law for contractors paves the way for still more license laws for building trades. But that is not to the point here. The point is that contractors can not merely put through a license law in any state and then expect that all the irresponsibles will be eliminated.

The definition of irresponsibility is too vague to permit any law to function to keep even the worst offenders from doing business. In fact, the danger of the law is not such a real thing to the seasoned schemer who would do what the law does not seem to permit, as it is a danger to the innocent, would be entrant to the profession or business the law covers.

A firm may be able to build to the plans and specifications and may have capital and equipment and still be the most "irresponsible" of bidders. In fact, it is not an uncommon thing for contractors possessing the highest ethics to bid at their cost for a job at times to keep their organization employed and from eating its head off.

The menace of the low bid will be with contracting even after license laws are passed.

We do not wish to say one word against the license law, but we do wish to convey the meaning that the license law is not the cure-all which is being sought to remedy all the bad conditions of contracting.

demand. Road building generally comes to a stop in the winter months and building activity slows down.

The problem presented by the greater requirements in the good weather months resolves itself into striking a balance between equipment enough to handle the entire peak demand and building up sufficient stocks in the off season to care for any possible developments.

As cement, through its liability to damage from moisture, requires expensive storage facilities and there is a certain market risk in building up large stocks, the solution has seemed to lie in normally maintaining some excess equipment to handle a part of the peak requirements.

Under these conditions a surplus of potential output over actual production is not an abnormal state of affairs.

In the past, demand engaging in the neighborhood of 85 per cent of the facilities available has sufficed to raise prices and attract imports.

On this basis the rate of activity in the years 1923 to 1925 must in general be considered highly satisfactory—in fact the most fully employment interval since 1907. In 1923 the industry was called upon to utilize nearly 90 per cent of its potential output. The rate of operation was but little lower in the two succeeding years, yet there was no indications of excess production.

This strong demand for cement is reflected in the recent trend of cement prices. The average of all building materials and the all-commodity index have declined a third since 1920.

Cement prices have declined only 10 per cent. It is true that the cement index did not show so marked a rise before 1920, and with 1913 prices as the base it is now in line with other building materials.

It is apparent, therefore, that if prosperous conditions are to be maintained in the industry and if a return to excessively competitive conditions is to be avoided it is imperative to slacken the rate at which capacity to produce is being enlarged.

### EL DORADO IRRIGATION DISTRICT VOTES BOND ISSUE

El Dorado Irrigation District with headquarters at Placerville, at a recent election, voted bonds of \$1,300,000 to finance construction of an irrigation system for 36,702 acres. S. J. Norris, chief engineer for the district, summarizes construction costs as follows: Storage and right-of-way for Hazen Valley Reservoir, \$436,817; main conduit from Sly Park Creek to North Webber Creek, \$245,158; Webber Ditch reconstruction, cement granite lining, \$60,873; Placerville city waterwork connection with Webber Ditch, \$32,400; distribution laterals, enlargement, extension and replacement of structure, \$51,840; purchase lot and construct office building, \$12,960; partial bond interest for three years, \$109,952; purchase of El Dorado ditch system, \$350,000.

## Portland Cement Trade In United States Needs Adjusting

Discussing the Portland cement industry in the current issue of "Commerce Monthly," the National Bank of Commerce, New York, points out that substantial additions to present plant capacity will tend to produce excessively competitive conditions, necessitating a period of readjustment. It says:

With the initiation of the post-war building boom, Portland cement manufacture resumed the steady expansion that had characterized twenty odd years of its existence prior to the outbreak of the war in 1914.

Large as was its capacity at the beginning of the boom, and rapidly as it was increased, the industry was taxed to keep pace with the growth in demand.

Four years of construction, however, has restored the normal surplus of capacity over requirements.

As the rise in consumption appears to have lost its upward momentum it seems likely that present cement-manufacturing facilities, with equipment now in process of installation, are entirely adequate to handle the probable

demands of the next few years.

The always generous surplus of capacity above requirements does not seem to denote a very close adjustment between supply and demand. As a matter of fact certain characteristics inherent in the industry make it peculiarly subject to over expansion. The product is heavy and bulky while its value is relatively low.

Freight rates, therefore, are an important element in cost to consumers, and in relatively distant markets they form a protective barrier that becomes a powerful incentive to the establishment of local plants. Thus with an almost universal occurrence of suitable raw materials the course of cement manufacture has been marked by progressive geographic decentralization.

For the industry as a whole the final result is a certain amount of used capacity since it may be stated as a general rule that all parts of the country are never uniformly prosperous at once.

This tendency toward excess capacity is accentuated by the pronounced seasonal movement of

# ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

## Peace Prevails In Building Industry—Carpenters' Strike Settled—Agreements Signed

The carpenters' strike ended officially Feb. 18 with acceptance by the Bay District Council of Carpenters of the American plan, or the collective bargaining principle. The vote was 1932 for and 632 against.

An agreement framed by a joint committee of representatives of both sides to the controversy was ratified by a referendum vote of members of the Bay District Council.

The agreement provides for the return to normal conditions in the building trades. The carpenters agree to discontinue the lumber and material yards now operated by the Bay District Council in San Francisco and Alameda counties and to sell the stock and equipment of these yards as soon as possible.

The Industrial Association, on the other hand, agrees to maintain the wage scale for 1927 established by the impartial wage board.

Signing of the agreement follows the issuance of a joint statement on January 14 by Colbert Coldwell, representing the Industrial Association, William H. George, representing the Builders' Exchange, A. W. Muir, representing the United Brotherhood of Carpenters and Joiners, and Norman McLean, representing the Bay District Council, to the effect that normal conditions in the building industry here could be restored as soon as possible.

The agreement, as adopted by the Bay District Council, follows in full:

**FIRST**—That the strike called by the Bay District Council of the United Brotherhood of Carpenters and Join-

ers of America on April 1, 1926, be regarded as at an end.

**SECOND**—That the Industrial Association will on February 7, 1927, suspend the operation of the "Permit System" for so long a time as there is no interference with the right of a mechanic in the building trades to seek and find employment irrespective of his affiliation or non-affiliation with any organization and or until such further time as in the judgment of the Industrial Association the re-establishment of the "Permit System" may become necessary.

**THIRD**—That the material and lumber yards operated by the said Bay District Council of Carpenters in San Francisco and Alameda counties be closed down on February 7, 1927, and, as soon as possible thereafter, all stock in these yards and the yard equipment will be sold for their market value, said sales to be under the direction of a committee representing said Bay District Council of Carpenters and with the assistance of a committee representing material and lumber dealers in the persons of William H. George, Matthew Harris and Frank O. Hatch.

**FOURTH**—That the Industrial Association and the Builders' Exchange reaffirm their previous announcement to the effect that they will uphold the wage scale for 1927 as established by the impartial wage board, \$9 per day for an eight-hour day being the standard for journeyman carpenters.

**FIFTH**—That all parties hereto pledge themselves to the practice and principle of adjusting disputes between employers and employes over hours and wages by conference to the end that strikes and lock-outs may be avoided.

### HARDWARE MEN ELECT

California Retail Hardware & Implement Dealers' Association, at the close of its convention in Sacramento Feb. 18, re-elected the following officers to serve for the ensuing year: A. Kettarlin, Santa Rosa, president; Frank Smith, Fresno, first vice-president; Walter A. Mariani, San Francisco, second vice-president; I. C. Walker, San Francisco, treasurer, and Leroy Smith, San Francisco, secretary.

### FIVE-DAY WEEK IS OPPOSED AT TACOMA MEET

Asserting that the construction industry is confronted by one of the most serious problems in its history in the demand of labor for the five-day week, building contractors of the Pacific Northwest went on record as opposed to any extension of the plan in the building trades, which are already working on a 5½-day basis in nearly all cities in this section.

The action took place at a meeting at the Winthrop Hotel, Tacoma, at which more than 30 representatives of Western Builders' Associations of Tacoma, Aberdeen, Hoquiam, Portland, Seattle, Everett, Bellingham and Vancouver, B. C., were in attendance.

The discussion among the building representatives brought out the belief that the 5-day week movement is an attempt on the part of labor in the building trades to add 52 half days to the list of recognized holidays, with the understanding that the work done on these days will be paid for at a rate higher than the regular wage.

Two major reasons why the 40-hour week in the construction industry would be impracticable at the present time were advanced in resolutions passed by the body. One of these is based on the question of economics and the other on the supply of labor.

A report of a uniform wage committee, given just before the meeting adjourned, stated that no uniform wage scale prevails in the building trades on the Pacific coast and that wages in Seattle and Portland are higher than in any other coast cities.

### FRESNO EXCHANGE PROTESTS USE OF FOREIGN STEEL

Another protest against the use of foreign manufactured materials in construction of school buildings in Fresno has been made by the Fresno Builders' Exchange, which will present a resolution to the city board of education.

According to H. L. Hardman, secretary-manager of the exchange, the directors contend that foreign made steel is inferior in quality to the open hearth steel of American manufacture. The Frederick Steel Company, low bidders for steel work on the Winchell School to be erected at Fresno, handles only foreign made steel, the exchange contends.

In all future contracts a specification requiring that all material used be of domestic manufacture should be inserted, according to the resolution.

The Fresno Building Trades Council has adopted a similar resolution.

### PORTLAND BUILDERS TO FIGHT PROPOSED CREDIT BILL

The construction industry of Portland, Ore., is up in arms due to a bill introduced in the State Legislature by Senator Gus Moser, making credit agencies liable for damages for the dissemination of credit information.

Section one of the proposed law reads:

"This act shall be construed to apply to any person, firm, corporation, committee, organization, association or any member thereof or contributor thereto any part or all of whose business is, or which assumes to furnish to individuals or to the public, or to public officers, for any purpose, information regarding the character, reputation, conduct, financial standing, credit rating, business or business standing or other information regarding persons, firms, corporations, organizations or associations."

George W. Herron, executive secretary of the Portland Building Material Dealers Credit Association, Inc., declares that the bill is the most malicious measure that could be brought before the legislature as it aimed at all credit associations, and if enacted into a law would give those who have a very poor credit rating a fine opportunity to secure damages against any person or institution furnishing such information.

### MOORE CONSTRUCTION COMPANY ENTERS FIELD

John J. Moore, for the past four years a construction manager in the East Bay District, has organized the John J. Moore Construction Company and will engage in a general contracting business. Mr. Moore is a civil engineer, graduating from the Syracuse University in 1916. Subsequently he was engaged in subway construction with the New York State Subway Commission and was later engineer for New York State Barge Canal construction. During the World War he had charge of the construction and assembly of hospital and freight barges in France and was a member of a commission to conduct a survey of a harbor exclusively for the use of American troops and supplies. On his return to the United States he came West and formed a connection with a San Francisco firm which has continued up to the present time.

# THE OBSERVER

## WHAT HE HEARS AND SEES ON HIS ROUNDS

"Keep away from Kern County," is the warning issued to building trades mechanics by T. W. Marsh, general business agent for the Kern County Building Trades Council, whose report on labor conditions, just submitted, indicate that immediate amelioration of the conditions existing can not be expected. Marsh believes that a survey issued by H. O. Lash, deputy state labor commissioner, to the effect that Bakersfield's building program, based on permits issued, may create an inaccurate impression, and bring a flood of unemployed craftsmen in Bakersfield. "Bakersfield and other cities of the county are crowded with a manifest surplus of skillful workers connected with the building trades," Marsh declared, "and the local council is hard pressed to find employment for many who seek employment."

Articles of incorporation have been filed with the secretary of state by the Richmond-San Rafael Bridge, Inc., which will file application with the Marin and Contra Costa County supervisors seeking permission to construct and operate a vehicular and pedestrian toll bridge over San Pablo Bay from Point San Pablo on the Contra Costa County side and San Pedro Point, a projection of McNear's Point on the Marin County side. The bridge, including a fill on the Marin County side, will be 14,600 feet long with a 30-foot vehicular roadway in the clear. The cost is placed at \$12,000,000. Preliminary plans for the proposed structure have been prepared by Dean Chas. Derleth of the College of Engineering, University of California. Roy O. Long, east bay capitalist, is president of the bridge corporation.

Recent destructive storms on the West Side communities and adjacent oil fields in Kern County, the damage from which now is estimated at \$250,000, including the wrecking of 111 derricks, will create a demand immediately for constructive laborers. In the opinion of H. O. Lash, deputy state labor commissioner in Kern County, Lash also visions a marked dearth of building trade mechanics in Bakersfield in view of the large expenditure of money indicated by recent permits to construct residences and office buildings.

In keeping with the terms of the recent agreement under which the carpenters' strike was settled, business has been suspended in the union-owned material supply yard at 1001 Glascock street, Oakland. The yard was financed by the United Brotherhood of Carpenters and operated under the supervision of the Bay Counties District Council of Carpenters.

Utilization of by-products from Berkeley's waste material aids in reducing the cost of collection and disposal of municipal garbage, according to John N. Edy, Berkeley city manager. Bottles, rags, lumber and pieces of metals salvaged at the sanitary fill net the city \$1500 a year. Swill is sold at \$2000 a year. Street sweepings are used as a surface covering at the fill.

Resolutions filed with the Fresno Board of Education by the Fresno Builders' Exchange and the Fresno Building Trades' Council, protesting against the use of foreign made steel in Fresno school buildings, were considered by the educational body, but no action was taken. The protesting organization urged the board to specify only American made steel in advertising for bids for future construction. Newton A. Johnson, president of the board, said that under the laws the request can not be complied with. "These requests are ridiculous," Johnson said. "We can not regulate competition." A communication filed by the Fresno Building Trades Council, urging the board to insert in all future bids on school buildings the now prevailing wage scale in effect with the trades council, was filed with the board. No action was taken by the board.

A preliminary injunction restraining the Pittsburgh Building Trades Council and various local unions in the building trades from interfering with the Columbus Heating & Ventilating Company, of Columbus, Ohio, in the work on five school buildings under construction in the Pittsburgh district, was granted in federal court recently. In granting the injunction Judge W. H. S. Thomson pointed out the necessity of completing the buildings as rapidly as possible.

Toledo plasterers are now working on the five-day week basis. The plastering organization is the first in the City of Toledo to adopt the forty-hour week. The bricklayers union has also declared for the five-day week and will shortly confer with the mason contractors on the proposal.

When a contractor inadvertently omits an important element of expense in bidding on a job and is awarded the contract, he can not be held to the contract nor can his certified check be forfeited if he declines to undertake the work for a price that certainly would involve a loss to him. This is the ruling recently made by the Kentucky Court of Appeals in the case of Cole vs. the Board of Regents of the Murray State Normal School.

On February 5, 1927, there were 50 strikes before the Department of Labor for settlement and in addition 10 controversies which had not reached the strike stage. Total number of cases pending—60—7 of which are new. The 7 new cases may be compared with 8 and 7 of the first and second weeks preceding.

The Tile & Marble Setters Union of Buffalo is demanding a raise in wages, which will bring the rate up to \$1.50 per hour and in addition the union is demanding the five-day week. The tile setters are working under an agreement entered into on December 3, 1923, and which has until January 1, 1929, to run.

Alterations of building regulations in Cleveland that would reduce the amount of steel required in building operations and thereby cut construction costs is planned by Building Commissioner William D. Guion. It is estimated that a saving of approximately 20% in steel costs would be affected if the proposed changes are adopted. Under the present regulations a unit stress of 16,000 pounds a square inch is permitted. It is now proposed to increase this limit to 18,000 pounds. This would enable builders to use a lighter steel and affect a saving of twelve to fifteen percent on tension members and up to twenty-five per cent on compression members or columns. It is claimed that the better grade of steel now available for construction purposes will permit an increase in the unit stress of 2000 pounds still leaving a considerable factor of safety.

Among the resolutions adopted at the recent convention of the Associated General Contractors of America at Asheville, N. C., was one opposing the five-day week for the building industry. Opposition was based on the contention that contractors are already handicapped by excessive lost time from inclement weather and other climatic conditions.

Attorney General Webb has filed notice of appeal in the case of Oswald Brothers of Los Angeles vs. Ray L. Riley, state controller, in which a decision was recently handed down by Judge John L. Fleming, in the Supreme Court of Los Angeles county, holding that contractors were entitled to a refund on gasoline used for fuel in propelling tractors and rollers on construction and repair of public highways which are closed to public use. In a letter to the attorney for Oswald Brothers, Controller Riley points out the advisability of contractors filing claims for gas tax refund at this time rather than waiting until the settlement of the suit.

Demands for \$12 a day and a five-day week have been presented to the Master Plumbers' Association of Boston, by representatives of the Plumbers Local Union No. 12 to replace the present working conditions of \$10 a day and a five and one-half day week which will expire within the next few months. Both demands, it is believed, will be refused by the Master Plumbers, as entirely uncalled for at this time. The agreements in the electrical and steamfitting trades also expire this year but to date no demands have been made.

Santa Cruz, by a vote of 230 to 1168 defeated a move to change the city charter so as to permit the city manager form of government.

Bent Bros., Los Angeles, on a bid of \$4,446,375 has been awarded a contract by the Portland, Ore., city council to construct the Bull Run Dam in connection with the city water supply system. The dam will be 200 feet high and 1000 ft. long on the crest. The principal items involved in the construction include 108,000 cubic yards of excavation and 230,000 cubic yards of concrete.

Santa Barbara Unions are preparing a program of entertainment for delegates to the state labor convention to be held in that city, March 24.

One of the important provisions of the bill now pending in the Arizona legislature for the reorganization of the state highway department is that requiring competitive bids to be taken on all road jobs costing \$5000 or more and all bills for supplies amounting to \$2500 or more. Not until bids have been twice rejected can any construction work be done by force account, or day labor, or any supplies be purchased in the open market.

As a first step in bringing the Pacific Coast into the national movement for the self-regulation of trade, plans have been made for a meeting of the National Trade Relations Committee of the Chamber of Commerce of the United States to be held, probably at San Francisco, in March. This will provide an opportunity for representatives of trade associations with western headquarters to discuss with the committee and with one another the conditions which exist in their respective trades. Similar meetings have already been held by the committee, of which A. Lincoln Filene, of Boston, is chairman, at New York and Chicago. These have been followed promptly by the setting up within individual trades of the machinery necessary to the adjustment of trade practices by the organization of joint trade relations committees. The movement appears to be gaining momentum rapidly.

W. P. Frick, timber operator of Northern California, has filed an action in San Francisco to recover \$107,000 from H. P. Preston, a Ukiah banker, alleging fraud in a timber deal.

## TRADE NOTES

The first "gas refrigerator" to be seen in San Francisco is on display at the offices of the Pacific Gas & Electric Company. It is a unique device. A gas flame heats ammonia and vaporizes it. The vaporized ammonia is then cooled by water coils and liberated in the refrigerating unit inside the box. The action causes a drop in temperature. The ammonia is then absorbed in cold water and the process repeated indefinitely.

Dudfield Lumber Company is occupying its new quarters at Channing Avenue and High street, Palo Alto. The company recently completed a modern office building, estimating rooms, warehouse and yard quarters at the site.

Faris-Osborne Co. of Fresno has been incorporated with a capital stock of \$50,000, and will engage in handling paints, sheet metal and building materials. Directors are: George A. Faris, T. A. Osborne and John O'Brien, all of Fresno.

Hill & Stoops, distributors of the Fraser Furnace, with headquarters at 410 Madison street, Oakland, announce the opening of a branch office and display room at 77 O'Farrell St., San Francisco.

Wm. H. Bright and A. S. Miller of an Jose will operate in the Santa Clara county district under the firm name of W. H. Bright Gravel Company, operating from a plant on Coyote creek on the Senter Road, Santa Clara county.

M. Stulsaft Co. of San Francisco, specializing in plumbing goods, has opened a branch office at 21 E-Channel street, Stockton. James H. Eustace is branch manager.

Craftex Co., 37 Antwerp St., Boston, Mass., has created a new department for the purpose of manufacturing and merchandising a new water soluble paint to compete in the kalsomine and mill white fields. The pigment of the new paint, which will be marketed as "Sundflex," is almost identical to the better mill whites, and in place of linseed oil the company has substituted a new binder vehicle soluble in hot water.

Harry Hennings, secretary-treasurer of the Master Roofers' Association of Alameda County, has taken over the business of Graff Winlund Graff, Inc., and will operate under the firm name of General Roofing Company, specializing in the larger projects for asbestos, slate, tile and composition roofing. The company will engage in a general roofing business and at the present time is operating at full capacity. Offices, estimating rooms and warehouse quarters are maintained at Beach and Hallack streets, Oakland. San Francisco branch offices are located at 486 California street.

Pacific Sheet Metal & Furnace Co., formerly located at 3200 Geary street has moved to new and larger quarters at 305 Valencia street, San Francisco. The company is factory distributor for Faultless Comfort & Falco Western Steel Furnaces.

A. W. Sweet and B. Crumline announce dissolution of the firm of the North Sacramento Plumbing Supply & Hardware Company.

Strable Hardwood Company, 511 First street, Oakland, announces that J. O. Elmer, formerly secretary-manager of the company, has been elected president of the concern to succeed G. H. Brown, who recently retired from active interest in the hardwood business. The company specializes in hardwood lumber, hardwood flooring, wallboard and triple sheath.

Krafftile Company, manufacturers of a highly faience tile for walls and floors, has started operations at Niles, Alameda county, according to A. Clay Myers, formerly with the California Art Tile Company. Associated with Myers in the concern are: J. L. Kraft, C. H. Kraft and H. E. Leash. The company has designed new equipment and perfected processes by which it expects to secure a more rigid control of quality and sizing than it has heretofore been possible to obtain.

C. F. Cuttridge, general manager of the United Dredging Co., Los Angeles, has acquired sixty acres of valuable clay deposits near Victorville, Calif., on which he will establish a plant for the manufacture of brick, terra cotta, tile and fire brick.

White Crystal Magnesite Company, operating near Porterville has been authorized by the State Corporation Department to sell 15,000 shares of common stock to obtain funds for equipping its large property with the necessary kilns and other equipment. Large deposits of magnesite of commercial quality are represented as existing on the property.

Columbia Engineering Co., Inc., of Oakland, capitalized at \$5000, has been incorporated. Directors are: H. D. Davis of Oakland, M. G. Sloan and I. E. Rogers of San Leandro.

Wm. F. Wilson Co., plumbers, have moved to new quarters at 240-242 4th Street, San Francisco.

Santa Cruz Lumber Co. of Santa Cruz voted to declare a cash dividend of 10 per cent, at the regular annual meeting of that concern. Officers and directors were re-elected as follows: George Ley, president; James Williamson, vice-president; Samuel Leask, Sr., Walter Byrne, Jules Steen, directors; James Maddock, secretary.

## ALONG the LINE

J. B. Woodson, formerly division engineer at Fresno for the California Highway Commission, has been appointed a member of the Board of Consulting Engineers of the Los Angeles City and County Major Highways Committee and Traffic Commission.

Architects Mark T. Jorgensen and L. H. Keyser have become associated with Architect Frederick H. Meyer with offices in the Bankers Investment Building, 742 Market St., San Francisco.

B. F. Jakobsen has resigned his position as engineer in charge of the Pacolma and Santa Anita dams under construction for the Los Angeles County Flood Control District.

Architect Robert W. Snyder has opened offices in the Spreckels Building, San Diego, and is in the market for samples and catalogs of building materials and equipment.

Architect Smith O'Brien of San Francisco will sail March 26 on the Steamship Celtic for a seven months' trip abroad.

## CALIFORNIA MATERIALS FOR CALIFORNIA BUILDINGS

Urging that California materials be used in the building of the proposed new post office in Sacramento, the Sacramento Chamber of Commerce, Department of Mines and Mining, has commenced steps to have the post office department to prepare specifications calling for native building products.

It was called to the attention of the chamber bureau that the marble for the new government hospital at Mare Island is to be furnished by quarries in Vermont and in Alaska. Much of the other building material is to come from out of the state.

The federal authorities will be asked to specify that the Sacramento post office construction use not only all California mineral products but California lumber as well.

## BILL SEEKS TO REGULATE PLUMBING

A new general law to regulate the plumbing business, to license plumbers and exact bonds from them, and to require permits for all installation and alteration of plumbing, is proposed to the legislature by State Senator John J. Crowley of San Francisco. The local board of health would be the regulating body under the proposed law.

## APARTMENTS

**Contract Awarded**  
APARTMENTS Cost, \$15,000  
SAN FRANCISCO. W Pine 150 N Ellis.  
Three-story and basement frame apts.  
Owner—M. Saroff, 180 Dolores St.  
Architect—None.  
Contractor—M. C. Ingraham, 120 Otis St.

**Owner Taking Segregated Figures**  
APARTMENTS Cost, \$27,000  
SAN FRANCISCO. N Clement 52 W 22nd Ave.  
Three-story and basement frame (15) apartments.  
Owner—P. J. Boscus, 339 Clement St.  
Architect—J. C. Hladik, Monadnock Bldg.

**Plans Being Figured**  
APART. BLDG. Cost, \$100,000  
SAN FRANCISCO. S line Hermann St. 60 East Buchanan.  
Apartment building (38 2-room apts.) height not decided upon.  
Owner—L. Blum.  
Architect—Clausen & Amandes, Hearst Bldg., S. F.

**Preparing Working Drawings**  
APT. BLDG. Cost, \$300,000  
OAKLAND, Lake and Madison Streets.  
Six-story reinforced concrete apartment bldg. (120 rooms).  
Owners—Dr. David and Edith Haddon.  
Architect—W. H. Weeks, 369 Pine St., S. F. and Ray Bldg., Oak.  
Plans will be ready for figures in about five weeks.

**Plans Being Figured.**  
APARTMENTS Approx. \$200,000  
SAN FRANCISCO. Broadway and Laguna Streets.  
Seven-story steel frame Class C apartment building.  
Owner—Broadway-Laguna Apartments, Inc.  
Architect—Hyman & Appleton, Foxcroft Bldg., San Francisco.  
Bids are being taken from a selected list of architects.

**Structural Steel Contract Awarded.**  
APARTMENTS Cost, \$150,000  
SAN FRANCISCO. Hayes St. W of Franklin St.  
Five-story steel frame and brick apartment building.  
Owner—Mangels Bros., 445 West Portal San Francisco.  
Architect—Albert H. Larsen, 447 Sutter St., San Francisco.  
**Structural Steel**—Dyer Bros., 17th and Kansas Sts., San Francisco.

**Sub-Contracts Awarded**  
APARTMENTS Cost, \$55,000  
SAN FRANCISCO. NW Beach and Cervantes Streets.  
Three-story and basement frame apts. (33 apts.)  
Owner—L. J. Neal, 180 Jessie St., San Francisco.  
Architect—Clausen & Amandes, Hearst Bldg., San Francisco.  
Contractor—J. Harold Johnson, Hearst Bldg., San Francisco.  
**Heating**—E. Sugarman.  
**Plumbing**—Higgins & Kraus.  
**Electric Work**—Draeger Electric Co.  
**Concrete Work**—Sartorio & Anderson.  
**Elevator**—Pacific States Elevator and Equipment Co.

LOS ANGELES, Cal.—Architect W. Douglas Lee, 709 Textile Center Bldg., is preparing working plans and has the general contract for a 7-story reinforced concrete class A store and apartment building at 5200 Hollywood Blvd. for the Guardian Holding Company, Commercial Exchange Bldg.; 189 rooms divided into single and double apartments, several stores, lobby, etc.; 100x121-ft., reinforced concrete garage

100x100 ft., stucco and stone facing, plate glass ornamental iron work, steel sash, basement, steam heating system, marble work, tiled baths and drainboards, cement, hardwood and pine floors, hardwood trim, wall beds, electric refrigerating system, tile and composition roofing, electric elevators, incinerator; \$350,000.

LOS ANGELES, Cal.—Architect W. Douglas Lee, 709 Textile Center Bldg., is preparing working plans and has the general contract for a 6-story reinforced concrete store and apartment building at cor. Oakwood and Vermont Aves., for G. Henry Frost; 137 rooms divided into single and double apartments, with stores and lobby on first floor; L-shape, 100x121 ft., reinforced concrete garage, 60x80 ft., stucco and art stone facing, plate glass, basement, steam heating system, tiled baths and drainboards, cement, hardwood and pine floors, hardwood and pine trim, wall beds, electric elevator, steel sash, incinerator, electric refrigerating system, tile and composition roofing; \$235,000.

LOS ANGELES, Cal.—Architect J. Thomas Payne, 426 Western Mutual Life Bldg., is taking segregated bids for a 4-story and part basement class C apartment hotel building, in the southwest dist.; owner's name withheld; 85x150 feet, 100 apartments, face brick, art stone trim, ornamental staff, ornamental iron, composition roof, steel lintels, tiled baths and drainboards, gas steam radiators, storage water heater, hardwood, tile and pine flrs., pine and mahogany trim, metal covered sash, metal lath, Calfelt sound deadening, Frigidaire refrigeration system, linoleum, wallbeds, incinerator, automatic elevator, fire escapes, marble lobby; \$150,000.

LOS ANGELES, Cal.—Luther T. Mayo, Inc., 829 Black Bldg., has contract and will start work at once on the erection of a four-story, 76-room, 31-family, Class C apartment house, 80x110 feet, at 5272 Hollywood Blvd., for Robert Nimmo. The contract was awarded last October. E. B. Rust, architect, 523 Black Bldg. Brick construction, stucco exterior, staff ornamentation, tile and composition roof, ornamental iron, hardwood and pine floors, mahogany and pine trim, tiled baths, showers and drainboards, automatic storage water heater, lawn sprinkling system; \$117,000.

## BONDS

LONG BEACH, Los Angeles Co., Cal.—City of Long Beach will hold election March 9 to vote \$35,000 bonds to cover cost of plans and design for proposed auditorium. A straw vote will also be taken to select site.

UPLAND, San Bernardino Co., Cal.—School trustees of Upland school district have called a special election for March 18 to vote bonds in the sum of \$110,000 for the erection of a junior high school building.

STOCKTON, San Joaquin Co., Cal.—Election will be held March 14 in Calaveras River School District to vote bonds of \$62,000 to finance erection of new school. Trustees of district are: Emily M. Dodge (clerk), M. E. Phillips, C. M. Chase, John N. Tone and M. L. McCall.

SANTA YNEZ, Santa Barbara Co., Cal.—A special election will be called soon to vote funds for erecting an auditorium and gymnasium building for Santa Ynez valley high school. The cost will be \$20,000.

COLTON, San Bernardino Co., Cal.—The board of school trustees has called an election for Mar. 25 to vote bonds in the sum of \$140,000 for erecting a new junior high school bldg. and a new grammar school.

GAVIOTA, Santa Barbara Co., Cal.—An election has been called for March 15 in Vista Del Mar school district to vote bonds in the sum of \$19,000 for erecting new school bldg. The sum of \$6000 is already available.

SANGER, Fresno Co., Cal.—The school trustees of Sanger union high school district are preparing to call an election to vote bonds in the sum of \$198,000 for erecting additional bldgs. at the high school.

ARBuckle, Colusa Co., Cal.—Pierce Joint Union High School District defeats proposal to issue bonds of \$200,000 to finance erection of a group of high school bldgs. 335 against and 233 for the issue.

BAKERSFIELD, Kern Co., Cal.—Election will be held March 25 in Mountain View School District to vote bonds of \$23,000 to finance erection of new school. Trustees of district are: Wm. Rueter, W. A. Smart and Lewis J. Young.

TUCSON, Ariz.—Tucson school district No. 1 approved two bond issues at recent election, one of \$162,000 for the erection of new buildings and additions to present buildings, the other of \$48,000 for purchase of property to be used as a playground.

SANTA YNEZ, Santa Barbara Co., Cal.—A petition will be circulated in this district calling for a bond election to finance erection of a new Santa Ynez Valley high school.

## CHURCHES

Commissioned to Prepare Plans  
CHURCH BLDG. Cost, \$60,000  
MELROSE, Alameda Co.  
Frame and stucco church bldg.  
Owner—Melrose Baptist Church.  
Architect—Wythe, Blaine & Olson, 1751 Broadway, Oakland.  
Sketches have been prepared. Working drawings will not be started for several months.

**Excavating Contract Awarded**  
**CATHEDRAL**, Cost, \$4,000,000  
**SAN FRANCISCO** Block bounded by Jones, Sacramento, Taylor and California Streets.  
 Class A cathedral with steel frame. Owner—Grace Cathedral Parish.  
 Architect—Lewis P. Hobart, Crocker Bldg., San Francisco.  
 Contract will be awarded Feb. 16, 1927.

**Excavating**—H. V. Tucker, 300 Vermont St.

**Plans Being Figured**  
**CHURCH** Approx. \$8000  
**MOUNTAIN VIEW**, Santa Clara Co.  
 One-story rustic church building (150 seating capacity).  
 Owner—Christian Science Church, Mountain View.  
 Architect—Henry H. Gutterson, 526 Powell St., S. F.

**Bids Being Taken—To Close Feb. 25**  
**CHURCH** Cost, \$250,000  
**SEATTLE**, Wash. N E 50th Ave and 15th Ave.  
 Fireproof brick and cast stone church bldg. (auditorium, social hall, all modern conveniences).  
 Owner—University Christian Church.  
 Architect—Clare Moffitt, 524 Seaboard Bldg., Seattle.

**Plans Being Prepared**  
**CHURCH BLDG.** Approx. \$50,000  
**WOODLAND**, Yolo County.  
 New Church Building.  
 Owner—Christian Church (D. E. Millard, pastor).  
 Architect—Starks & Flanders, Oschner Bldg., Sacramento.  
 Height and type of construction not decided upon.

**Plans Complete**  
**CHURCH** Cost, \$250,000  
**SACRAMENTO**, Cal. 13th and N Sts.  
 Church bldg., reinforced concrete construction.  
 Owner—Westminster Presbyterian Church.  
 Architect—Dean & Dean, City Library Bldg., Sacramento.  
 Bids will not be called until building has been financed.

**GARDENA**, Los Angeles Co., Cal.—Architects H. Carlton Newton and Robert Dennis Murray, 304 San Fernando Bldg., Los Angeles, are taking bids from a selected list of bidders for reinforced concrete church at Gardena for the Roman Catholic Bishop of Los Angeles and San Diego, St. Anthony's parish; seating capacity of 400; 38x145 ft., 1-story, tile roofing, gas furnace heating and ventilating system, stone work, ornamental iron work, pine and hardwood trim, ornamental wood trusses, concrete exterior, tower 60 ft. high.

**HUNTINGTON PARK**, Los Angeles Co., Cal.—F. & F. Building Co. has been awarded a contract to erect a new church on Seville St. for Redeemer Lutheran Church. It will cost \$12,000 and will be frame and stucco construction with tile roofing.

**LOS ANGELES**, Cal.—J. V. McNeil Co., 5860 Avalon Blvd., Los Angeles, has been awarded the contract on a percentage basis for erecting a class A church at the corner of Raymond Ave. and Chestnut St., Pasadena, in St. Andrew's parish, for Roman Catholic Bishop of L. A. and San Diego. Ross Montgomery, Chamber of Commerce Bldg., L. A., is the architect. The main auditorium will seat 1200 people; reinforced concrete construction, tapestry brick facing, clay tile roofing, art glass windows, hardwood trim, cement and tile floors, plumbing, heating and ventilating. A feature will be a tower 200 feet high. The building will cost about \$250,000.

**SOUTH PASADENA**, Los Angeles Co., Cal.—A new church to cost \$150,000 is to be erected at Fremont Ave. and Rollin St. for Holy Family parish, Father James B. Morris, rector. Several architects are preparing sketches.

**WILMINGTON**, Los Angeles Co., Cal.—Methodist Church of Wilmington has had plans prepared for a new church to be erected here.

**FRESNO**, Fresno Co., Cal.—Rev. Manuel Madrigal, pastor, First Mexican Baptist Church, announces plans are being prepared for a \$16,000 edifice to be erected at 1061 E street, the site of the present structure. Will be brick construction, the main auditorium seating 400 or more persons.

**WATSONVILLE**, Santa Cruz Co., Cal.—Methodist Church, Rev. A. L. Pratt, pastor, will shortly appoint building committee to work out ways and means to finance erection of a new church building. Preliminary plans for the proposed structure have been prepared.

**LOS ANGELES**, Cal.—Congregation B'nai B'rith has sold the property at n. e. corner of 9th and Hope Sts. to a syndicate at \$500,000, and will proceed at once with the erection of a class A synagogue for which plans were prepared a year ago. The church has a site at n. e. corner of Wilshire and Hobart Bldgs., although it is reported that the site may be changed to secure a larger property. A. M. Edelman, H. W. Hellman Bldg., and S. Tilden Norton, Financial Center Bldg., are the architects. The syndicate which purchased the site at 9th and Hope Sts. will erect a class A building on the property within a year. The sale was made by Burton & Co.

**LOS ANGELES**, Cal.—J. S. Metzger & Son, 1007 S. Grand Ave., was low bidder at \$69,130 for all work complete for erecting an educational building at 1183 W. 25th St., for Magnolia Ave. Christian Church; Robert H. Orr, 1305 Corporation Bldg., architect. The bldg. will be two stories and basement, 80 x 112 ft., reinforced concrete walls, composition roofing. The other bids were: Stiles Construction Co., \$70,700; C. A. Schweisinger, \$71,519; Samuel Evans, \$70,826; Gauger Construction Co., \$73,366; and Royce H. Heath, \$73,640. Bids are held under advisement pending completion of financial arrangements.

**CAMPBELL**, Santa Clara Co., Cal.—St. Lucy Catholic Church has purchased site at Rincon Ave. and South Third St. on which it is proposed to erect a new edifice.

**SAN DIEGO**, Cal.—Archts. Frohman, Robb & Little, Boston, Mass., have prepared preliminary plans for a new church bldg. and parish house to be erected on Nutmeg Street between 5th and 6th Sts., San Diego, for St. Paul's Episcopal parish. A campaign is being launched to raise \$75,000 for erecting the parish house unit which will be built first.

## FACTORIES & WAREHOUSES

**Plans Being Prepared**  
**CONDENSARY PLANT** Cost, \$40,000  
**KING CITY**, Monterey Co., Cal.  
 Milk condensary plant.  
 Owner—Nestle's Food Company, 112 Market St., S. F.  
 Architect—Engineering Dept. of Owner (New York Office).

**Sub-Contracts Awarded**  
**FACTORY** Cost, \$350,000  
**SAN FRANCISCO**, Tenth and Bryant Streets.  
 Three-story and basement class B reinforced concrete factory with steel sash and rolling doors, etc.  
 Owner—Investment Properties Corp., (Walter Sullivan et al.) Alexander Bldg., S. F.

Lessee—Pacific States Electric Co.  
 Architect—Eng. Dept. of Pacific States Elec. Co.

**Mechanical Engineer**—Hunter & Hudson, Rialto Bldg.  
**Contractor**—George Wagner, 181 So. Park St.

**Lumber**—Hardwood Lumber Co., 236 Ritch, S. F.

**Sand and Gravel**—Bode Gravel Co., 235 Alabama St., S. F.

**Cement**—Santa Cruz Portland Cement Co., Crocker Bldg., S. F.

As previously reported: Pilling to M. B. McGowan, 74 New Montgomery St., S. F.; grading to Sibley Grading & Teaming Co., 165 Landers; reinforcing steel to Gunn-Carle Co., 444 Market St.

**Plans Being Prepared**  
**MARKETING PLANT** Cost, \$250,000  
**COLMA**, San Mateo Co. School St. between Junipero Serra Blvd. and Mission St.

Produce Marketing Plant (290,000 sq. feet).

Owner—Norton & Papale, 3742 Mission St.

Architect—Bernard Tuohy, Flatiron Bldg., San Francisco.

**Working Drawings Being Prepared.**  
**FACTORY** Cost, \$200,000 Approx.  
**SAN FRANCISCO**, Sansome and Pacific Streets.

Six-story Class B reinforced concrete factory and warehouse.

Owner—Pacific Coast Syrup Co.  
 Architect—Dodge A. Riedy, Pacific Bldg., San Francisco.

Figures will be taken for a general contract in one week.

**PHOENIX**, Ariz.—Archts. Fitzhugh & Byron have completed plans and are taking bids for erecting a canning plant near Six Points for Arizona Preserving Co. It will be part two stories, 60x200 ft., of brick construction, with a separate building for the steam boiler plant.

# PRATT'S

## CONCRETE

### MIX

Clarence  
by Sand  
Pratt

SACRAMENTO IS progressing.  
 AND GROWING very fast.  
 ESPECIALLY WITH a new Auditorium.  
 THAT COST \$1,500,000.  
 MADE OF sand and gravel.  
 PRODUCED BY Sandy Pratt's companies.  
 AND NOW Sacramento.  
 IS TAKING another step forward.  
 BY PRODUCING Grand Opera.  
 FOR THE first time.  
 ON FEBRUARY 27th and 28th.  
 CLARENCE (SANDY) Pratt, President.  
 OF THE Pratt Building Material Co.  
 AND PRODUCER.  
 OF CLEAN, sharp sand.  
 AND CLEAN, hard rock.  
 AND CLEAN, well-graded gravel.  
 AT SACRAMENTO, Marysville.  
 MAYHEW (SACRAMENTO County).

PRATTCO (MONTEREY County).  
 AND PRATTROCK (near Folsom).  
 (CENTRAL OFFICE—San Francisco).  
 WILL BE at the Auditorium.  
 TO HEAR the noted singers.  
 OF THE San Carlos Grand Opera Co.  
 WHILE SANDY.  
 CAN SING only.  
 "ROCK-A-BYE BABY."  
 AND "MAY The SANDS.  
 OF THE Desert.  
 NEVER GROW Cold."  
 SANDY CAN and will enjoy.  
 SACRAMENTO'S FIRST Grand Opera.  
 IT IS predicted.  
 THAT MOST of the residents.  
 OF THE entire Sacramento Valley.  
 WILL BE in Sacramento.  
 TO HEAR this musical treat.  
 "I THANK you."

The people of Sacramento and Northern California are glad of an opportunity to attend grand opera in a wonderful building like Sacramento's new \$1,500,000 Auditorium (Built of Sandy Pratt's sand, rock and gravel).

## BUSINESS OPPORTUNITIES

**SAN FRANCISCO, Cal.**—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission St., San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index number of each opportunity.

11312—Brussels, Belgium. Exporters of cement, whitening and whitewash are very anxious to appoint a suitable sales representative in this territory.

11315—Genoa, Italy. Firm wishes to be put in touch with San Francisco users of rough marble from Italy.

11316—Volo, Greece. Firm wishes to get in touch with producers and exporters of electric lighting wires and accessories who are interested in marketing their produce in Greece.

11322—Sonora, Mexico. Party wishes to get in touch with brokers or agents who would care to handle from 1,500 to 1,700 barrels of turpentine per month and also between 8,000 and 9,000 barrels of rosin.

11323—San Salvador, Central America. Commercial organization offers its services to San Francisco manufacturers and exporters interested in having a sales representative to market its produce in Central America.

11325—Buenaventura, Colombia. Established firm of commission agents and manufacturers' representatives offers its services to San Francisco manufacturers and exporters wishing to market their products in Colombia.

D-2348—San Francisco, Calif. Firm is interested in buying wrought iron specialties, wrought iron ornaments, furniture and builders' hardware. They would be pleased to hear from manufacturers and distributors of this merchandise.

D-2349—San Francisco, Calif. If you have merchandise stolen in transit, in warehouse, or lost through damaged cases, you will be interested in an inexpensive method of sealing cases, now being introduced on the Pacific Coast.

D-2351—Baltimore, Md. Manufacturers of a line of plumbers' cast brass goods, such as bath cocks, basin cocks, bibbs, tank fittings, etc., are looking for a representative to handle their line in California on a commission basis. Their line is well known in the

East and North and their manufacturing facilities are such that they are always in a position to fill orders promptly.

D-2352—Seattle, Wash. Manufacturers of radio telephone and telegraph stations for communicating purposes between large industrial plants, mines, oil fields, etc., and manufacturing vacuum tube telephone and telegraph sets for point to point communication are very desirous of securing a representative in San Francisco a broker who represents houses specializing in electrical or machinery lines.

D-2353—Portland, Ore. A manufacturer of playroom and playground equipment would like to arrange with some jobber or distributor to handle his product in San Francisco. The equipment in question is designed for the amusement and physical development of the very little folk—from 1 to 6 years—and while it is admirably suited to playground service it finds its greatest field in homes.

## TRUSCON STEEL COMPANY HAS GOOD YEAR IN 1926

The Truscon Steel Company, with plants in Detroit, Youngstown, Canada and Japan, had the best year in its history in 1926, President Julius Kahn told stockholders at their annual meeting.

Net earnings available for dividends, after all charges except federal taxes, were \$2,239,010.35, equivalent after preferred dividends, to approximately \$4 a share on the 474,932 shares of \$10 par common stock outstanding. After deduction of federal taxes, estimated at about \$250,000, earnings on the common stock would be about 36 per cent of the par value.

Current liabilities were declared \$2,500,000 lower than on June 30, 1926, with the cash position improved.

# Official Proposals

## NOTICE TO BIDDERS

(Wood Working Machinery—Oakland Board of Education)

Notice is hereby given that the Board of Education of the City of Oakland and of Oakland School District and Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, Calif., until Tuesday, the 8th day of March, 1927, at 9:30 A. M., at which time and place said bids will be opened for: Wood Working Machinery for Oakland Public School Shops.

These bids shall be presented in accordance with the Specifications on file in the office of the Assistant Business Manager, City Hall, Oakland.

Price, fitness and quality being equal, preference will be given to the products of the State of California.

Persons or firms desiring to be on the mailing list of the Oakland Board of Education may list themselves with the Purchasing Department.

JOHN W. EDGEMOND,  
Secretary of the Board of Education of Oakland, California.

## NOTICE TO CONTRACTORS

(San Luis Obispo High School District)

Notice is hereby given that sealed bids will be received by the Board of Education of San Luis Obispo High School District, County of San Luis Obispo, State of California, up until 7:30 o'clock P. M., on the 4th day of March, 1927, at which hour they will be opened at the office of A. H. Mabley, Superintendent of City Schools, which office is located in the High School Building, San Luis Obispo, for the furnishing of all materials and labor required for the construction of a one-story masonry and frame school building to be used as an Athletic Building, and a one-story masonry and frame building to be used as a Recitation Building, which buildings are to be located on the present High School Grounds. The contract contemplated to be as follows:

### FOR ATHLETIC BUILDING:

Proposal No. 1:

General contract to include everything with the exception of the Plumbing, Heating, Gas and Sheet Metal.

Proposal No. 2:

Plumbing, Heating, Gas and Sheet Metal.

### FOR RECITATION BUILDING:

Proposal No. 1:

General contract to include everything with the exception of the Plumbing, Heating, Gas and Sheet Metal.

Proposal No. 2:

Plumbing, Heating, Gas and Sheet Metal.

A separate bid for each kind of work mentioned above is to be submitted in accordance with plans and specifications now on file with the Superintendent of City Schools, A. H. Mabley, in the City of San Luis Obispo, or may be had upon application at the office of the Superintendent.

Each bid shall be made out on a form to be obtained at the Superintendent's office and must be accompanied by a certified or cashier's check in the amount of ten per cent of bid made payable to the order of C. L. Smith, Clerk of the Board of Education of the San Luis Obispo High School District. Bids shall be sealed and filed with the Superintendent of City Schools, of the San Luis Obispo High School District, at the above mentioned specified time.

The above mentioned check shall be given as evidence that the bidder will enter into contract if awarded the work, and will be declared forfeited

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

if the successful bidder refuses to enter into said contract after being requested to do so by the Board of Education.

The successful bidder will be required to furnish two bonds of a surety company, satisfactory to the Board of Education of the San Luis Obispo High School District, one covering an amount equal to fifty per cent of the contract price and one equal to twenty-five per cent of the contract price.

A deposit of ten dollars (\$10.00) is required for all drawings, which will be returned when the drawings are returned.

The Board reserves the right to reject any or all bids.

By order of the Board of Education of the San Luis Obispo High School District.

Dated this 11th day of February, 1927.

## NOTICE TO CONTRACTORS

Notice is hereby given that sealed estimates will be received by the Board of Supervisors of San Mateo County, California, up to the 21st day of March 1927, at 10:00 A. M., for the erection and completion of a reinforced concrete and brick building, known as the San Mateo County Relief Home, and said building will be located on the present site of the old Relief Home recently destroyed by fire.

Sealed estimates will also be received for the erection and completion of a frame addition to the present T. B. Pavilion now situated on the property of the San Mateo County Community Hospital at Beresford.

All of the above estimates will be rendered in accordance with the plans and specifications as submitted by Will H. Toepke, Architect, and as filed with the clerk of the Board of Supervisors on February 14th, 1927, to which bidders are referred.

The estimates on the San Mateo County Relief Home will be submitted as follows, and must be rendered in strict accordance with the plans and specifications as filed:

ESTIMATE No. 1:—Will be in accordance with the plans and specifications as filed and will be on a rein-

forced concrete, brick and steel frame building with hardwall interior plastered partitions, etc., all as specified.

ESTIMATE No. 2:—Will be an estimate on the same building, changing the interior partition to wooden construction, using 2 x 4 O. P. studs metal lath and changing attic and 2nd story floor slab to wooden joists, all metal lathed.

ESTIMATE No. 3:—Will state the saving of money between the tile walls as specified changing same to heavy canvas painted 5 coats.

NOTE: In addition to the above estimate there will also be separate estimates rendered on steam heating and domestic hot water, also on the plumbing and sewerage, and also electric wiring.

In addition to the estimates called for above there will be further separate estimates required for erection and completion of the frame addition to the present T. B. Pavilion, now erected on the property of Community Hospital at Beresford.

All bidders submitting estimates will be required to submit with their proposal a certified check or certificate of deposit on some responsible Bank or Trust Company in the sum of ten (10) per cent of their bid. Said check to be made payable to the County Treasurer of the County of San Mateo, and will be held as security that the bidder will enter into a written contract with the Board of Supervisors of the County of San Mateo, if awarded the contract within ten (10) days, from the date of award. In the event of a breach in the terms under which this check is held, the said check or certificate of deposit will be cashed and the proceeds thereof placed to the credit of the building fund of said County of San Mateo.

The successful bidder will further be required to give a bond from a satisfactory surety company in the sum of fifty (50) per cent of his contract price, conditional for the faithful performance of his contract within the time limited, and to further insure the payment of all claims for labor and material furnished on the work.

The successful bidder will also be required to protect the County against liability arising under the Workmen's Compensation Act and against any and every contingency under which the County might be held liable during the progress of the work connected with the contracts on said hospital building.

The contract will provide for the retention of twenty-five per cent of the contract price for thirty-five (35) days after the completion of the work, and the filing of the notice of completion thereof.

Sealed estimates should be filed with the clerk of the Board of Supervisors, at Redwood City.

The said Board of Supervisors of the said County hereby reserves the right to reject any or all bids.

Plans and specifications can be secured at the Architect's office at Room 714 New Call Building, 72 New Montgomery Street, San Francisco, California.

By order of the Board of Supervisors Dated February 14th, 1927.  
(SEAL)

ELIZABETH M. KNEESE,

Clerk.

#### NOTICE INVITING BIDS

(Highway—Sonoma County)

Office of the Clerk of the Board of Supervisors, Sonoma County, California, February 15th, 1927.

Sealed bids will be received by the Clerk of the Board of Supervisors of Sonoma County, California, at his office until 12 o'clock M., March 15th, 1927, and will be publicly opened and read at 1:30 for the construction of a concrete pavement on the Healdsburg to Forestville highway, Section "A," from Eng. Station 31 plus 32 to 124 plus 50, in Fourth Supervisorial District, in Sonoma County.

Specifications for this work are on file in the office of the Clerk of the Board of Supervisors, and in the office of the County Surveyor, which bidders are hereby referred to.

#### Estimated Quantities

2723.84 cubic yards class "A" concrete in pavement.

23 cubic yards class "A" concrete in culverts.

3400 cubic yards excavation unclassified.

1525 feet reinforcing steel.

26 linear feet 16 inch concrete pipe.

Total estimated cost, \$35,000.

W. S. COULTER,

Clerk of the Board of Supervisors.

#### NOTICE TO CONTRACTORS

(Administration Building Berkeley)

Sealed bids will be received by the Board of Education of the City of Berkeley and of Berkeley School District of Alameda County at its office located at 2133 Allston Way, Berkeley, California, until Monday, the 7th day of March, 1927, at eight o'clock p. m., at which time said bids will be opened for the furnishing of all labor, materials and mechanical workmanship to be used and employed in the erection and completion of a new building to be known as the Administration Building for said school district and to be located at Milvia Street and Durant Avenue in the City of Berkeley, California.

Plans and specifications for said work are on file in the office of James W. Plachek, Architect for said Board of Education, Mercantile Trust Company Building, corner of Shattuck Avenue and Center Street, Berkeley, California.

On deposit of ten (\$10.00) dollars, said plans and specifications may be had by any prospective bidder for this work. These plans and specifications may be retained for a period of five days.

If the plans and specifications are not returned to the Architect within the time above specified, or are returned in a mutilated or damaged condition, the deposit will be forfeited and immediately used for the purchase of a new set of blue prints and specifications.

Bids must be made on proposals obtained at the office of the Architect, and be signed by the bidder and accompanied by a certified check certified to by some responsible bank or banker and made payable to the Berkeley School District of Alameda County, to be retained by the said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall be for at least ten (10%) per cent of the total amount of the bid.

Bids will be opened by the Board of said School District on the 7th day of March, 1927, at the hour of 8 o'clock P. M., in the office of the Secretary of the Board of Education, 3133 Allston Way, Berkeley, California.

The Board reserves the right to reject any and all bids or any or all items of such bids.

By order of the Board of Education, January 31st, 1927.

CLARA F. ANDREWS,  
Secretary of the Board of Education of the City of Berkeley and of Berkeley School District of Alameda County, State of California.

#### INVITATION FOR BIDS

UNITED STATES DEPARTMENT OF AGRICULTURE, BUREAU OF PUBLIC ROADS, District No. 2, San Francisco, California, February 19, 1927—Sealed bids (single copy only) subject to the conditions contained herein, will be received until 10 o'clock A. M. on the 15th day of March, 1927, and then publicly opened, for furnishing all labor and materials and performing all work for constructing the Conner's Pass National Forest Highway project located partly within the Nevada National Forest, State of Nevada, County of White Pine. The length of the project to be constructed is 5.97 miles and the principal items of work are approximately as follows:

Excavation, unclassified, 78,292 cu. yds.

Overhaul, 9218 sta. yds.

Crushed Rock or Crushed Gravel Surface Course, 9340 cu. yds.

Class A Concrete, 61,56 cu. yds.

Class B Concrete, 70 cu. yds.

Reinforcing Steel, 6386 lbs.

Corrugated metal pipe, placing, 2806 lin. ft.

Bids must be submitted upon the Standard Government Form of Bid and the successful bidder will be required to execute the Standard Government Form of Contract for Construction. These Standard forms together with the plans and specifications may be examined or obtained at the following addresses: District Engineer, Bureau of Public Roads, 807 Sheldon Bldg., San Francisco, California; Geo. W. Borden, State Highway Engineer, Carson City, Nevada; Forest Supervisor, Ely, Nevada. The right is reserved, as the interest of the Government may require, to reject any and all bids, to waive any informality in bids received, and to accept or reject any items of any bid, unless such bid is qualified by specific limitation. — C. H. Sweetser, District Engineer.

#### NOTICE TO BIDDERS

(Pump—James Irrigation District)

Public notice is hereby given that the Board of Directors of the James Irrigation District hereby calls and will receive until 1 o'clock p. m., on Wednesday, March 23, 1927, and then open at its office in the City of San Joaquin, Fresno County, California, bids or proposals to be addressed, or delivered in person to the Secretary of said Board of Directors, for the following equipment, to-wit:

One (1) screw pump to operate under 5 to 9 ft. head, approximate capacity 15 second feet, with direct connected 440-volt, 60-cycle, 40-degree speed motor (150 to 600 H. P. M.) and automatic starter.

Quote price f. o. b. San Joaquin, California, according to plans and specifications on file in the office of H. M. Crocker, district engineer of the James Irrigation district.

The successful bidder will be required to file a bond in the amount of at least 25% of the bid, with good and sufficient sureties, to be approved by said board.

The right is reserved to reject any and all bids.

Dated this 21st day of February, 1927.

PETER RUSCONI,

President of the Board and Director.

R. J. HALE,

Director.

E. C. BRACKNEY,

Director.

## BRIDGES

**SAN PABLO BAY, Contra Costa Co., Cal.**—Articles of incorporation have been filed with the secretary of state by the Richmond-San Rafael Bridge, Inc., which will file application with the Marin and Contra Costa County supervisors for permission to const. a vehicular and pedestrian bridge over San Pablo Bay from Point San Pablo on the Contra Costa county side and San Pedro Point, a projection of McNear's Point on Marin County; est. cost \$12,000,000. Bridge, including fill on Marin County side, will be 14,600 ft. long with 30-ft. wide vehicular rdwy. Preliminary drawings for the structure have been prepared by Dean Chas. Derleth of the College of Engineers, University of California. Roy O. Long, east bay capitalist and president of the Berkeley Chamber of Commerce, is president of the Richmond-San Rafael Bridge Company. Fletcher G. Flaherty, attorney, Crocker Bldg., San Francisco, is secy.

**LOS ANGELES, Cal.**—Until 10 a. m. March 21, bids will be rec. by board of public works to const. Glendale-Hyperion viaduct, over Los Angeles River; be 1300 ft. in length and consist of 8 48-ft. spans 150 ft. wide, one 68 ft. 72 ft. wide, 2 135 ft. spans 72 ft. wide, 2 118 ft. spans 72 ft. wide, portion of bridge carrying 3 roadways and 4 walks. Const will be of reinf. conc. involving 35,000 cu. yds. conc. and 45,000 lin. ft. conc. piling. Rdwy will be paved with 8-in. asph. conc. Merrill Butler, chief bridge engineer.

**SANTA ROSA, Sonoma Co., Cal.**—Until March 15, 12 noon, bids will be rec. by W. S. Coulter, county clerk, to const. reinf. conc. floor and buttress walls for Schnitzger Bridge over Dry Creek, 7 mi. n. w. of Healdsburg, 4th Sup. Dist., involv. 340 cu. yds. Class A reinf. conc. Est. cost \$10,500. Plans obtainable from E. A. Peugh, county surveyor. See call for bids under official proposal section in this issue.

**GLENDALE, Cal.**—City plans to widen bridge on San Fernando Road near Doran St.

**FULLERTON, Cal.**—City Eng. C. M. Thorpe reports city council proposes bond issue for new bridges. Two bridges at Richman Ave. and at Brea Rd. are immediate prospects.

**LOS ANGELES, Cal.**—Until 2 p. m. March 21, bids will be rec. by county to const. combination steel and conc. bridge on 7th Ave. over San Jose Creek. Plans obtainable from Road Department, 11th floor, Hall of Records. Certified check or bond, 10%.

**LONG BEACH, Cal.**—Fred R. Johnson, 101 Wilshire, Beverly Hills, sub. low bid to city at \$69,950, to const. pedestrian subway under Ocean Blvd., connecting with Arcade of Jergins Trust Bldg. 30 ft. in width, 200 ft. long and with ceiling height of 12 ft. Roof to be supported on steel girders and beams, baring on reinforced concrete walls and piers.

## DREDGING, HARBOR WORKS AND EXCAVATIONS

**LONG BEACH, Cal.**—Hauser Constr. Co., Hutchinson Bldg., Oakland awarded supplementary cont. for addition of 900 ft. to 6100-ft. breakwater now under construction. The contracted price of the rock will be \$232,650 or \$1.10 per ton. Maj. R. G. McClone, harbor engineer.

**SANTA BARBARA, Cal.**—A. J. Grier, 480 Chetwood St., Oakland, sub. low bid to city at \$350,800 to const. breakwater, using rubble mound type, requiring placing of 160,000 tons rock at \$2.38 per ton. City now holds an option to purchase the rock from the Santa Cruz Island quarries at a nominal figure. Other bids were: Merritt-Chapman & Scott Corp., \$414,400 (rubble mound), or \$2.59 ton; Engineering Construction Corp., \$512,000 (rubble mound), or \$3.20 ton. The latter submitted a bid of \$721,560 on the caisson type, on alternate plans and specifications. The breakwater is to begin at a point approx. 500 ft. off shore at Castle Rock and will extend 400 ft. s. e. and from the end of that 400-ft. extension it will angle in an easterly direction toward Stearns Wharf for a distance of 800 ft., making a total of 1200 lin. ft. breakwater. The caisson type calls for reinf. conc. const. with rock foundation involv. 42,000 tons. All stone placed in both the foundation and the interior of the caissons must weigh not less than 150 lbs. per cu. ft. when dry and free from all dirt. All stone shall be weighed by vessel displacement. A superstruc. of reinf. conc. road slab and railing would be built with this type of const. by the cont. let separately. Boat landings, 21x23 ft., reinf. conc. platforms connected with the superstruc. by stairways would also be const. under separate cont. The rubble mound type requires placing of 160,000 tons of rock.

**OAKLAND, Cal.**—East Bay Municipal Utility District, Ray Bldg., having spec. completed for const. of Lafayette Dam of earth fill type, 140 to 150 ft. high, involv. approx. 2,000,000 cu. yds. earth fill. A. P. Davis, chief eng. for district.

**GLENDALE, Cal.**—City will request aid from county for flood control work amounting to probably \$100,000.

## LIGHTING SYSTEMS

**RIVERSIDE, Cal.**—Until 10 a. m. March 8, bids will be rec. by city for ornamental light system in Pepper St., bet. 4th and 7th Sts.; 1911 act. G. Albert Mills, city clerk.

# TIMPIE HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately \$70,000,000 High Class Pacific Coast construction in last 3 years.

*EXAMPLES:—*

New Standard Oil Building, San Francisco  
Oakland Savings Bank

New Mark Hopkins Hotel, San Francisco  
New Hunter-Doolin Building, San Francisco

Pacific Telephone and Telegraph Building, San Francisco

Central Bank, Oakland

New Subway Terminal Building, Los Angeles

Federal Reserve Bank, San Francisco

New Russ Building, San Francisco

*Sold by most progressive dealers throughout Pacific Coast.*

For special information write or wire

## Industrial Buildings of Permanent Construction

**COASTEEL** Standard Buildings, manufactured on the Pacific Coast, are in every sense permanent buildings. They are constructed of completely standardized units, of a specially manufactured steel. Every member is hot dip galvanized after fabrication.

In such places as window sash, where complete protection from weathering is essential, copper bearing steel is used and all of it is galvanized.

COASTEEL Buildings are made in various types—in all sizes—and are entirely suitable wherever a one-story industrial building is desired.

## U. S. SUPREME COURT HOLDS PRICE FIXING ILLEGAL

Price fixing by competitors without regard to the reasonableness of the prices, was declared unlawful by the U. S. Supreme Court. Its decision, was rendered in a cast against the Trenton Potteries and other companies engaged in the manufacture or distribution of 82 per cent of the sanitary pottery fixtures produced in this country.

The decision read by Justice Stone, divided the court, 5 to 3, with Justice Brandeis not participating. The majority of the court consisted of Chief Justice Taft and Justices Holmes, McReynolds, Stone and Sanford, while the dissenters were of Justices Van Devanter, Sutherland and Butler, with Justice Brandeis taking no part.

Explaining that the real question at issue was whether the fixing of fair and reasonable prices constituted a violation of anti-trust laws, the majority sustained the trial court in which 23 individuals and 23 corporations were convicted. The sentences will be carried into effect as a result of the decision.

It does not follow that agreements to fix or maintain prices are reasonable restraints and therefore permitted by statute, the majority asserted, merely because the prices themselves are reasonable. The court also held that every price fixing agreement is effective must eliminate one form of competition, and said that its construction of reasonable competition was the same as in the Standard Oil and tobacco cases.

## FEBRUARY BUILDING IN S. F. TOTALS \$3,210,978

San Francisco building operations during the month of February, 1927, both in number and valuation, fell below those for the corresponding month in 1926 and January, 1927. During the past month 623 permits were issued for improvements valued at \$3,210,978 as compared with 753 permits for improvements costing \$4,711,886 during the month of February, 1926. January, 1927, operations totaled 692 permits, the work undertaken being estimated at \$3,528,955.

The following is a segregated report of the activities for the month of February, 1927, as compiled by John P. Horgan, chief inspector of buildings of the department of public works:

### FEBRUARY, 1927

Class	No. of Per.	Est. Cost
A .....	2	\$ 145,000

Public Buildings ....	1	36,774
Harbor Buildings ....	1	256,000
Total....	623	\$3,210,978

## HOME HEATING OIL BURNERS DISCUSSED IN BULLETIN

A new bulletin, "The Domestic Oil Burner," issued by the United States Department of Agriculture as Department Circular 405-C, is available to everyone considering the installation of an oil-burning plant.

Many types of oil burners designed especially for home-heating purposes have been placed on the market within the last few years. To meet the demand of prospective purchasers of this type of heating equipment for reliable information, the United States Department of Agriculture has tested a number of oil burners of different design and has prepared this bulletin, based on the results of the tests, in which an attempt has been made to give the information necessary for the home owner to make his own selection of an oil burner.

The test conducted by the department, and a study of many installations, indicates the character of performance that may be expected of the several types of burners, the adaptability of existing heating plants, and the facts concerning oil-fuel supplies and operation costs.

Copies of the publication may be secured, as long as the free supply lasts, by writing the Department of Agriculture, Washington, D. C.

## CERTIFICATES GRANTED

California State Board of Architecture, Northern Division, has granted certificates to the following, to practice architecture in this state: Mervyn Gunzendorfer, 3367 Washington St., San Francisco; Howard H. Hazen, 1515 10th St., Sacramento; Albert H. Winter, 1353 Vancouver Ave., Burlingame.

## SHOULD ENGINEERS MAKE KNOWN COST ESTIMATES?

The question of whether engineers' estimates of the cost of public work should be given out prior to the opening of bids has long been a subject of controversy between contractors and engineers and of differences of opinion among contractors. The most common argument advanced in favor of giving out estimates in advance was that it enabled the contractor to judge whether, after preliminary study of a specific project, it would be worth while for him to attempt to prepare and submit a bid, assuming the estimate represented approximately the amount available or the sum which would be expended on it. In opposition to publication of estimates in advance it has been argued that it encouraged inexperienced and irresponsible bidders who would accept the engineer's estimate as a reliable estimate of the cost of the work and use it as a basis for submitting a bid. At the recent national convention of the Associated General Contractors of America the question was settled by that organization so far as its position is concerned by the adoption of a resolution declaring the "publication of the estimated cost of prospective construction work before bids are received is not in the public interest and should be discontinued by public bodies; and further laws requiring such procedure should be amended."—(S. W. Bldr. & Contractor.)

## PLANS ANNOUNCED FOR L. A. UNIVERSITY BUILDINGS

Definite plans regarding the building program of the University of California at Los Angeles are announced by Robert G. Sproul, Vice-president and Comptroller of the University.

The construction will be of reinforced concrete with brick facing, Sproul says; and the buildings will be erected on the natural contour of the hills, instead of grading to give them a level site. This will add to the beauty of the site, by preserving the natural beauty of the campus, and at the same time will save large sums that would have been necessary to effect the grading.

The classroom building is to be the first constructed, and it will be designed to care for all the students who are expected to attend the institution. It will have an auditorium that will seat between 1800 and 2000. The library building is the second on the program, and is to be designed to meet the needs of the University at Los Angeles for the next quarter of a century or more. Whatever is left of the \$3,000,000 voted by the people at the last election for buildings on the new site will be spent for the departments of chemistry, physics, biology, and mathematics. It is hoped two buildings may be erected for this purpose.

As closely as possible, the \$3,000,000 will be spent for buildings and services, with a minimum of equipment to be installed, as room is the prime need of this rapidly growing institution.

# ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

## BUILDING STRIKE AT KLAMATH FALLS IS ENDED

Following a series of extended conferences between master plumbers and journeymen at Klamath Falls, Ore., the plumbers' strike which for a time threatened to tie up all construction, has been settled.

Most of the seventy-five men who walked off local jobs when the strike went into effect nearly two weeks ago, have already returned to work and by the middle of next week, construction will again be at full tilt so far as the plumbers are concerned.

While word from the strike headquarters where the agreement was reached merely stated that the matter had been settled with only a few slight changes in working conditions, it is believed that the men received a \$1 increase in wages. At the time of the strike it was announced that the plumbers wanted \$11 per day instead of \$9, the old scale.

## INTERNAL RELATIONS SECTION ORGANIZED AT LOS ANGELES

The Internal Relations Section of the Construction Industries Council of Southern California has been organized and is now functioning along the lines of the original Building Business Relations Committee. Wm. A. Simpson of the Wm. Simpson Construction Co., representing the Associated General Contractors on the Council, is chairman; G. B. Schneider of the Washington Iron Works, representing the Builders' Exchange, is vice-president, and E. W. Hokom, representing the Heating & Piping Contractors' Association, is secretary-treasurer. At the meeting of the Section held Feb. 23, rules of procedure for the subcontractors engaged in building construction were discussed in detail, and it is expected they will soon be whipped into shape to be presented to the Council for its consideration.

## SACRAMENTO BUILDING BUREAU UNDERGOES REORGANIZATION

A rearrangement of the Sacramento city building inspection department to comply with a provision of the new building code that the building inspector must be either a structural engineer or certified architect is announced by City Engineer Allen J. Wagner.

Under the new arrangement, R. H. Shields, structural engineer of the engineering department for a number of years becomes city building inspector and Ben H. Covell, now building inspector, becomes his chief assistant.

No change will be made in the salary of either man. Covell will have practically the same duties as formerly except that he will be able to devote more time to outside work, while Shields will be able to inspect all technical details more closely.

Both Wagner and City Manager Bottorff gave assurance that the change was made to comply with the new code, adding that Covell's services are and have been extremely satisfactory, but that since he is neither a structural engineer nor architect he cannot legally retain his former title.

## BRICK CONSTRUCTION PROBABLE FOR FRESNO SCHOOLS

Unless all signs fail, the Fresno City Board of Education's policy of favoring concrete construction for all complete buildings in the city school building program will be changed, according to developments at the last meeting of the educational body.

While a delegation of brick manufacturers and masons appeared before the board and appealed that the brick men be given a chance to figure on construction of future buildings, the board took no action on the request, but the discussion that followed the appeal indicated the board is considering advertising for bids on the basis of either concrete or brick construction, two sets of plans and specifications being used.

Speaking for the brick men, E. M. Prescott said: "We urge that we be given the chance to figure on brick and mill type construction in future school buildings. We can build with brick just as economically and as safely as with concrete. Brick is fire resisting."

## STATE MASTER PLASTERERS IN FAVOR OF LICENSE LAW

A resolution declaring in favor of a state law providing for licensing of contractors was adopted by the Contracting Plasterers' Association of California at the recent convention in Los Angeles. The convention also voted to continue its campaign for better plastering by pressing the adoption of ordinances regulating plastering in municipalities. Craft problems were discussed and the opinion was expressed that while progress had been made toward higher standards both in craftsmanship and in methods of conducting business there was still much to be desired. Seventy-six delegates representing all sections of the state attended the convention.

## GENERAL CONTRACTORS OF S. F. ELECT OFFICERS

The annual meeting of the General Contractors of San Francisco, Inc., was held at the Clift Hotel, February 17th, with some fifty members present. Considerable important business was transacted including the election of directors for the ensuing year, the labor situation and means whereby the business of the general contractor could be benefitted.

The following directors were elected: A. H. Bergstrom, John Monk, J. G. Leibert, W. J. Stevens, J. W. Cobby, W. W. Hayes and N. E. Nielsen. At an organization meeting the following day, the following officers were elected: A. H. Bergstrom, president; John Monk, first vice-president; J. G. Leibert, second vice-president; W. J. Stevens, treasurer and C. J. Dixon, secretary.

## MONTEREY BUILDERS ELECT

Fred McCrary was elected president of the Monterey County Builders' Association at the annual meeting of that body held in Monterey, Feb. 23. C. E. Colburn was elected secretary. Directors are: C. L. Frost, A. Jacobson, W. P. Sweeney and Fred McCrary.

## PENINSULA PAINTERS ENJOY DINNER DANCE

Members of the Peninsula Master Painters' Association, their wives and friends enjoyed a dinner-dance at the Cardinal Hotel, Palo Alto, Feb. 23.

Charles Leis was toastmaster, and speakers included Clyde Simmons, manufacturer of Sacramento; William Wooley, state secretary, and T. von Hacht of Palo Alto.

N. Sorrels was chairman of the arrangements committee.

San Jose is forming a painters' association, and a committee was named previous to the dinner, to visit that city and assist with the organization. Committeemen are Art Jensen, Charles Leis, William Wooley, Arlington Dennerly, L. E. Doolittle, M. Sorrell and T. von Hacht.

A women's auxiliary of the association is being organized and the first meeting will be held at the home of Mrs. T. von Hacht in Palo Alto.

## NAPA BUILDERS TO MEET

Election of officers will be conducted at the annual meeting and banquet of the Napa Builders' Exchange, to be held in Native Sons' Hall, Napa, March 21. E. W. Doughty and Wade Shifflet have been named a committee to arrange a program of entertainment.

## MASTER PLASTERERS ELECT

Fred Young of Los Angeles was elected president of the Master Plasterers' Association of California at the annual convention of that body in Los Angeles which closed a 3-day session Feb. 23. Other new officers are: Phillip Patenude, San Jose, first vice-president; Joseph Young, Santa Monica, second vice-president; John Perry of Stockton, third vice-president; J. J. O'Connor of Los Angeles, treasurer, and L. R. Wadle, Los Angeles, secretary.

## SAN FRANCISCO TO VOTE ON BOND PROPOSALS

Bond issues for \$4,000,000 to complete the War Memorial and Municipal Opera House group in the Civic Center and \$4,500,000 to finance extensions and improvements for the Municipal Railway System will be submitted to the voters of San Francisco in the immediate future.

The city will bond for \$4,000,000 for the Civic Center structures to which will be added approximately \$2,000,000, which amount, was donated by San Francisco citizens to finance the project. For a granite face group of structures, the cost of construction is placed at \$5,700,000 and for terra cotta faced buildings, \$4,760,000.

The \$4,500,000 issue on the Municipal Railway Improvements would provide \$3,500,000 for new car lines, erection of new shops and car barns and the purchase of additional street cars. The remaining \$1,000,000 would provide funds for construction of the Bernal Cut. This latter improvement will provide a roadway 4200 feet long and 117 feet 6 inches wide, allowing a paved roadway 42 feet wide, 8 foot sidewalks on each and a right-of-way for municipal

## Gladding, McBean Takes Over Plants In Pacific Northwest

Purchase of Denny Renton Clay & Coal Company plants in Washington and other Northwestern States by Gladding, McBean & Co., of this city, is announced by Atholl McBean, president of the latter organization.

The consideration was not made public, but it is understood to run into large figures because of the extensive business holdings of the Denny Company. The purchasing company is a 10,000,000 organization.

"The acquisition was made to enable us the better to meet growing demands for our products, other than terra cotta, in the Northwest territory," McBean said. "We can now utilize the Denny plants in Oregon, Washington,

Montana and British Columbia, in the manufacture of face brick, terra cotta, sewer pipe, fire brick, roof tile and other clay products."

Organized under the laws of this State in 1875, the Gladding organization has six plants in California and six branch offices on the Pacific Coast. As the result of the consolidation, the company now has 200 kilns and employs 2000 workers.

Raymond R. Smith, manager of the company's brick and tile department here for the last two years, will be transferred to Auburn, Wash., to superintend the Denny plant there. He was associated with the Denny corporation from 1909 to 1925.

## Court Decision Ends Long And Bitter Union Dispute

The long and bitter war between the Bricklayers, Masons, & Plasterers International Union and the Operative Plasterers & Cement Finishers International Association was ended recently with a decision by Elihu Root and the arbitration tribunal of which he is head, restoring all previous agreements which had been abrogated during the inter-union struggle. Precipitated by the Florida boom of 1923 and 1924 the building trades' dispute grew until it caused strikes delaying more than \$500,000,000 worth of building, in widely separated parts of the country and imperiling the whole nation's building program for 1925. It was a jurisdictional war to determine which union should organize plasterers

in various parts of the country, especially in the boom district of Florida.

In handing down the decision Mr. Root pointed out that both sides had been in error and had gone far beyond their powers in abrogating previous agreements between them. The bricklayers abrogated their agreements of April 4, 1913, and July 1, 1916, and the plasterers retaliated by abrogating their agreement of 1911. Mr. Root made it plain that the arbitrators were not ordering the plasterers out of Florida. Last December, however, the spokesmen for both organizations agreed that as soon as a decision was announced by Mr. Root they would establish a permanent peace and hold a conference to settle the status of the Florida local unions.

## Electrical Science Ventilates Modern Home Through Kitchen

One of the best ways to ventilate a home is through the kitchen.

And electrical science, after years of study and experimentation, has developed a simple little device known as an electric exhaust fan which is conquering all the formerly formidable odors of frying or cooking onions, cabbage, cauliflower, fish and other smells from the griddle as well as giving the entire home real protection from air eases and poor ventilation.

The ventilation experts declare that this little exhaust fan for the kitchen will be as commonly used and as popular among the rank and file of intelligent housewives as the electric iron, the vacuum cleaner, the automatic washer and ringer and other electrical equipment which has largely eliminated drudgery in the household. And the use of ventilation of this sort is an application in the home of the most recent developments in the electrical control of air used extensively today in big industries, in efficiently operated schools, theatres and public buildings, the experts say.

Both physicians and engineers seem to agree that few housewives have learned to use their windows with sufficient skill and regularity to overcome the flood of smells and gases that the kitchen pours into the dining

room. Window ventilation cannot be controlled with any certainty or regularity as air supply can be by electricity. It is pointed out. Ventilation should be provided for just like heating or lighting in the home and the way now is simple and the cost slight.

An exhaust fan is just a special type of electric fan which is permanently installed high up in the wall of the kitchen, in an opening provided for it, so that in operation, the fan blows the air of the kitchen with all the smoke and steam, directly outdoors and away. This sets up an immediate circulation of air from the house into the kitchen and no more smells of cooking work their way out into the other rooms. The result is that boiling cabbage or fried onions do not greet the guest at the front door while a ham may be boiled, baked, and brought up to the full point of perfection and still be a surprise to the household, when it comes to the table. The air from the house flows to the kitchen but the kitchen air can never work its way into the house.

While this little mechanical product of electrical science is a complete cure for odors, it provides better working conditions for the cook by assuring improved ventilation and less heat in the summer. The economic housewife

realizes, too, that this type of ventilation constitutes a real saving to decorations, hangings and furniture throughout the house by eliminating the fumes, smoke and soot which inevitably work their way from the cookstove and gradually deposit a film of grease on everything. Dust settles and dirt clings, ruining colors, fabrics and wall paper.

The exhaust fan may be installed in any kitchen. Sometimes a square opening is cut in the wall into which the fan fits. Sometimes a section of the upper sash of a window is taken out to avoid the cutting of the wall. Often the fan is fitted into a direct flue leading from the hood over the range into the chimney. To prevent the entrance of cold air into the kitchen when the fan is not in use, a shutter is installed that opens automatically when the fan is in operation, blown open by the blast of air. The fan need be running only about three hours a day, the engineers say.

Why the home cannot be effectively ventilated by opening windows in the kitchen is indicated by the fact that the wind may be blowing the wrong way, which would rush all the cookstove odors into the house. The draught also would interfere with the cooking and chill the overheated cook. If there was no breeze at all, there would not be a particle of ventilation.

### BUILDING UNIONS MEMBERSHIP

The Bureau of Labor statistics report the membership of building trades unions affiliated with the American Federation of Labor as follows: asbestos workers 2400; bricklayers, masons and plasterers, 103,600; bridge and structural iron workers, 18,350; carpenters and joiners, 376,400; electrical workers, 140,000; elevator constructors, 18,000; steam and operative engineers, 33,000; granite cutters, 8500; hod carriers and common laborers, 65,000; lathers, 17,000; marble, slate and stone polishers, 4500; painters, decorators and paperhangers, 125,000; plasterers, 32,000; plumbers and steam fitters, 60,000; roofers, damp and waterproof workers, 3500; stone cutters, 5075; total membership, 1,012,325.

### LOCOMOTIVE WHISTLES COSTLY

At least \$8,000,000 is spent yearly by the railways of the United States in blowing the locomotive whistles, according to estimates. Each hour of continuous use for one whistle consumes about four tons of water and 1200 pounds of coal, says Popular Mechanics. Suggestions have been made that the whistle be moved ahead of the smokestack, so that its sound would be deflected much less, and that it be constructed to give a high-pitched note which would have a larger range of audibility.

Request that painters and paperhangers employed by the Berkeley Board of Education be paid \$9 per day instead of \$8.35 is made by the Builders' Exchange of Alameda County.

### STATE-OWNED CEMENT PLANT PROPOSED IN BILL

A bill designed to authorize the state to construct and operate a portland cement plant has been introduced into the Washington State Senate. The bill was introduced by Senator W. H. Kirman, of Walla Walla, and empowers the state to acquire a site for the cement plant, appropriating \$25,000 from the motor vehicle fund to carry out the act.

# THE OBSERVER

## WHAT HE HEARS AND SEES ON HIS ROUNDS

The "battle of the bridges" continues. From Sacramento comes word that State's Attorney General U. S. Webb has approved the petition of Hans Miller of Crockett, seeking permission to file suit in the name of the State of California against the Northern California Development Company with the object of asking the courts to dissolve the development concern. The petition filed by Miller is based on a law enacted in 1925 and which holds that a bridge company must secure a franchise and start work on a bridge within six months of its incorporation or be subject to dissolution. The law was enacted as a means of hurrying action on bridges projected on San Francisco bay in 1925. While Webb's action strictly consisted of notice of intention to grant the plea it, in effect, accords Miller the right to institute suit on filing a bond with the state. Notice of Webb's action has been received by Attorney Wilbur Pierce, counsel for the development company. The Northern California Development Company three made pleas for a Carquinez Straits span but each application was denied by the Contra Costa County Supervisors.

In considering the demand of organized labor for the five-day week, Irving Fisher, Professor of Economics, Yale University, raises the question of production. He says: "But can the workers produce as much in the five-day week? The reductions in the daily shifts of most industries successively from twelve hours to ten hours and from ten hours to eight have been amply justified by results. However, the question of desirability and practicability of the five-day week is still very much a matter for experiment. In an economic theory, labor saving machinery (by increasing productivity) should reduce human toil and misery and in actual fact it has done so to the extent of increasing real wages. It now promises to do so in increasing leisure. Perhaps labor is now getting enough to warrant more leisure even if it gets no more wages. After a certain point leisure is a substitute for more wages. If the wage earner can gain both more leisure and more wages (through greater productivity) by means of a five-day week, then the sooner it can be generally introduced the better all around."

State Supreme Court Justice Joseph Morschauer has denied the application for an injunction sought by a general contractor in Westchester County, N. Y. to restrain union building mechanics from refusing to work with non-union steam fitters. In rendering this decision Judge Morschauer declared no union man was obliged to work with non-union men and that the labor unions were within their rights in walking out where their members were required to work with men who were regarded by the United Association of Plumbers and Steam Fitters as non-union men in doing a particular line of work.

Production of lumber in Fresno county increased more than 1000 per cent during the years from 1921 to 1924, according to figures published in a summary of the lumber industry published by the California Development Association research department. In that period lumber production in this county increased from 9,056,000 board feet in 1921 to 109,352,000 board feet in 1924. While production figures for the years since 1924 are not given in the publication, it is believed that Fresno county lumber production last year even exceeded that of 1924. Fresno county ranked fifth in pine lumber production in the state in 1924, the table shows, and seventh in the production of all lumber in the state. In pine production this county is exceeded by Siskiyou, Lassen, Butte and Tuolumne counties, and in redwood production by Humboldt and Mendocino counties. Lumber production in this county is exclusively pine.

Perfection of a new steel, from ten to fifty times as durable as the ordinary product, is announced by the Crucible Steel Company of America at Cleveland, Ohio. A. T. Galbraith, vice-president of the company and general manager of sales, made the announcement at the annual sales conference of the central division of the company. He said the new steel, known as H. Y. C. C., was first made in the laboratories of the Crucible company many years ago, but that difficulty in procuring satisfactory alloys made it impossible to manufacture it in its present form at reasonable prices. This handicap, he said, has now been overcome. Mr. Galbraith declined to reveal details of the process by which the new steel is produced, but said its strength has been proved by extensive experiments.

January bookings of architectural terra cotta, as reported to the Department of Commerce by 27 manufacturers who produced over 95 per cent of the architectural terra cotta made in 1925, were 9851 tons, as compared with 10,414 tons in December and 13,312 tons in January, 1926.

The hearing before the State Railroad Commission on the application of the California Water Service Company for permission to make a stock and bond issue of \$10,100,000 to purchase twelve water supply systems serving California cities was adjourned last Friday until March 22. During the intervening month, engineers of the commission will make a survey and official estimate to determine whether the properties which the company proposes to purchase are of sufficient value to warrant so large an issue of stocks and bonds.

The building and safety commission of Los Angeles has asked the city council to create the position of heating and safety engineer in the building department, fixing the salary at \$400 a month.

Declaring that modern workers need more leisure, the federal arbitration court at Sydney, Australia, decides that forty-four-hour week of five and one-half working days was practicable, and for all practicable purposes the forty-four week henceforth will be the standard in Australia except in the state of Victoria.

Re-trial of a suit in which Marcos B. Soria, former cement plant worker, obtained a jury judgment of \$11,500 against the Cowell Cement Company for loss of his left leg in an accident at the company's Cowell plant, was denied by Superior Judge A. B. McKenzie at Martinez in acting upon a new trial motion presented by the defense. Appeal of the judgment will be carried to the Appellate Court, according to Attorney A. F. Bray, one of counsel for the cement company. Soria, who sued for \$65,000, lost his leg in 1925.

Radio is used in Sweden to notify those in charge of road work of the advance of snow storms. Equipment is in readiness to work on roads as soon as storms begin.

That the retail lumber man of the future must prepare for a radical change in his business methods or be driven out of business by more far-seeing competitors was the message given the delegates to the Western Retail Lumbermen Association by C. J. Baldwin, president of the organization, in his annual address at the opening session of the convention at Tacoma, Feb. 24. "Originally we were called retail lumbermen because lumber was the only material out of which to erect homes," Baldwin said. "Today a home may be built without a stick of timber in it."

January wholesale prices of standard plumbing fixtures for a six-room house, as collected by the Department of Commerce from reports of twelve representative manufacturers and wholesalers, were \$105.46 as compared with \$105.74 in December and \$109.79 in January, 1926.

Three Sacramento firms, the Thomson-Diggs Company, the Sacramento Brick Company and the W. P. Fuller Company, have petitioned the federal court that the Yolo County firm of Hauser & Cline enter a declaration of bankruptcy. It is alleged that Hauser & Cline owe the petitioners in excess of \$1000 due for more than six months.

A new mode in construction and one akin to economy is that being practiced by several well known architects in Germany. The doorways in old buildings which have an artistic conception of no mean merit are not destroyed when the building is torn down, but are carefully removed intact and preserved to be used in new buildings. In the new museum of the city of Hamburg, Fritz Schumaker, city architect, has used beautifully designed doors and their arches, which are representative of the best in architecture of a decade ago. They had been preserved from buildings torn down.

H. V. Grant, who superintended construction on the Sacramento Municipal Auditorium has been named construction engineer for the new filtration beds the city of Sacramento will construct in connection with the municipal water system.

## TRADE NOTES

Suit has been filed in the Federal Court at San Francisco by John S. Wheeler of Willows who seeks damages of \$500,000 for alleged infringement of patent from Philip B. Wallace, H. J. McPhee and E. A. Wallace, officers of the United States Pipe Bending Company with headquarters at 315 Howard street, San Francisco. In his complaint Wheeler avers that the defendants, contrary to a written agreement, have sold a large amount of pipe bending machines outside the State of California and have realized large sums of money on such sales. The complaint asks that the defendants be perpetually enjoined from further manufacture of the infringed patent and that they make no further sales of the pipe bending machine, his sole patent.

Consolidation of the businesses of the Fresno Sheet Metal & Roofing Company and the Fresno Roof & Paint Company under the name Faris-Osborne Company, and removal of the consolidated business to 720 Fulton St., Fresno, is announced by George A. Faris, one of the owners of the business. Faris was formerly proprietor of the Fresno Sheet Metal & Roofing Company, located for the last seven years at 1818 Mariposa St., Fresno, and Thomas A. Osborne, the other member of the new firm, has operated the Fresno Roof & Paint Company for the last six years.

The Alloys Company, manufacturer of zinc dust and pipe joint compound, a subsidiary of the Merrill Company of San Francisco, 121 Second street, has installed a department in its factory at 550 Fourth street, for the manufacture of "Merco Pure Litharge" and "Merco Pure Red Lead." The concern plans state-wide distribution of these products which are used by manufacturers of batteries, paints and rubber products.

Metta S. Kempston has opened offices at 813 Merchants' Exchange Bldg., and will specialize in solving filing problems. Miss Kempston is not affiliated with any manufacturer or office-equipment house but co-operates with them all. Her work consists of "making old and feeble filing systems new and efficient."

Suit for \$1,237.96 has been filed in the Superior Court at Stockton by the San Joaquin Brick Company against Christen H. Hansen, Joseph H. Buchen and the Globe Indemnity Company. The sum sought is alleged to be due on a contract dated in May, 1923.

Urban Bros. plan the construction of an eight-bunker gravel loading station in Homer Ave., Palo Alto, between the railroad tracks and the state highway. Improvements will require an expenditure of \$10,000.

DeWitt Brothers of Sutter City have purchased approximately 1500 acres of dredged land in the Thermalito district, Butte county, and will establish a rock crushing plant to be served with a Sacramento Northern Railway spur. They are now operating a quarry in the Sutter Buttes.

Reagan Engineering Company of Oakland has been incorporated with a capital stock of \$1,000,000 and will engage in the manufacture of Reagan steam engines, a patent on which has recently been obtained from the government. The Board of directors is composed of Leonard E. Armstrong, Russell P. Howard, H. W. Welsh, C. C. Cuff of Oakland and George W. Hickman of Berkeley.

E. G. Dahlberg, president of the Celotex Company of Chicago, announces that William Johnston, formerly of the New York World, had been made vice-president of the Celotex Company, in charge of public relations. The company manufactures an insulating lumber from sugar cane. The company's plant is in New Orleans and it has two other plants under construction in Florida and Porto Rico. Mr. Johnston will assume his new duties on March 1st.

Frank Pratini has purchased a site comprising 6 lots in A street, between Eighth and Ninth streets, Antioch, and will establish a marble plant. A warehouse, display rooms, offices and estimating rooms will comprise the structures to be erected.

James E. Raymond will operate from 693 Mission street, San Francisco, under the trade name of Unit Construction Company.

Eugene and Myron A. Hoffman will operate in the East Bay district under the firm name of Standard Sheet Metal Works with headquarters at 9219 East 14th St., Oakland.

O. Takahashi and U. Yamane, both of 2760 Grove St., Oakland, will operate under the firm name of Yma Hardwood Floor Company, with headquarters in Oakland.

Crane Co. announce the opening of a new plumbing display room at 136 State street, Santa Barbara.

Severin Electric Co., formerly located at 828 Mission street, announces removal to new quarters at 115 Capp street, San Francisco.

California Corrugated Culvert Co. announce the opening of a branch office at 818 Crocker Building, San Francisco. Frank S. Gaines, is in charge.

Ely C. Hutchinson, for the past five years vice president and general manager of the Pelton Water Wheel Co., of San Francisco, has been appointed president and general manager.

Price-Teltz Co., formerly located at 525 Market street, have moved to their own building at 633 Howard street, San Francisco. The new quarters will permit the company to display its complete stock of equipment.

Hofius Equipment Co. of Seattle, dealing in logging supplies, pulley blocks and logging equipment in the Pacific Northwest, has opened a branch office at 272 Stark St., Portland.

Adams Lumber Company of San Francisco has filed articles of incorporation in Oakland. Directors are: B. W. and M. D. Adams of Berkeley; F. F. Sayre of Stockton and E. S. Page of Berkeley. The company is capitalized for \$100,000.

## ALONG the LINE

Edward Young Buchanan, 84, retired civil engineer, died at his home in Piedmont, Calif., February 28. Mr. Buchanan was born in Paradise, Lancaster county, Pennsylvania, and was graduated from West Point Military Academy at the beginning of the Civil War as a civil engineer. Coming west, Mr. Buchanan worked on engineering projects of the Union Pacific Railroad. He drove ox teams between Omaha and Salt Lake. He laid out the Coleman road of the California Northwestern Railroad and surveyed much of the line of the Southern Pacific into Coos Bay.

H. S. Taylor and C. S. Moody, metallurgical engineers, announce they will give a course in steel and its heat treatment, beginning March 8. The course, given under the auspices of the Golden Gate chapter of American Society for Steel Treatment, will be held at Oakland High School.

Forrest Mitchell, executive secretary of the Republican State Central Committee, has been named secretary and disbursing agent for the California State Highway Commission, succeeding W. F. Nixon.

Chas. C. Young, civil engineer and former employe of the Oakland city engineer's office, has announced his candidacy as city commissioner of Oakland, against Wm. J. Moorehead. A lower tax rate and consolidation of city and county government in Oakland are the two outstanding planks of Young's platform. Young is a World War veteran and a member of Oakland Post of the American Legion.

Patrick Boyle, contracting plasterer of San Jose, died in that city Feb. 24, following a brief illness.

A. T. Brown has opened offices at 832 Merchants National Bank Building, Los Angeles, and will engage in the practice of general civil engineering. Mr. Brown has been associated with Edward M. Lynch for the past four years, and prior to going to Southern California practiced engineering in Oregon and Washington, being engaged in municipal, harbor and irrigation work.

Harry Ennell of Oakland has been named attorney for the California State Highway Commission, succeeding Paul F. Fratessa of San Francisco. The appointment is effective March 1, Fratessa leaving the state service to take up the practice of law in San Francisco.

An appropriation of \$1,000,000 for protection of Palo Verde and Imperial Valleys from the Colorado river floods is proposed in an amendment to the second deficiency bill offered by Senator Samuel Shorthridge of California.

The State Railroad Commission has dismissed a complaint of the Western Pacific Railroad against the Northwestern Pacific Railroad in which the former asks that the Northwestern be ordered to establish a through rate for transportation of lumber products from points on the Western Pacific to points on the Northwestern.

## Twenty-Six Apprentices Are Awarded Graduation Certificates

**Master Plumbers' Joint Apprenticeship Committee and Industrial Association of San Francisco Award Certificates to Apprentice Plumbers — Wages Advanced From \$4.50 to \$6.00 Per Day—Many Speakers Laud Work of Industrial Association, Which Is Supervising Training of Apprentices in Many Crafts—1300 Trained in Past Four Years**

Graduation of twenty-six apprentice plumbers who qualified under the terms of the Master Plumbers' Joint Apprenticeship Committee of San Francisco for Junior Mechanic Grade, took place last week at the Plumbers' School, 1120 Howard Street.

The event marked an important step in the progress of the school and the program of training first-class mechanics entered into between the Master Plumbers' Joint Apprenticeship Committee and the Industrial Association of San Francisco.

The following boys were graduated: Elmer Anderson, Walter Fitts, Otto E. Bauml, B. L. Mullinix, T. Fernandez, Fred Lundahl, Ray Forster, Grant Frost, Tom Sullivan, Dewey Jewett, Jack Tyers, O. R. Johnson, Bernard Mayer, Tom O'Neil, R. P. Trezise, H. J. Weeks, John Sposito, Frank Lamont, W. Dunaway, A. Pollia, A. F. Sinclair, Chas. England, P. Schwenger, H. Koenig, K. Griswold and C. Rodegerdts.

Each graduate was presented with a certificate and a leather wallet by the Industrial Association.

The graduated apprentices have completed their requirements in school and in the shop for the Junior Mechanics rating which entitles them to be advanced from \$4.50 to \$6.00 a day.

A. J. Wilson, president of the National Master Plumbers' Association, states that the work of this school and the San Francisco Apprenticeship Committee has been the most successful of any city in the United States.

The graduation exercises opened with a talk by H. L. Pierce, director of Training and Research Department of the Industrial Association, who addressed the gathering on "What the Term Junior Mechanic in the Plumbing Trade Means," followed by J. C. Staudinger, school instructor, who told what the Industrial Association plumbing school was doing for the apprentice.

Alex. Coleman, secretary of the National Plumbers Association, delivered an address on the problem of getting good mechanics and enforcement of the Apprenticeship Agreement, followed by V. H. Kehler, president of the Junior Plumbers Social Club, who told of the activities and purposes of that body.

Frederick J. Koster, a director of the Industrial Association, who presented the certificates to the graduates, delivered an address on "The Industrial Association's Interest in the Junior Mechanic Plumber and the Master Plumber."

J. Ahlback, president of the California Sanitation League, told of educating the apprentice to his responsibility under the American Plan and W. P. Goss, president of the California State Master Plumbers' Association, told of the interest of the Master Plumbers in other California cities in the apprenticeship work under way in San Francisco.

What the National Plumbers Association is doing for the apprenticeship was explained by Al. Wilson, president of the association.

Moving pictures featuring the Christmas Jinks given by the Trade Schools on December 22 were thrown on the screen.

H. L. Pierce, director of training for the Industrial Association, at the close of the evening announced that the association, together with the Trade Apprenticeship Committees, are supervising training of apprentices in the following crafts and have had in training some 1300 apprentices during the last four years: Plumbers, plasterers (plain), plasterers (ornamental), painters, interior decorators, paperhangers, bricklayers, housemiths, electricians, lathers, cabinetmakers, glaziers, tile setters, molders, coremakers and merchant tailors.

fire. For, as is well known, each kind of combustible material has its own point of ignition, and when its temperature is raised to that point, if it be in actual contact with the air it bursts into flames whether flame from other burning material has touched it or not. This fact was brought out more strongly than ever before in these tests. In one test, the amount of combustible present was limited to 4000 pounds of paper and books in a 15-foot by 29-foot office room (ceiling height 9 feet 9 inches), the furniture being entirely of the ordinary commercially-available sheet steel varieties and the floor of concrete. This change to metal furniture reduced the amount of combustible in the test to only one-half of that present where the same floor and wood furniture was used. Briefly, the results found were that:

(a) A fire started by a match in a paper-filled steel waste basket smoldered out by itself and did not spread.

(b) A fire started in a waste paper basket adjoining open steel shelving filled with letters and other papers, spread only into the papers on the adjacent shelves and on top of a table on which one of the shelves was supported.

(c) A fire started by a great flame from 400 pounds of fine split dry kindling wood, saturated with kerosene oil and held in a huge wire basket 3 feet in diameter and 7 feet high, in one corner of the fireproof room, spread so far as damaging contents of the furniture, no more than five feet from the wire basket; and, so far as igniting loose papers on desks and the tops of cabinets, no more than a maximum of 15 feet from the wire basket.

(d) The maximum temperature attained at any point other than the immediate area occupied by the flame from the wire basket, was greatly below that of the same points in previous tests: a fact accounted for by both the lower temperatures due to less material burning at any one time and because much of what was present was contained within incombustible enclosures so it could not burn freely.

That the amount of combustible present and its exposure to the air is the determining factor, was further demonstrated in another test. The same steel furniture which had stood the previous test was again filled with an equal supply of papers and books and was placed in the same position in the same room, but resting this time on a 3/4-inch wide faced common yellow pine floor laid on 2-inch by 3-inch wood sleepers, and was then ignited by the same great flame as before. Here the fire spread as it had in all the tests with combustible furniture so that all parts of the room were on fire. After the fire the steel furniture was intact but was disfigured and its contents were about two-thirds consumed. The limited air supply of the closed type of construction was shown to be of very great value in preventing the destruction of the contents of the furniture. But standing out above all else is the important fact that for safety of office contents, the amount of combustible present must be kept down to the mere papers and books which record the business transactions of the office, and that these should be stored in receptacles which will not burn and will prevent the easy access of draughts of air to the heated contents.

## Results Of Tests By U. S. Standards Bureau on Office Furniture Fire-Resistance

BY GUY L. IRWIN

(Special Correspondence)

Of late there has been much comment on the utility of furnishing fireproof buildings, particularly office buildings, with combustible furniture and fittings. That the fireproofness of the building is often defeated by the combustibility of its contents has been proved repeatedly by fires which have practically gutted fireproof structures of their contents.

Recently the United States Bureau of Standards has made several interesting tests to determine what constitutes fire safety for offices.

The tests were made in fireproof rooms of two different sizes, furnished as complete offices, first with wooden desks, tables, filing cabinets, bookcases, chairs, and later with steel furniture and with a heavy load of old departmental letters, vouchers, bids

and records of all sorts filling these pieces of furniture, and with books and loose papers on desks, tables and open shelves. These rooms were fired in each of three ways (a, b and c, as noted later) and the temperature measured hundreds of times at 50 different points in the office each time it was fired.

It has long been evident that when testing under the most severe conditions of quantity and exposure of papers, full supply of air, maximum congestion of furniture liable to be experienced in any office, and freedom from any fire-fighting effort whatever, that the total amount of combustibles of any and all sorts present, and the degree to which air could have free access to these combustibles, control the height of the temperature attained, and, in that way, the spread of the

An expansion program involving an expenditure of \$1,000,000, including plans for double tracking the Alameda Belt Line railroad to serve establishments on the Alameda shore of the Oakland Estuary, is announced by A. Latham, city councilman and director of the railroad.

# Pittsburgh Building Is Halted By Three Trades Unions

Failure of three trade unions and the Building Trades Employers' Association to negotiate a new wage contract has resulted in a partial tie-up of an early spring building program, which included two theatres and a hotel in downtown Pittsburgh, Pa.

The trade unionists, numbering some 1200 men, stopped work at the expiration of the 1926 wage contract when the employers refused to grant their demands. The contractors insisted upon a renewal of the old wage agreement which was accepted by other trade unions. Members of these unions remained at work.

The crafts involved in the suspension are the structural ironworkers, the cement finishers, and the steamfitters. They asked wage increases and two of the unions, the ironworkers and the cement finishers, are seeking a five-day week. Their wage demands are: Ironworkers, \$14 a day, an increase of \$2; cement finishers, \$12 a day, an increase of \$1.20, and the steamfitters, \$12.50, an increase of 50 cents a day.

Representatives of the United States commissioner of Conciliation and of the state department of labor and industry continued their efforts to bring the two sides together.

## United Effort Necessary To Put Over License Bill

(Reprint From Southwestern Builder and Contractor)

Contractors generally are very much interested in licensing as a protective measure. Some are very enthusiastic about it. But few have any definite ideas of what the provisions of a license law should be. However, they see in it a possible means of reducing the number of, if not entirely eliminating in course of time from the contracting business unscrupulous and irresponsible persons. As a result nearly all contractors have an open mind on the question of the form which licensing legislation should take. What they desire most of all is an enforceable law. Licensing of contractors has been discussed causally for more than a decade, but only seriously in the last two or three years. Up to date only one state, North Carolina, has enacted a law to regulate the contracting business. This law has been in effect only about a year and it cannot be considered as having a thorough test. However, reports from North Carolina are that the operation of the licensing measure has been very effective, so much so that a similar bill has been introduced in the South Carolina legislature and will probably pass the present session.

The North Carolina licensing law applies only to general contractors who for a fixed price or fee undertake "to construct buildings, highways or other structures in accordance with plans and specifications prepared by a licensed architect or registered engineer, where the cost of the completed structure is in excess of \$10,000." A license can be obtained for \$20; renewal costs \$10 a year. But the applicant must pass an examination. The board which administers the act can hear complaints and revoke the license of any general contractor "who is found guilty of any fraud or deceit in obtaining a license, or gross negligence, incompetency or misconduct in the practice of his profession." For any fraud in obtaining a license, for using an expired or revoked license or impersonating another there is a penalty of not less than \$500 fine or imprisonment for three months or both. It is stated that under this law a number of persons have been barred from securing licenses and the licenses of several others have been revoked.

Both the contractors' licensing bills now before the California legislature differ materially from the North Carolina law. One of them, known as the Kelsey bill, is a redraft of the realtors' license law, to fit the contracting business. This law has operated most successfully in the opinion of realtors. Its chief object was to eliminate unscrupulous and dishonest persons from the realty business and this it has accomplished by making it possible to revoke the license of such persons. Incidentally the law has raised the standard of qualifications for realtors who are now required to be familiar at least with the state laws governing realty transactions and established forms and rules of procedure. The other bill, known as the Weller bill, is a simple registration measure, requiring the applicant for a license to be vouched for by two property owners and to file a faithful performance bond. An entirely new idea embraced in this measure is a provision requiring the owner or his agent to file a notice of intention to build, giving a description of the lot and noting any items or incumbrances against it. Failure to file such a notice is made a misdemeanor.

Whether a law will be resolved out of the pending bills at the present session of the California legislature depends largely upon the attitude of the contractors throughout the state. Both measures have as their apparent object the protection of the building public against fraud and dishonesty at the hands of persons engaged in the contracting business. It is not likely the legislature will deny the public this protection if those engaged in the contracting business show a willingness to have the business regulated. If contractors, therefore, desire enactment of a licensing bill agreement upon either of the two pending bills or a substitute bill is necessary. Licensing bills for engineers have been regularly introduced in the legislature for the last decade, but none has been made a law simply because engineers of the state have never united either on the principle of licensing or upon any specific bill. Efforts are now being made to get the proponents of the two

contractors' licensing bill together in agreement, and upon the success of these efforts the fate of the proposed legislation largely depends.

## The Observer

The California-Oregon Power Company announces its 1927 construction program in Southern Oregon and Northern California will involve an expenditure of \$1,800,000 which will include the new Prospect project, estimated to cost \$3,000,000. The erection of a new high power line from the Prospect plant to Medford, is the chief minor improvement. The company also announced it would enlarge its mercantile establishments started at Dunsmuir, Cal., to include Roseburg, Grants Pass and Chiloquin, Ore., and Northern California points.

A bill has been introduced in the Canadian House of Commons, providing for an expenditure of \$12,000,000 on the Montreal harbor. The money is to be spent as follows: Dredging, \$800,000; wharves, piers and basins, \$5,400,000; plant and equipment, \$155,000; shops and buildings, \$322,000; rails and electrification, \$1,342,000; permanent sheds, \$300,000; grain elevators, \$3,155,000; also a total of \$142,000 for small harbor works.

America's foreign trade was 1,174,000 long tons greater during the fiscal year 1926 than it was the previous year, the United States shipping board announces. The increase was due largely to the demand for imported raw materials. Total imports amounted to 43,589,000 tons during the year, a gain of 2,553,000 tons. Exports showed a decline of 1,270,000 tons, due largely to the poor wheat crop. Total exports amounted to 50,593,000 tons.

Forty building permits were issued in Palo Alto during February as compared with 71 for the corresponding period in 1926. February operations totaled \$87,012 as compared with \$214,388 for February, 1926. Residence construction last month totaled \$38,500, permits being issued for eight of these structures.

No more wooden shingles can be used within the entire city limits of New York City. The vote was 52 to 9 when the board of aldermen acted.

In addition to other contemplated bond issues San Francisco will probably vote on a proposal to issue bonds of \$1,000,000 to finance construction of a power line from Newark, Alameda County, to San Francisco, in connection with the Hetch Hetchy power project.

Discovery of a process for utilizing sulphite paper pulp mill waste in making an effective paint and varnish remover is announced by the Department of Agriculture. The process was discovered and patented by Dr. Max Phillips and M. J. Goss, department chemists, who have dedicated their patent to The People of the United States, thus making it possible for any one to make or use the product without payment of any royalties.

The Hayward Lumber & Investment Company has added two more yards to its string, the Crowther Lumber Co. and the Beaumont Lumber Co., both at Beaumont, Calif.

## PRATT'S CONCRETE MIX

by Clarence  
Sandy Pratt

IT IS just a year.

AND SIX days.

SINCE SACRAMENTO.

DEDICATED THE new depot.

BUILT BY the Southern Pacific.

AND COSTING \$2,300,000.

AND CLARENCE (Sandy) Pratt, President.

OF THE Pratt Building Material Co.

PRODUCERS OF clean sand.

AND CLEAN, hard rock.

AND WELL-GRADED gravel.

HEADED A delegation.

OF SAN Francisco business men.

THAT WENT to Sacramento.

ON THE first train.

INTO THE new station.

ON FEBRUARY 27, 1926.

THERE WERE hundreds of tons.

OF CLEAN, washed gravel.

USED IN this depot.

AND PRODUCED at Mayhew

NINE MILES from Sacramento.

WHERE SANDY'S companies.

HAVE A gravel plant.

THAT ALSO produces concrete mix.

OR SAND and gravel mixed.

MUCH SAND from Sandy's plant.

ON THE American River.

AT THE 12th Street bridge.

WAS USED to lay brick.

IN THE new depot.

THEN 35,000 tons.

OF CRUSHED rock.

FROM PRATTOCK (near Folsom).

WAS USED for ballasting.

ALL THE new tracks.

AROUND THE depot.

AND EVERY time.

SANDY BUYS a ticket.

TO RIDE over these tracks.

SANDY FEELS safe.

ON A "well-ballasted" railroad.

"I THANK you."

This puzzle picture said by some big newspaper men to represent the first train into the new S. P. station at Sacramento (see above K.C.B.-like story), but Sandy Pratt (producer of sand, rock and gravel at Marysville, Sacramento, Prattock (near Folsom), Mayhew (Sacramento County) and Prattock (Monterey County)—Central Office—San Francisco—claims this is a photo of Sandy's crushed rock ballast (see lower part of picture only), sold to the Southern Pacific Company.

**LOS ANGELES, Cal.**—John M. Cooper, architect and builder, 321 Rives-Strong Bldg., applied for building permit to erect a 2-story and part basement class A hospital building 88x111 ft. at 765 College St. for Mrs. O. P. Clark; reinforced concrete walls and floor and roof slabs, hollow tile partitions, tile and composition roofing, wrought iron, linoleum covered and maple floors, metal toilet stalls; \$65,000.

See call for bids under official proposal section in this issue.

## BUSINESS OPPORTUNITIES

**SAN FRANCISCO,** Cal. — Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission St., San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

D-2356 — Idaho Falls, Idaho. Party desires quotations on plain, lightweight sheet iron tubing, one inch in diameter and in about four-foot lengths. The punching of certain holes in each piece is involved in the manufacture, necessitating special dies, etc.

D-2359 — Fort Dodge, Iowa. Manufacturers of an "accordian" folding partition for schools, churches, hotels, lodges, etc., are very desirous of appointing a suitable agent to handle the sale of their product throughout the state of California.

D-2360 — New York, N. Y. Cement manufacturers desire to get in touch with San Francisco building supply dealers with a view to establishing an agency in this territory.

D-2361 — Upper Darby, Pa. Manufacturers desire to obtain a distributor for their gummed scaling tapes in the San Francisco territory. They wish connections with an established firm having its own warehouse and sales force.

D-2363 — Laurel, Miss. Suppliers of lumber and woods of various kinds desire to get in touch with San Francisco users of steamed and air dried dimension stock for furniture making, also with manufacturers of brooms and mops and buyers of high-grade quartered band sawed lumber 5-4, 6-4 and 8-4 thick, all red gum, good widths and the lengths will average 75 per cent 14 and 16 feet long.

D-2364 — Seattle, Wash. Buying agents for lumber in the Pacific Northwest desire connections with interested California lumber dealers.

11331 — Hamburg, Germany. Party wishes to act as buying agent in Germany for San Francisco firms. He is particularly interested in tools and hardware.

11335 — Dresden, Germany. Manufacturers of artificial flowers, plants, branches, etc., for show windows and decorating purposes, wish connection with firms in San Francisco.

11345 — Harbin, Manchuria. Gentleman with 20 years' experience in the railway contracting business and having had steady relations with the Chinese Eastern Railway for the last five years, offers his services to American manufacturers and suppliers of railway materials and supplies of all kinds who wish to bid on the requirements of the Chinese Eastern Railway. There is a good opportunity for American firms to handle this business, but it is necessary for interested firms to have some one who is well acquainted with local conditions.

# Official Proposals

## STATE OF CALIFORNIA CALIFORNIA HIGHWAY COMMISSION

### NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, Strub Building, Sacramento, Cal., until 2 o'clock p. m. on March 28, 1927, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

Sacramento County, an undergrade crossing under the tracks of the Southern Pacific Company, one mile south of Ben Ali (III-Sac-3-B), consisting of two concrete abutments with wing walls, sidewalk and graded roadway.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

RALPH W. BULL,  
J. P. BAUMGARTNER,  
California Highway Commission.  
R. M. MORTON,  
State Highway Engineer.  
W. F. MIXON, Secretary.

Dated: February 23, 1927.

### NOTICE TO BIDDERS

#### (Speed Motors—Sacramento)

Bids will be received by the undersigned City Clerk of the City of Sacramento for the City Council in his office, Room 203, City Hall, located on I Street, between 9th and 10th Streets, up to the hour of 5 o'clock P. M. on date of March 24, 1927, for the furnishing of two 2-speed motors for the use of the Sacramento Sewage Pumping Station No. 1 in accordance with specifications adopted by the City Council on date of February 24th, 1927, and now on file in the office of the City Clerk.

All proposals must be submitted upon printed proposal and affidavit form supplied by City Clerk without charge to prospective bidders, said bid to be enclosed in envelope marked "Sealed Proposal for Motors," which may be had upon application to the undersigned.

All proposals must comply with requirements of the City Charter of the City of Sacramento, effective June 30, 1921, and bidders are hereby cautioned that no bid which fails to comply therewith can be considered.

At the same time with the execu-

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

An official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

tion of the contract for supplying foregoing equipment, the contractor shall execute a contract bond furnished by an authorized surety company or personal sureties who shall be freeholders or householders of the City of Sacramento, to be approved and acceptable by the City Controller in a sum not less than fifty (50) per cent of the aggregate of the proposal in accordance with Ordinances and Charter of the City of Sacramento.

A certified check made payable to the City Controller as prescribed in Section 256 of the said Charter for not less than ten per cent of the total of said bid, must accompany each bid.

The right to reject any and all bids is reserved by the City Council under provisions of said Charter.

H. G. DENTON,  
City Clerk, Room 203, City Hall.

### NOTICE TO BIDDERS

#### (Cement Concrete and Asphalt Concrete Shoulders—Stanislaus County)

Pursuant to an order of the Board of Supervisors of the County of Stanislaus, State of California, made and entered on the 15th day of February, 1927, notice is hereby given that sealed bids will be received by the undersigned Clerk of the Board of Supervisors of Stanislaus County, up to and not later than the hour of 2 o'clock p. m. of the 15th day of March, 1927, for the construction of approximately 14,100 linear feet of Cement Concrete shoulders on Woodland Avenue and approximately 5400 linear feet of Cement Concrete shoulders on Dakota Avenue. The shoulder to be constructed four (4) inches thick and two and one-half (2½) feet wide on each side of and adjacent to the present concrete pavement.

And sealed bids for the construction of approximately 14,100 linear feet of Asphaltic Concrete shoulders on Woodland Avenue and approximately 5400 linear feet of Asphaltic Concrete shoulders on Dakota Avenue. The shoulder to be constructed four (4) inches thick and two and one-half (2½) feet wide on each side of and adjacent to the present concrete pavement.

Said avenues are situated in the County of Stanislaus, State of California.

nia, and said shoulders shall be constructed in accordance with the plans and specifications therefore on file in my office, where the same can be inspected by intending bidders during office hours.

All bids must be submitted on special forms and accompanied by a certified check or cashier's check on some solvent bank of the State of California in a sum equal to 10 per cent of the amount of the bid, conditioned that the successful bidder will enter into such contract and furnish such corporate surety bond as may be required within ten days after such award or failing so to do will forfeit the amount of such check as liquidated damages, for such failure.

Copy of plans and specifications and bidding forms can be obtained from the County Surveyor.

The Board reserves the right to reject any or all bids.

C. C. EASTIN,  
Clerk of the Board of Supervisors of the County of Stanislaus, State of Calif.

### NOTICE TO BIDDERS

#### (Outfall Sewer—Yreka)

Notice is hereby given that sealed bids will be received for the construction of an outfall sewer line 16 inches in diameter and about 3400 feet in length for the Town of Yreka City in accordance with plans and specifications on file in the office of the City Clerk. Bids will be received up to 8 P. M., March 10, 1927. A certified check of 10 per cent of the amount bid must accompany the proposal.

Copies of plans and specifications may be obtained from U. F. Brown, City Clerk.

The Board reserves the right to reject any and all bids.

Bids to be endorsed "Bid for Sewer Line."

By order of the Board of Trustees.  
U. F. BROWN, City Clerk.

### NOTICE TO CONTRACTORS

#### (Pumping Plants, Etc.—El Camino Irrigation District)

Sealed proposals will be received by the directors of El Camino Irrigation District, at their office at El Camino ranch, Proberta, Tehama County, Calif., up to 10 o'clock A. M. (10:00 A. M.) March 22, 1927, for furnishing and installing a portion of the irrigation system of said district under the following described contracts; at which time bids will be publicly opened.

Contract No. 1. Drilling and casing three wells numbered 22, 23 and 24 respectively, each approximately three hundred (300) feet deep the first eighty (80) feet or more of each well to be cased with sixteen (16) inch casing and the remainder of each well to be cased with twelve (12) inch casing, all casing to be furnished by the contractor.

Contract No. 2. Furnishing and installing three deep well pumping plants in wells No. 22, 23 and 24, respectively, together with all wiring, switches and other equipment necessary to a complete pumping plant.

Contract No. 3. Furnishing and installing approximately sixty-two thousand (62,000) lineal feet of concrete irrigation pipe 8 to 16 inches in diameter with all necessary surges, air vents, gates and other accessories. This contract to be completed by April 15, 1927.

Bidders may bid on any or all of the contracts, but no contract will be subdivided. The contracts will be awarded to the lowest responsible bidder for each contract. The district reserves the right to reject any or all bids.

Plans, specifications, contracts and maps, showing the locations of the various items are on file and can be inspected at the district's office at Proberta, or at the office of the district's engineer, Fred H. Tibbitts, Alaska Commercial Bldg., San Francisco, California.

Full sets of plans, specifications and contracts may be obtained at the engineer's office or the district office on deposit of \$5.00 for each set, which will be repaid if the set is returned in good condition on or before April 1, 1927.

All proposals shall be accompanied by a certified check or bid bond in the amount of at least 5% of the total amounts of the bid submitted. Certified checks or bid bonds accompanying rejected bids will be returned. They will be returned to successful bidder, conditioned on their executing the contracts and furnishing bonds required within the time stipulated in the proposal. In case of failure to execute the contract or furnish the required bonds within the stipulated time, the certified check or bid bond and the proceeds thereof will become and remain the property of El Camino Irrigation District.

Certified checks and bid bonds will be made out in favor of El Camino Irrigation District.

By order of the board of directors of El Camino Irrigation District, Mrs. Anna L. Phillips, secretary of the board of directors.

#### NOTICE TO BIDDERS

(Sewage Treatment Plant—Yreka)

Notice is hereby given that sealed bids will be received for the construction of a sewage treatment plant for the town of Yreka City in accordance with plans and specifications on file in the office of the City Clerk. Bids will be received up to 8 o'clock P. M., March 10, 1927. A certified check of 10 per cent of the amount bid must accompany the proposal. Copies of plans and specifications may be obtained from C. C. Kennedy, consulting engineer, 543 Call Building, San Francisco, Calif.

The Board reserves the right to reject any and all bids.

Bids to be endorsed "Bid for Septic Tank."

Mail bids to the undersigned.  
By order of the Board of Trustees.  
U. F. BROWN, City Clerk.

#### NOTICE TO BIDDERS

#### NOTICE TO CONTRACTORS

OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 22nd day of March, 1927, at 9:45 A. M., at which time said bids will be opened for the erection and completion of the McChesney School Addition, of the Oakland School District, to be erected on the Southeast Corner of E. 38th Street and 13th Avenue. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

Separate bids will be received for:

(1) General Work.

(2) Awning Type Window Fixtures and Hardware.

(3) Slate Blackboards.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings as his office hereinbefore mentioned. Plans taken out by bidders on or before March 12, 1927, shall be returned on March 12, 1927; plans taken out after March 12, 1927, shall be returned March 23, 1927. If

the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than ten (10%) per cent of the amount bid, provided, however, that in no case shall said check be required to be in excess of Five Thousand (\$5000) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 22nd day of March, 1927, at 9:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMOND,  
Secretary of the Board of Education of Oakland, California.

#### NOTICE TO CONTRACTORS

Notice is hereby given that sealed estimates will be received by the Board of Supervisors of San Mateo County, California, up to the 21st day of March 1927, at 10:00 A. M., for the erection and completion of a reinforced concrete and brick building, known as the San Mateo County Relief Home, and said building will be located on the present site of the old Relief Home recently destroyed by fire.

Sealed estimates will also be received for the erection and completion of a frame addition to the present T. E. Pavilion now situated on the property of the San Mateo County Community Hospital at Beresford.

All of the above estimates will be rendered in accordance with the plans and specifications as submitted by Will H. Toepke, Architect, and as filed with the clerk of the Board of Supervisors on February 14th, 1927, to which bidders are referred.

The estimates on the San Mateo County Relief Home will be submitted as follows, and must be rendered in strict accordance with the plans and specifications as filed:

ESTIMATE No. 1:—Will be in accordance with the plans and specifications as filed and will be on a reinforced concrete, brick and steel frame building with hardwall interior plastered partitions, etc., all as specified.

ESTIMATE No. 2:—Will be an estimate on the same building, changing the interior partition to wooden construction, using 2 x 4 O. P. studs metal lath and changing attic and 2nd story floor slab to wooden joists, all metal lathed.

ESTIMATE No. 3:—Will state the saving of money between the tile walls as specified changing same to heavy canvas painted 5 coats.

NOTE: In addition to the above estimate there will also be separate estimates rendered on steam heating and domestic hot water, also on the plumbing and sewerage, and also electric wiring.

In addition to the estimates called for above there will be further separate estimates required for erection and completion of the frame addition to the present T. E. Pavilion, now erected on the property of Community Hospital at Beresford.

All bidders submitting estimates will be required to submit with their proposal a certified check or certificate of deposit on some responsible Bank or Trust Company in the sum of ten (10) per cent of their bid. Said check to be made payable to the County Treasurer of the County, of San Mateo, and

will be held as security that the bidder will enter into a written contract with the Board of Supervisors of the County of San Mateo, if awarded the contract within ten (10) days, from the date of award. In the event of a breach in the terms under which this check is held, the said check or certificate of deposit will be cashed and the proceeds thereof placed to the credit of the building fund of said County of San Mateo.

The successful bidder will further be required to give a bond from a satisfactory surety company in the sum of fifty (50) per cent of his contract price, conditional for the faithful performance of his contract within the time limited, and to further insure the payment of all claims for labor and material furnished on the work.

The successful bidder will also be required to protect the County against liability arising under the Workmen's Compensation Act and against any and every contingency under which the County might be held liable during the progress of the work connected with the contracts on said hospital building.

The contract will provide for the retention of twenty-five per cent of the contract price for thirty-five (35) days after the completion of the work, and the filing of the notice of completion thereof.

Sealed estimates should be filed with the clerk of the Board of Supervisors, at Redwood City.

The said Board of Supervisors of the said County hereby reserves the right to reject any or all bids.

Plans and specifications can be secured at the Architect's office at Room 714 New Call Building, 72 New Montgomery Street, San Francisco, California.

By order of the Board of Supervisors Dated February 14th, 1927.  
(SEAL)

ELIZABETH M. KNEESE,  
Clerk.

#### NOTICE TO BIDDERS

(Pump—James Irrigation District)

Public notice is hereby given that the Board of Directors of the James Irrigation District hereby calls and will receive until 1 o'clock p. m., on Wednesday, March 23, 1927, and then open at its office in the City of San Joaquin, Fresno County, California, bids or proposals to be addressed, or delivered in person to the Secretary of said Board of Directors, for the following equipment, to-wit:

One (1) screw pump to operate under 5 to 9 ft. head, approximate capacity 15 second feet, with direct connected 440-volt, 60-cycle, 40-degree speed motor (450 to 600 H. P. M.) and automatic starter.

Quote price f. o. b. San Joaquin, California, according to plans and specifications on file in the office of H. M. Crocker, district engineer of the James Irrigation district.

The successful bidder will be required to file a bond in the amount of at least 25% of the bid, with good and sufficient sureties, to be approved by said board.

The right is reserved to reject any and all bids.

Dated this 21st day of February, 1927.

PETER RUSCONI,  
President of the Board and Director.  
R. J. HALE,

Director.  
E. C. BRACKNEY,  
Director.

Attest:  
A. F. C. GREENE,  
Secretary of the Board.

#### INVITATION FOR BIDS

UNITED STATES DEPARTMENT OF AGRICULTURE, BUREAU OF PUBLIC ROADS, District No. 2, San Francisco, California, February 19, 1927—Sealed bids (single copy only) subject to the conditions contained herein, will be received until 10 o'clock A. M. on the 15th day of March, 1927, and then publicly opened, for furnishing all labor and materials and performing all work for constructing the Conner's Pass National Forest Highway project located partly within the Nevada National

Forest, State of Nevada, County of White Pine. The length of the project to be constructed is 5.97 miles and the principal items of work are approximately as follows:

Excavation, unclassified, 78,292 cu. yds.

Overhaul, 9218 sta. yds.

Crushed Rock or Crushed Gravel Surface Course, 3340 cu. yds.

Class A Concrete, 61.56 cu. yds.

Class B Concrete, 70 cu. yds.

Reinforcing Steel, 6386 lbs.

Corrugated metal pipe, placing, 2806 lin. ft.

Bids must be submitted upon the Standard Government Form of Bid and the successful bidder will be required to execute the Standard Government Form of Contract for Construction. These Standard forms together with the plans and specifications may be examined or obtained at the following addresses: District Engineer, Bureau of Public Roads, 807 Sheldon Bldg., San Francisco, California; Geo. W. Borden, State Highway Engineer, Carson City, Nevada; Forest Supervisor, Ely, Nevada. The right is reserved, as the interest of the Government may require, to reject any and all bids, to waive any informality in bids received, and to accept or reject any items of any bid, unless such bid is qualified by specific limitation. — C. H. Sweetser, District Engineer.

#### NOTICE INVITING BIDS

(Highway—Sonoma County)

Office of the Clerk of the Board of Supervisors, Sonoma County, California, February 15th, 1927.

Sealed bids will be received by the Clerk of the Board of Supervisors of Sonoma County, California, at his office until 12 o'clock M., March 15th, 1927, and will be publicly opened and read at 1:30 for the construction of a concrete pavement on the Healdsburg to Forestville highway, Section "A," from Eng. Station 31 plus 32 to 124 plus 50, in Fourth Supervisorial District, in Sonoma County.

Specifications for this work are on file in the office of the Clerk of the Board of Supervisors, and in the office of the County Surveyor, which bidders are hereby referred to.

#### Estimated Quantities

2723.84 cubic yards class "A" concrete in pavement.

23 cubic yards class "A" concrete in culverts.

3400 cubic yards excavation unclassified.

1525 feet reinforcing steel.

26 linear feet 16 inch concrete pipe.

Total estimated cost, \$35,000.

W. S. COULTER,

Clerk of the Board of Supervisors.

The annual statement of the Southern California Edison Company for last year showed net earnings of \$8,859,461.92, an increase of more than a million and a half dollars over 1925. This was equivalent to \$4.16 per share of \$25 par value outstanding during 1926 or 16.66 per cent.

## BRIDGES

**STOCKTON**, San Joaquin Co., Cal.—Nelson Bros., Escalon, awarded cont. by county at \$4475 to const. reinf. conc. bridge over Bear Creek on Jack-Tone Road, Road District No. 3.

**UKIAH**, Mendocino Co., Cal.—Until March 15, 2:30 P. M., bids will be rec. by W. H. Prather, county clerk, to const. county highway bridge and approaches over Noyo river on highway leading from Fort Bragg to town of Caspar. Involves 2 rein. conc. pile piers and slab; twenty-eight 4 pile timber bents, includ. floor system and railing; 5 pile timber bents includ. floor system and railing; one 73-ft. 6-in. A truss; 2500 cu. yds. unclassified excavation includ. cleaning with 500-ft. haul, etc. Rods, bolts and castings to be fur. by county f. o. b. Fort Bragg. Plans obtainable from clerk. J. H. Hoskins, county surveyor.

**YREKA**, Siskiyou Co., Cal.—Bond election will be called by city for \$50,000 to finance reconst. of bridges, sewers and water mains damaged in recent storms.

**SONOMA COUNTY**, Cal.—Following bids rec. Feb. 28 by State Highway Commission to const. bridge over Sonoma Creek 1 mi. west of Schellville, consisting of 100 ft. steel truss span and two 25-ft. conc. approach spans. Proctor-Klegghorn, Rosenberg Bldg., Santa Rosa, \$23,217; Fred J. Maurer, San Francisco, \$23,600; R. McKenzie, Gerber, Cal., \$24,686; Harry Thorsen, Helena, Cal., \$24,868; R. Kress Smith, Santa Rosa, \$26,940; Noble Bros., San Jose, \$27,709; Roscus Colletta, San Francisco, \$28,300; McDonald and Maggiora, Sausalito, \$28,423; Healy-Tibbitts, San Francisco, \$28,768; A. W. Kitchen, San Francisco, \$29,660. Engineer's estimate, \$24,859. All bids taken under advisement.

**WASHINGTON**, D. C.—Const. of a bridge to cost \$70,000, across the Trinity River within the boundaries of the Hoopa Valley Indian Reservation in California is proposed in a bill passed by the House and sent to the Senate.

**RIVERSIDE**, Cal.—Robert V. Leeson of Los Angeles has been appointed consulting engineer on proposed Victoria Ave. bridge. Est. cost, \$150,000.

**SAN DIEGO**, Cal.—Reports from San Diego indicate that in rebuilding county bridge over San Pasqual River, the driving of piling for a distance of 1000 lin. ft. will be required.

**SANTA ANA**, Cal.—Olive and West Orange Protective Assn. has adopted resolution recommending to chamber of commerce and official bodies that the present railroad bridge over Santa Ana River east and north of Olive be replaced by a 4-span steel bridge. The bridge is a Santa Fe Ry. structure.

**RIVERSIDE**, Cal.—County estimates damage to county bridges in recent storm at \$400,000. T. C. Jameson, chairman of the board.

## DREDGING, HARBOR WORKS AND EXCAVATIONS

**LOS ANGELES**, Cal.—A flood control issue of \$30,000,000 will probably be voted on at April election. This issue will provide for flood control work in San Fernando Valley. Henry W. Wright is county supervisor for this district.

**TIBURON**, Marin Co., Cal.—San Francisco Bridge Co., Nevada Bank Bldg., San Francisco, awarded cont. by Corinthian Yacht Club for approx. 300,000 cu. yds. dredging in channel at Tiburon. Baldwin Bros., Berkeley, awarded cont. to const. culverts in connection with club imps.

**SAN RAFAEL**, Marin Co., Cal.—County Eng. Rodney E. McKsner making estimates of cost for rock fill to replace the present bridge between Tiburon and Belvedere; \$37,000 is already available for the work from publicly subscribed funds.

**WASHINGTON**, D. C.—Appropriation of \$1,000,000 for protection of Palo Verde and Imperial Valleys from Colorado River floods is proposed in an amendment to the second deficiency bill offered by Senator Samuel Shortridge of California.

**SAN BERNARDINO**, Cal.—County plans formation of a special imp. dist. to finance \$200,000 bond issue for flood control work, the principal item being a 6-mile channel extending south of Colton Ave. highway from the Bryn Mawr district to the Santa Ana River south of this city. Howard L. Way, county surveyor.

**MARTINEZ**, Contra Costa Co., Cal.—Until April 4, bids will be rec. by city for reclamation of municipally owned waterfront lands, under \$75,000 bond issue. A. W. Pioda, consulting engineer. Plans on file in office of city clerk.

**NEWPORT BEACH**, Cal.—Paul E. Kressly, city engineer, H. W. Hellman Bldg., Los Angeles, has announced that Capt. H. D. Pope, a former U. S. government engineer, will have charge of the construction of the two jetties to be built under the \$500,000 bond issue voted Feb. 14.

**HUMBOLDT COUNTY**, Cal.—Construction of four channels in Humboldt Harbor and bay is recommended by the War Department. The work would cost \$187,000 with \$14,000 annually for maintenance. The channels would supplement work already authorized by which it is hoped to promote the bay's commerce.

## IRRIGATION PROJECTS

**PHOENIX**, Ariz.—\$500,000 bond issue of Roosevelt Water Conservation District approved by state certification board. The funds will be used for lining main canal and several auxiliary canals east of Mesa, involving about 3,650,000 sq. ft. concrete lining.

## CLEMENT WEATHER HINDERS LOS ANGELES BUILDING

Los Angeles' building total for February, 1927, fell a million dollars short of that for the same month a year ago, attributable in part to the fact that rather conditions were unfavorable for construction operations. During the month the city building department issued 2476 permits with an estimated valuation of \$7,574,354. For January, 1927, the number of permits issued was 44 with an estimated valuation of \$129,749, and for February a year ago the number of permits was 2783 with an estimated valuation of \$8,542,370. For the first two months of the current year Los Angeles' building total is slightly more than for the corresponding period last year. February building was fairly well balanced. Class D all-frame construction fell slightly below normal. Permits were issued for five Class A buildings estimated to cost \$1,679,000, three Class B buildings estimated to cost \$343,000, and 46 Class C buildings estimated to cost \$952,167. Class D all-frame construction amounted to \$3,086,868 for 1565 structures. Housing operations for February amounted to \$4,041,281 for 698 dwellings and apartment houses, or 28.1 per cent of the entire number of permits, and 53.3 per cent of the entire valuation for the month. Accommodations were provided for 1186 families. No material change in general conditions affecting building were recorded during February. Spring opens with prospects favorable for at least a normal volume of construction.

## POWER DEVELOPMENT PERMITS GRANTED BY STATE

Two water permits, authorizing construction work totaling nearly \$7,000,000 in Placer County, have been granted by Edward Hyatt Jr., chief of the Division of Water Rights, State Department of Public Works, to the American River Water & Power Company.

The company, initiated by E. P. Tuttle of Auburn, proposes to store water in French Meadows on the Middle Fork of the American River and, with two powerhouses, to develop approximately 59,000 theoretical horsepower of electric energy.

Since the applications were first filed, about four years ago, Tuttle's interests have been taken over partly or wholly by Fred Dewhirst of San Francisco, who promoted the company's activities during the past several months.

One diversion at French Meadows would involve the expenditure of \$5,006,400 for the development of 31,818 horsepower of energy, while the other power plant, costing \$1,717,800, would develop 27,555 horsepower.

## STEEL BOILER OUTPUT REPORTED BY MANUFACTURERS

Orders were received for 8931 steel boilers during the first half of 1926 by 58 manufacturers, comprising most of the leading concerns in the industry, according to a preliminary report, while shipments by these firms for the full year 1925 totaled 13,417 boilers, and in 1924 they shipped 12,215 boilers. More boilers were shipped in 1925 than in any other year since the war up to that time, but in square footage 1920 shipments were the highest, followed by those of 1923. Of the various types of boilers reported only steel heating stationary boilers and Scotch marine boilers showed increases over 1924 both in number and in square feet of heating surface.

The 58 reporting firms indicated that on the average between 1919 and 1925, 8960 persons were employed in their boiler departments, 880 of these being in the executive, engineering or sales organizations; 7210 in the shops and 870 in erection work. These firms used annually during that period 90,087 net tons of steel plate, 17,095 of structural shapes, 8376 of bars and 53,253 of tubes. They also reported 23,495 gross tons of castings.

Alleging that he has never received his fees for preparing plans and specifications for the Madison and Marshall schools, M. J. Lyon, San Francisco architect, has filed a claim with the Board of Supervisors for services performed twenty years ago. Lyon does not specify the amount that he believes is owed to him by the city. Both schools were erected in 1908. In his letter the architect declares that he has been informed by City Attorney John J. O'Toole that the Board of Supervisors can legally pay his fee.

## CONTRACTORS WARNED TO RUSH OAKLAND SCHOOL

Demand that Sampel & Cody, San Francisco contractors, show cause why their San Leandro Junior High School contract should not be abrogated, is forwarded to the concern by the Oakland Board of Education.

Resolution citing the builders to appear before District Attorney Earl Warren was adopted by the Board when W. E. Whalin, superintendent of school construction, reported that they apparently have abandoned the job.

While 50 per cent of the interior work of the \$350,000 school remains incomplete, the contractors have removed all carpenters from the job, thus delaying electrical, plumbing and other sub-contractors in their work, Whalin said.

Although the time limit for erecting the building was reached Nov. 9 of last year, the school is now only 85 per cent complete, according to Whalin.

"I have tried repeatedly," he added, "to get faster action, but without success."

The Board will seek Warren's advice as to what procedure to follow in terminating the contract and either completing the school itself or having the contractors' bondsmen finish the work.

## NORMAN F. MARSH ANNOUNCES EXPANSION PROGRAM

Architect Norman F. Marsh of Los Angeles announces the expansion of his office organization which will be conducted under the name of Norman F. Marsh & Co., architects and engineers. The new members of the firm are D. D. Smith, architect and engineer, of Venice, and Herbert J. Powell. Mr. Marsh, who will be the administrative executive of the firm, has practiced architecture in Los Angeles for the past twenty-seven years and has specialized in schools, churches and public buildings. He is a graduate of the University of Illinois and an honorary member of Alpha Rho Chi, national society of architectural students. Mr. Smith, who will have charge of engineering and office management, is a graduate of the college of engineering of Stanford University and an engineer of note. During the World War he was office engineer in charge of construction of military works at Brest, France, which cost \$9,000,000, for the United States Government. Mr. Powell, who will be in charge of design and drafting, is a graduate of the college of architecture at Harvard University. He was the winner of a scholarship and studied abroad for a year. Prior to coming to Los Angeles he was connected with several of the largest architectural offices in New York City.

Pasadena, Calif., Realty Board is considering the award annually of a medal for the best architectural achievement among the commercial buildings of that city.

# THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Developments in bridge design during the past few years will soon make the old narrow bridge with a bad turn at either end a thing of the past, according to the California State Automobile Association. Standard width of state highway bridges prior to 1924 was 21 feet, the Association Highways Bureau pointed out yesterday. Now bridges are being built 24 feet wide for 20-foot roads and where traffic justifies are being made wider to correspond to the roadway. There are a number of 30-foot bridges and a few 40 and 46-foot structures have been built recently. The former custom of constructing bridges at right angles to the stream often resulted in dangerous sharp turns at bridge approaches.

R. Amory, specializing in landscape planning, wood and concrete garden furniture and farm concrete problems, has opened offices at 824 Monadnock Bldg., San Francisco.

Berkeley voters will be asked to sanction a \$1,000,000 bond issue for school improvements, according to Mayor Frank D. Stringham, ex-officio member of the Board of Education. A bond issue for \$2,592,000 was defeated at the general election last November by an overwhelming majority. Reduction of the amount of the issue may result in passage, Mayor Stringham says.

Approval of a uniform state electrical inspection ordinance by Fresno County was stressed in a talk by E. J. Crawford before the Fresno Engineers' Club recently. The speaker said that in many cases, work done in suburban areas must be changed and bettered to conform to city requirements when such areas are taken into the municipality.

On February 19 there were 58 strikes before the Department of Labor for settlement and in addition 14 controversies which had not reached the strike stage. Total number of cases pending, 62—11 of which are new. The 11 new cases may be compared with 9 and 7 of the first and second weeks preceding.

San Francisco Board of Supervisors contemplates a bond issue to finance construction of a "step-down" power station in connection with Hetch Hetchy power project. A plant costing from \$800,000 to \$1,000,000 is under consideration.

Despite adverse weather conditions, 440 new buildings were started in East Bay cities during the month of February, according to the East Bay Water Company. Of the total 278 buildings were started in Oakland, 87 in Berkeley, 47 in Richmond and 28 in Alameda.

Legal and Engineering Departments of the City and County of San Francisco and the Spring Valley Water Company are investigating the proposal to construct a \$2,000,000 water main to bring a greater supply of water to San Francisco from the San Andreas Reservoir.

Assemblyman Fred G. Noyes of Yuba City seeks a \$200,000 appropriation for the construction of a causeway on the Yuba City-Woodland road over the Sutter by-pass. The bill is identical with one vetoed two years ago by Governor Friend W. Richardson.

Ways and means of lowering the cost of brick in the wall occupied the center of the stage at the convention of brick manufacturers held in Chicago recently.

C. F. Hatch, an official of the Monticello Steamship Company at Vallejo, admits his name has been mentioned for the position as agent for the U. S. Housing Corporation in that city. Hatch, if he accepts the offer, would succeed Linton Morgan, who recently tendered his resignation following a controversy over the sale of the Bay Terrace water system in Vallejo.

Every plumber in Woodland will be required to take an examination on plumbing and city ordinances referring to plumbing, if plans proposed by the city trustees are adopted. R. P. Keith, newly chosen sanitary inspector, will probably be appointed city building inspector.

January shipments of steel-furniture stock goods, as reported to the Department of Commerce by 33 manufacturers in the business group were \$2,697,857 as compared with \$2,934,331 in December and \$28,859,393 in January, 1926. January shipments of shelving, compiled from the reports of 15 companies, were \$553,539 as compared with \$621,773 in December and \$578,161 a year ago.

## TRADE NOTES

Albert A. Giuste has purchased the Dinuba Cement Pipe Works formerly owned by Lloyd & Oakley at Dinuba. Giusti has been in business in Dinuba for the past nine years.

Announcement is made by the Simplex Manufacturing Co. that a patent has been granted on its metal louver ventilator for cooler closets. R. J. Miller, a member of the concern, is the inventor. The Simplex Co. are also the manufacturers of Simplex anti-proof shelves and shelf supports, other Miller inventions. The company operates a plant at 2929 Elmwood Ave., East Oakland.

The co-partnership heretofore known as the Santa Clara Paving Company has been dissolved and M. Zekich and V. Sijakovich have purchased the interests of P. V. Matich, the third member of the company. Zekich and Sijakovich, however, will continue to operate under the name of Santa Clara Paving Company.

Two years ago Gunn, Carle & Co., announced their affiliation with the Pacific Building Materials Company. Today, as a result of the association, the company announces the complete merger of the two corporations, with increased capital. No change in personnel is involved. The merger was effective February 21. Officers of the company are: Chas. M. Gunn, president; Chas. W. Carle, vice-president; O. P. Shelley, vice-president and Earl H. Swing, secretary.

William D. Evans Plumbing Company, 6607 Telegraph Ave., Oakland, has displaced the former firm of McNeal & Evans. The interest of McNeal has been purchased by his former partner, who is now operating the business alone.

Walter Moore, formerly connected with the San Francisco office of the Pacific Steel Boiler Corporation under J. Harry Russell, is in charge of newly opened offices for that company in the Story Building, Los Angeles.

Little River Redwood Company of Eureka has purchased a site with a 380-foot frontage in North F. Street, Madera, on which it will establish a distributing yard for the San Joaquin Valley.

Harry Marker, former representative in the East Bay District for the Mueller Company is now connected with the C. W. Abbott Company, wholesale plumbing concern. His territory covers the East Bay area into the San Joaquin Valley. Marker maintains headquarters at Oakland.

Clarence E. Musto, a member of the firm of Musto-Keenan Co., marble and tile contractors of San Francisco and Los Angeles, left an estate estimated to be worth \$1,000,000, according to the will admitted to probate by Judge Thomas F. Graham of San Francisco. The will leaves a third of the estate to his widow, Mrs. A. Musto and the balance to their three children.

Delano Hardware Co. has filed articles of incorporation at Bakersfield. The company is capitalized for \$70,000 and has the following directors, all of Delano, Calif.: Andre Vieux, O. A. Clasen, Ward Robertson, Ellen Bowhay, G. T. Clasen and Peter Rostain.

Probability of the establishment of a new industry for the manufacture of cement, pottery and brick in Oakdale, or at Cooperstown, 20 miles southeast of the Sierra Railway in Stanislaus County, looms as a result of investigations being carried on for some ten months which disclose huge deposits of clay suitable for the manufacture of such products. The deposits are on the Lydberg Brothers Ranch just beyond Cooperstown. From the tests made it has been found that a high grade of pottery and brick can be manufactured from the clay, as well as a fine, white cement. Of two tests made the clay showed 72.80 silica, 2.63 of iron and 17.47 aluminum, with some calcium and magnesite. Among those who have made surveys of the deposits is the Santa Fe Railroad (Industrial department). Several eastern concerns have sent personal representatives to look over the field.

J. G. Duane & Sons, specializing in electrical contracting, have opened shop and office quarters at 505 Main Street, Martinez.

# Standard Of Living Depends Upon Standard Of Production

"The standard of living depends upon the standard of production. If the latter is low, the former cannot be high. The world abounds with proofs of the fact that the nation which produces little enjoys little. . . . If all men would realize that value is the sole basis of industry; that nothing can be taken unless an equivalent is given, half the ideas that create strikes and disturbances would be killed instantly, and the other half would cease to influence." The above quotation is taken from a book entitled "What We Want and Where We Are," written shortly after the war by A. W. Appleton, an Englishman and one of the greatest labor leaders the world has ever seen.

It is indisputable that the vast majority of strikes are caused through lack of understanding of the economic principles involved. Production is the basis upon which wages depend and where production is low there must of necessity be a low wage rate and consequently a low standard of living. We all know that the standard of living in this country is the highest

of any of the countries of the world and we also know that it is higher today than ever before. This has been made possible through the high wages which American workers have enjoyed during the past few years. If labor wants to continue to enjoy this high standard of living, and labor leaders throughout the country state that labor will never be contented with a lower standard of living, then it is up to the men themselves to safeguard their present economic position by maintaining the highest possible degree of production. This cannot be done through a shortening of the working week, as no man can produce in 40 hours what he formerly did in 44.

Whether the present high standard of living now being enjoyed by labor is maintained or a reversion to the lower standard of former years is brought about, lies entirely with labor itself. Labor can, if it so desires, insure the maintenance of present standards if it assumes a sane and reasonable attitude in the question of production.—(Bulletin, National Association of Building Trades Employers.)

in arrangement and adapted to general use. The jury of award will consist of five architects of national repute selected from representative sections of the United States. The program of the competition provides that the jury of award shall give consideration to the following points:

- "1. Novelty and originality in the treatment and use of wood native to the Pacific northwest.
- "2. Excellence and ingenuity of plans.
- "3. Architectural merit of the design and fitness of the application to a frame house.
- "4. Practicability of construction.
- "5. Fitness of the design as a whole to meet the needs of the problem."

Excellence of drawings also will be given consideration by the jury, but will rate a small percentage in proportion to the other points. The competition will be conducted under the code of the American Institute of Architects. "The special purpose and intent of this Competition," according to the statement of the committee of architects in charge, "is to develop and bring forth the uses, applications, and methods of construction and finishing of the woods of the Pacific Northwest, Douglas Fir, West Coast Hemlock, Sitka Spruce and Western Red Cedar. It is the thought of the Bureau that the methods of use and the beauty in treatment of these woods has as yet been merely touched upon and that applied ingenuity will bring forth new and effective developments, both in using and beautifying these products. It is hoped that the most competent architectural designer will be encouraged to bring their talent to bear in ingenious ways towards most artistic results."

## Hutchinson Lumber Sale Is Authorized By Superior Court

Sale of the entire holdings of the Hutchinson Lumber Company of Oroville to satisfy a second mortgage of \$1,054,525.33 held by the Capital City Bank of North Carolina is authorized by a decree of foreclosure and order of sale issued by the superior court. The decree was granted by Judge Ragland Tuttle of Nevada County, who is residing in the case.

The judgment was issued on stipulation of attorneys. Attorneys' fees for the plaintiff were fixed at \$30,000. Cost of the suit aggregating \$735.65 was ordered paid by the Hutchinson company.

The case had been pending in the superior court since last August. Under the order the properties will be sold by Commissioner Carleton Gray at an auction in Oroville. Gray

is an Oroville representative of the lumber companies. The properties will be sold as a whole.

The amount payable to the bank, \$1,054,525.33, will accumulate interest at the rate of 7 per cent from March 4 to the date of the sale. Holders of any bonds secured by the mortgage may bid for the purchase of the property at the auction.

The decree sets forth that providing the money arising from the sale is insufficient to pay the amount due the plaintiff, the deficiency shall be paid by the lumber company, together with 7 per cent interest. The foreclosure will have no effect on operation of the lumber company's mill and logging headquarters, it was made known. Operations will be resumed shortly.

## COLUMBIA STEEL COMPANY SHOWS LARGE GAIN

Columbia Steel Corporation increased its net income \$312,328 to \$1,090,271 after interest and Federal taxes, the annual report of President Wiggington E. Creed to stockholders at the annual meeting revealed.

After a charge for preferred dividends, which, however, are still being paid in common stock to release funds for development, the net is equal to about 36 cents a share on the 1,180,209 shares of common outstanding December 31, last. The total net was equal to \$1.09 a share on preferred.

While the company has some distance to go yet, the report indicates general satisfactory gains. Sales exceeded \$11,977,000.

President Creed told stockholders business conditions in 1926 proved to be substantially identical with those of the preceding year—good volume; keen competition, both domestic and foreign; low prices and small profits. If any difference were to be noted, it would be the recession of prices to still lower levels.

City Engineer W. D. Clark of Bakersfield is preparing plans to pave eighteen blocks of streets. Bids will be asked on three types of pavement in an effort to dispel rumors that a "paving trust" controls the city council.

Action of the Oakland city council in opposing any San Francisco bay bridge which would "in any way interfere with the Oakland harbor development program" has received the endorsement of the Oakland Port Commission, it is announced by G. B. Hegardt, city port manager.

## Architectural Competition Is Announced By West Coast Lumbermen

Announcement was made at Seattle, Wash., of the details of the nationwide architectural competition for the best designs for a residence and garage built principally of wood, with \$500 in cash awards offered by C. W. Wason, prominent Seattle lumberman and the West Coast Lumber Bureau. This contest is sponsored by and conducted under the auspices of the Washington State Chapter American Institute of Architects and is known as the "West Coast Wood Architectural Competition." It is open to any architect, architectural firm, designer or draftsman in the United States.

J. Lister Holmes, A. I. A., of Seattle, has been selected as professional adviser and architects composing the committee on competitions for the chapter are: Harlan Thomas,

chairman; J. Lister Holmes, vice chairman; William J. Bain; David J. Myers and Robert F. McClelland, all of Seattle and Nelson J. Morrison of Tacoma.

The competition will cost at 5 P. M. on August 1, 1927, and the first prize design will receive \$2000 in cash, the second prize \$500 and ten designs receiving favorable mention will be awarded \$100 each.

The program of the competition provides that the subject of the design shall be an attractive all-year-round residence and garage, built principally of wood, the house containing not more than seven principal rooms confined, with the garage, to an immediate site of 12,000 square feet. The garage may either be a part of the house or detached. The plans shall be convenient

## ALONG the LINE

The Alliance Engineers, with main offices in the Lissner Building, Los Angeles, have opened offices at 417 Phelan Building, San Francisco. For the past ten years they have served the architects and contractors in Southern California, in the taking off of quantities and preliminary estimates and now offer the same service to architects and contractors in this section. Mr. C. L. Weeks, president of the organization, and also first vice-president of the American Institute of Quantity Surveyors, is at the head of the Los Angeles office, and Mr. R. H. Zimmerman, formerly general manager of the Los Angeles office, will have charge of the San Francisco division. They employ a staff of practical engineers who have a thorough knowledge of construction and market conditions.

Under an act introduced by Senator Berney of Churchill County, the provision of the Nevada state highway law which authorizes the retaining of ten per cent on contracts executed by the highway department for the protection of creditors will be amended, giving to the highway engineer a discretion in making said payments before the work is completed. The amendment further releases the contractor from liquidated damages because of delays in the completion of work due to severe weather conditions or other causes. It further authorizes suits to be brought against the highway department for legal obligations insured in the construction, repair, or alteration of highways.

The California State Civil Service Commission, 331 Forum Building, Sacramento, announces examinations will be held shortly in San Francisco, Sacramento and Los Angeles, for architectural and structural drafting, designing and engineering positions. The receipt of applications will close March 31. Complete particulars are obtainable on request to the commission offices at Sacramento.

P. J. Van Loben Sels, 76, engineer, died at his home, 520 Sycamore St., Oakland, March 3.

Construction of an \$8,000,000 power and irrigation project on the American river is blocked by an opinion rendered by Attorney General U. S. Webb, which holds that sale by the state of a tract of Folsom prison land to the American River Hydro-Electric Company is illegal. The attorney general's opinion is based on the following technicalities:

1. That the title of the bill that was passed by the legislature during the 1925 session, enables the sale of 560 acres of prison yard land, is misleading.
2. That the body of the bill goes beyond the purview of the title.
3. That the contract drawn between the state and the power company goes beyond the purview of the title of the bill.

P. L. Boneysteel, maintenance engineer for the Nevada State Highway Department for several years, has resigned to accept a position with a tire concern of Sacramento, Cal. The resignation is effective March 7. Arthur Loforth, division engineer at Elko, has been named to fill the vacancy.

## Pacific Coast Building In February Shows Slowing Down

A further slowing down of building activity in Pacific Coast cities is evidenced by the tabulations of building permits issued during February as reported in the National Monthly Building Survey of S. W. Straus & Co. Both in point of the number of permits issued, in total of building costs, and in the character of construction as indicated by the average cost item, the February totals reflect a reduction in building program.

A grand total of 10,904 building permits were issued during February in 95 cities of the Pacific Coast area. These call for an aggregate investment of \$31,373,541 in new construction. This is 6% below the comparable figure for February of 1926 and is 5% below that of January of this year. The average building permit issued in February calls for \$2872 in building costs, while the average for January was \$3332.

Many of the cities, however, report substantial increases; 25 of the 57 California cities showing gains over the January totals, as do all of the Idaho cities 8 of the 11 Washington cities, 6 of the 8 in British Columbia, 5 of the 8 in Oregon, Tucson in Arizona and Salt Lake City in Utah. Of the 95 cities comprised in the Straus survey, 51 show gains over January and 48 show gains over last February's totals.

The following are the official February, 1927, construction cost figures, as reported by the building department executives of 95 cities, comprised in the Pacific Coast Section Survey:

City	February, 1927 No.	February, 1927 Cost	February, 1926	January, 1927
<b>CALIFORNIA</b>				
Alameda	58	\$ 85,574	\$ 195,708	\$ 59,46

## Court Decision Broadens Power Of Enforcement Of Architects' Law

By A. M. Edelman, Secretary, California State Board of Architecture, Southern District, in "The Inspector"

A recent decision handed down in the Court of Appeal, Second Appellate District, Division 2, of the State of California, greatly strengthens the power of enforcing the state law against persons who practice as architects without being licensed.

This decision will aid in the prosecution of unlicensed persons who practice as architects under misnomers and aliases of "Architects Inc.," "Architecture and Engineering," "Architectural Designers" and similar titles that mislead the public to believe they are licensed architects.

The state law in question is not an enactment to protect architects. It is law passed by the California Legislature to protect the public.

The substance of the case before the court was that one who styled himself as an "architectural engineer" agreed by contract in writing to "make all necessary plans and specifications, supervise the bids from subcontractors and supervise the construction of a proposed new Class "C" theatre and office building. It was stipulated that compensation for the service should be 10 per cent of the total cost of the building; but that, should the owner fail to negotiate a loan for the purpose of constructing the building, or decide not to build, the architectural engineer should be paid \$200 "for his sketches and services."

It appears that the architectural engineer furnished the owner an original sketch and plans and specifications for the building, and received from the owner on account of such service the sum of \$100. Thereafter the owner seems to have entered into a contract with an architect, who procured a loan for the owner, prepared other and different plans and specifications, and a theatre building was erected in accordance with the new plans.

### Sues for Commissions

The original architectural engineer contended that he was not permitted to fulfill his part of the contract and instituted action to collect the sum of

\$1072, alleged balance of commissions due him under the terms of the original contract.

The trial court found that the building was erected at a total cost of \$23,000; that the defendants refused to permit the plaintiff to supervise the bids or the erection of the building; that the reasonable value of the services performed was \$575. Of this amount \$475 remained unpaid and judgment was given for that amount.

The defendants or owner appealed from the judgment of the trial court. The principal ground of attack upon the judgment was that the architectural engineer had no license, did not inform the owner that he was not an architect within the meaning of the statute, and that the contract was illegal and void.

It appears that before the trial court the architectural engineer in question testified that although he had been preparing plans and specifications and supervising construction work for about ten years, and was "doing it every day," he did not have, and never had, a license from the State Board of Architecture, as required by the Act of 1903 (p. 522). From his testimony, it is clear that he did not have such license, and that he did not intend to obtain one.

The decision of the Appellate Court in part is here quoted:

### Must Have Certificate

"It is urged on behalf of the respondent that since he at no time represented himself to be an architect, but only an architectural engineer, he did not violate the statute above quoted. The idea seemed to be that unless it appears that he violated every provision of the law in question, the mere fact that he transgressed one of its inhibitions, is of no consequence. But for any person to practice architecture in this state without a certificate, is made a misdemeanor, and this, regardless of whether or not he may also have held himself out to the public or to any person as an architect.

"Under this statute, there is but one way in which a person who has no cer-

tificate can legally render such architectural services as were to be performed by respondent. Such person can inform the person for whom such plans or data are furnished, that he, the person furnishing the plans, is not a certified architect. Therefore, if it be shown that the respondent practiced architecture, the burden is clearly upon him to prove that he brought himself within the exception just quoted by giving the appellant the required information. It is not contended that the respondent did this. Under such circumstances, the task of the court is a simple one. It is merely to decide whether or not the work contracted to be performed constituted practicing architecture.

"The rule which brings one within the classification of 'architect' has been declared in various jurisdictions. In every instance where the term has arisen for interpretation, so far as we are able to ascertain, it has been held that one who makes plans and specifications for a building, and superintends the construction, is an 'architect.' In fact, the rule most commonly applied does not embrace the duty of supervision. . . . In *Bacigalupi vs. Phoenix Bldg. and Const. Co.*, 14 Cal. App. 632, 112 Pac. 892, it was held that although a person who prepared the plans and specifications was not a professional but was a contractor and builder, yet, having performed such services, he was in that instance an architect. Clearly the services contracted to be rendered by Payne were those of an architect.

"But respondent attempts to avoid the effect of this upon the theory that, although he was the contracting party, prepared the plans and specifications, and agreed to supervise the construction, the contract was legal because he was in reality not the principal architect. However, the latter was not a party to the contract.

### Similar Case Cited

"In *Wedgewood vs. Jorgens*, 190 Mich. 620, 157 N. W. 360, a city ordinance was involved which embodied provisions similar to those contained in the statute here under consideration. It was here said: 'An architect as defined by the ordinance, employs an unlicensed architect to prepare plans and specifications for one of his clients. Does the rule apply in such a case? We think it does. Plaintiff must have known that, as a builder, contractor, and overseer of construction, he was an architect within the meaning of the ordinance. He knew that he had no license, and he admits that he knew that Krieger the architect, who actually prepared the plans, had no license. Whether plaintiff be regarded as an unlicensed architect, or whether he be regarded as a mere contractor and builder, and knowingly employed an unlicensed architect to do the work, he is barred under the rule from recovering on the contract.

"The Act here in controversy forbids the practice of architecture by an unlicensed person and makes it a misdemeanor, although it does not prevent him from furnishing plans or data if he shall first have fully informed the person for whom they are intended that he has not been certified. This latter duty the respondent did not observe.

"It has frequently been held that a statute or ordinance requiring the payment of a license and procurement of a certificate to perform the services of an insurance agent, attorney, contractor and builder, freight solicitor, insurance broker, peddler, architect, plumber, real estate agent, or stock broker, is not to be construed as a revenue law alone, but as a police measure, for the protection of the public, and that a contract of an unlicensed person for the furnishing of such services will not be upheld.

"It is to be noticed that every case from every court recognizes that when a statute has been made for the protection of the public, a contract in violation of its provisions is void.

"We conclude that respondent practiced architecture in contravention of the provisions of the Act regulating the practice of architecture, and that, therefore, the contract upon which recovery is sought, was illegal and void."

# ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

## A. G. C. CHAPTER IS FORMED AT SACRAMENTO

Looking to an improvement of conditions in the building industry, seven Sacramento contractors have joined to organize the Sacramento chapter of the Associated General Contractors of America.

This is according to a recent announcement by field agents of the general contractors, who, for months past have been co-operating with Sacramento contractors and the national organization to perfect the Sacramento organization.

The contractors and contracting firms who are charter members of the chapter are Ira C. Boss, the Campbell Construction Company, the Holdener Construction Company, George D. Huddnutt, Inc., W. C. Keating, H. W. Robertson and Siller Brothers.

The McGillivray Construction Company, for several months allied with the San Francisco chapter, will, it has been indicated join the Sacramento chapter.

An expansion of the chapter, to include possibly Marysville, Chico, Stockton and other regional cities, is tentatively scheduled.

"The fundamental requirement for membership in the Associated General Contractors of America," the announcement said, "is based upon the ability of each member to subscribe to and maintain their principles of skill, integrity and responsibility."

## S. F. BUILDERS' EXCHANGE TO ELECT DIRECTORS

Sixteen crafts, representing every branch of the construction industry, seek to place a member of their craft on the Board of Directors of the San Francisco Builders' Exchange. Eleven directors are to be elected. The election will be held Monday, March 21. Candidates and the craft they represent follow: C. G. Berg, Common Brick Mfrs.; S. F. Cohn, Master Painters & Decorators; R. J. H. Forbes, Concrete Contractors; W. H. George, Building Material Dealers; Emil Hogberg, Masons and Builders; J. A. Hart, Millwork Institute of Calif.; S. F. Branch; Jos. B. Keenan, Marble Dealers; Victor Lemoge, Elec. Contractors & Dealers; J. D. McGillivray, Granite Mfrs.; Alexander Mennle, Master Plasterers, John Mullen, Cabinet Mfrs.; James H. Pinkerton, Master Plumbers; Leslie F. Scherling, Council of Ormnt'l. Iron Mfrs.; Edw. L. Soule, Reinforcing Steel Dealers; A. H. Wilhelm, General Contractors of San Francisco; Geo. A. Wieland, Sheet Metal Contractors.

Chas. J. Ullrich, president of the National Chapter, American Association of Engineers, in addressing the Modesto, Calif., Chapter, at a recent meeting dwelt upon the tendency of engineers to enter unions and take up unionism. This, he said, should be discouraged. He also told of the fight of the American Association of Engineers to eliminate engineering correspondence schools, declaring that certain correspondence schools are incorrect in their teachings and are detrimental to the profession.

## PORTLAND MAKING PLUMBERS FOR THE FUTURE

The plumbing department of the Vocational Schools at Portland, Ore., reports approximately 40 enrolled, 15 of whom are journeymen plumbers, seven first or second year apprentices, with the remainder third, fourth and fifth year students. Many of the apprentices have accumulated substantial savings accounts, money which has been paid them for their services while enrolled in the school. The savings are to be turned over to the boys when they have completed the five-year course. William Root is instructor.

## ANNUAL MEETING

The annual meeting of the San Francisco Builders' Exchange will be held March 21, at 11 A. M. in the Exchange quarters, 180 Jessie street. The election of directors for the ensuing year will be held at the same time, according to R. J. H. Forbes, secretary.

## SCHAEFFLE NAMED MANAGER OF MASTER PLUMBERS ASS'N.

Ernest Schaeffle has been appointed manager of the San Francisco Master Plumbers' Association. Schaeffle has a wide variety of business and organization experience, including management of the American Plan Promotion Department of the Industrial Association of San Francisco, supervision of the State Fish & Game Commission, management of the Meat Council of Northern California and management of one of the largest meat packing plants in China. Under his direction the local Master Plumbers' Association is outlining a constructive program for the current year.

## ARCHITECTS ORGANIZE

At a meeting of 14 certified architects of San Diego a temporary organization was effected by election of Wm. H. Wheeler as temporary chairman and John S. Siebert as temporary secretary. A permanent organization is proposed, preferably one affiliated with the American Institute of Architecture.

Santa Monica Bay Master Plumbers' Association is preparing a labor agreement between master plumbers and journeymen, to be based in the present successful arrangement of the Oakland, Berkeley and Alameda Master Plumbers' Association. W. E. Wilmot is president of the southern organization.

Santa Rosa carpenters will receive \$9 a day effective April 1, according to word from that city. In most instances the increase will mean a \$1 a day raise. Santa Rosa painters, plumbers and other branches of the construction industry are said to have allied themselves with the contractors who intend to give preference to local labor and supply dealers.

## AUTO GRADE CROSSING BILL IS AMENDED

A definite program to eliminate grade crossings was favored by the senate committee on taxation and revenue in consideration of a measure by Senator H. C. Jones of San Jose.

He proposes a new general law to provide 5 per cent of state funds raised by taxation for state highway construction shall be used for the purpose.

R. M. Morton, state highway engineer, appeared before the committee and said there are 230 grade crossings which must be eliminated, and the Jones bill would abolish about 20 a year.

The committee voted to amend the bill providing that the expenditures be taken from the reconstruction fund.

## YOSEMITE CEMENT COMPANY NAMES FRESNO MANAGER

Appointment of Dewey A. Schlemmer as sales manager for the Yosemite Portland Cement Company and plan for opening a sales office for the company at Fresno are announced by A. Emory Wisnon, one of the organizers of the corporation. Schlemmer will make his headquarters in the Pacific Southwest Bank Building, where the company has had general offices and its stock sales department for the last year. Schlemmer is now engaged in making a survey of the cement market in preparation for distribution of the product from the company's Merced County plant late in May, when it is expected to get the new plant into operation.

For a number of years Schlemmer was sales manager for large cement manufacturing companies in California in the East, and more recently has been engaged in masoleum promotion work.

## ENGINEERS NAME COMMITTEE

Fresno Engineers' Club has named A. Segal, M. C. Paulsen, Allen Hall, Fred Gamboni and J. W. Jourdan, as nominating committee to prepare a slate of officers for the club election to be held in April.

Fresno Builders' Exchange has appointed H. L. Hardman, secretary of the organization, to represent the exchange at the civic club's meeting to be held in Fresno at which candidate for the Fresno City Board of Education will be sought. The meeting is scheduled for March 14.

Plans for the twenty-first annual convention of the United Metal Trade Association of the Pacific Coast to be held in Portland, Ore., April 15-16, are under way, according to E. J. Mann, chairman of the Committee of Arrangements at Portland. Headquarters will be located at the Benson Hotel.

Los Angeles city council has adopted an amendment to the city building ordinance permitting the erection of bungalow hospitals restricted to three patients. All other hospitals must be fireproof construction.

 One and one-half story frame and stucco day nursery (stucco exterior, slate roof); English type of construction.

THEY MARRIED one year ago.  
 SHE HAD escaped from a cage.  
 WAS A beautiful yellow canary.  
 HE WAS a wild one.  
 AND THE cause.  
 OF THE elopement.  
 THEY SPENT their honeymoon.  
 NEAR THE Yuba River.  
 WHERE SANDY Pratt.  
 PRODUCES CLEAN Marysville sand.  
 THEN THEY moved to Sacramento.  
 WHERE SANDY Pratt.  
 PRODUCES AMERICAN River sand.  
 HE WANTED.  
 TO BUILD the nest.  
 ON THE American River.  
 WHERE THERE was freedom.  
 AND PLENTY of wild feed.  
 SHE WAS a "downtown" girl.  
 LIKED JAZZ, bright lights.  
 AND DELICATESSEN store food.  
 AND LIKE all family arguments.  
 THE WIFE won out.  
 AND BELIEVE it or not.  
 THEY BUILT their 1927 home.  
 IN ONE of the "Bee's" trees.  
 AT SIXTEENTH and K Streets.  
 ON A limb.  
 EXTENDING OVER K Street.  
 ALMOST TO the car-line.  
 JUST ABOVE automobile traffic.  
 WHERE SHE could see all.  
 THE BRIGHT lights at night.  
 THE PARADES by day.  
 AND BE near the downtown shops.  
 THEY RAISED three children.  
 ALL GIRLS, if you please.  
 AND THE neighbors.  
 OVERHEARD THE children talking.  
 AND CRITICISING their Dad.  
 FOR HIS old fashioned ideas.  
 ABOUT THE great open space.  
 AND FOOD, mostly worms.  
 THESE GIRLS liked prepared food.  
 AND DELICATESSEN store products,

AND THUS the bird world.  
 IS MOVING along.  
 WITH THE rest of us.  
 IN THIS age.  
 OF AUTOS, jazz, etc.  
 THE ABOVE 1927 nest.  
 IS NOW in plain sight.  
 OUT IN the middle.  
 OF K Street near 16th.  
 IN SACRAMENTO, California.  
 WHERE THE "Bee" is fighting.  
 TO SAVE the beautiful trees.  
 AND SANDY Pratt, President.  
 OF THE Pratt Building Material Co.  
 PRODUCER OF hard, crushed rock.  
 AND CLEAN, sharp sand.  
 AT MARYSVILLE, Prattrock (near Folsom).  
 SACRAMENTO, PRATTCO (Monte County).  
 AND MAYHEW (Sacramento County).  
 CENTRAL OFFICE—San Francisco.  
 THINKS BOTH 16th Street.  
 AND H Street (in Sacramento).  
 ARE TWO beautiful streets.  
 PICTURES IN themselves.  
 AND SANDY and Mrs. Sandy.  
 ARE FOR the "Bee."  
 AND SACRAMENTO'S beautiful tree.  
 "I THANK you."

Spring is here again, just one year since this popular young couple eloped. They still make their home in a beautiful tree on 16th and K Streets, Sacramento just one mile from the Pratt Building Material Company's sand washing and producing plant on the American River. If you pass this spot any time of the day, you can hear them singing and chirping, because they are very happy.

ner—Berkeley Day Nursery.  
 Architect—W. H. Ratcliff, Chamber of  
 Commerce Bldg., Berkeley.  
 A feature of the structure will be  
 auditorium with a seating capacity  
 250 persons.

## BUSINESS OPPORTUNITIES

**SAN FRANCISCO, Cal.**—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission St., San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

11355—Kobe, Japan. An American firm, established in Kobe, is interested in increasing the market in the United States for wooden insulators for high-power transmission lines. These insulators are manufactured in Japan of well-seasoned cherry wood and are proving very successful. United States references are supplied.

11357—Buenos Aires, Argentina. An importer and commission merchant is interested in securing the representation on a commission basis of a firm manufacturing cast iron pipe, for water works, etc. The party in question has close connections with the ministry of public works and is making this request for representation on behalf of the ministry, with whom a large business is expected.

11360 — Celle-Hanover, Germany. Manufacturers of black and colored printing inks, printing and drying mediums, varnishes, blacks and dry colors, wish to be represented in San Francisco by a firm connected with the graphical line.

11361—Hamburg, Germany. Gentleman having 30 years' experience in the export trade, with a thorough knowledge of German and continental articles and sources of production, offers his services as purchasing agent to American importers. He is also in a position to act as sales and distributing agent for American manufacturers and exporters wishing to market their products in Germany. References will be supplied.

11362—Hamburg, Germany. Well-established buying and selling agent offers his services to San Francisco importers of German-made products and to manufacturers and exporters wishing to market their goods in Germany.

11363—Copenhagen, Denmark. Manufacturers of a packing paste for engines, flanges, pipes, fittings, etc., are very desirous of getting in touch with San Francisco importers interested in handling such a product.

11368 — Dallas, Texas. Gentleman contemplating taking up residence in New Zealand desires to communicate with San Francisco firms exporting to or having branches in New Zealand or Australia. It is his desire to make connections as representative with a concern manufacturing marine motors or standardized small power craft.

11369—Delhi, India. Importing and exporting house desires to get in touch with San Francisco firms which would be interested in importing myrtle powder (for dyeing), bristles, merrybolam, fruits, tea, rice, hides, skins, carpets, brassware, precious wood, metal and ivory carving, inlaid marble and alabaster toys, Indian curiosities, Indian embroidery work, Indian sweets, jams and pickles, etc., etc. They are also prepared to receive samples of all kinds of piece goods and sundries, such as hosiery, rubber goods, machinery, drugs, chemicals, paints and varnishes, glassware and crockery, hardware, iron goods, paper, etc. Bank references supplied.

11374—Cali Colombia. Swedish import firm, established four years, with branches in Manizales and Buenaventura, desires to make connections with exporters of all American products suited to the Colombian market. Representative now in San Francisco. Local references.

D-2368 — Minneapolis, Minn. Manufacturing concern is in the market for a power unit of about 400 to 700 K.V.A. generator, directly connected with a four-valve or uniflow engine.

D-2373 — Minneapolis, Minn. Manufacturers of a new type of jaw crusher for crushing rocks would like to secure a high-class distributor for the State of California. Both jaws of the new type crusher are movable, giving greater production, a more uniform product, a smaller percentage of fines and requires less horse-power than other types of jaw crushers of corresponding size. Illustrated, descriptive circulars are available at the Foreign and Domestic Trade Department.

D-2376—New York, N. Y. Firm desires to establish business connections with a manufacturer of fuel oil burners for domestic purposes who desires eastern representation. As the New York firm is a manufacturer of tanks, making its own installations and covering the entire territory east of Pittsburgh, it feels that its organization is competent to handle an oil burner account satisfactorily.

D-2379—Los Angeles, Cal. Representative of an eastern firm desires a few additional California products of real merit to handle on strictly commission basis. He sells through jobbers and distributors only. Full particulars are requested in first letter.

# Official Proposals

## NOTICE TO CONTRACTORS

### (Palo Alto Union High School District) Additions

The High School Board of the Palo Alto Union High School District, Santa Clara County, California, will receive sealed proposals up until **7:30 o'clock p. m., March 29, 1927**, at the Union High School Building, Embarcadero Road and State Highway, Palo Alto, California, at which time and place said bids will be opened and read in public for furnishing the required labor and materials for and erecting and completing the proposed additional new buildings for the Palo Alto Union High School, in accordance with plans and specifications therefor, by Birge M. Clark, Architect, 310 University Avenue, Palo Alto, California.

Bids will be received separately for the different parts of the work as follows:

- For Excavating, Concrete, Carpenter Work, Iron, Masonry, and Terra Cotta Work, Contract No. 1. (See Specifications)
  - For Sheet Metal Work, Contract No. 2. (See Specifications)
  - For Composition Roofing, Contract No. 3. (See Specifications)
  - For Tile Roofing, Contract No. 4. (See Specifications)
  - For Plastering, Contract No. 5. (See Specifications)
  - For Blackboards, Contract No. 6. (See Specifications)
  - For Painting, Contract No. 7. (See Specifications)
  - For Hardware, Contract No. 8. (See Specifications)
  - For Steel Sash, Contract No. 9. (See Specifications)
  - For Steel Lockers, Contract No. 10. (See Specifications)
  - For Plumbing, Contract No. 11. (See Specifications)
  - For Electric Work, Contract No. 12. (See Specifications)
  - For Electric Clocks, Contract No. 13. (See Specifications)
  - For Heating and Ventilating, Contract No. 14. (See Specifications)
- Cashier's or certified check or bidder's bond for amount not less than five per cent of amount of bid shall accompany each proposal, drawn payable to the order of Walter H. Nichols, Clerk of the Palo Alto Union High School District, as a guarantee that the builder will, if requested within five days after receiving notice of the acceptance of bid, enter into a contract with said High School Board in accordance therewith and furnish the required bonds.

Said check or bond to be forfeited to the High School Board should the bidder fail to execute contract and bonds as above mentioned.

All bids to be made out on forms furnished by the Architect.

Plans and specifications for all the above work may be seen and secured at the office of the Architect, Birge M. Clark, 310 University Avenue, Palo Alto, California.

A deposit of \$20 will be required from all contractors receiving plans, said deposit to be refunded when plans and specifications are returned in good condition. The said High School Board reserves the right to reject any and all bids and waive any informality in any bid received.

By order of the High School Board of the Palo Alto Union High School District.

By **WALTER H. NICHOLS**,  
Clerk.

Dated Mar. 8, 1927.

## NOTICE TO CONTRACTORS

### (Sutter County Highway)

Sealed proposals will be received at the office of the Clerk of the Board of Supervisors, Hall of Records, Yuba City, Calif., until **10 o'clock A. M. on**

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

**Monday, March 21, 1927**, at which time they will be publicly opened and read, for paving the following road:

Power Line Road, from Riego Road to County Line, a distance of approximately 1 mile, in Supervisor District No. 5.

### County Engineer's Estimate

Item 1—79,000 sq. ft. 5" thick Willite Process Asphaltic Concrete Pavement. Plans, profiles, cross-section and specifications for the above work may be obtained from O. W. Lanzendorf, County Engineer, Court House, Yuba City, Calif. A deposit of \$10 will be required on each set.

The Board of Supervisors reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the County.

**BOARD OF SUPERVISORS OF SUTTER COUNTY.**

By **G. H. TREVATHAN**, Chairman.

Attest:  
(Seal) **ALBERT B. BROWN**, Clerk  
Dated: February 8, 1927.

## SEALED PROPOSALS

### (Pumps, Motors and Auxiliary Equipment for Sewage Pumping Station No. Two)

Bids will be received by the undersigned city clerk of the City of Sacramento in his office, Room 203, City Hall, located on I Street, between Ninth and Tenth Streets, up to the hour of **5 o'clock P. M., April 14, 1927**, for the furnishing of three pumps, three motors and auxiliary equipment for Sewage Pumping Station No. 2 in accordance with plans and specifications adopted by the city council on date of March 3, 1927, and now on file in the office of the city clerk.

All proposals must comply with requirements of the city charter of the City of Sacramento, effective June 30, 1921, and bidders are hereby cautioned that no bid which fails to comply therewith can be considered.

All proposals must be submitted upon printed proposal and affidavit form supplied by city clerk without charge to prospective bidders, said bid to be enclosed in envelope marked "Sealed Proposal for Motors, Pumps, and Auxiliary Equipment for Pumping

Station No. 2," which may be had upon application to the undersigned.

At the same time with the execution of the contract for supplying foregoing equipment, the contractor shall execute a contract bond furnished by an authorized surety company or personal sureties who shall be freeholders or householders of the City of Sacramento, to be approved, and acceptable by the city controller in a sum not less than fifty (50) per cent of the aggregate of the proposal in accordance with ordinances and charter of the City of Sacramento.

A certified check made payable to the city controller as prescribed in Section 256 of the said charter for not less than ten (10) per cent of the total of said bid, must accompany each bid.

The right to reject any and all bids is reserved by the city council under provisions of said charter.

**H. G. DENTON**,  
City Clerk,  
Room 203, City Hall.

## NOTICE FOR BIDS

### (Pipe, Etc.—Oroville-Wyandotte Irrigation District)

Sealed bids will be received by the Board of Directors of the Oroville-Wyandotte Irrigation District at the office of the Board, Oroville, California, until **2 o'clock P. M., March 25, 1927**, for furnishing 2700 lineal feet of Armo Iron riveted slip point pipe and fittings or machine-banded Redwood Pipe.

Also pipe laying, trenching, back-filling, etc.

Contract will be let to the lowest responsible bidder. Plans and specifications can be seen at the office of the Board, Oroville, California.

Contractor proposing to furnish wood pipe will be required to furnish specifications covering work proposed to be done.

**W. J. MONRO**,  
Secretary, Oroville-Wyandotte Irrigation District.

## NOTICE TO CONTRACTORS

### OFFICE OF THE SECRETARY OF THE BOARD OF EDUCATION OF THE CITY OF OAKLAND.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until **Tuesday, the 5th day of April, 1927, at 9:45 A. M.** at which time said bids will be opened for the erection and completion of the Lakeview Junior High School Building of the Oakland High School District, to be erected on the West side of Harrison Boulevard approximately 350 feet North of 26th Street. These bids shall be presented in accordance with the plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street, Oakland, California.

Separate bids will be received for:

- (1) General Work.
- (2) Awning Type Window Fixtures and Hardware.
- (3) Slate Blackboards.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned. Plans taken out by bidders on or before March 21, 1927, shall be returned on March 21, 1927; plans taken out after March 21, 1927, shall be returned April 5, 1927. If the plans and specifications are not returned within said time, or if mutilated,

Prices f. o. b. Eureka, Calif.

The Board of Library Trustees of the City of Eureka reserves the right to reject any or all bids, or parts of bids.

Dated this 1st day of March, 1927.

W. J. CRANE,  
Secretary of the Board of Library Trustees.

#### NOTICE TO CONTRACTORS

(Monterey School District)

The Trustees of the Monterey School District will receive sealed proposals up until **7:30 P. M. on the 26th day of March, 1927,** at the Monterey Grammar School, 642 Pacific St., Monterey, at which time and place said bids will be opened and read in public, for furnishing all labor and materials for the erection and completion of a twelve-room and auditorium addition to the present New Monterey School Building, in accordance with the plans and specifications prepared therefor by Slocum & Tuttle, Architects, 337 17th St., Oakland.

A cashier's or certified check or Surety Co. Bid Bond for an amount not less than 5 per cent of the amount of bid shall accompany each proposal, drawn payable to the order of A. G. Winston, Clerk of said Board of Trustees, as a guarantee that the bidder will, after being notified of the acceptance of his bid, enter into a contract with said Board of Trustees, in accordance therewith and furnish surety bonds as required by the specifications. Said check or bidder's bond to be forfeited to the said School District, should the bidder fail to execute the contract and furnish the bonds as above mentioned.

All bids will be made out on bid forms as furnished by the architects. Plans and specifications may be procured from the Clerk of the Board or from the Architects.

A deposit of \$25.00 will be required from contractors receiving plans, which deposit will be refunded when plans and specifications are returned in good condition.

By order of the Board of Trustees of the Monterey School District, Monterey, California.

H. D. SEVERANCE, President.  
A. G. WINSTON, Clerk.  
GEO. E. MACDONALD, Trustee.  
Dated: March 2, 1927.

#### NOTICE TO BIDDERS

(Sewage Disposal Plant)

NOTICE IS HEREBY GIVEN by the Hospital Central Committee of Weimar Joint Sanatorium that bids will be received for the construction of a sewage disposal system for the Weimar Joint Sanatorium, Weimar, California, in accordance with the plans and specifications for the construction thereof, which said plans and specifications were duly approved and adopted on the 11th day of January, 1927, and are now on file in the office of the Secretary of Hospital Central Committee, Weimar Joint Sanatorium, at Weimar, California.

All bids or proposals must be in writing and may be delivered to the undersigned or presented at the meeting of the Hospital Central Committee, Weimar Joint Sanatorium, March 10, 1927, in the Board of Supervisors Room in the Sacramento County

Court House, in the City of Sacramento, County of Sacramento, State of California, at which said time and place said bids will be opened.

All bids must be accompanied by a certified check for an amount equal to ten (10%) per cent of the bid, as evidence of good faith, which said checks will be returned to the unsuccessful bidders, and the check of the successful bidder will be returned when he has entered into and executed a contract approved by said Hospital Central Committee.

All parties interested are hereby referred to said plans and specifications for the construction of said sewage disposal system for further particulars, which said plans and specifications may be inspected in the office of the Hospital Central Committee, Weimar Joint Sanatorium, at Weimar, California.

ROBERT E. CALLAHAN,  
Chairman Hospital Central Committee Weimar Joint Sanatorium.

#### NOTICE FOR BIDS FOR FURNISHING PUMPING EQUIPMENT

(Paradise Irrigation District)

Sealed proposals will be received by the Board of Directors of the Paradise Irrigation District at their office at Paradise, Butte County, California, until **10:00 A. M., Tuesday, the 5th day of April, 1927,** at which time they will be publicly opened and compared bids to be made for furnishing the following equipment:

One Byron Jackson No. 5 deepwell pump; 16 inch, 4-stage, having a capacity of 1350 gallons per minute against a 130 foot head.

One General Electric motor, built-in-head type, 60 horsepower, 440 volts 1200 R. I. M.

One General Electric Auto Starter No. CR 7651.

Further specifications may be obtained at the office of the said Board.

The right is reserved to reject any or all bids and to accept any bid that is considered to be the most favorable to the interests of the District.

By order of the Board of Directors of the Paradise Irrigation District, dated March 1st, 1927.

J. E. ALLEY, Secretary.

#### NOTICE TO BIDDERS

(Auditorium Chairs — Hillsborough School District)

## THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

## Recommendations Are Submitted For S. F. Bay Bridge Engineers

Bion J. Arnold  
Chas. Loweth  
Geo. H. Pegran  
Robt. Ridgway  
J. S. Stevens  
Geo. F. Swain

Arthur Talbot  
Wm. Wilgras  
H. D. Newell  
John D. Galloway  
L. H. Nishkian  
C. H. Snyder

Chas. B. Wing

The above listing contains the names of engineers competent to make a study of the problem of bridging San Francisco Bay including an investigation of the proper location of termini, foundations, clearance above water, space between piers, loads to be carried, facilities for traffic at termini, financial arrangements and all other problems incident to the construction of the great structure.

The above names were submitted to the Board of Public Works by the presidents of the University of California, Stanford University, University of Santa Clara and St. Mary's College.

A resolution of the Board of Supervisors passed February 16 authorized the university presidents to submit names of the best qualified engineers to act in the bridge matter.

Of the thirteen names submitted three will be selected to perform the bridge survey. Only one, however, will be a local engineer, if the recommendations of the university presidents are followed out.

In selecting the men to perform the survey recognition was given by the University men to the complexity of the problems to be solved. The selections not only including expert bridge analysts and designers but also engineers trained in the problems of traffic and distribution and leaders of

the engineering profession whose broad knowledge of engineering as a whole includes the important field of engineering economics. The selections of the University presidents are divided between those engineers located in the bay region and those from outside the state, the local list being included on the theory that on a commission of three engineers it might be advisable to have one man with knowledge of local conditions, problems and needs.

"Because of our method of selection the greater experience of the engineers from outside the state, and other reasons, most of which are obvious, we most strongly recommend that not more than one local engineer be selected," say the recommendations submitted by the university officials to the Department of Public Works.

Five of the engineers named are local, these being H. D. Dewell, John D. Galloway, L. H. Nishkian, C. H. Snyder, all of San Francisco, and Chas. B. Wing of Palo Alto.

Robert Ridgway, J. S. Stevens and Wm. Wilgras are listed from New York City.

Bion J. Arnold is of Chicago, Ill.; Chas. Loweth, Cleveland, Ohio; Geo. H. Pegran, South Orange, N. J.; Geo. F. Swain, Brookline, Mass.; Arthur Talbot, Urbana, Ill.

### OAKLAND SCHOOL CONTRACT IS CANCELLED

The contract for construction of the \$240,000 San Leandro junior high school by J. H. Sampel and W. F. Cody was abrogated March 15 by the Oakland board of education and steps will be taken immediately to complete the structure.

The action followed testimony under oath by W. E. Whalin, superintendent of buildings, and his two assistants. They declared that work on the structure had practically ceased February 21 when carpenters were discharged.

Specifications were not complied with, the contractors refused to meet demands of inspectors and the building was not completed November 9, as ordered, Whalin told the board.

Penalties for failure to finish the structure already total more than \$7000, which will be deducted from the amount to be paid the contractors.

Whalin estimated that two months would be required to complete the building. The board ordered a conference of Whalin and John W. Edgemond, secretary, with District Attorney Earl Warren to plan for resumption of work.

The building is located on Estudillo Avenue, San Leandro.

### LUMBER AND ALLIED PRODUCTS CENSUS FOR 1926

The Department of Commerce announces that according to data collected at the biennial census of manufacturers taken in 1926, the establishments classified in the "Lumber and Allied Products" group reported, for 1925, products valued at \$3,688,552,647, an increase of 1.5 per cent as compared with \$3,633,033,680 for 1923 the last preceding census year. The totals are made up as follows: Basic industries, using timber, logs, cordwood, crude gum, or other raw forest products as materials, \$1,468,427,334 in 1925, a decrease of 4.3 per cent as compared with \$1,534,990,576 in 1913; wood-reworking industries, \$773,050,860 in 1925, an increase of 2.1 per cent over \$762,017,455 in 1923; wooden-container industries, \$249,612,107 in 1925, a decrease of 6 per cent from \$265,500,597 in 1923; furniture and related industries, \$950,595,981, an increase of 11.6 per cent over \$851,449,173 in 1923; miscellaneous and allied industries, \$241,866,365, an increase of 10.8 per cent over \$218,316,685 in 1923.

### WESTERN BUILDING MATERIALS FACES THIRD ACTION

Straightening out of an interesting and somewhat unusual legal entanglement was promised last Wednesday, when the filing in the United States District Court at Sacramento, by Attorney George E. McCutchen of an involuntary petition in bankruptcy, dictated against the Western Building Material Company. The petitioners are the Robertson-Govan Company, the Thomson-Diggs Company and H. A. Diers, their joint claims being a trifle more than \$3500.

The unusual feature of the case is that this is the third legal procedure against the company, or part owners of same, in three months. The allegations in the present petition are those set in procedure under the national bankruptcy act, that preference was given to certain creditors over the other persons or corporations that had claims.

In December 21st, it is charged that Henry Cowell Lime & Cement Company, with an action pending in the superior court, was permitted to levy a writ of attachment on the corporation's property.

The second charge is that one David H. H. on January 31st presented a writ of attachment on the company's property for about \$5900, naming Harry Herbert Simpson of the corporation as debtors under the instrument, that he was given judgment.

The matter will be subject of a hearing before Evan J. Hughes, United States commissioner in bankruptcy.

## Court Holds Contract With Non-Certified Architect Void If Client Is Not Notified

A contract for architectural services made by a person who does not possess a license to practice architecture is null and void unless he explicitly informs his client at the time that he is not licensed as required by the California law regulating the practice of architecture. This is the ruling of the court of appeal, second appellate district, division 2, in a decision reversing a judgment of the superior court of Los Angeles county in the case of *Payne vs De Vaughn and Spaugb* (No. 4140). No appeal was taken to the supreme court and the appellate court's ruling stands as its final interpretation of the clause in the California license law relating to noncertificated architects.

According to the evidence in the case the plaintiff, who styled himself an "architectural engineer," had a written contract to prepare plans and specifications for and supervise the construction of a building for a fee of 4 per cent of the cost of the completed structure, and was paid \$100 on account. It was stipulated that should the owner fail to secure a loan for the building or decide not to build, the plaintiff was to receive \$200 for his sketches and services. Subsequently the owner entered into a contract with an architect, who prepared other plans and specifications and secured a loan to erect the building, the completed cost of which was \$23,000. Contending that he was not permitted to fill his part of the contract, plaintiff sued for \$11,072, balance of fee claimed to be due him under his contract. In the trial court plaintiff secured a judgment for \$575, of which amount \$475 remained unpaid.

Defendants, appealing the judgment, contended that as the plaintiff had no license to practice architecture and did not inform them of this fact, the contract was null and void. In upholding this contention the court was unanimous. In the opinion on the case, written by Judge Craig, the court said:

"It is urged on behalf of the respondent that since he at no time represented himself to be an architect, but only an architectural engineer, he did not violate the statute above quoted. The idea seemed to be that unless it appears that he violated every provision of the law in question, the mere fact that he transgressed one of its inhibitions, is of no consequence. But for any person to practice architecture in this state without a certificate, is made a misdemeanor, and this, regardless of whether or not he may also have held himself out to the public or to any person as an architect.

"Under this statute, there is but one way in which a person who has no certificate can legally render such architectural service as were to be performed by respondent. Such person can 'inform the person for whom such plans or data are furnished, that he, the person furnishing the plans, is not a certified architect.' Therefore, if it be shown that the respondent practiced architecture, the burden is clearly upon him to prove that he brought himself within the exception just quoted by giving the appellant the required information. It is not contended that the respondent did this. Under such circumstances, the task of the court is a simple one. It is merely to decide whether or not the work contracted to be performed constituted practicing architecture.

"The rule which brings one within the classification of 'architect' has been declared in various jurisdictions. In every instance where the term has arisen for interpretation, so far as we are able to ascertain, it has been held that one who makes plans and specifications for a building, and superintends the construction, is an 'architect.' In fact, the rule most commonly applied does not embrace the duty of supervision. . . . In *Bacigalupi vs. Phoenix Bldg. and Constr. Co.*, 14 Cal. App. 632, 112 Pac. 892, it was held that although a person who prepared the plans and specifications was not a professional but was a contractor and builder, yet, having performed such services, he was in that instance an architect. Clearly the services contracted to be rendered by Payne were those of an architect.

"But respondent attempts to avoid the effect of this upon the theory that, although he was the contracting party, prepared the plans and specifications, and agreed to supervise the construction, the contract was legal because he was in reality not the principal architect. However, the latter was not a party to the contract.

"In *Wedgewood vs. Jorgens*, 190 Mich. 620, 157 N. W. 360, a city ordinance was involved which embodied provisions similar to those contained in the statute here under consideration. It was here said: 'An architect as defined by the ordinance, employs an unlicensed architect to prepare plans and specifications for one of his clients. Does the rule apply in such a case? We think it does. Plaintiff must have known that, as a builder, contractor and overseer of construction, he was an architect within the meaning of the ordinance. He knew that he had no license and he

admits that he knew that Krieger, the architect, who actually prepared the plans, had no license. Whether plaintiff be regarded as an unlicensed architect, or whether he be regarded as a mere contractor and builder, an knowingly employed an unlicensed architect to do the work, he is barred under the rule from recovering on the contract.'

"The act here in controversy forbids the practice of architecture by an unlicensed person and makes it a misdemeanor, although it does not prevent him from furnishing plans or data if he shall first have fully informed the person for whom they are intended that he has not been certified. This latter duty the respondent did not observe.

"It has frequently been held that a statute or ordinance requiring the payment of a license and procurement of a certificate to perform the services of an insurance agent, attorney, contractor and builder, freight solicitor, insurance broker, peddler, architect, plumber, real estate agent or stock broker, is not to be construed as a revenue law alone, but as a police measure, for the protection of the public, and that a contract of an unlicensed person for the furnishing of such services will not be upheld.

In *Levinson vs. Boas* our own superior court said: 'It is to be noticed that every case from every court recognizes that when a statute has been made for the protection of the public, a contract in violation of its provisions is void.'

"We conclude that respondent practiced architecture in contravention of the provisions of the act regulating the practice of architecture, and that, therefore, the contract upon which recovery is sought, was illegal and void."—S. W. Builder.

## 64.7 Cents Of Every Dollar Expended In Building In 1925 Went Into Home Construction

In a study made in 274 cities by the Bureau of Labor Statistics of the U. S. Department of Labor it has been found that in 1925 64.7 cents out of every dollar expended for new building construction were spent for residential buildings, including hotels, as against 35.3 cents spent for new non-residential buildings. One-family dwellings made up 41.7 per cent of the total number of new buildings and 28.8 per cent of the total building costs. Two-family dwellings constituted 6.9 per cent of all buildings and 8.5 per cent of all costs. Apartment houses, each built to accommodate three or more families, were 3.0 per cent of all new buildings but made 20.6 per cent of all costs. One-family dwellings had an average cost each of \$4567, two-family dwellings \$8369, and apartment houses \$46,928. The 342 hotels had an average cost of \$502,333 each.

Private garages comprised 37.1 per cent of all new buildings erected, but only 2.3 per cent of the total cost of all buildings, the average cost being only \$422. A total of 1248 churches and 1047 amusement buildings were built, but \$63,457,806 were spent for churches and \$116,283,961 were spent for theatres and other amusement buildings. Schools and libraries were built in

these 274 cities to the number of 1034 with a total cost of \$163,027,827.

The number of families provided for by new dwellings in 272 identical cities increased from 455,775 in 1924 to 507,096 in 1925. Of these families provided for by new construction 29.5 per cent were taken care of in apartment houses in 1924 and 33.8 per cent in 1925. The entire number of permits issued for new buildings of all kinds in 272 identical cities increased 0.1 per cent between 1924 and 1925, and the cost 18.6 per cent.

Based on the costs of material and labor, the bureau found that in 1925 building in general cost two and one-eighth times as much in 1925 as in 1914. Permit figures are available for 130 cities back in 1914. In these cities two and one-fourth times as much building was done in 1925 as in 1914. This means physical construction, no valuation. In the same interval population in these cities increased 24 per cent. It is believed that the building shortage of the War period has more than been made up with more new building being done than necessary to meet normal needs, this conclusion being based on the assumption that the building done in 1914 supplied the need of that year.

# Unit Buildings Costs Compiled By Southern California Contractors

Special Correspondence from the Associated General Contractors of America, Southern California Chapter, Los Angeles)

In using these figures, corrected to February 1, 1927, it should be remembered that application of an average estimate of cost to any given locality is always open to question even where the prices are uniform, which they never are. For these reasons, the Southern California Chapter, Associated General Contractors of America, has provided a range of costs in each item which would cover all ordinary conditions, but cannot be compared with cost estimates based upon a detail study of plans and specifications, as regularly made by a general contractor.—Editor.

## TOTAL UNIT COSTS PER CUBIC FOOT

Cheap	4.25 5.00	Cheap	3.50 3.75
BRICK IRON BUILDINGS, ALL KINDS			.90 1.20

Area (sq. ft.) total floor space including porches but not light courts. Concluding a careful study of unit building costs for the current period, the committee of general building contractors, who were making the study, find practically no change in unit costs for buildings as compared with current estimates of one year ago. While several materials and labor advanced in price, certain materials were correspondingly reduced, thus rendering a very slight change in the unit costs.

# erious Building Slump Not Anticipated This Year

(Special Correspondence)

There is little likelihood that the construction industry will be confronted with a serious slump this year, in the opinion of A. W. Dickson, executive secretary of the National Association of Building Trades Employers.

A. W. Dickson in an article in the March issue of the American Builder-Economist, states that although there is not the "pressing demand for new construction this year that there has been in the past eight years," there is a large volume of industrial, public and home building work in prospect.

"Speculative building is at an end," Dickson asserted, "and any program begun this year will be of a legitimate nature for which there is a definite need.

Present prices and cost levels will doubt prevail throughout the year. There is nothing to indicate that material prices will advance and labor is to be in the main contented to

go along under existing wage scales. There will undoubtedly be some minor readjustments of wage scales, but the upward tendency of rates over the past few years has been definitely stopped.

"The larger cities report a surplus of mechanics in all lines and unemployment is general throughout the industry and there will undoubtedly be more craftsmen out of work this year than at any time since the depression of 1920."

Thomas J. Vernia, vice-president of the Indiana Limestone Company, writing in the American Builder-Economist declared that "there is undisputable evidence that the building situation is more stabilized than ever before."

"The ever-growing demand due to population increase, to better living conditions, to the desire for better business quarters, coupled with a more plentiful supply of available money," said Mr. Vernia, "will probably keep the construction industry operations at

a high rate for some time to come.

"Signs point to a building volume well up toward the totals of the last three years. This in spite of warnings to retrench and reports of over-building in some branches. If there is over-building, it is a local rather than a general condition. There is still a sharp demand for the moderate-priced apartment and suburban home and certain types of commercial buildings. Surveys in a number of cities indicate a fairly good balance between under-production and over-supply. A halting of building now would create another building shortage which in turn would mean higher rents as well as unemployment for several hundred thousand workers.

"A strong influence in continued high activity is the public buildings program now under way. This program, held in reserve until urgent private requirements have been met, will compensate for any possible slowing up. In Washington, public works construction is going forward at a pace never before known. Huge undertakings will be added to the present government projects.

"Another factor which might help to fill the gap should there be a trade recession is the great waterways undertaking that will call for an enormous construction expenditure. The vast sums appropriated for good roads should also stimulate the construction of better dwellings in their proximity."

## ADVERTISING TO FURTHER USE OF HEMLOCK

Plans to place west coast hemlock in its proper place before the builders of the world for its many specialized uses were agreed on at a special hemlock meeting of interested lumber manufacturers held at Tacoma recently. An advertising and trade promotion campaign for this purpose will be launched at once by the West Coast Lumber Bureau, Seattle, it is announced.

J. D. Tennant, president of the bureau and chairman of the meeting, stated that more than 50 publications will be used by the bureau in the first broadside of the hemlock campaign. This advertising, scheduled for May this year, includes popular weekly magazines, architectural, building, engineering and lumber journals. At the same time the bureau will have ready for distribution to prospective customers a book on hemlock, written both from a technical and a popular viewpoint.

It was agreed by the manufacturers at the meeting that west coast hemlock should be advertised as a specialty wood. "We can recommend west coast hemlock finish, flooring, interior trim and like purposes as the equal of any other soft wood anywhere and we can say truthfully that our hemlock is the equal of any other soft wood for ordinary house and barn construction," declared George S. Long, general manager of the Weyerhaeuser Timber Company. Other speakers stressed the necessity for advertising the special uses of west coast hemlock. In addition to these special uses, the sale of common grades of west coast hemlock for home building will be emphasized, the bureau announced.

## ENGINEERS TO CONVENE

The next annual convention of the American Association of Engineers will be held at Tulsa, Okla., June 6-8, 1927. The convention will be held at the same time as the annual meeting of the Oklahoma Division, A. A. E.

# THE OBSERVER

## WHAT HE HEARS AND SEES ON HIS ROUNDS

Assembly Bill No. 162, presented by the White Pine and Nye County delegations and introduced in the Nevada State Assembly, would change the present Nevada state highway law by striking out a section which provides for the appointment of members to the highway commission. Under the terms of the new bill the commission is to consist of three members, to be appointed from three districts throughout the state. The districts are created on county division lines, District No. 1 consisting of Washoe, Lyon, Ormsby, Mineral, Storey, Douglas, Lander and Eureka Counties; District No. 2 of Humboldt, Pershing and Elko Counties; and District No. 3 of Esmeralda, Nye, White Pine, Lincoln and Clark Counties. The bill, if it becomes a law, will be effective immediately after passage and the governor will name three commissioners to serve one, two and three years. As the terms expire the appointments will be made on a three-year basis.

Limitations on the amount of work which will be awarded to new bidders are proposed in a new provision in the specifications for state highway work in Iowa. Contractors who have not previously executed contracts under the supervision of the commission are now required to file within five days before opening of bids a statement showing their financial responsibility and experience on similar work. Upon the showing in this statement the bidder will be notified before the opening of proposals the number of miles of paving, if any, which will be awarded to him if his bid is low, but in no case will he be given contracts for more than about 10 miles of road. Similar limitations will be imposed upon contractors who have not substantially completed their first contract under the supervision of the commission.

A campaign to reduce the number of deaths in traffic accidents in the United States is being formulated by the American Road Builders' Association's recent convention in Chicago. Uniform traffic regulations, wider and straighter highways, more signals and elimination of grade crossings and narrow bridges are among the things held necessary to reduce the toll by Charles M. Upham, managing director of the organization. He said that preliminary reports from state highway commissions indicate that the number of deaths exceeded 29,000 last year. In 1925 the toll was more than 26,000 and the property damage \$650,000, he stated.

Geary Rieb, of San Francisco, has been authorized by State Department of Public Works, Division of Water Rights, to appropriate waters for municipal use in the towns of Vallejo, Benicia, Cordella, Suisun, Fairfield and other points in Solano County. Construction contemplated will involve an expenditure of \$2,000,000.

Bill providing for \$200,000 appropriation to finance construction of a causeway over the Sutter By-Pass on the Yuba City-Woodland highway, has received favorable consideration of the Assembly Committee on Drainage.

Under a proposed ordinance introduced in the Reno, Nev., city council, at the request of various building contractors, "any person, firm, association or corporation carrying on the business of building contracting or painting," would be required to pay a \$50 annual license fee. Mayor Roberts referred the measure to the grievance committee for investigation and report. The proposed ordinance is declared to be aimed especially at "fly-by-night" builders and painters who have no established headquarters in the city. It provides for conviction on violation a penalty of not less than \$25 nor more than \$250 fine, or a jail sentence not to exceed 45 days.

The latest figures of Canadian exports of asbestos, covering December and the nine months of the Dominion fiscal year to December 31, 1926, indicates a fair improvement in the asbestos industry so far as markets are concerned. Exports to the United States are gradually picking up. Total exports for December were 24,924 tons, as compared with 21,165 one year before.

American and German engineers will be the chief competitors in a contest to be staged by the Soviet commissariat of transport in Leningrad, Russia, May 1, to determine the best type of internal combustion locomotives using petroleum for fuel. Invitations sent out several months ago to foreign engineers, asking them to submit plans for a locomotive of this type, have been accepted by several prominent American and German specialists.

An ordinance requiring a permit to be obtained to establish a rock crushing plant or sand and gravel pit and regulating the location of same was passed by the supervisors of Los Angeles county March 4th and took effect as once as an emergency measure because of danger from excavations in washes in time of floods.

Expenditure of 16 to 15 per cent more money and application of all available engineering skill would have prevented such disasters as attended the earthquake in Santa Barbara and the recent hurricane in Florida, Ford A. Carpenter, manager of the department of meteorology and aeronautics of the Los Angeles Chamber of Commerce, told the Executive Club of Chicago recently.

San Francisco Board of Education contemplates a school construction program to extend over a period of ten years during which it is hoped to erect fifteen new schools. The program calls for an annual expenditure of from \$2,000,000 to \$3,000,000. A large appropriation in the 1927-28 municipal budget will be requested of the supervisors.

Leonard F. Youdall, San Francisco contractor has brought suit in the superior court at Stockton for \$123,10 against the Santa-Caribona Irrigation District, alleging the amount to be due for labor and materials furnished in the installation of pumping equipment for the defendant on Oct. 29, 1924.

Unskilled laborers in the employ of the city of Seattle will hereafter be paid on a monthly wage basis, instead of a daily basis, as at present. These laborers, many of whom are employed only part time, now draw \$4.75, \$5.00 and \$5.25 a day. They petitioned for a monthly wage of \$110, \$115 and \$120. The city council granted them \$112.50, \$117.50 and \$122.50 a month.

Unfilled orders of the United States Steel Corporation decreased 203,055 tons in the month ended February 2. Forward orders on February 28 aggregated 3,597,119 tons, against 3,800,177 tons as of January 31 and 4,616,820 on February 28, 1926.

Seattle recently voted a \$900,000 bond issue to finance construction of municipal auditorium.

Seattle will obtain the 1928 convention of the Northwest Electrical Inspectors' Association, according to Sam G. Hepler of the Seattle Electric Club. The 1926 convention was held in Portland, Ore.

Municipal ownership of public utilities, long a political issue, went down to defeat in the Seattle elections recently. The voters registered the disapproval by a vote of 27,537 to 13,216 of a proposal to buy the on privately owned street car line in the city for \$1,200,000.

City of San Rafael contemplates bond issue to replace the present sewer system. City Manager Brainerd in report to council estimates cost of 4 inch wood stave pipe sewer at \$107,620; 42-inch concrete pipe, \$159,865 and 4 inch cast iron pipe at \$266,619. Brainerd favors the wood stave type.

## TRADE NOTES

B. H. T. Anderson, associated with James J. Wood in the theatre business in Redding and Red Bluff, and V. Wooley, former superintendent of the Diamond Match Company at Chico have formed a partnership in the lumbering business with headquarters in San Francisco. The firm will be known as the Taylor-Anderson Lumber Company. Offices are maintained in the First National Bank Bldg.

George Ankers and D. C. Narbo, president and vice-president, respectively of the Lucille Chemical Company of Los Angeles, are conferring with the Santa Cruz Chamber of Commerce regarding the location in that city for a plant to manufacture paint.

The Wilmat Co., 8th Floor, 333 Second St., Los Angeles, seeks a live dealer in San Francisco to sell automatic water systems (200 to 300 gallons per hour capacity), household garbage rubbish burners (gas fired), gas and oil storage tanks, pumping equipment and air compressors.

Weinman Pump Manufacturing Co., 270 Spruce St., Columbus, Ohio, manufacturers of pumping machinery is anxious of securing a satisfactory engineering firm or sales engineer to handle their pumping machinery on an exclusive basis for San Francisco and contiguous territory.

E. U. White Lumber Company has taken over the business of the Blanken Lumber Company at Santa Rosa which makes that concern the largest company operating north of San Francisco Bay, according to officials of the concern.

Benjamin F. Delaney, 4096 Hopkins street, Oakland, will operate under the firm name of Success Heating Company.

R. H. Garland, son of F. J. Garland, manager of the Chas. H. McCormick Lumber Company's yard at San Diego, until recently with that concern himself, is now with the U. S. Gypsum Co. in Southern California.

J. Ellery Robertson will operate from Morris Ave., San Francisco, under the trade name of Robertson Trucking and Grading Company.

H. C. Ferguson and F. D. Butler have bought the Western Lumber Co. at Sacramento from E. C. Carpenter.

Wm. Chas. Constable, 2786 Bellaire ave., Oakland, will operate under the trade name of Preservo Waterproofing Co. Co.

E. T. Robie Company, lumber dealer, with headquarters at Auburn, Cal., is now incorporated. The company is capitalized at \$10,000. Directors are: T. Robie, Ina S. Robie and Wendell Robie, all of Auburn; Edwina Robie Robbins of Yuba City and E. S. McIdee of Davis.

Asbestos Distribution Company, capitalized for \$100,000, has been incorporated and will establish a factory in Oakland. Directors of the company are: S. M. Sample, Harry D. Leech, J. Turgeon, George T. Ehrlich and A. Little.

The Adams Lumber Company of San Francisco has leased 7000 square feet floor space at 5317 Horton street, Berkeley, for the distribution of boards, molding, sash, veneered white pine panels and art panels. E. Adams is president and general manager of the company.

B. H. Taylor Anderson and Vernon Woolley will operate under the firm name of Taylor Anderson Lumber Company with offices at 219 Crocker First National Bank Bldg., San Francisco.

Philip A. Genochio will operate from 6 Mission street, San Francisco, under the firm name of Crocker Hardware & Sheet Metal Works.

Geo. W. Wilson will operate from 12 Railroad Ave., Fresno, under the name of San Joaquin Pump Company, manufacturing and selling pumps and agricultural machinery.

K. M. Hayden and F. W. Knipscher have established the K. M. Hayden Company, wholesale and manufacturing agents and will specialize in the selling of hardwood doors and flooring with headquarters at 430 Ninth St., San Francisco.

Diablo Electric Company has opened offices and shop quarters at 629 Seely street, Antioch, under the ownership of E. R. McClelland.

The Rix Company, Inc., with offices in San Francisco, Los Angeles and Seattle, announces a change in the personnel of the Los Angeles office. J. H. Haigh, for many years associated with air compressor lines, has been appointed manager at Los Angeles.

Leo J. Dolan, Albert P. Devincenzi and George M. Frisbie, all of Oakland, will operate under the trade name of Nottingham Heating and Ventilating Company with headquarters at 368 10th Street, Oakland.

L. C. Burkee, general contractor, formerly of Yakima, Wash., is now operating in Petaluma, Cal.

## ALONG the LINE

San Francisco Board of Supervisors has voted to hold a bond election in May on projects involving a total of \$46,700,000. The board has also called a second bond election to be held two weeks after the first for a vote on the proposed \$1,000,000 bond issue for the war memorial and on bonds for Sunset Boulevard and to build an annex to the hall of justice. The proposals for which the \$16,700,000 bond issue will be asked are: Purchase of the Spring Valley Water System, completion of the Bernal Cut and construction of seven municipal railway extensions.

City of Long Beach has voted bonds of \$1,250,000 to finance extensions and betterments to the municipal gas system and \$2,378,000 for municipal water improvements. The former issue will provide \$750,000 for a 10,000,000-cu. ft. holder and storage tank and \$200,000 for pipe lines. The water works bonds will provide \$1,150,000 for pipe line extensions, \$500,000 for new reservoir and \$240,000 to construct the Alamitos pumping plant.

John Phillips, excavating contractor, has opened offices in the Hobart Bldg., San Francisco.

Harold B. Hammill, for many years associated with John B. Leonard, San Francisco consulting engineer, is now practicing under his own name, continuing, however, to share offices with Mr. Leonard at 381 Bush street, San Francisco.

The annual banquet and ball of Stockton Chapter, American Association of Engineers, was held March 12 in the Hotel Wolf roof garden with 150 members and guests in attendance. The program and dinner were arranged by Chas. H. Widdows and Lyle Payton.

E. D. Boivin, formerly assistant city engineer of Vallejo, is now connected with J. E. Johnston, street paving contractor of Stockton. Boivin will continue to make his home in Vallejo and will be district representative for Johnston in that section.

J. P. Davis, town engineer of Lakeport, Calif., has tendered his resignation to the town trustees. He will continue to be associated with Clear Lake Engineering & Construction Company with headquarters at Lakeport.

John F. Stevens, national president of the American Society of Civil Engineers, was guest of honor at the 129th meeting and monthly dinner of the Los Angeles section of the society March 9.

The consolidation of all companies quarrying marble near Carthage, Mo., has been announced. The new company will be the largest producer of finished marble in the world and will represent an investment of \$5,000,000.

### NOTICE TO ARCHITECTS

The following letter from Leonard B. Gray, district manager, U. S. Department of Commerce, to the California State Board of Architecture, Northern Division, is self-explanatory: Calif. State Board of Architecture, San Francisco, Calif. Gentlemen:

You will doubtless be interested and wish to give publicity to the following opportunity for American architects to participate with their British colleagues in a competition in design for the rebuilding of the Shakespeare Memorial Theatre, as mentioned in the following extract from report No. 236561 dated January 26th, 1927, by Consul John F. Jewell of Birmingham, England:

"The rebuilding of the Shakespeare Memorial Theatre, which was destroyed by fire on March 6th, 1926, is to be combined with a Stratford-upon-Avon town planning scheme. Competitive designs therefore have been invited and the competition is open to both American and British architects. A complete schedule of conditions and instructions to architects can be obtained from the Secretary, Shakespeare Memorial Theatre, Stratford-upon-Avon, England, on deposit of one guinea—£1:10 (\$5.12)."

Should any of the local architects decide to enter this competition, we will be very much interested in keeping in touch with their progress. Also, if we can be of any further assistance, we will be very glad to do so.

Cordially yours,  
(Signed) LEONARD B. GRAY,  
District Manager.

### CAN STORE BE EXCLUDED FROM RESIDENTIAL DISTRICT?

Whether a store building can legally be excluded from a residential district by zoning will soon be decided by the U. S. Supreme Court. This is the direct issue in a case involving the constitutionality of the zoning ordinance of Los Angeles argued before that tribunal March 7. Hecker N. Zahn and A. W. Ross, owners of property on Wilshire Blvd., between Dunsuir and Cochran Sts., sought to erect a store building but were denied a permit because the property has been restricted by ordinance to residential purposes. Constitutionality of the zoning ordinance was attacked in a suit brought to compel the city to issue a permit. Plaintiffs lost their case in the superior court, but won on an appeal to the appellate court and lost again in the state supreme court. It is argued by the plaintiffs that the ordinance does not sufficiently regard the nature of the businesses that would be conducted in the proposed building and thereby places unreasonable and discriminatory burdens upon the property. Counsel for the city of Los Angeles contends the ordinance is a proper exercise of police powers and that it is wholly within its jurisdiction to create residential districts from which any and all business may be excluded.—S. W. Builder.

### HARDWARE FIRM SUE

Following an accident on the state highway near Atherton, San Mateo County, on November 23, last, a damage suit naming Douglas Watson, truck driver, and the Palo Alto Hardware Company, as defendants, has been filed in the Superior Court at Redwood City. Guthrie alleges that he was changing a tire on his machine when Watson, driving a delivery truck, ran into him. The plaintiff's skull was fractured and he incurred other injuries, the complaint sets forth. Damages in the amount of \$25,290 are sought.

# ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

## ASSOCIATED CONTRACTORS PROTEST ROAD CONTRACT AWARD

Seeking to protect its members against alleged unfair treatment, and, at the same time, carrying a threat to place upon the black list all such offenders, the Associated General Contractors of America has laid before the Yuba County grand jury, through Floyd O. Booe, a traveling representative, a charge that the board of supervisors of that county last month awarded a contract on road work to a firm not the lowest responsible bidder.

The work referred to is now under way by the Contractors, Hemstreet & Bell of Marysville. At the time the contract was awarded Hemstreet & Bell it was admitted that another firm, from a distance, was about \$400 lower.

In this connection W. T. Ellis at a recent session of the supervisors, charged that Hemstreet & Bell are not living up to the terms of their contract, which covers a portion of road near Browns Valley.

## SUGAR PINE LUMBER COMPANY ELECTS OFFICERS

President Arthur H. Fleming and other officers and directors of the Sugar Pine Lumber Company were re-elected at the annual meeting of the corporation held at Pinedale, Fresno County, March 8, according to B. A. Cannon, vice president and general manager of the concern. In addition to Fleming and Cannon, the officers and directors are: Clarence S. Fleming, secretary; Herbert J. Goudge, treasurer, and R. C. Gillis, director.

## SACRAMENTO COMPLETES NEW BUILDING CODE

Copies of the new Sacramento city building code have been placed on sale by City Assessor-Collector C. W. Mier. Two thousand copies of the code will be sold at \$1 each. The code was made possible by a series of meetings of engineers and building officials on the Pacific Coast, the main object being a uniform building code for Pacific Coast cities.

## QUANTITY SURVEYORS MEET

The second annual convention of the American Institute of Quantity Surveyors will be held June 6, 7 and 8, 1927, at Washington. At this convention the progress made by this organization during the past year and its future activities will be discussed. A complete program of the Institute's sessions will be issued prior to this convention and will be forwarded upon request. The sessions of this institution are open to any one in the construction industry and the public who are interested in the development of a more economic, ethical and greater construction industry. The institute, which was organized in June, 1926, is stated to have doubled its membership in the first six months. The headquarters of the Institute at 510 North Dearborn St., Chicago, in charge of C. T. Burman, secretary.

## SALINAS CARPENTERS DEMAND WAGE INCREASE

The following letter has been mailed to all contractors doing business in Salinas and vicinity and is also made public by the undersigned committee:  
118 Harvest St.  
Salinas, Calif.

Dear Sir:

Pursuant to a resolution passed by Carpenters' Local No. 925, the undersigned committee has been authorized to communicate with all contractors and other interested parties with the object of putting into effect the above mentioned resolution to increase the pay of all carpenters in this district one dollar a day on and after May 31, 1927.

We are aware, however, that some work now contracted will not be completed by that time and wish it clearly understood that all bona fide contracts not completed by that time will be completed at the present scale.

We further suggest that all contracts entered into on and after Feb. 21, 1927, should carry a clause to cover the additional wage on any portion of the work extending beyond May 31, 1927.

You will, no doubt, recognize the fact that all other building craftsmen are receiving more money than carpenters upon whom falls the greater responsibility both in point of labor and knowledge to say nothing of investment and upkeep of tools of the craft.

We feel that we are asking a very modest share of the prosperity of this community and that the fairness and good judgment you have heretofore shown will be our guarantee of success in this matter so that the carpenters of Salinas and vicinity may receive a wage commensurate with their importance to the building industry and this community.

For some time past the disparity in this respect has been greater than usual and the present change will but tend to correct what has been an unjust condition.

Local Union No. 925

U. B. of C. and J. of A.  
FRED SKOIFVARS  
RAY LUNA  
H. H. BEAVEN

## ELECTRICAL SOCIETY DANCES

The Sacramento Valley Electrical Society held its annual dinner-dance at the Elks' Club Ball Room, Sacramento, March 9. Verne Ele with his band furnished the music and during the evening there were several solos. A radio skit was put on by employees of the Pacific Gas & Electric Company.

## ENGINEERS NOMINATE OFFICERS

A slate of three candidates for each office in the Fresno Engineers' Club of Fresno, was nominated by that organization for the election scheduled for April 6. Nominations follow: President, Max W. Enderlein, F. E. Twining and Chris. Jensen; first vice-president, H. C. Burbridge, O. L. Dickinson and W. F. Rantsma; second vice president, H. N. Klab, C. W. Manly and J. A. Ross; secretary-treasurer, Lee Duncan, A. L. Finney and H. H. Wheaton.

The nominating committee was composed of A. Segel, chairman; M. C. Paulsen, J. Allan Hall, J. W. Jourdan and Fred Gamboni.

## STATE MASTER PAINTERS ARE GUESTS AT SAN JOSE

Master painters of San Jose were hosts to the executive board of the State Association of Master Painters at a dinner at the Sainte Claire Hotel, that city, Saturday, March 12. Thirty four painters representing every section of the state attended the meet and discussed problems of the trade.

W. H. Herman of San Jose was toastmaster, and C. A. Boren of San Diego, president; O. A. Tollman of Los Angeles, H. M. Brace of San Francisco, Max Cohen of San Francisco, Harry McManus of Oakland, William Woole of Burlingame, secretary; George Langzen of San Jose and Frank Dixon of Sacramento were among the speakers.

Announcement was made that the association took second prize in the national body for their organization work last year. The board's next meeting will be at Los Angeles in May.

An increase of \$1 a day bringing the scale of wages to \$11 a day may be asked by the journeymen plumbers of Reno, Nevada, when the present agreement with the master plumbers expires on May 31. It was reported some time ago that carpenters of Reno would also seek an increase in wages.

## U. S. CUSTOMS COURT RULES BRICK AS DUTY FREE

Importers of building materials have won another important test case before the United States Customs Court at New York. In an opinion, rendered recently by Judge Young, merchandise described as "moler solid insulating bricks" is held properly entitled to free entry under paragraph 1536 of the Tariff Act of 1922. Protests of Van Oppen & Company, Inc., making the claim, are sustained. The collector's assessment at 30 per cent ad valorem under paragraph 214, Act of 1922, as manufactured earthy or mineral substance, is reversed.

Judge Young meets the contention that this brick does not come within the general class of merchandise commonly known as brick with the statement that, while the brick at issue was not designed primarily for building structural use, its presence in a building or wall has in fact a structural value.

It was brought out at the trial that the landed cost of this brick is about \$85 per thousand.

Congress, Judge Young points out in concluding his opinion, did not state that building brick, structural brick or any other kind of brick should be free of duty but that all brick was duty free unless specially provided for.

## ISSUES FOLDER

Cannon & Co. of Sacramento, "makers of America's finest brick," have a novel system of advertising their product—brick. With every piece of material leaving the company's office is enclosed a 6-page leaflet issued by the American Face Brick Company of Chicago. The leaflet features three home designs by the Service Department of the brick association in addition to a floor detail of a well planned home.

NEAR WHITTIER, Los Angeles Co., Cal.—Ranchito School District contemplates the erection of a new school building and will hold a bond election in the near future.

SANTA BARBARA, Cal.—County supervisors have invalidated the \$24,000 gricola school bond issue and another bond election will probably be held soon.

PHOENIX, Ariz.—Phoenix school district No. 1 has sold \$200,000 bond issue dated Feb. 2 to A. G. Becker & Co., Chicago, at a premium of \$14,541.

MARYSVILLE, Yuba Co., Cal.—Until April 5, bids will be received by county supervisors for purchase of 5,000 bond issue of Linda School District; proceeds of sale to finance erection of new school, plans for which are being prepared by Architects Cole & Orchard, Chico.

FAIRFIELD, Solano Co., Cal.—Until April 4, bids will be received by county supervisors for purchase of \$10,000 bond issue of Suisun School District; proceeds of sale to finance school improvements.

TAFT, Kern Co., Cal.—City trustees will be asked to call election to vote bonds of \$60,000 to finance erection of new city hall. Proposal has backing of Taft Exchange Club.

ARBUCKLE, Colusa Co., Cal.—Another election will be called to vote bonds to finance erection of a new high school. Petitioners for the election have lowered the amount to be voted from \$200,000 to \$125,000. Previous elections were defeated.

FONTANA, San Bernardino So., Cal.—Fontana School District will hold a bond election on March 25, at which time it is proposed to vote \$30,000 for building two rooms to the junior high school, erecting a new kindergarten building, acquiring the Declez school building and providing additional playground apparatus.

CAMPBELL, Santa Clara Co., Cal.—Bond election will be held April 6 in Campbell Union High School District to vote bonds of \$100,000 to finance erection of new grammar school and making additions to present structure.

WINNEMUCCA, Nevada — Election to be held March 26 in Winnemucca School District to vote bonds of \$100,000 to finance erection of new grammar school.

TOKTON, San Joaquin Co., Cal.—Election held in Calaveras River Grammar School District to vote bonds of \$100,000 to finance erection of new school failed to carry.

## CHURCHES

SAN DIEGO, Cal.—Greek Orthodox Church of San Diego, Thos. Rigopoulos, president, has incorporated and plans the erection of an edifice here.

LENDALE, Los Angeles Co., Cal.—Lestists in the Lake St. district of Lendale propose erecting a new church.

WHITTIER, Los Angeles Co., Cal.—Bur R. Herby has designed a new church building on Comstock between Ley and Hadley, Whittier, for the United Brethren Church; \$35,000.

LOS ANGELES, Cal. — Architects Henry Carleton Newton and Robert Dennis Murray, 304 San Fernando Bldg., are preparing working plans for a new Spanish church at s. w. corner of Smuir Ave. and Pico Blvd. for the Roman Catholic Bishop of Los Angeles. The church, parish of the Holy Spirit, Rev. Patrick Conanan, pastor; will have a seating capacity of 520; will be of concrete exterior, clay tile roof, gas steam radiators, hardwood floors, tile corridor, pine trim, glass sash, carpeted floors, cast stone accents, tower 60 ft. high, staff wks.; \$100,000.

GARDENA, Los Angeles Co., Cal.—Fred E. Tucker, 913 Olive St., Long Beach, was low bidder at \$27,573 for reinforced concrete church, at 936 W. Walnut St., Gardena, for the Roman Catholic Bishop of Los Angeles and San Diego, St. Anthony's parish; seating capacity of 400; 38x145 ft., 1-story with tower 60 ft. high, basement, gas furnace heating and ventilating system, stone work, ornamental iron wks., pine and hardwood trim, concrete exterior, cement and tiled floors, ornamental wood trusses; Henry Carleton Newton and Robert Dennis Murray, 304 San Fernando Bldg., Los Angeles, architects.

FRESNO, Fresno Co., Cal.—Architect Chas. E. Butner, Cory Bldg., Fresno, has completed preliminary plans for proposed White Temple to be erected for Methodist Episcopal Church, South, at L and Fresno streets; estimated cost \$100,000. Present edifice will be remodeled for Sunday School and social quarters; auditorium section of new structure will be equivalent to a three-story structure; auditorium seating 1200. Will be steel and concrete construction with 100 feet frontage in Fresno St. and 80 ft. frontage in L St.; heating, cooling and ventilating system will be installed.

LOS ANGELES, Cal.—Architects H. L. Pierce and W. S. Orme, 701 Wright & Callender Bldg., are preparing preliminary plans for a new edifice to be built at Gramercy Pl. and 70th St. for the old Vernon Ave. Congregational church. The project is practically financed.

LOS ANGELES, Cal.—Architect Albert C. Martin, Higgins Bldg., is taking bids for moving a frame school building at Ninth and Green Sts. for the Roman Catholic Bishop of Los Angeles and San Diego. The building is to be moved preparatory to erection of a new church for which plans are being completed; Father Conaty, pastor.

### PROGRAM

### FOLKS, GREET "SANDY" PRATT!

The Rocky road from Marysville to the American River in Sacramento past Mayhew (Sacramento County), thence by detour to Prattrock (near Folsom), with a long jump to Prattco in Monterey County, will be traveled with CLARENCE (SANDY) PRATT, at the

AD CLUB MEETING, MONDAY, MARCH 14  
AD CLUB ROOM—HOTEL SENATOR

Every member of the Club will appreciate the fact that Mr. Pratt has selected a decidedly "hard" subject to talk on, but as he earns his living selling cobble stones, crushed rock and sand, he may be pardoned for waxing enthusiastic over such a subject. Possessed of great quantities of "sand" he will come through with flying colors.

Seriously speaking "Sandy" Pratt, who is about half his time a citizen of Sacramento Valley, has developed a national reputation not only for his sand and gravel, but for his ability to make people talk about his products. This has been accomplished by clever advertising and there is hardly a week that some paper or magazine does not copy one of his ads and comment on its cleverness.

This is the kind of a speaker we like to get hold of. In addition to the message "Sandy" has to offer, he is a clever business man who is at the top of the heap in his line.—From weekly bulletin of the Sacramento (California) Ad. Club.

CHARLEY FARRELL is president.

OF THE Sacramento Ad Club.

AND CHARLEY invited Sandy.

TO TALK on advertising.

AT SACRAMENTO.

ON MONDAY last.

CHARLEY AND Sandy.

ARE OLD pals.

BOTH USED to be.

IN THE theatrical business.

IT WAS long time ago.

CHARLEY AND Sandy drove Indians.

OFF OF the land.

SO CHARLEY and Sandy.

COULD BUILD theatres.

CHARLEY RUSTLED the actors.

IN SAN Francisco.

AND SANDY ran the show.

IN THE San Joaquin Valley.

CHARLEY HAS reformed.

AND IS now.

AN ADVERTISING expert.

SANDY REFORMED also.

AND SELLS clean sand.

CLEAN ROCK and gravel.

FROM SACRAMENTO, Marysville.

PRATTROCK (NEAR Folsom).

PRATTCO (Monterey County).

(AND MAYHEW (Sacramento County

CENTRAL OFFICE—San Francisco.

SANDY TALKED advertising.

BUT SANDY also told.

THE MULTITUDE assembled.

AT THE Ad Club luncheon.

ABOUT SANDY'S clean sand.

AND CLEAN rock and gravel.

"IT PAYS to advertise."

AND SANDY grabbed the opportunity

TO TELL the girls and boys.

THAT WRITE good advertisements

ABOUT SANDY'S rock and sand.

AND ALL said to Sandy.

"I THANK you."

When Clarence (Sandy) Pratt, president of the Pratt Building Material Co. and producer of clean sand, rock gravel and concrete mix (sand at rock mixed) talked to the Sacramento Ad Club, Sandy took his churn (wool crusher) and "ground out" advertising facts, "screening out" the non-facts and tried to "crush" untruth in advertising.

LOS ANGELES, Cal.—Jones & Ward, 155 N. Western Ave., are taking bids segregated contracts for a five-story class B hotel and store building, on Ixchel St. near 6th St., for Jacobowitz & Intz; 72-room with 100% baths, 1 ore, lobby, etc.; steel frame, brick walls, wood floor joists, pressed brick and stucco facing, basement, electric elevator, composition roofing, tiled floors, pine trim, cement and pine doors, gas heating system, ornamental on work, plate glass, storage water heater; \$200,000.

LA GRANDE, Ore.—Architect C. B. Miller, La Grande, is preparing plans for seven-story fireproof hotel to be erected for Julius Roesch at Adams and Fir streets; est. cost, \$250,000. It will contain 100 rooms, 50 of which will have private baths.

TEMPE, Ariz.—The Casa Loma hotel here will be remodeled and refurbished. A steam heating plant and a new elevator will be installed.

LA GRANDE, Ore.—Trenchell & Parelius, 155 Tillamook St., at approx. \$225,000 awarded contract by W. C. Becktell of Las Grande to erect part four and six-story concrete hotel. Ernest Kroner, architect, Portland. Will be 116 by 135 feet, with two four-story wings and 6-story tower in center. Bids for plumbing, heating and electric work will be opened March 19.

SAUSILITO, Marin Co., Cal.—G. P. W. Jensen, 320 Market Street, San Francisco, at \$39,603, submitted low bid and was awarded contract by Architects Fabre and Hildebrand, 110 Sutter St., San Francisco, for the construction of a two-story reinforced concrete hotel building. It is to be erected at 198 Bulkley Street, Sausalito (Alta Mira Hotel Site) for E. W. Jackson, of Sausalito. Other bidders on revised plans are as follows: Leibert and Trobock, 185 Stevenson Street, San Francisco, \$39,724; H. H. Larsen, Foxcroft Bldg., San Francisco, \$39,769.

SAN FRANCISCO, Cal.—Cahill Bros., 55 New Montgomery St., San Francisco, recently awarded the grading contract to the Sibley Grading and Teaming Co., 165 Landers St., in connection with the construction of a one-story and mezzanine floor addition to the hotel building, located on the southwest corner of Market and Eighth Sts. Improvements are being made for the Whitcomb Estate, Ernest Drury, manager, of the Whitcomb Hotel. Plans were prepared by Architect Myron Hunt, 1007 Hibernian Bldg., Los Angeles, associated with Powers & Ahn-geles, 460 Montgomery St., local architects. Chas. C. Nason, 204 Whitcomb Hotel, San Francisco, is the manager of construction. \$150,000 is the approximated cost of the present addition, but the foundation will be for a 15-story addition, which, when completed, will cost approximately \$600,000.

## POWER PLANTS

OROVILLE, Butte Co., Cal.—Election will be held March 24 to vote bonds of \$150,000 to finance municipal electrical distributing system.

REDWOOD CITY, San Mateo Co., Cal.—Pacific Gas and Electric Co., 245 Market St., San Francisco, has approved orders for electric line construction involving an expenditure of \$39,265 in the Redwood City district.

FRESNO, Fresno Co., Cal.—San Joaquin Light and Power Co., Power Bldg., Fresno, will expend \$62,000 to erect a new sub-station at Orosi and \$21,828 to improve the sub-station at Reedley.

PASADENA, Cal.—City considering recommendation of Benj. F. DeLanty, manager of the municipal light and power dept., that 15,000-kilowatt unit be added to present plant.

LOS ANGELES, Cal.—Until 3 P. M., April 5, bids will be rec. by water and power commission for distribution and small-power transformers, specifications No. P-415. James P. Vroman, secretary.

PHOENIX, Ariz. — Prel. permit for five storage reservoirs and power plants on Gila river in Hidalgo and Grant counties, New Mexico, has been asked from federal power commission by R. H. Woods. He plans to develop 50,000 h. p. electrical energy for use in mining and smelting operations and for public utility purposes.

## PUBLIC BUILDINGS

Commissioned to Prepare Plans.  
AUDITORIUM Cost, Approx. 30,000  
PLACERVILLE, Cal.  
Municipal auditorium.  
Owner—City of Placerville.  
Architect—Starks & Flanders, Oschner Bldg., Sacramento.

BANNING, Riverside County, Cal.—Until 1 p. m., March 29, bids will be received by the city clerk of the city of Banning, Riverside County, for the erection of a 2-story reinforced concrete city hall building at Banning; Architects John Burnett and John V. Koester, 444 Petroleum Security Bldg., Los Angeles, associates; council chamber, offices, fire engine house and office for water department; stucco exterior, cast stone trim, tile, cement and wood floors, pine trim, reinforced concrete vault. Deposit of \$10 to be refunded. Plans and specifications are on file at office of city clerk, Banning, and at offices of the architects.

CULVER CITY, Los Angeles Co., Cal.—Architect William Lee Woollett, 733 Pacific Mutual Bldg., Los Angeles, will start working plans at once for a new city hall and municipal building at Culver City; the building will house all the city offices, jail and the central fire station; 2-story and basement, concrete and stucco construction, tile roofing, basement, gas heating, cement and wood floors, pine trim. The cost will be \$90,000. Bonds for this work were voted March 10.

**AUTO CAMP** Cost, \$15,000  
**DALY CITY, San Mateo Co., Cal.**  
 Auto Camp (8 cottages, store, community hall and office building).  
 Owner—Mission Auto Camp.  
 Architect—C. H. Jensen, Santa Fe Bldg. San Francisco.

**SANTA ROSA, Sonoma Co., Cal.—A. M. Hildebrandt, 406 4th St., Santa Rosa, at approx. \$40,000 awarded contract to erect reinforced concrete passenger and freight depot for Petaluma and Santa Rosa Railway in block bounded by Fourth, Wilson, Third Sts. and the railroad; will be Mission type of architecture.**

**SAN FRANCISCO—Board of Supervisors** will shortly adopt ordinance authorizing the construction of station buildings and equipment, shops and hangar, approaches and gasoline supply depot in connection with Municipal Airport near Millbrae, San Mateo county.

**OAKLAND, Alameda Co., Cal.—A. F. Anderson, Patton and Chabot Road, Oakland, at \$35,036, was awarded contract by the East Bay Municipal Utility District, to construct housing for San Pablo screening chamber, Lafayette screening chamber and Lafayette pump house and the aeration works at Lafayette screening chamber.**

**MIRABEL PARK, Sonoma Co., Cal.—A. O. Hall, Santa Rosa, at approx. \$15,000, awarded contract by Skaggs Bros., to erect dance pavilion a portion of which will border on the Russian River. A roller coaster costing \$7,000 and a \$10,000 bathhouse is contemplated on completion of the pavilion.**

**SAN FRANCISCO, Cal.—Granfield, Farrar and Carlin, 67 Hoff Ave., at \$74 cu. yd. submitted low bid to Board of Public Works to grade municipal airport site near Millbrae, San Mateo County Project involves 12,000 cu. yds. excavation. Other bids: P. L. Burr, \$82; C. L. Harney, \$90; Dutton-Dredge Co., \$110; Guerin Bros., \$116.**

**EL CERRITO, Contra Costa Co., Cal.—Joe Rossi, promoter of El Cerrito Athletic Club, El Cerrito, is having plans prepared for a \$50,000 gymnasium and arena building to be erected in San Pablo Ave. Will have seating capacity of 5500 persons.**

**LONG BEACH, Cal.—City Manager Chas. S. Henderson** instructed to advertise for bids for const. of 10 million cu. ft. gas holder to be located on Signal Hill water land at a point east of Cherry and south of Spring St.

**PHOENIX, Ariz.—Architect L. F. Fitzhugh, Home Builders Bldg., has prepared preliminary plans for a bowl to be built in Echo canyon for the Echo Canyon Bowl Association. It will have a primary stage, 160x80 feet, a secondary stage, 80x40 feet, property rooms, 40 dressing rooms, etc. Initial seating capacity will be 8000. Cost is estimated at \$100,000.**

**LOS ANGELES, Cal.—The Austin Co. of California, 777 E. Washington St., is preparing plans for a two-story brick addition, 142x140 feet, to the Blue Bird Laundry Co. plant at 3606 S. Western Ave. to cost about \$45,000.**

**FRESNO, Fresno Co., Cal.—Engineering Department, Southern Pacific R. R., 65 Market St., San Francisco, is preparing plans for \$25,000 automobile loading platform on S. P. reservation in H St., north of Tuolumne St.; will comprise platform 300 ft. long, 24 ft. and 40 ft. wide, the 24-ft. portion being covered with corr. iron. A 20-ton scale will be installed. Harry E. Ish, is district freight agent for the company at Fresno.**

**LAKEPORT, Lake Co., Cal.—Until April 7, 8 p. m., bids will be received by Sadie Gruwell, clerk, Lakeport Union School District, to fur. and install oil burner and storage tank. See call for bids under official proposal section in this issue.**

**MONTEBELLO, Los Angeles Co., Cal.—Until 7:30 P. M., March 23rd, bids will be received by the City of Montebello for the construction of a natatorium in Montebello. Separate proposals will be received on the following work: (1) construction of a bathhouse complete, including caretaker's quarters; (2) construction of two reinforced concrete swimming pools with a capacity of approximately 380,000 gallons and 45,000 gallons respectively; (3) furnishing and installing recirculation, filtration, heating and sterilization equipment. Certified check for 10%. Bidders must submit statement of qualifications. Plans and specifications on file in the office of city engineer of Montebello, and copies may be obtained from Olmsted & Gillesen, civil engineers, 1112 Hollingsworth Bldg., Los Angeles. Bathhouse plans only obtainable from H. B. Dunn, architect, 122 W. Foothill Blvd., Monrovia. Deposit of \$25 required. L. G. Herr, city clerk.**

**BAKERSFIELD, Kern Co., Cal.—California Fish & Game Commission will make a survey in Kern county to determine site for a new fish hatchery. It will probably be built in the vicinity of the junction of Kern river and Brush creek, above Kernville.**

**COALINGA, Fresno Co., Cal.—Until April 4, 5 p. m., bids will be received by L. A. Buchanan, city engineer, to fur. electrical refrigeration apparatus complete for public drinking fountain in West Elm Street. Temperature of water to be maintained at between 42 and 50 degrees, Fahrenheit. Further information obtainable from engineer.**

**TURLOCK, Stanislaus Co., Cal.—Until April 5, 10 a. m., bids will be received by Anna Sorenson, secy., Turlock Irrigation District, to construct rest house at Don Pedro Dam. Plans obtainable from secy.**

**SANTA ROSA, Sonoma Co., Cal.—Petaluma and Santa Rosa Railway rejects bids to erect electric depot at Santa Rosa, bids having run above the amount available for construction. New bids will be asked on revised plans.**

**STOCKTON, San Joaquin Co., Cal.—Bids received by city council to erect six-story drill tower for fire dept. will be rejected, according to City Manager Chas. E. Ashburner, due to property owners' adjoining the site for the structure. A new site will be purchased and new bids asked.**

**NAPA, Napa Co., Cal.—Until March 21, 8 p. m., bids will be received by Dr. R. M. Squier, clerk, Napa Union High School District, to fur. and del. at Napa High School: 1200 sacks cement; 350 yds. crushed rock, ½-in. to 1-in.; 40 yds. crushed rock, 1-in.; 100 yds. Marysville sand; 200 yds. river sand; 2700 ft. 6-in. stay wire. Further information obtainable from clerk.**

**MODESTO, Stanislaus Co., Cal.—E. L. Gamble, manager of Tidewater Southern Railroad, announces company will expend \$300,000 in construction in the Purdue District north of Modesto, when the city of Modesto makes provisions for water and sewerage; twenty warehouses and packing sheds are included in the improvements in addition to spur tracks and paved streets.**

**LIVERMORE, Alameda Co., Cal.—Until April 12, 11 A. M., bids will be received by U. S. Veterans' Bureau, Arlington Bldg., Washington, D. C., to construct fence and gates at Veterans' Hospital, Livermore. Project will involve 3960 lin. ft. 7-ft. wire fence and gate with concrete anchorages, and wrought iron fence and gates at main entrance (not including concrete gate posts, curbing, etc.) Plans may be obtained from Washington offices of Bureau or from Supervising Superintendent of Construction, U. S. Vet. Hospital, Palo Alto, Calif. Partial payments will be made monthly, covering approx. 90 per cent of the completed work.**

**WILMINGTON, Cal.—Wilmington Boat Works, Inner Harbor (T. S. Smith and Hugh Angelman, owners), having plans prepared for yard and building improvements costing \$100,000. A drydock is to be installed capable of raising boats of 600 tons and 150 feet. The addition of this drydock will place the plant in a position to handle almost all pleasure craft in the harbor. All the present ways are to be removed. One two-story building 26 x 80 feet, is to be erected alongside the present structure to provide space for yacht show rooms, drafting headquarters and offices. Another building, 36 x 100 feet, two stories, is to be constructed for a paint shop, machine shop, sail loft and spar and rigging loft. A blacksmith shop is also included in the plans. Mechanical equipment includes a 100-ton hydraulic boat lift, 80-ft. in length, with adjustable cradle.**

**PROBERTA, Tehama Co., Cal.—Until April 5, 8 P. M., bids will be rec. by El Camino Irrigation District, for:**

(1) erect office building and garage, including removal of 200 cu. yds. earth in grading;

(2) fur. and install office fixtures and furniture, including desk, chairs and filing cases;

(3) fur. and install, (a) septic tank; (b) 250 lin. ft. 4-in. sewer; (c) 80 lin. ft. 12-in. culvert pipe; (d) 400 lin. ft. 4-in. woven wire fence with metal posts and gate; (e) drill and case, 6-in. well, 50 ft. deep, more or less, and install pump and pressure tank.

Cert. check 5% payable to district req. with bid. Plans obtainable from Fred H. Tibbets, engineer, Alaska Commercial Bldg., San Francisco. See call for bids under official proposal section in this issue.

**MIRABEL PARK, Sonoma Co., Cal.—Skaggs Bros., have bids under advertisement and will shortly award a contract to erect \$15,000 dance pavilion at Mirabel Park; will be 75 by 150 ft. of frame construction and will involve some piling in the Russian River. A graded area will be provided with a capacity to park 5000 machines.**

**CLAREMONT, Los Angeles Co., Cal.—Jas. M. Judy, Pomona College, has prepared plans for a stadium to seat 50,000, swimming pool, etc., to be built at Pomona College.**

## BUSINESS OPPORTUNITIES

**SAN FRANCISCO, Cal.—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission St., San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.**

**D-2380—New York, N. Y.** The sole importers and installers of an English tennis court, en-tout-cas, that requires cinders for a foundation, wish to establish connections with a railroad or steamship company that can supply cinders in quantities of 90 tons. West Coast installations of these courts are at present impossible due to the non-availability of cinders.

**D-2381—Salt Lake City, Utah.** Sales engineer wishes to establish connections with San Francisco manufacturers desiring representation in Salt Lake City, and vicinity. He will visit San Francisco during the month of April, at which time personal interviews may be arranged with him.

**D-2384—Columbus, Ohio.** Manufacturers of pumping machinery are desirous of securing a satisfactory engineering firm or sales engineer to handle their pumping machinery on an exclusive basis for San Francisco and contiguous territory.

**D-2385—San Francisco, Calif.** Manufacturers' agent desires partner to help share the burden of a rapidly growing business. Has some twenty excellent connections with eastern manufacturers, principally building materials, some specialties. Financial and executive assistance preferred.

**D-2380**—Los Angeles, Calif. Company is seeking a live dealer in this country to sell automatic water systems (200 and 300 gallons per hour capacity), household garbage and rubbish burners (gas fired), gasoline and oil storage tanks, pumping equipment and air compressors.

**11375**—Toledo, Ohio. Manufacturers of automotive products wish to establish business connections with San Francisco automotive exporters who would be interested in handling their products for export trade.

**11374**—Alameda, Calif. Gentleman making trip to Honolulu, Japan, China and Manila would like to represent San Francisco firms interested in developing these markets.

**11378**—Waukegan, Ill. Concern is in the market for a certain brand of hard ammoniac in cakes of 8x2x1/4 inches, which have molded in them the name "Chlorammon." It is used for cleaning and tinning soldering irons. They would appreciate hearing from importers handling this particular brand.

**11389**—Trieste, Italy. Concern is in the market for pitchpine timber for ship construction. It wishes connections with firms who will sell directly to Trieste, not through the medium of other Italian houses. New York references supplied.

**11392**—Dusseldorf, Germany. A justice of the supreme court, who is also judge of one of the highest courts of Germany and for nineteen years an active attorney and notary public, contemplates severing his government connections and will devote his entire time and interest to representing foreign associations, organizations and concerns, in commission of all sorts. He is also in a position to observe and give reports on conditions in Germany, political matters excluded. He is a man of good standing, of influence and experience.

**11393**—Leipzig, Germany. Party having several patented articles, such as machines, specialties, etc., desires to establish connections with San Francisco patent sellers or patent bureaus which would be interested in handling his articles.

**11396**—San Francisco, Calif. Export manager, with two years' local experience and prior foreign experience in India, will return to India shortly as manufacturers' representative and desires to make connections with additional manufacturers of non-competing lines to sell their goods in India, or to establish agencies. University training in both India and California. Local references.

**11397**—San Francisco, Calif. Established firm, with offices in San Francisco and several Latin American countries, is desirous of obtaining exclusive agency rights of United States manufactures. All references.

**11399**—Guadalajara, Mexico. Concern is in the market for box shooks and material for making same. Solicits quotations from all San Francisco firms interested in supplying this material. Three San Francisco references are furnished. Material is needed at an early date.

**11400**—Mexico City, Mexico. An established representative of American factories and firms, having about 250 agents practically covering the entire Mexican territory, is interested in taking over the representation of San Francisco houses wishing to market their products in Mexico.

**11402**—Buenos Aires, Argentina. A number of members of the Chamber of Commerce of the United States of America in the Argentine Republic are well established as manufacturers' agents and are open to accept further representations. They are particularly interested in western lumbars, Douglas fir, pitch pine, office equipment, building materials, engineering supplies, paints and varnishes, hardware, etc.

### SURVEY SHOWS NEED FOR HOMES AND APARTMENTS

The steady diminution of the building shortage, which has been going on in the past few years, is showing a slight retardation, according to the ninth semi-annual survey of the real estate market just completed by the National Association of Real Estate Boards.

For each of the three types of housing studied the number of cities reporting a shortage shows an increase over the number shown in a similar survey made by the association six months ago. As compared with the situation shown by the survey of a year ago, however, the shortage is indicated as having further decreased.

Of the 304 communities reporting, a shortage is shown for single family dwellings in 29 per cent of the reports, for apartments in 33 per cent, and for business buildings in 19 per cent, as compared with 17 per cent, 15 per cent and 12 per cent respectively for June of 1926.

The largest shortage of single family dwellings exists in the Pacific States Section where the percentage reporting this condition is 44. Of apartments, the South Eastern and South Central Section show the largest shortage, the percentages being 45 per cent of the former and 44 per cent for the latter. The South Central Section also shows the greatest shortage in business buildings, 25 per cent of the

reports indicating such a shortage. Fifty-six per cent of the district boards reporting show a shortage of single family dwellings. The greatest need for apartments as well as for business buildings exists in the cities of under 25,000 population. None of the cities reporting of over 500,000 population show any shortage of apartments or business buildings, while but 33 per cent report a shortage of single family dwellings.

Residential rents show very little change over that of a year ago, and practically none over that of June, 1926. Sixty-six per cent of the cities reported stationary rental situation. Eleven per cent of the reports give rents as higher, and 23 per cent state them to be lower.

### GRANFIELD, FARRAR & CARLIN SUE FOR DAMAGES

Asking \$50,000 damages, five children of the late Henry Grace, San Francisco inventor, have filed suit against the grading firm of Granfield, Farrar & Carlin. They allege that Grace died as the result of injuries received when he was run down by a company truck at Sixteenth and Hoff Streets last November.

Grace, 78 years old, was the inventor of the cable grip used on San Francisco's cable cars. At the time of his death, the plaintiffs allege, he was perfecting a resilient tire for heavy motor trucks, which would have brought considerable wealth.

The children, represented by Attorney George L. Stewart, are John and Howard Grace, Mrs. Freda Thrasher, Mrs. Rose Kennedy and Mrs. Claire Showalter.

An intensive fire protection system for its thousands of acres of choice timber above Sonora has been decided by the Pickering Lumber Company for the approaching summer season. The plan is to cooperate with the national forest service by June 1, by placing a crew of picked men in the field on the part of the lumber company. The government will furnish lookouts on all the high peaks and communicate fire discovery to the company's guards. The lumber concern will fight all fires on its own property with its own crews.

Bids will be opened at the regular meeting of the Board of Trustees of the City of Madera, California, April 4th, at 7:30 P. M.

Said Board of Trustees reserves the right to reject any and all bids and to readvertise of bids.

Dated: March 7, 1927.

BOARD OF TRUSTEES OF THE CITY OF MADERA,

John B. Gordon, President,  
James Wakefield, City Clerk.

## NOTICE TO CONTRACTORS

(Sewer Pipe — Hanford, Cal.)

Pursuant to motion made and adopted by the Board of Trustees of the City of Hanford at a regular meeting of said board held on Monday, March 14, 1927, notice is hereby given that said Board of Trustees will receive

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate, 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

sealed proposals or bids for the furnishing of 900 feet, more or less, of No. 1, Class A, 8 inch Vitrified Sewer Pipe and 40, Class A, 4x8 inch Vitrified Sewer Y's. All the above to be f. o. b. cars at Hanford.

All bidders must accompany their bid with a certified check for ten per cent of the amount of said bid. All bids must be addressed to D. C. Williams, City Clerk. All bids must be on file on or before 8:00 o'clock, p. m., Monday, March 28, 1927, at which time said bids will be opened and declared.

The Board of Trustees expressly reserves the right to reject any and all bids.

Dated at Hanford, California, this 15th day of March, 1927.

(Seal) D. C. WILLIAMS,  
City Clerk.

## NOTICE TO BIDDERS

(Lakeport Union School District)

Notice is hereby given that on Thursday, April 7, 1927, at the hour of eight o'clock P. M. in the office of the Lakeport Union School, the Board of Trustees of said School will open bids for furnishing and installation of an oil burner and storage tank. Burner to be properly installed complete on No. 34 Mills Water Tube, low pressure steam 10 section 4000 feet. Boiler with 3500 feet radiation. Burner must be fully equipped with motor no voltage release switch and oil pump with oil pressure relief valve. Fire box of boiler to be properly lined with highgrade fire brick set in fire clay mortar and arranged to give complete combustion to fuel oil. Oil storage tank to be made of 3/8" iron—1500 gallon capacity, buried in basement 18" below the surface thereof—fitted and piped to Burner with 1 1/2" pipe and 1 1/4" return pipe. Distance between tank and burner not to exceed 25 feet. 2" vent pipe to run from tank alongside building to a height of 10 feet above ground distance not to exceed 15 feet and capped with return bend. 4" filling pipe to run to surface grade and properly capped (surface grade to tank 5 1/2 feet.) All pipe must be black. Equipment installed must be guaranteed to give satisfaction for

the term of one year. Installation to be made between July 1, 1927 and September 1, 1927.

The successful bidder will be required to file with the Board of Trustees a bond or certified check for 20 per cent of bid price for the faithful performance of his contract.

All bids must be sealed and plainly marked "Bids for Installation of Oil Burner and Storage Tank" and filed with the Clerk of the Board of Trustees not later than twelve o'clock noon, April 7, 1927.

Lakeport Union School Board of Trustees.

SADIE Z. GRUWELL,  
Clerk.

## NOTICE TO CONTRACTORS

(L. A. Winchell School, Fresno, Calif.)

Pursuant to an order of the Board of Education of the City of Fresno School District of the County of Fresno, duly made and entered in its minutes this 24th day of February, 1927, public notice is hereby given that said Board will receive up to 5 o'clock P. M. on the 31st day of March, 1927, at the office of said Board in the Hawthorne School Building, 2425 Fresno Street, in Fresno, California, sealed proposals for the furnishing of labor and material for the construction of the L. A. Winchell School as per plans prepared by Kump & Johnson, architects, Rowell Building, Fresno, California.

Segregated bids will be received for this building. Reference is hereby made to "General Information to Bidders," Building Form 6, for further particulars regarding all bids.

Plans and specifications, together with forms for submitting all bids and further details regarding any and all bids may be obtained from the undersigned Secretary of said Board of Education, at the office of said Board above designated.

A bidder's surety bond or certified check equal to at least ten per cent of the amount of the bid submitted must accompany all proposals.

The Board of Education of said school district reserves the right to reject any and all bids.

By Order BOARD OF EDUCATION,  
City of Fresno School District.  
L. L. SMITH, Secretary.

## NOTICE TO CONTRACTORS

(Office Bldg., Etc., El Camino Irrigation District)

Sealed proposals will be received by the directors of El Camino Irrigation district at their office at El Camino ranch, Proberta, Tehama county, California, until 8 o'clock p. m., April 5, 1927, for construction work at district headquarters, under the following contract at which time bids will be publicly opened:

Contract No. 1—All material and labor for erection of office building and garage. This contract to include moving approximately 200 cubic yards of earth in grading the site.

Contract No. 2—Office fixtures and furniture, including desk, chairs and filing cases.

Contract No. 3—Furnishing and installing the following items: 1, Septic tank, 2, 250 lineal feet of 4-inch sewer, 3, 80 lineal ft. 12-inch culvert pipe, 4, 400 lineal ft. of 4-ft. woven wire fence with metal posts and metal gate, 5, drilling and casting 6-inch well, 50-ft. deep, more or less, and also furnishing and installing pump and pressure tank.

Contract will be awarded to the lowest responsible bidder for each contract. Contractors may bid on any or all the contracts. The directors re-

serve the right to reject any or all bids.

Plans, specifications and contracts are on file at the district office, Proberta, and at the office of the engineer, Fred H. Tibbets, Alaska Commercial Building, San Francisco, California. Sets of plans and specifications may be obtained at either office by depositing the sum of \$2 for each set. Deposits will be repaid upon the return of the set in good condition, on or before April 10, 1927. Each proposal shall be accompanied by a certified check or bid bond in the sum of 5% of the total amount of bid, drawn in favor of El Camino Irrigation district. Certified checks or bid bonds accompanying rejected bids will be returned. Same will be returned to successful bidder upon execution of the contract and furnishing the required bond for faithful performance thereof. In case of failure to execute the contract, or furnish the required bond within the stipulated time, the certified check or bid bond, and the proceeds thereof, will become and remain the property of El Camino Irrigation district.

By order of the board of directors.

O. R. SMITH,  
Secretary.

# NOTICE FOR BIDS FOR FURNISHING PUMPING EQUIPMENT

(Paradise Irrigation District)

Sealed proposals will be received by the Board of Directors of the Paradise Irrigation District at their office at Paradise, Butte County, California, until 10:00 A. M., Tuesday, the 5th day of April, 1927, at which time they will be publicly opened and compared. Bids to be made for furnishing the following equipment:

One Byron Jackson No. 5 deepwell pump; 16 inch, 4-stage, having a capacity of 1350 gallons per minute against a 130 foot head.

One General Electric motor, built-in head type, 60 horsepower, 440 volts 1200 K. P. M.

One General Electric Auto Starter No. CR 7651.

Further specifications may be obtained at the office of the said Board.

The right is reserved to reject any or all bids and to accept any bid that is considered to be the most favorable to the interests of the District.

By order of the Board of Directors of the Paradise Irrigation District, dated March 1st, 1927.

J. E. ALLEY, Secretary.

## STATE OF CALIFORNIA

## CALIFORNIA HIGHWAY COMMISSION

### NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, Strub Building, Sacramento, Cal., until 2 o'clock P. M. on April 11, 1927, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway as follows:

Orange County, between San Juan Creek and Serra (VII-Or-2-60-A-C), about six-tenths (0.6) miles to be graded and paved with Portland cement concrete and four-tenths (0.4) miles to be graded and paved with bituminous macadam.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of

work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

RALPH W. BULL,  
J. P. BAUMGARTNER,  
California Highway Commission.  
R. M. MORTON,  
State Highway Engineer.  
E. FORREST MITCHELL,  
Secretary.

Dated: March 14, 1927

Lumber, logs and other personal property of the Sims Lumber & Box Company were sold at sheriff's sale March 15 at Sims, Shasta county, for \$2400 to the Lassen Lumber & Box Company of Castella. The sale was made under the direction of Labor Commissioner Mathewson, for the benefit of unpaid laborers, whose claims aggregated \$6620. They will receive 30 cents on the dollar.

C. K. Williams & Co., of Easton, Pa., with San Francisco branch offices at 216 Pine street, has purchased a 10-acre site near Shell Mound Park, Emeryville, and plans to erect a plant for the manufacture of dry colors.

John F. Stevens, president of the American Society of Engineers, was guest at a banquet of the San Francisco Chapter of that organization at the Palace Hotel, San Francisco, March 16.

## BRIDGES

**SACRAMENTO, Cal.**—On request of Major C. S. Ridley, San Francisco, Engineer Corps, U. S. Army, the Sacramento county supervisors have called a hearing for April 8 in the courthouse to discuss plans for building bridge across the Sacramento River at a point below Freepoint. The type and estimated cost of the structure has not been determined. Both Yolo and Sacramento counties will finance the cost. Chas. Deterding, Jr., is Sacramento County engineer.

**SONOMA COUNTY, Cal.**—Proctor & Cleghorn, Rosenberg Bldg., Santa Rosa, at \$23,217.50 awarded cont. by State Highway Comm. to const. bridge over Sonoma Creek near Schellville consisting of 100-ft. steel truss and two 25-ft. conc. approach spans; engineer's est., \$24,859.

**SHASTA COUNTY, Cal.**—State Highway Commission, Strub Bldg., Sacramento, preparing plans for conc. bridge over Pollard Gulch, 1½ mi. north of Lamoine; est. cost, \$85,000. R. M. Morton, state highway engineer.

**SAN LUIS OBISPO, Cal.**—Until April 4, 3 P. M., bids will be rec. by J. G. Driscoll, county clerk, to const. two rein. conc. bridges on Coast Highway; Villa Creek bridge, 4½ mi. north of Cayucos and Perry Creek bridge, 10 mi. north of Cayucos. Crushed rock in stock piles along highway is available for successful contractor by county without charge. Cert. check 5% payable to Chairman of Bd. of Suprs. req. with bid. Plans obtainable from clerk on deposit of \$5.

**COLTON, Cal.**—Until March 23, bids will be rec. by county to const. bridge at Palm Ave. and Riverside Road. The estimated cost is \$15,000. Of this amount, the Pacific Electric Ry. and Southern Pacific Ry. will each pay \$3000.

**SACRAMENTO COUNTY, Cal.**—As previously reported, bids will be rec. by State Highway Comm., Strub Bldg., Sacramento, March 28, 2 P. M., to const. underground crossing under tracks of S. P. Co., 1 mi. south of Ben Ali, consisting of 2 conc. abutments with wing walls, sidewalk and graded rdwy. Project involves: 22,500 cu. yds. rdwy. excav without classification; 19,000 sta. yds. overhaul (12 stations or less); 9500 mi. yds. haul (greater than 15 stations); 850 cu. yds. struc. excav.; 1220 cu. yds. "B" cem. conc.; 400 cu. yds. "A" cem. conc. (abutments, sump, etc.); 115 cu. yds. "A" cem. conc. (walk); 17,000 lbs. reinf. steel; 70 lin. ft. 12" drain pipe; 150 lin. ft. 5" discharge pipe 1100 cu. yds. structure backfill; 900 lin. ft. pipe handrail; 1 pumping equipment. Note—No progress payments will be made for this work prior to June 1, 1927.

**KERN COUNTY, Cal.**—Peterson & Elsler, Bakersfield, at \$7478.50 awarded cont. by State Highway Comm. to const safety walk for pedestrians across Kern river bridge near Bakersfield; engineer's estimate, \$12,520.70.

**LOS ANGELES, Cal.**—Until 2 P. M., April 4, bids will be rec. by county to const. conc. bridge on Pomona Blvd. over San Jose Creek.

**SANTA ROSA, Sonoma Co., Cal.**—R. Press Smith, Santa Rosa, at approx. \$10,500 sub. low bid to county to const. reinf. conc. floor and buttress walls for Schnitzler bridge over Dry Creek, 7 mi. n. w. of Healdsburg, 4th Sup. Dist., involv. 340 cu. yds. Class A reinf. conc.

**LOS ANGELES, Cal.**—Until 10 A. M., March 28, bids will be rec. by Board of Public Works to const. pedestrian subway across Pacific Electric Ry. at Young St., Wilmington. Plans obtainable from city engineer, 242 S. Broadway.

**SAN BERNARDINO, Cal.**—Until 11 A. M., April 4, bids will be rec. by county to erect steel work in construction of 1-beam trestle over combined tracks of Pacific Electric Ry. and Southern Pacific Ry. at Palm Ave., Grand Terrace. Plans obtainable from county surveyor. Certified check, 5%. Harry L. Allison, clerk.

**STOCKTON, San Joaquin Co., Cal.**—Until April 18, 11 a. m., bids will be rec. by Eugene D. Graham, county clerk, to const. rein. conc. bridges at site of old bridges on Everett School Road in Rd. Dist. No. 1. Est. cost \$6,000. Plans obtainable from F. E. Quail, county surveyor.

**SAN LEANDRO, Alameda Co., Cal.**—E. F. Hutchins, city clerk, desires to receive tentative plans and estimates of cost to construct two bridges over San Leandro Creek within the San Leandro city limits. City proposes to submit a bond issue and the plans and costs are desired to determine the amount of money the city should bond for.

**YOLO CO. Cal.**—Bill of Assemblyman A. B. Noyes providing \$200,000 appropriation to const. causeway over Sutter By-Pass on Yuba City-Woodland road has received favorable action of the Assembly Committee on Drainage. Recommendations have been made for a "do pass."

## DREDGING, HARBOR WORKS AND EXCAVATIONS

**RICHMOND, Contra Costa Co., Cal.**—Bids will be asked shortly by U. S. Engineer Office, Customhouse, San Francisco for dredging in Richmond Harbor. City of Richmond has posted \$142,500 as its share in the dredging to a depth of 90 ft. An equal amount will be provided by the Federal Government.

**RICHMOND, Contra Costa Co., Cal.**—Until April 14, 11 A. M., bids will be rec. by U. S. Engineer Office, Customhouse, San Francisco, for dredging in Richmond Harbor. Spec. obtainable from above office.

**SAN BERNARDINO, Cal.**—Tentative estimates of cost to const. new channel for San Timoteo Creek, as estimated by county engineer for board of supervisors, is \$190,000. River bank protection may cost an additional \$100,000.

Protection work and storm damage repair in the Byrn Mawr and Loma Linda District, according to Supervisor G. S. Biggin, will involve the construction of four new bridges at Mt. View Ave., Anderson St., Waterman Ave. and Hunt's Lane; the estimated cost of which is \$40,000. Other items of expense include right-of-way, \$32,400; excavation, \$50,000; reconstruction of city of Riverside reservoir, \$3000; construction of Gage canal siphon, \$5000; construction of outlet or spillway, \$5000; construction of intake, \$5000; moving and replacing houses and improvements, \$25,000; control of channel between Mt. View and California St., \$25,000, and bank protection work costing up to \$100,000.

**VALE, Ore.**—As previously reported bids will be rec. by U. S. Reclamation Bureau, Vale, April 12, 2 P. M., to const. portion of Division No. 1 of Vale canal project. Project involves: 450,000 cu. yds. of canal excav.; 33,000 sta. cu. yds. overhaul; 32,000 cu. yds. compacted embankments or puddled core; 4700 cu. yds. of excavation for structures; 5600 cu. yds. of backfill about structures; 1700 cu. yds. of puddling or tamping backfills about structures; 600 cu. yds. conc. in structures; 650 cu. yds. conc. in canal lining; placing 87,000 lbs. reinf. bars; lay 1400 lin. ft. 4-in. drain pipe with uncm. joints; lay 120 lin. ft. 6-in. drain pipe with cemented joints; lay 260 lin. ft. 15-in. conc. pipe with cement joints; lay 60 lin. ft. 18-in. conc. pipe with cement joints; erect 21 M. ft. b. m. of timber in bridges and install 2350 lbs. of gate lifts, etc. The invitation for bids does not cover the purchase of materials, which are to be furnished by the government. Guarantee of five per cent. of the amount of the bid for the maximum quantity of the work which the bidder stipulates a willingness to accept. Plans and specifications may be obtained from the bureau of reclamation at Vale, Denver, Colorado, or Washington, D.C.

**LOS ANGELES, Cal.**—Bids for removal of Dead Man's Island at entrance to main channel, Los Angeles harbor, are to be called within 30 days, according to Major H. A. Finch, dist. eng., Central Bldg., Los Angeles. Project involv. moving 2,000,000 cu. yds. earth and filling of 62 acres at south end of Terminal Island. Funds will become available as soon as President signs Army Approval Bill. Included in work is widening of main channel from 550 ft. to 1000 ft.

## IRRIGATION PROJECTS

**PHOENIX, Ariz.**—According to Howard S. Reed, engineer, Gillespie dam project, approx. \$500,000 will be expended on rehabilitation of 38 miles of canal, pumping equipment, and lateral system.

## LIGHTING SYSTEMS

Congress of March 3, 1879.

## HAMMOND AND WHITNEY LUMBER COMPANIES IN MERGER

Merger of two large and well-known lumber companies, the Hammond Lumber Company, San Francisco, and the Whitney Lumber Company, Oregon, with extensive holdings in the vicinity of Tillamook Bay and Garibaldi, Ore., is announced by A. B. Hammond, president of the Hammond Lumber Company.

The amalgamation of these two companies unites holdings in Oregon conservatively valued at more than \$15,000,000. The Whitney mills and holdings will be operated by the Hammond interests, it was announced.

Both companies deal extensively in Douglas fir.

Experienced lumber men place the value of the Whitney properties, including saw mill, logging equipment and growth, at more than \$4,000,000. The value of the Hammond interests adjoining is estimated at more than \$11,000,000.

While refusing to discuss price details of the merger, Hammond admitted it satisfactory to all parties.

"We have extensive holdings in that region and adjoining the Whitney interests," he said. "The owners of the property live in Detroit and are quite agreeable to merge with the Hammond interests, a long-established firm on the Pacific Coast. The new arrangement will aid the California lumber situation, I think, as we are actors in its supply."

## General Contractors Of S. F. Opposed To Proposed License Law

General Contractors of San Francisco, Inc., as an organization, is opposed to Senate Bill No. 758 and Assembly Bill No. 1050, which proposes to license general contractors operating in the state of California. In a letter to all senators and assemblymen in California, over the signature of A. H. Bergstrom, its president, the organization advances the following reasons for its objection to such a law:

First: It is impossible to legislate the irresponsible contractor out of business under either of these bills. It will always be possible for an unscrupulous or irresponsible contractor to obtain the necessary \$5000 bond through the help of some friendly surety company, material man or friend who will go on the bond or act as indemnitor.

Second: It will in a measure deter many worthy young men from making their first venture from engaging in the building industry, who may be possessed of the necessary technical qualifications but are lacking in friends who will execute the bond.

Third: Neither bill provides for a duly qualified examining board to test the qualifications of an applicant for a building contractor's license. Assembly Bill No. 1050 says the building commissioner MAY ask the applicant certain questions as to his qualifications, which is optional, at his discretion.

Fourth: Assembly Bill No. 1050 is merely a revenue-creating measure at the expense of building contractors. It concerns itself chiefly with the creation of a new office known as a building commissioner with an annual salary of \$5000. Under this bill it will cost contractors at least \$100 more per year to do business, which includes the license fee of \$25 per year and an annual premium on the \$5000 bond costing at least another \$75. This expense will be in addition to the present city taxes and license.

Fifth: The provisions for revocation of licenses under Assembly Bill No. 1050 are immaterial and difficult of proof. It does not concern itself with work not done in accordance with contract requirements or not in accordance with state or city building laws.

Sixth: Assembly Bill No. 1050 possesses no constructive legislation and is a delusion and a snare if contractors are led to believe their condition will be bettered by its enactment into law.

Seventh: The foregoing criticism also applies to Senate Bill No. 758. The principal difference between Assembly Bill No. 1050 and Senate Bill No. 758 is that the assembly bill may be construed as only covering building contractors, and makes no reference to other branches of the trade. Senate Bill No. 758 is much broader and can be construed to mean the building contractor, sub-contractor or others who furnish and install any material in a building. So that under this bill all employers of labor who furnish and erect material on practically any kind of a construction job will have to take out a license and file a \$5000 surety bond on which the annual premium must be paid. Another difference in Assembly Bill No. 1050 and Senate Bill No. 758 is that licenses will be issued under Senate Bill No. 758 by the secretary of state, and that no license fee is specified, as required by Assembly Bill No. 1050. The office of building commissioner is also omitted under Senate Bill No. 758.

Eighth: The principal purpose of the \$5000 bond required under Senate Bill No. 758 is to protect labor and material men. This bond will therefore be a duplication to the extent of \$5000 of

any separate bond required by an owner covering faithful performance and payment of material and labor and is an unnecessary expense.

Ninth: Under the present lien laws, material men sell to anyone without discrimination, knowing they can lien the job if they are not paid. This is a prolific source of trouble in the building industry, it is the underlying cause that promotes, sustains and encourages the irresponsible and unscrupulous contractor to defraud the owner or surety who sometimes have to pay the material and labor bills twice over.

The lien laws should only be for the protection of labor. That part giving material men the right to lien should be abolished. This will force material men to use discretion, and to only sell to responsible contractors who are of good reputation, honest and trustworthy.

If contractors are really anxious to better their profession the abolishment of the present lien law covering material is primarily essential. It will automatically abolish the irresponsible contractor, and they should not further involve themselves and make their position worse by giving their support to measures that will eventually prove to be a detriment.

Tenth: We are therefore opposed to these bills and are convinced that no benefit whatever will inure to the building contractor or the building industry by enacting into law of Bills 1050 or 758. It will simply be an additional expense hedging the contractor's business in with a lot of legal technicalities without any recompense or benefit to the public.

## ADDITIONAL SECTIONS FOR MILLWORK MANUAL ISSUED

Managing Director H. T. Didesch, of the Millwork Institute of California, has issued sections I and II of a Manual of Millwork, designed for the specific use of architects and contractors. Section I, "Woods, Their Properties and Uses," and Section II, "Glass and Glazing," may be inspected at Mr. Didesch's office, 117 W. Seventh St., Los Angeles. Section III, which will be devoted to "Mouldings and Finish," will be released for printing soon. This will be followed by Section IV, "Frame Construction;" Section V, "Doors and Sash," and others on allied subjects. Copies may be obtained from any Institute member with whom the architect or contractor is doing business, which will be furnished gratis, or copies will be mailed direct from the office at the rate of \$1 each.

## SOULE STEEL INCORPORATES

Soule Steel Company of San Francisco, capitalized for \$1,000,000, has been incorporated. Directors are: N. E. Dawson, O. A. Lindquist, N. C. Millar, D. H. Short, E. L. Soule, D. J. Stoddard and W. C. Thielman.

## Standardized Method To Appraise New Buildings Urged

Establishment of a uniform and standardized method of appraising new building projects financed by first mortgage real estate bonds is urged by W. J. Moore, president of the American Bond & Mortgage Company, who has submitted a proposed standard appraisal code to the committee of the American Construction Council appointed to survey the real estate bond industry. He declared that "it is the urgent responsibility of all elements either directly or indirectly identified with this business" to co-operate in solving the appraisal problem.

"Adoption of an honest, conservative and adequate appraisal policy, worked out with the co-operation and approval of the National Association of Securities (Blue-Sky) Commissioners," advised Mr. Moore, "would undoubtedly go far toward eliminating the criticism and present-day talk of inadequate appraisals and inflated valuations. Establishment of basic principles of property valuation, accepted and universally recognized by the (Blue-Sky) Commissioners, would also simplify the qualification of bond issues for sale in the various states, and give investors additional assurance of the quality and adequacy of the security back of the bonds they buy."

The American Construction Council committee is now considering Mr. Moore's proposal, which was submitted in booklet form, citing at length decisions of the federal and state courts and the rulings of the Interstate Commerce Commission and the state public regulatory bodies on questions of valuation that are similar and analogous to those in the real estate bond industry. "Study and analysis of these decisions," he said, "conclusively show that there are certain recognized and legalized standards of practice already established, especially in the public utility field, which I feel sure must be recognized and accepted as a basis of fair property valuation in the real estate mortgage bond field by the officials of the various states who are in charge of the execution of the realty securities laws."

### Finds Basis for Appraisal Code

The following reasons were cited by Mr. Moore in support of his contention that there was ample precedent on which to base a uniform appraisal code for construction projects:

First: The highest courts by their decisions on questions arising in the public utility field and in railroad rate-making cases have established a common law with respect to the determination of the value of lands, buildings and improvements on property.

Second: These court decisions and the accepted rulings of the Interstate Commerce Commission and the public utility regulatory bodies have definitely established principles for determining "Fair Actual Cost," "Fair Market Value" and certain other basic elements of valuation subjected to much controversy in new building appraisals.

Third: Many so-called "Overhead Charges," which have been disputed or disallowed as sound costs in real estate appraisals, have been defined and legally established as sound elements of valuation, as well as practically every other item of cost that the owner actually incurs from the time a project is started until it is completed and fully established as a going business.

Fourth: Intangible elements of cost, such as the value of putting a property on a profitable, or going basis — often referred to as "Going Value" — have also been defined and generally allowed a proper item of valuation by the courts and public utility commissions.

### Uniform Valuation Policy Needed

"Real estate bond houses operating on a national scale have been handicapped in qualifying their issues for sale before the various state commissions," explained Mr. Moore. "Their costs have been largely increased and their business operations seriously interfered with because of the widespread lack of uniformity in state requirements, especially as to factors of valuation to be considered in appraisal of proposed building projects."

"The difference of opinion on the part of appraisers, and particularly on the part of the Securities Commissions of the various states, have been widespread. They have especially differed as to what constitutes 'Fair Actual Cost' and 'Fair Market Value.'"

"Analysis of decisions and ruling by the courts and public utility commissions in numerous cases involving valuations for the purpose of fixing rates for public utilities or railroads, show that many of the intangible and so-called 'Overhead Charges,' which have been disallowed for inclusion as sound costs in real estate bond field appraisals, are universally permitted in various other fields of activity. Among the items of cost that have been recognized as legitimate by the various state regulatory and other rate making bodies, are—Cost of Financing, Interest during Construction, Brokerage, General Taxes, Title and Legal Expenses, Insurance, Organization Expenses and Contingency Allowance, Loss Incurred in putting property on 'Going Basis,' etc. With these items recognized as legitimate costs in appraisals in the public utility field, the real estate bond industry surely has an established precedent and a well defined basis on which to begin to establish an adequate, workable valuation code."

### Independent Appraisals Necessary

Mr. Moore stated, however, that a house specializing in real estate mortgage financing should be qualified to make its own appraisals, but "such appraisals should be substantiated by valuations obtained from responsible independent appraisers." He explained that "this will act as an additional assurance to the bond dealer and the investing public that the valuations are not excessive."

"Too much emphasis," he added, "cannot be placed upon the importance of determining the correct earning power of a project. Appraisals of rental income by competent, responsible outside appraisers is highly desirable. It is from the net income that the interest and amortization requirements of a bond issue must come."

"Experience has demonstrated, however, that capitalization of earning power alone is not altogether satisfactory. Therefore, it is generally recognized by experienced real estate bond

houses that the most reliable and sound basis for an appraisal of new project is on the basis of 'Fair Actual Cost,' plus a reasonable profit to the builder, backed up by independent appraisals as to the 'Fair Market Value' based on both cost and income.

"The purpose which legislatures had in view in passing securities laws and creating so-called, 'Blue-Sky' commissions is the protection of the public against fraud. When loans secured by mortgages were made directly by the owner of the moneys loaned, there was no occasion for the regulation of mortgage loans. The lender inspected, or caused to be inspected, the property offered as security and exercised his own judgment as to the amount he saw fit to loan. With the advent of the serial bond issue, the individual bond buyer is not usually in a position to exercise an independent judgment on the nature of the security offered. He has to rely upon the standing and reputation of the party who has sponsored the issue and offered it to the public.

### Security Issuer Has Rights

"The borrower is a member of the public and he has the right to go to the public, within the limits prescribed by law, and sell his securities if he can find purchasers for them, and the officers charged with the administration of the law are just as much bound to respect the rights of the issuer of securities, in accordance with the statutes and the interpretation thereof established by the courts, as the other members of the public have to be protected against an unsafe investment.

"Whether the issue of securities that may qualify under the 'Blue-Sky Law' is limited to 50% or 75% or any other percentage of the 'Fair Market Value' of the property is a matter of public policy to be determined by the people through legislative bodies, and when a percentage is fixed, it becomes the law of the jurisdiction. Where and if the legislative body invests a commission with the determination of which is a fair and reasonable amount of an issue of securities, that they think may be safely and properly issued and sold to the public, the officers charged with the administration of such securities law should take into consideration the past experience of those engaged in making such loans and the ratio of value to loans should be that which reasonably prudent individual investors are willing to make, where they have the opportunity and ability to form an independent judgment for themselves.

"In other words, 'Blue-Sky' Commissions should not only keep in mind the reasonable protection for the investor, but they also should take into account the reasonable rights of the borrower. Undue limitation on the rights of the borrower will slow up the wheels of progress."

As a basis for discussion, Mr. Moore suggested a chart detailing the elements of value to be taken into consideration in appraising a new building project as well as tentative per-

contages to be allowed in computing appraisals.

"I believe the average investor would prefer an appraisal based upon the method outlined," concluded Mr. Moore in his proposal, "to one based upon continuance of the practice of taking appraisals by competent disinterested appraisers for the purpose of verifying the 'Fair Market Value' arrived at by the method outlined."

"I would also like to stress the idea of the independent appraisals of gross and net income, by real estate and hotel men, familiar with the operation and income from apartment houses, office and loft buildings and hotels, for after all it is the net income that pays the interest and bond amortization, and a correct determination of this essential matter is of the greatest importance."

#### LIME AND PLASTER-OF-PARIS STUDIED BY X-RAY

X-ray examination has been applied by the Bureau of Mines and the Massachusetts Institute of Technology to the study of certain problems in lime and in plaster-of-paris. In the case of lime, the method was used to determine whether there is any structural relationship between lime and the stone from which it is made. In the case of plaster-of-paris the purpose was to investigate the deterioration resulting from recalcination, the strength virtually reaching zero at the fifth calcination, while the water-carrying capacity of the material is more than doubled. From the investigation it was concluded that the change is probably due to changes in size of particles, possibly brought about by articles of uncalcined plaster acting as centers of crystallization. By the addition of small percentages of promoters, the strength can be greatly increased, according to the report of the director of the bureau, just issued.

#### A. CITY COUNCIL CONSIDERS NEW PLASTERING LAW

An ordinance regulating plastering in Los Angeles will go to the city council tomorrow, according to Chairman Zahn of the building and safety committee. Some changes have been made in the text of the ordinance, the most important being that relating to interior plastering. As now drafted the minimum thickness of plastering is fixed at 3/4-in. which will permit two-coat work. As originally drafted three-coat work with a minimum thickness of 1/2-in. was required.

#### PAVING COSTS CUT

Invasion of the Oakland field by outside paving companies has resulted in sharp drop in paving costs, according to Wm. J. Baccus, commissioner of streets, Oakland. Oil macadam costs have dropped from 3 to 4 cents a foot and the reduction on expensive paving is has ranged from 2 to 5 cents a foot. The competition at present is making the form of a war to obtain private contracts for street work. In many instances the street department is found frontage on the same street lined up with two or three paving companies at different figures, Baccus said.

## California Pottery Company To Market "Rock Edge Shingles"

The "Rock Edge Shingle" is the latest addition to the line of clay product building materials now being manufactured at the Merced plant of the California Pottery Company of San Francisco.

The "Rock Edge Shingle" is a hard burned clay product, one-half inch thick, and comes in variegated colors ranging from buffs to russets, browns, chocolates, old golds, reds and purples. Rough edges are accomplished by hand which afford real sharp lines, giving a very massive and rugged appearance on the roof.

The shingles are sixteen inches long and run between six, eight and twelve inches wide, according to Ben Vincent, who perfected the product and is in

charge of the Roofing Tile Department of the California Pottery Company.

"Rock Edge Shingles are new on the market and will fill a long felt want in the building field," says Vincent. "From a standpoint of beauty, fire-proof quality and economy, Rock Edge Shingles will not be found wanting. The Merced plant of our company is prepared to turn out this product to meet the greatest demands. Heavy stocks are carried at our Eleventh and Harrison Streets yards, San Francisco, East Twelfth Street and Park Avenue, Oakland; and at Niles, California."

Literature on the new product will be mailed to the trade at once, according to Vincent, who will have exclusive charge of the distribution of the shingles.

## Making Concrete Watertight Is Explained In New Booklet

(Special Correspondence From National Lime Association)

The problem of making concrete watertight, detailing experiences of architects, engineers and contractors in various sections of the country, with data on the strength and permeability of concrete, is discussed in a recent bulletin of the National Lime Association under the title of "Watertight Concrete."

There is no mystery about making concrete watertight. First, the concrete must be made uniform and workable so that it reaches every corner of the forms and flows around the steel without pockets or bridges. Second, the voids must be filled. Hydrated lime does both. The microscope shows approximately 85 per cent would pass through a screen having 860 meshes per linear inch, or 739,000 openings per square inch if such a screen could be made. These particles work into the voids and fill them so that water cannot penetrate. Even when the voids are filled, the watertightening action of lime does not stop.

While void filling is well enough as far as it goes, there must be no porous areas like stone pockets, bridges or honeycombs. The action of lime prevents them, for lime makes concrete so workable that every corner of the forms is sure to be filled. All steel, even in the most intricate reinforcing, is completely and uniformly bedded in dense and homogeneous concrete. Segregation is eliminated and the steel is firmly gripped in rust-preventing concrete.

All concrete should be watertight. Concrete basements and floors must be kept dry; concrete sewers and mains should be kept tight; retaining walls, dams, reservoirs and swimming pools must be watertight; factory and office buildings will be more permanent if protected against water, it is asserted in the bulletin.

Water is one of the worst enemies of good concrete construction. Too much mixing water means weak, porous concrete and too great a variation in the moisture content after it has hardened causes cracks. "Just concrete" is no longer good enough. Engineers know that the stresses due to moisture variations are greater than

those due to temperature. Hydrated lime keeps the moisture content uniform, avoiding internal stresses and cracking. This is particularly evident in concrete road construction, where roads containing lime have only 50 to 70 clean cut transverse cracks per mile, while roads without lime may have from 200 to 300 ragged cracks in the same distance.

Where reinforcing steel is alternately damp and dry, as is the case with porous concrete, rust soon spalls off the concrete which covers the rods. Hydrated lime prevents this action in two ways, first by making a dense and uniform covering of the steel without danger of pockets or bridges, and second because its alkalinity prevents rust.

The use of hydrated lime by the leading architects, engineers, and contractors throughout the country, testifies to its reliability and continuing effectiveness. It is used by army engineers in river and harbor improvements, and the intricate and massive concrete in the Wilson Dam at Muscle Shoals all contain lime. Its cost is offset by the increase in workability and the decrease in handling expense.

The best way to make concrete watertight, according to the bulletin, is to add hydrated lime to the mix. The results are permanent and satisfactory. Permanence and void filling, high workability and uniformity, freedom from segregation and cracking, high strength and pleasing color are essential. Hydrated lime gives these qualities to concrete, and is carried in every building material dealer's stock.

Concrete containing lime is placed with less water than concrete without lime. The natural smoothness of the lime is imparted to the concrete and it flows down the chutes in a uniform and stiff but plastic mass, without clogging and without segregation. There is no need for the man at the mixer to flood the concrete in order to wash it down the chute and into the forms. The quakey mass handles easily, spades well, and when the forms are removed is smooth enough for any purpose.

# THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

U. S. Attorney Buckner, acting under instructions from Attorney General Sargent, recently filed a petition in the Federal District Court to restrain five unions in the building trades of Westchester County, the Building Trades Council and sixteen union officials from preventing the use in New York City and environs of cast stone manufactured at lower costs outside the city by union and non-union workers. The government's petition, based upon six months' investigation, alleged that apartment houses, school buildings, churches and other structures have been delayed as a result of a conspiracy to violate the Sherman Anti-Trust Law with which the unions are charged.

On March 28th the presidents of fifteen of the international unions in the building trades will assemble in Cleveland for the purpose of attempting to bring about a consolidation of the two building trade councils in that city. At the present time the bricklayers, bridge and structural iron workers, hoisting engineers, plumbers and sheet metal workers are affiliated with what is known as the new Council as against the old building trades council with which is affiliated the balance of the trades.

The report of a special engineering committee appointed by the county supervisors of Los Angeles to investigate the San Gabriel dam site has been filed. The salient points in the report are: that the Fork site has been decided upon as the logical site for the proposed dam, eliminating the Granite Dyke site; that the size of the storage area be reduced from 240,000 acre feet to 180,000 acre feet, thereby reducing the height from 485 feet to 385 feet; and that the cost be estimated at \$25,800,000.

The steady downward trend of building since October, 1925, has resulted in a decreasing lumber demand, the Brookmire Economic Service, Inc., states in a lumber bulletin. A decrease in rural purchasing power anticipated for this spring and summer, and the prospect of little increase in railway purchases of lumber will contribute toward the decline. In the past four weeks, lumber production was 15 per cent less than that reported in the same period of 1926, orders were 17 per cent lower and shipments fell off 20 per cent.

Clyde L. Chamblin, Oakland electrical contractor, was elected president of the Association of Electragists International, the international organization of the electrical contractors. He succeeds Jos. A. Fowler of Memphis, Tenn.

Key System Transit Company with headquarters at 22nd and Grove Sts., Oakland, will expend \$1,300,000 for East Bay transportation improvements in 1927-28, according to budget plans, it is announced by Lester S. Ready, president of the company.

In view of the probable high tariff on lumber, now pending in the Japanese Parliament, which is expected to curtail the American export market, now amounting to more than a billion feet a year, Congressman Albert Johnson has suggested to the Secretaries of Commerce and Agriculture that scientific studies be pursued to find other uses than lumber for America's vast timber tracts.

Production of polished plate glass in the United States in January was 8,483,863 square feet, an increase of 15.5 per cent over 7,344,361 square feet in December, but a decrease of 20.9 per cent from 10,728,677 square feet in January, 1926.

Yuba City's new plumbing law is now in effect. License fees, under the ordinance, require \$40 annually from master plumbers and \$2.50 from journeyman plumbers. Master plumbers must furnish a \$500 bond under the terms of the law.

At the annual meeting of the R. C. Deacon Lumber Company of Lemoore, Calif., T. C. Allen, Mae D. Deacon, Douglas Sides, E. H. Howe and R. O. Deacon were elected directors to serve for the ensuing year. An 8 per cent dividend on the regular preferred stock of the corporation was declared and ordered paid.

Los Angeles Builders' Exchange has endorsed the plan to create the position of heating and ventilating engineer in the Los Angeles building department. The engineer would inspect all heating and ventilating installations.

Corporations that do business in California but are not incorporated here will not be required to pay an annual license fee based upon their authorized capital stock, according to a ruling of the State Supreme Court in granting a writ of mandate against Frank C. Jordan, secretary of state, for the Perkins Manufacturing Co.

The first woman to be elected to corporate membership in the American Society of Civil Engineers in its 75 years of existence is Miss Elsie Eaves, assistant manager of market surveys for Engineering News Record, a New York publication. Miss Eaves, a graduate of the University of Colorado in 1920, came to New York last year from Denver.

Plans to organize a credit association of contractors and building material dealers in Kern county are under way. Meetings to further organization are being held regularly in the offices of the Kern County Business Men's Association in Bakersfield. J. F. O'Neill, secretary of the business men's organization is active in the move. Contractors and material dealers entering the association will give and receive information of a protective nature in regard to their credit dealings.

## TRADE NOTES

United States Gypsum Co., Chicago, Ill., has issued five new bulletins devoted to its different construction projects of fireproof material. A 50-page booklet gives architectural data on "Pyrobar" roof construction. An 18-page catalog gives architectural information on "Pyrofil" roofs and floors. A third bulletin describes the Pyrobar floor voids used with concrete joists systems of floor construction. The last two bulletins are devoted to Structlite (structural gypsum), the first devoted specifically to floors and roofs, the latter showing its adaptation to industrial building. All of the booklets contain line drawings of details, information as to installation and many photographs showing the three different types of gypsum products in actual use on diverse construction operations.

Guy W. Richards, manager of the Kavanaugh & Twohy Rock Co., which operate a rock and gravel plant at Orange, Cal., announces that its holdings have been sold to the Union Rock Company of Los Angeles and that it will discontinue business. The Union Rock Company will operate the plant at Orange as a branch. No change in the personnel at the plant is contemplated at present, according to the announcement.

Lowell Wood Products Mfg. Co., 953 Sixty-third St., Oakland, capitalized for \$50,000, has been incorporated in Oakland. Directors are: Wm. A. and Kate Mangless and Geo. T. Ehrlick, all of Oakland.

East Bay Builders Incorporated of Oakland has been incorporated. Concern is capitalized for \$15,000. Directors are: L. K. Clark, K. A. Temple and L. R. Holm, all of Oakland.

Authorization to increase the capital stock of Gladding, McBean & Co., to 500,000 shares was voted by stockholders in a routine meeting recently. This is preliminary to the carrying out of the announced plan of the company to issue a 400 per cent stock dividend by giving holders four shares for each one now held. The total outstanding now is 52,000.

George Katz will operate from 950 Mission street, San Francisco, under the trade name of Peerless Electric Company.

Alameda city council will amend zoning laws to permit expansions to the plant of the California Mill & Lumber Company at the northwest corner of Eagle avenue and Webster street.

At a meeting of directors of the Santa Cruz Portland Cement Company March 16, a dividend of \$1 a share was declared, payable April 1 to stockholders of record March 18.

Ward Furnace Co. announces the appointment of L. H. Romey as assistant manager of the Oakland plant. Mr. Romey is a heating engineer and a graduate of the University of Syracuse, N. Y., and comes directly to the Ward Company from Cleveland, Ohio.

California Builders Supply Co. announce the opening of new display rooms and offices at 1745 East Twelfth street, Oakland. Architects, builders and prospective home owners are invited to inspect the display rooms which feature Masterbilt and Eureka built-in fixtures, mahogany and quarter figure gum doors, fir doors and sash.

Sunnyvale Lumber Company at Sunnyvale has been purchased by the Lucas Manufacturing Company of Sunnyvale. F. A. Lucas is general manager of the latter concern.

E. J. O'Bella, for the past fourteen years in charge of the Los Angeles plant of Veyhle & Collins, has been named superintendent for the Berkeley Sash & Door Company at Fifth and Dwight Way, Berkeley.

Riverside Portland Cement Company has just published for the benefit of architects "Cement Plastering Specifications," which represent the best practice according to competent and experienced authorities. They are designed to recommend the most practical and economical methods of plastering. The specifications are written in four parts covering plastering over frame construction, over concrete, over brick or concrete hollow tile and over insulating material.

California Electric Manufacturing Co. of Stockton has been incorporated. The company is capitalized for \$75,000 and has the following directors: F. C. Brandt, F. C. Gerard and P. E. Onwiler.

Electrical Products Corporation with headquarters at 1123 Venice Boulevard, Los Angeles, specializing in the manufacture of electric signs, has leased shop and office quarters at 1240 Van Ness Ave., Fresno, to serve the San Joaquin Valley section. Paul D. Howse, president and H. H. Kaufman, secretary of the company negotiated the lease for the Fresno quarters.

Smith Co-operative Builders, Inc., has opened offices in the Pacific Building, San Francisco, and will design and finance homes, flats and apartment buildings. Jos. J. Smith is president of the company.

Geo. W. Ryman and Durward B. Staples will operate under the firm name of Sunnyvale Plumbing & Heating Company with shop and offices at Sunnyvale, Santa Clara County.

Denial of assertions concerning the construction of a \$3,000,000 cement plant in Seattle by the Pacific Coast Company, occurring in Pacific Northwest newspapers, is made by N. D. Moore, vice-president of the Pacific Company with headquarters in Seattle. It is generally understood that the company proposes to erect such a plant but, according to Moore, no decision has been reached in the matter.

Morgan A. Shirley of Berkeley and Morgan A. Shirley Jr., will operate from 409 Washington street, Oakland, under the trade name of Shirley Sheet Metal Company.

Western Paving Co. of San Francisco, capitalized for \$100,000, has been incorporated. Directors are: A. B. Rilevich, H. Claudius and A. T. Peterson.

## ALONG the LINE

Fred L. Swartz, a member of the firm of Swartz & Ryland, Fresno architects, addressed the senior class of the Tulare High School District at Tulare, March 15. Mr. Swartz spoke along the lines of what a boy must do to fit himself for the architectural profession.

John N. Bidwell, city engineer of North Sacramento, has tendered his resignation to the city trustees. His successor will be appointed shortly.

R. O. Steck, who has been identified with the paving industry on the Pacific Coast for several years, has been appointed engineer for the Western Asphalt Association in the San Diego district, it is announced by Daniel B. Miller, secretary-engineer of the organization. Mr. Steck will maintain headquarters at 4615 Utah St., San Diego.

T. H. King, engineer of the La Mesa Irrigation District at La Mesa, has been elected president of San Diego Section, American Society of Civil Engineers, succeeding Commander DeWitt C. Webb of the U. S. Navy.

Francis Prine, a pioneer builder and father of W. E. Prine, editor of the Southwest Builder and Contractor, died in Los Angeles March 10 at the age of ninety-three years. Mr. Prine's experience in construction harked back to the days when the adze and the drawing knife were essential tools, for power saws were then almost unknown in Southern Ohio where he was born and raised.

William E. Schirmer has been appointed supervising architect of the Oakmore Highlands Homes Association, composed of the home owners in the new East Bay District.

The salary of the city building inspector has been set at \$280 a month by the Stockton city council. Other employees of the office will be paid as follows: assistant building inspector, \$200 a month; electrical inspector, \$280 a month; plumbing inspector, \$255 a month, and assistant plumbing inspector, \$180 a month.

Lewis P. Hobart, San Francisco architect, has left for a three months' trip of Europe to study European architecture. He will study cathedrals of England and France with a view to obtain ideas for the proposed \$1,500,000 Grace Cathedral to be erected in San Francisco.

plasterer, with headquarters at 720 Clementina street, San Francisco.

L. L. Hursh announces his association with Jesse Shay, contracting

### IN NEW QUARTERS

Truscon Steel Company, formerly located at 709 Mission Street, has moved to larger quarters in the Sharon Building, 55 New Montgomery street, San Francisco. The company carries a complete line of reinforcing steel, steel windows, metal lath, steel joists, steel building and road products.

### QUARRY MERGER COMPLETE

Lumber rates in the intercoastal trade will be increased during the spring movement, it was indicated following the announcement that the San Francisco freighter Frank Lynch had been chartered for a cargo from Puget Sound to Cuba at a rate of \$16 a thousand feet. Although the present rate is \$14 a thousand local shipping men believe it will soar to \$2 more a thousand at the height of the movement.

### HOME BUILT PAR-EXCELLENT

The contractor took a friend to see a row of houses he had just erected. The friend took up his position in one house while the builder went next door.

"Can you hear me, Bill?" he whispered through the dividing wall.

"Yes," was the answering whisper.

"Can you see me?"

"No," was the reply.

"There's walls for you!" replied the proud contractor.—Ex.

### WANTS BRIDGE ESTIMATES

The city of San Leandro proposes to submit a bond issue to finance construction of two bridges over San Leandro Creek within the city limits. E. F. Hutchins, city clerk, advises he desires to secure tentative plans and estimates of cost for such structures that the city might determine the amount of money to be provided for the bond issue.

### COST OF LIVING

According to the Monthly Labor Review of the Bureau of Labor Statistics, U. S. Department of Labor, the retail price of food showed a decrease of 2.2% on December 15, 1926, as compared with December 15, 1925. The cost of living in December last year stood at 176 using 1913 as 100. This was a decrease of two points from December, 1925, and three points higher than December, 1924.

The San Francisco Civil Service Commission announces examinations will be held at the City Hall beginning April 20 of applications for city jobs in the following classes of services: Blacksmiths, boiler makers, bricklayers, carpenters (including cabinet makers), cement finishers, hoisting and portable engineers (including engineers of steam rollers), engineers of stationary steam engines (including chief engineers and assistant engineers), glaziers, granite cutters, locksmiths, machinists, marine engineers, marine engineers of gasoline engines, painters, pattern makers, pilots, plumbers, steamfitters and tinners. Applications must be filed before 5 o'clock Monday, April 18. Tests will be held for asphalt workers on April 9.

A chapter of the American Institute of Architects has been formed in Hawaii, it is announced by Milton B. Medary Jr., Philadelphia, president of the institute. The charter was granted as a result of a petition signed by Hart Wood, C. W. Dickey, W. L. Emory, M. H. Webb, Ralph A. Fishbourne and Ed-

Harry Searancke, office engineer for the State Reclamation Board, has resigned to become Modoc County water commissioner for the State Department of Public Works, Division of Water Rights. He will maintain headquarters in Surprise Valley.

# ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

## MENNIE HEADS DIRECTORS VOTE IN EXCHANGE

Alex. Mennie, representing the master plasterers' craft, rolled up the highest vote for a place on the Board of Directors of the San Francisco Builders' Exchange, at the annual election held March 21. Mennie polled a total of 308 votes. Wm. H. George polled the second highest vote with 307 and D. J. Sullivan, a "write-in" candidate, polled the third high with a total of 306.

The following is a summary of the election together with the name of the candidate, the craft represented and the number of votes polled, the first eleven being elected to a place on the Board of Directors: Alexander Mennie, master plasterers, 308 votes; W. H. George, building material dealers, 307 votes; D. J. Sullivan, house movers and underpinners (write-in candidate) 306 votes; Jos. B. Keenan, marble dealers, 299 votes; R. J. H. Forbes, concrete contractors, 279 votes; Emill Hogberg, masons and builders, 279 votes; Jas. H. Pinkerton, master plumbers, 257 votes; J. D. McGilvray, granite manufacturers, 251 votes; S. F. Cohn, painters and decorators, 227 votes; W. H. Wilhelm, general contractors, 210 votes; C. G. Berg, common brick manufacturers, 207 votes; Geo. A. Wieland, sheet metal contractors, 203 votes; J. A. Hart, Mill Institute of California, (San Francisco Branch), 147 votes; John Mullen, cabinet manufacturers, 139 votes; Edw. L. Soule, reinforcing steel dealers, 136 votes; Victor Lemoge, electrical contractors and dealers, 124 votes; Leslie F. Scherling, ornamental iron manufacturers, 94 votes; C. W. Fitzpatrick, (write-in candidate), 60 votes.

## LUMBERMEN ACCIDENT BODY ELECTS OFFICERS

The Lumbermen's Accident Prevention Association, operating throughout California and one of a few organizations sponsored by the State Industrial Accident Commission, at its meeting March 11 in the State Building, San Francisco, elected the following officers: J. B. Clark, Hobart Mills, chairman; M. S. Johnstone, Pinedale, vice president; L. M. Mammon, Sciota, secretary, and W. W. Blackmen, Susanville, treasurer.

Clark, following the meeting, announced that the association would convene in San Francisco again on June 16, 17 and 18, at which time plans would be discussed for a state wide campaign against accidents to employees in the lumber industry.

## NEW MEMBERS ANNOUNCED FOR FRESNO BUILDERS' EXCHANGE

Fresno Builders' Exchange, through its secretary H. L. Hardman, announces the following new members were admitted at the last meeting of the Board of Directors: George Campbell, J. T. Cowan, H. M. Cummings, Fresno Builders' Supply Co., Fresno Pioneer Shingle & Roofing Co., Kellner & Son, Parker Ice Machine Co., Pioneer Paper Co., E. W. Tribble, U. S. Gypsum Co., and George G. Wood.

## FRESNO BUILDERS' EXCHANGE RE-ELECTS OFFICERS

President Thomas M. Robinson and other officers and directors who have served the Fresno Builders' Exchange since its reorganization last October, were unanimously re-elected at the annual meeting held in the Hotel Fresno.

Others re-elected are: Oliver I. Lines, vice-president; A. I. Roper, treasurer; C. B. Cochran, D. A. Moore, E. H. Mellencamp, John G. Teeple, Frank Minard, J. E. Harrison, M. E. Summers and Otto W. Baty.

Reports made to the members showed that substantial progress has been made by the exchange during the period since reorganization, one of these reports being that of Secretary-Manager H. L. Hardman, who also reported on a visit he recently made to similar organizations of other cities.

Comparing the activity of the Fresno Exchange with that of other similar organizations, Harry Learn said greater service is available in Fresno.

A proposal that a general meeting of the exchange membership be held monthly was referred to the directors.

## ADOPTS WAGE SCALE

The Builders' Exchange of Santa Clara County has adopted the wage scale compiled by the Impartial Wage Scale Board of San Francisco. The same wage scale was recently adopted by the Industrial Association of Santa Clara County. Members of the Exchange will put the new scale into effect on April 1.

## NEWLY ORGANIZED HAYWARD BUILDERS OPEN QUARTERS

Offices of the newly organized Hayward Builders' Exchange (Alameda County) have been opened at 924 A street, Hayward. Officers of the exchange are: Roscoe Byrnes, President; Jas. Willison, Vice-President; Leonard R. Rosenberg, Treasurer; Edward Payson Whitman, Secretary. Directors are: Roscoe F. Byrnes, H. H. Fenneman, W. W. Hays, Joseph Huber, Earl E. Johnson, L. R. Rosenberg, Carl A. Sorensen, E. P. Whitman, James Willison. A feature of the new quarters will be a building exhibit in which members of the organization will display their products.

## NAPA BUILDERS' EXCHANGE ELECT OFFICERS

The following directors have been elected by the Napa County Builders' Exchange to serve for the ensuing year: S. J. Cinnamond, Fred Jaekle, Frank A. Pond, Earl G. Wilson, A. McNair, E. W. Doughty, Wade Shifflett, Harry Thorsen, H. Vionop, E. W. Arnitz and Wm. M. Noble.

## BUSINESS OPPORTUNITY

Architects Swartz & Ryland, Rowell Bldg., Fresno, desire to receive complete cost data, catalogs, etc., for laundry equipment. Communicate direct with the architect if you are interested.

## RABBI BRICKNER AGAINST THE FIVE-DAY WEEK

In a forceful address delivered at the Euclid Avenue Temple, Cleveland, and broadcast by radio station WJAY on Sunday, February 27th, Rabbi Barnett R. Brickner denounced the five-day week movement as one for which industry is not yet ready. The great danger in decreasing the number of hours worked per week in certain industries lies, according to Rabbi Brickner, in the hardship which it would create for the great mass of unorganized workers who are today bearing the brunt of industry. The lessening of hours worked would mean wage increases which in turn would have to be passed along to the consumers thereby working a hardship on those who were not enjoying the benefits of more leisure. In the opinion of Rabbi Brickner labor is not yet ready for the five-day week because the average worker does not know how to use his leisure time to the best advantage. He is of the opinion that the labor leaders of America might better educate the rank and file of the unions to the proper use of the extra leisure which will be their when the time comes that industry can be successfully run on a five-day basis than to attempt to hasten the evolution of a shorter week at this time.

## CHICAGO BUILDING EXPOSITION OPENS ON MAY FIRST

The permanent exposition of building materials in connection with the new Builders Building in Chicago now nearing completion on Wacker Drive, will be open to the public on May 1st. The exposition will give the prospective builder an opportunity to make selections of materials from the large number which will be permanently on display in the exposition. The leading American and European manufacturers of building materials and contractors equipment are signing up for space and officials of the Building Construction Employers' Association, the organization behind the building project state that the exposition, when it is assembled, will be the most complete of its kind that has ever been gotten together.

## TO INCREASE CAPACITY FOR FIRE PROOF PRODUCTS

The All Fireproof Construction Company of Los Angeles announces that it is forming a corporation to enlarge its capacity to handle its several fire proof building products for Class 1 buildings only. These products comprise structural steel window and door frames, steel fire shutters, roof framing, steel screens, steel sash and doors. All fire sash and shutters operate on ball bearings and are automatically controlled. Other products include reinforced concrete exterior hollow walls, concrete floors, concrete roofs and partitions. The company claims it will be able to guarantee savings in costs.

760 Market Street  
Phone Garfield 3541

**SAN FRANCISCO, Cal.**—The brick contract was awarded to Dix Johns, 681 Market St., in connection with the construction of a three-story and basement frame and stucco apartment building, to contain twelve, two, three and four room apartments. It is to be erected on the south side of Clay St., east of Baker, for Edward Jose, 251 Kearny St., from plans prepared by Architect H. C. Baumann, 251 Kearny St.

As previously reported: Electric to Aetna Electric Co., 1337 Webster St. Heating to La Pointe Heating Co., 119 De Lano St.; Plumbing to J. Gibbs, 1706 Geary St.; plastering to J. F. Sullivan, 251 Kearny St.; iron to Sunset Iron Works, 964 Harrison St.; lumber to Loop Lumber Co., Central Basin.

**LOS ANGELES, Cal.**—Architect W. Wellington Smith, 1242 Keniston Ave., has prepared plan for a 5-story, class C apartment house, 60x125 ft., to be built on the east side of Normandie Ave., between 7th and 8th Sts., by the Parker Construction Co., 3867 W. Sixth St. The building will be Norman in type and will contain a large lobby and 37 apartments; brick construction; colored cement plaster front, tile shingle and composition roof, fire escapes, structural steel, marble, tile and terrazzo lobby, tile floors and wainscot in baths, carpeted hardwood floors, steel sash, ornamental iron, electric refrigeration, elevator, gas-steam radiators, incinerator, wall beds, built-in wardrobes and service cabinets; estimated cost is \$125,000.

## BONDS

**SALINAS, Monterey Co., Cal.**—Election will be held April 15 in Pajaro School District to vote bonds of \$15,000 to finance erection of a new school. Trustees of the district are: T. S. Hudson, H. H. Osner and T. E. Grafton.

**CORONA, Riverside Co., Cal.**—Security Company has purchased \$100,000 Corona school district bond issue at premium of \$4500 and the \$80,000 Corona high school district bond issue at premium of \$2700.

**KLAMATH FALLS, Ore.**—Bonds of \$300,000 were voted at recent election to finance erection of new high school. Bids will be asked at once by school trustees to raze structure now occupying the proposed high school site.

**TRACY, San Joaquin Co., Cal.**—Election will be held April 9 in New Jerusalem School District to vote bonds of \$26,000 to finance erection of a new school. Trustees of district are: H. A. Walter (clerk), Walter Peterman and Henry T. Ohm.

**CALISTOGA, Napa Co., Cal.**—Calistoga Union Grammar School District defeats proposal to issue bonds of \$80,000 to finance erection of new school; preliminary plans were submitted by Architect W. H. Weeks, 369 Pine St., San Francisco. Issue failed by 94 votes.

**ALHAMBRA, L. A. Co., Cal.**—Alhambra city high school district and Alhambra city school district will hold bond elections on April 5th at which time it is proposed to vote \$490,000 for new high school buildings and \$518,000 for elementary schools.

**COMPTON, L. A. Co., Cal.**—Compton city school district will hold bond election on March 25th at which time it is proposed to vote \$100,000 for the erection of a 4-room school at the Mayo St. site, a 4-room building at the Compton Ave. school site, and a 6-room building in the White Way vista tract.

**LONG BEACH, Los Angeles Co., Cal.**—Directors of Long Beach Chamber of Commerce have adopted a resolution recommending to city council of Long Beach, that the bond election for \$2,800,000 for new auditorium be placed on ballot, at election to be held May 10th.

**MODESTO, Stanislaus Co., Cal.**—Election will be held April 12 to vote bonds of \$330,000 to finance school improvements; \$250,000 for high school and \$80,000 for college building.

**STOCKTON, San Joaquin Co., Cal.**—Another election will be held in the Calaveras River Elementary School District to vote bonds of \$42,000 to finance erection of new school. Previous elections for \$62,000 failed to carry.

**SAN MATEO, San Mateo Co., Cal.**—Special election will be held probably April 20 in San Mateo Grammar School District to vote direct tax to finance additions to present schools. The election will probably be set for \$45,000. Geo. W. Hall is Supt. of Schools.

**WOODLAND, Yolo Co., Cal.**—Election will be held April 11 in Zamora School District to vote bonds of \$15,000 to finance erection of new school. Trustees of district are: D. F. Houx, L. J. Didion, Oscar Anderson, E. E. Schlieman and Edwin H. Robinson.

**SANTA PAULA, Ventura Co., Cal.**—Santa Paula union high school district, Donald Teague, chairman of the school board, contemplates calling an election in April to vote on a \$50,000 bond issue, proceeds to be used for erecting a gymnasium, 50x100 feet.

**LAGUNA BEACH, Orange Co., Cal.**—Laguna Beach school district proposes calling a bond election soon to provide \$100,000 for erecting a new 8-room elementary school, repairs to the present building, and the purchase of additional property.

**BAKERSFIELD, Kern Co., Cal.**—Election will be held Mar. 25 in Mountain View School District to vote bonds of \$20,000 to finance erection of new school. Trustees of district are: Wm. Rueter, W. A. Smart and Lewis J. Young.

**UPLAND, San Bernardino Co., Cal.**—Upland voted \$110,000 for erecting a junior high school plant at the 10th St. School site here.

## CHURCHES

**WILMINGTON, Los Angeles Co., Cal.**—Archts. Norman F. Marsh & Co., Dwight I. Kindig, associate, 1010 Broadway Central Bldg., L. A., have been commissioned to prepare plans for new buildings to be erected at Wilmington for Calvary Presbyterian Church. There will be two units, one to contain main church auditorium and the other to contain Sunday school and recreation quarters. Preliminary plans are being prepared. The cost will be \$100,000 or more.

Euclid Ave., Pasadena, are completing plans and will take bids about one week for the erection of church building to be built on Lake Ave. and Woodbury Road, Pasadena, for the Westminster Presbyterian church; auditorium to seat 1600 people; reinf. concrete construction, 150 x 50 ft., tower 150 ft. high, tile roof, tile floors, steel sash, wrought iron, fine trim; Dr. Josiah Sibley, pastor; \$300,000.

## Factories & Warehouses

**Excavating and Grading Contract**  
Awarded  
**FACTORY** Cost, \$200,000 approx.  
**SAN FRANCISCO.** Sansome and Pacific Streets.  
Two-story Class B reinforced concrete factory and warehouse.  
Owner—Pacific Coast Syrup Co.  
Architect—Dodge A. Riedy, Pacific Bldg., San Francisco.  
Contractor—P. J. Walker Co., Sharon Bldg.

**Excavating and Grading**—Sibley Grading & Teaming Co., 165 Landers St.  
**ALAMEDA, Cal.**—R. W. Littlefield, 57 12th St., Oakland, recently awarded the following sub-contracts in connection with the construction of a concrete and steel warehouse, 250x1000 ft. It is to be erected in the north section of Alameda, for the Alaska Packers Association, 111 California St., San Francisco:  
**Excavating**—Haughton Construction Co., Oakland.  
**Lumber**—Hilden Lumber Co., Oakland.  
**Reinforcing Steel**—Frederick Steel Co., Alameda.

**Structural Steel**—L. C. Larsen, San Francisco.  
**Structural Steel**—Schrader Iron Works, San Francisco.  
**Sheet Metal Work**—Edgar W. Anderson, Oakland.

**Painting**—J. A. Mohr & Son, S. F.  
**Gravel**—Niles Sand, Gravel & Rock Co., S. F.  
**Glass and Glazing**—East Bay Glass Co., Oakland.  
**Roofing**—Frank Gottstein, 226 8th St., Oakland.

**Plans Being Prepared.**  
**BUILDING** Cost, \$200,000  
**SAN FRANCISCO.** SW Davis and Vallejo Sts.  
Two-story reinforced concrete Class C building.  
Owner—Albers Bros. Milling Co.  
Architect & Contractor—Geo. Wagner, 181 S-Park St., San Francisco.

**Ready for Segregated Figures in One Week**  
**WAREHOUSE** Cost, \$15,000  
**ALAMEDA, Alameda Co., Cal.** Thirty-second and Eddy Sts.  
One-story frame and cast iron office and warehouse.  
Owner—Sterling Lumber Co.  
Architect—Edw. A. Nickel, 25 California St., San Francisco.

**Contract Awarded**  
**WAREHOUSE** Cost, \$250,000  
**ANTA CLARA.**  
Two-story reinforced concrete warehouse.  
Owner—Libby, McNeill & Libby, Merchants Ex. Bldg., S. F.  
Architect—None.  
Contractor—K. E. Parker, 135 South Park, S. F.

**Contract Awarded**  
**MACHINE SHOP** Cost, \$15,000  
**SAN FRANCISCO.** N W Fremont and Harrison Sts.  
One-story brick machine shop.  
Owner—Orton Machine Co., 325 Fremont St.  
Architect—G. M. Cantrell, 45 2nd St.  
Contractor—H. P. Hoyt, 45 2nd St.

Item 13, entire work under part 4.  
Item 13a, deduct from item 14 for  
rk in hospital corps barracks.  
Item 13b, deduct from item 14 for  
rk in executive officers' quarters.  
Item 13c, deduct from item 14 for  
rk in surgeons' quarters.  
Item 13d, deduct from item 14 for  
rk in double quarters.

**Part 2 and 3, Plumbing and Heating**

Item 16, entire work covered by  
items 8 and 12.  
Item 17a, deduct from item 16 for  
omission of work covered by items 9a  
and 13a.  
Item 17b, deduct from item 16 for  
omission of work covered by items 9b  
and 13b.  
Item 17c, deduct from item 16 for  
omission of work covered by items 9c  
and 13c.  
Item 17d, deduct from item 16 for  
omission of work covered by items 9d  
and 13d.  
Item 18, add to item 16, based on  
white metal for fixture trimmings, alt.  
D.  
Item 19, add to item 17a for white  
metal for fixture trimmings as covered  
by alt. D.  
**Part 2, 3 and 4, Plumbing, Heating  
and Electrical Work**  
Item 20, entire work under items 8,  
12 and 14.  
Item 21a, deduct from item 20 for  
omission of work covered by items 9a,  
13a and 15a.  
Item 21b, deduct from item 20 for  
omission of work covered by items 9b,  
13b and 15b.  
Item 21c, deduct from item 20 for  
omission of work covered by items 9c,  
13c and 15c.  
Item 21d, deduct from item 20 for  
omission of work covered by items 9d,  
13d and 15d.  
Item 22, add to item 20 based on  
white metal for fixture trimmings, alt.  
D.  
Item 23, add to item 21a for white  
metal for fixture trimmings, alt. D.

**Parts 1, 2, 3 and 14, Entire Project**

Item 24, work complete.  
Item 25a, deduct from item 24 for  
omission of all work in hospital corps  
barracks, including connecting pipe  
conduit to the contagious ward build-  
ing.  
Item 25b, deduct from item 24 for  
omission of all work in executive offi-  
cers' quarters.  
Item 25c, deduct from item 24 for  
omission of all work in surgeons' quar-  
ters.

## HALLS AND SOCIETY BUILDINGS

Plans Being Prepared  
LODGE BLDG. \$150,000 to \$200,000  
MARYSVILLE, Yuba Co., Cal.  
Class C lodge building.  
Owner—Marysville Lodge, Benevolent and Protective Order of Elks, Marysville.

Architect—Dean & Dean, California State Life Bldg., Sacramento.  
The height and type of the structure has not been decided upon.

Completing Plans  
CLUB BLDG. Cost, \$45,000  
SAN FRANCISCO, S E Twenty-first & Alabama Sts.  
Two-story frame and stucco boys' club building (gymnasium, auditorium and classrooms).  
Owner—San Francisco Boys' Club.  
Architect—Harry A. Thomsen, Sharon Bldg., San Francisco.  
Owner will take figures May 1.

LOS ANGELES, Cal.—H. D. Frankfort, 1096 N. Western Ave., has prepared preliminary plans for a 3-story and basement club building and alteration to the present building at 210-20 N. Western Ave. for the Americus Club 210 N. Western Ave.; building will contain dining room, gymnasium, swimming pool, ballroom, lounges, handball courts.

MORRO BAY, San Luis Obispo Co., Cal.—W. H. Roy is acting secretary of a new yacht club being formed by residents of Morro Bay. Improvement of the channel is proposed.

PACOMA, Los Angeles Co., Cal.—The Pacoma Woman's Club and the Chamber of Commerce are negotiating for the purchase of property on San Fernando Rd., Pacoma, as site for a frame and stucco clubhouse to be occupied jointly by both organizations.

Joseph H. Dyer, General Manager,  
Southern Pacific Railroad Co.,  
San Francisco, California.  
Dear Mr. Dyer:

YOU ARE launching boats.  
AS FAST.  
AS WE buy rock plants.  
YOU ARE naming the boats.  
AFTER CITIES.  
ON YOUR railroad.  
SO CLARENCE (Sandy) Pratt, President.  
OF THE Pratt Building Material Co.  
CENTRAL OFFICE—San Francisco.  
AND PRODUCER of clean sand.  
AND CLEAN rock and gravel.  
AT SACRAMENTO, Marysville.  
PRATTROCK (NEAR Folsom).  
MAYHEW (Sacramento County).  
AND PRATTCO (Monterey County).  
SUGGESTS THAT your next boat.  
BE NAMED "Prattrock."  
FOR SANDY'S big town.  
NEAR FOLSOM.  
OR "PRATTCO" for Sandy's town.  
IN MONTEREY County.  
NEAR HOTEL Del Monte.  
AND HOME of "Prattco Amber" sand.  
BOTH TOWNS.  
ARE ON your lines.  
AND ARE big shipping points.  
FOR SAND, rock and gravel.  
IF YOU name a boat.  
AFTER THESE fast growing cities.

SANDY PRATT will be glad.  
TO FURNISH "SAND" wishes.  
MADE OF Plymouth "Rock" chicken.  
WITH PLENTY of "ROCK" salt.  
FOR THE launching party.  
SANDY WILL cook "ROCK" cod.  
AND "SAND" dabs.  
FOR THE multitude.  
AND "ROCK" the babies.  
FOR THE fond mothers.  
IF ANYBODY is sleepy.  
TAKE THEM to bed "ROCK."  
SANDY WILL keep the boat.  
FROM "ROCK" ing.  
WE WILL christen the boat.  
WITH WHITE "ROCK" mineral water.  
GUESTS WILL be met.  
AT THE train.  
WITH OLD fashioned "ROCK"-a-wa-  
carriages.  
THE MAYOR of Prattrock.  
WILL SHOOT sky "ROCKETS."  
GUESTS WILL wear "SAND" als.  
AND BE seated.  
IN "ROCK" ing chairs.  
SANDY SUGGESTS special trains.  
FOR ALL "ROCKY" Mountain cities.  
SANDY WILL sing.  
"ROCK A Bye Baby."  
AND "MAY the 'SANDS'.  
OF THE Desert.  
NEVER GROW Cold."  
"I THANK you."

This California scene is on the lines of the Southern Pacific Railroad at Prattrock (near Folsom) where Sandy Pratt, President of the Pratt Building Material Company produces sand, crushed rock and gravel. Sandy's other shipping points are: Sacramento, Marysville, Prattco (Monterey County) and Mayhew (Sacramento County) Central office—San Francisco.

**GLENDALE, Los Angeles Co., Cal.**—Arthur G. Lindley, 410 American Bank Bldg., Los Angeles, has been commissioned to prepare plans for a Class A Masonic building to be erected on east side of Brand Blvd., between Colorado and Harvard Sts., Glendale, for Glendale Masonic Building Association. It will be practically an eight-story and basement building, having four main floors and four mezzanine floors, each of the main floors being two stories in height to accommodate lodge rooms and auditorium. The basement will be equipped with six bowling alleys, two billiard tables, four pool tables, showers and lockers and cafe. The upper floors will contain two stores, lobby, two shops, an auditorium to seat 1000 people, stage, dressing rooms, fitting room to seat 650, kitchen, serving rooms, two Blue Lodge rooms, 30x5 feet and 45x65 feet respectively, with accessory rooms and departments for womens' organizations, commandery room, 62x90 ft., with gallery on two

sides, armory with 300 steel lockers. The building will be 64x125 feet, reinforced concrete and structural steel construction, stucco and cast stone facing, plate glass, marble and tile work, hardwood and pine trim, elevator, steam and gas heating. The cost is estimated at \$200,000. Preliminary plans have been approved and working plans will be prepared at once.

**LOS ANGELES, Cal.**—Architects Walker & Eisen Western Pacific Bldg., are preparing plans and James P. Taylor Co., 254 S. Western Ave., will be the contractor for a six-story Class A club building, to be erected at Third St. and Oxford Ave., for the Wilshire Athletic Club, Frank H. Brooks, H. K. Huntsberger and Boyle Workman are three of the directors; swimming pool and gymnasium, ballroom, kitchen, and dining room facilities, Turkish bath department, private dining rooms, bowling alleys, clubrooms, offices and 50 guest rooms with 100 per cent baths;

150x140 feet, steel frame, reinforced concrete, tile and composition roofing, ornamental iron work, pressed brick and terra cotta facing, basement, steam heating system, electric elevators, pine and hardwood trim, mechanical venting system, refrigerating system, marble work, tiled baths, floors and pool, etc.; \$600,000.

**OJAI, Ventura Co., Cal.**—Order of the Star in the East, theosophical society, has purchased 126 acres of land in the Ojai valley, where, it is reported, national headquarters will be established.

**SUNNYVALE, Santa Clara Co., Cal.**—Knights of Pythias Lodge is considering preliminary plans for proposed new club and lodge building to be erected at s. e. cor. of Washington and Taaffe streets; would be one-story and basement, reinforced concrete. Basement would be used for banquet room, kitchen and gymnasium. The first floor would contain lodge rooms and serve as auditorium for public affairs.

**SAN FRANCISCO**—Independent Order of Foresters, 172 Golden Gate Ave., has had preliminary plans prepared for a \$150,000 lodge building to be erected in the downtown section. W. H. Hunter of Toronto, Canada, Supreme Chief Ranger of the order is now in San Francisco to confer with J. P. Murphy, High Chief Ranger of California, with regard to construction. The name of the architect and the exact site of the proposed structure will be made public when plans are further advanced.

**SANTA MONICA, Los Angeles Co., Cal.**—Trewitt-Shields Co., Edwards & Wilder Bldg., have been awarded the contract to erect a class A club bldg. on the Esplanade at Santa Monica for the Gables Beach Club. The building will be 76x273 feet and of steel frame and reinforced concrete construction. Curlett & Beelman, Union Bank Bldg., are the architects.

## HOSPITALS

Ready for Figures in One Month  
**DAY NURSERY** Approx. \$40,000  
**BERKELEY, Alameda Co., Cal.** Sixth and Addison Sts.

One and one-half story frame and stucco day nursery (stucco exterior, flat roof); English type of construction.

Owner—Berkeley Day Nursery.  
Architect—W. H. Ratcliff, Chamber of Commerce Bldg., Berkeley.

A feature of the structure will be an auditorium with a seating capacity of 250 persons.

**BERKELEY, Alameda Co., Cal.**—Harry C. Knight, 1428 Franklin Street, Oakland, awarded the steel contract to the Superior Steel Placing Company, 58 Sutter Street, San Francisco, in connection with the construction of a six-story Class "B" concrete hospital building, to contain 100 beds. It is to be erected on the southwest corner of Webster and Regent Street, Berkeley, for the Alta Bates, Inc., from plans prepared by Architect C. C. Cuff, 1313 Central Bank Building, Oakland. Cost, \$500,000.

**YOSEMITE, Mariposa Co., Cal.**—W. B. Lewis, superintendent of Yosemite National Park announces plans are being prepared for a new \$35,000 hospital to replace the present temporary structure. It is expected that construction will be started within six weeks.

**POMONA, Los Angeles Co., Cal.**—Until 2 p. m., April 18, bids will be received by county for construction of the new health centre building at s. e. corner of Main and Fifth Sts., Pomona. Bids will be taken on (1) general construction, (2) electric wiring and fixtures, and (3) plumbing, heating and service piping. Building will be 2-story brick with pressed brick facing, some cast stone, hollow tile walls, clay tile roofing, pine trim, wood and reinforced concrete floors, steam heating, tile work. Karl W. Muck, 1005 Hall of Records, Los Angeles, architect. Mame B. Beatty, deputy county clerk.

## BUSINESS OPPORTUNITIES

**SAN FRANCISCO, Cal.**—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission St., San Francisco, either by phone, letter or personal call. Requests for additional information

should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

**D-2387**—Knoxville, Tenn. Firm proposes to enter this territory with an entirely new and patented method of outdoor night advertising and would like to engage the services of a suitable man, preferably with advertising experience, to represent it in this territory.

**D-2391**—Hartford, Conn. Concern wishes the services of a sales representative, native of California, Oregon or Washington, to handle industrial silencers for engines, compressors and pumps. Engineering experience in these lines desirable.

**D-2392**—Hazelton, Pa. Company manufacturing centrifugal pumps, checkvalves, strainers, priming equipment and other accessories desires an exclusive sales agent in the western territory to operate on a commission basis.

**11405**—Vienna, Austria. Large Vienna manufacturers of fine art bronzes wish to appoint an agent in California.

**11408**—Hanover, Germany. The owner of a special process for the manufacture of a plastic substance from which can be pressed insulation articles for the electrical and radio industry; hollow articles, plates, rods, boxes, rings, corkheads, buttons and other utility articles, wishes to sell his invention for use in the United States. This plastic substance is a certain substitute for vulcanized India rubber, and articles made from it require no polishing, as the presses leave a natural luster.

**11409**—San Francisco, Cal. Gentleman with international business experience, sailing for Germany April 9 for a year's visit, offers his services to San Francisco firms or individuals as investigator, buyer or salesman.

**11413**—Trinidad, Colo. An electrical company is very anxious to establish connections with San Francisco Importers of novelties, particularly electrical novelties, or any imported electrical supplies.

**11419**—Penang, British Malaya. Concern is in the market for electric jacketed revolving pans for the manufacture of "rifle ball" confectionery. It desires pans having capacity of 2, 5 and 10 cwt. of "rifle ball" per day.

**11422**—Mexico City, Mexico. Firm desires to appoint an agent willing to act as its representative for San Francisco for the sale of Mexican graphite, ochre, oxidized and gilsonite. Firm claims to be the only producer of gilsonite in Mexico; also operates its own mines of ochre and graphite.

**11426**—Cali, Colombia. Firm of commission agents and representatives desires to represent American manufacturers and exporters of the following lines: Rosin, structural steel, cement, lumber, wooden doors and windows, school furniture, etc.

## NOTICE TO CONTRACTORS

(Edison Technical School Gymnasium Fresno)

Pursuant to an order of the Board of Education of the Fresno City High School District of the County of Fresno, duly made and entered in its minutes this 10th day of March, 1927, public notice is hereby given that the said Board will receive up to 5 o'clock P. M. on the 14th day of April, 1927, at the office of the said Board in the Hawthorne School Building, 2425 Fresno Street, Fresno, California, sealed proposals for the furnishing of labor and materials for the construction of the Edison Technical School Gymnasium, as per plans and specifications prepared by Felchlin, Shaw & Franklin, architects, Patterson Bldg., Fresno, California.

Segregated bids will be received for this building and reference is hereby made to "General Information to Bidders," Building Form No. 6, for further particulars regarding all bids. Plans and specifications together with forms for submitting all bids and further details regarding any and all bids may be obtained from the undersigned Secretary of said Board of Education, at the office of said Board designated.

A bidder's surety bond or certified check equal to at least ten per cent of the amount of the bid submitted, must accompany all proposals.

The Board of Education reserves the right to reject any and all bids. By order of the Board of Education, Fresno City High School District.

L. L. SMITH,  
Secretary.

## NOTICE TO CONTRACTORS

(Post Hospital Addition—S. F. Presidio)

OFFICE CONSTRUCTING QUARTERMASTER, FORT MASON, SAN FRANCISCO, CALIF. Sealed proposals will be received at Fort MacArthur, Calif., until 11:00 A. M., April 11, 1927, and then opened, for constructing an addition to the post hospital. Further information upon application.

## NOTICE TO CONTRACTORS

(Pumping Plant—Oakdale)

Notice is hereby given that the board of Trustees of the City of Oakdale, Stanislaus County, State of California, will receive sealed bids for pumping machinery and installation of same for their Municipal water plant.

Full lists and specifications can be seen at the office of the City Clerk, Oakdale, California, and copy of same will be sent upon application.

Bids will be opened at 8 o'clock P. M. on the 4th day of April, 1927, or as soon thereafter as convenient, and all bids must be on file prior to the hour foreshad. It is expected that the award will be made at that time or as soon thereafter as possible. All bids must be accompanied by a certified check on some solvent California bank for an amount equal to not less than 10% of amount of bid, payable to C. E. Wood, President of the Board of Trustees, and be forfeited to the City upon failure to execute and fulfill the contract after award or be returned to bidder upon the rejection of the bid and upon the execution of the contract and the filing of the required bonds. Bids should be addressed to C. E. Wood, City Clerk, and marked "Proposal for Pumping Plant."

The Board reserves the right to reject any or all bids. By order of the Board of Trustees of the City of Oakdale.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

Dated Oakdale, Calif., March 17th, 1927.

C. E. WOOD,  
Clerk for the City of Oakdale.

## NOTICE CALLING FOR BIDS

(King City Union High School District)

Notice is hereby given by undersigned clerk of the Board of Trustees of the King City Union High School District of King City in Monterey County, California, that sealed bids will be received by said board up to 2:30 P. M., on April 7, A. D., 1927, for the building of a reinforced concrete vocational unit to King City Union High School in accordance with the plans and specifications prepared and furnished by H. B. Douglas, architect. Plans and specifications are now on file at the office of the clerk at the high school building.

A deposit of \$20 will be required on all plans.

All bids and proposals must be made out on the blank forms furnished for that purpose and in accordance therewith, and must be accompanied by a certified check, the amount of which shall be not less than 10 per cent of the amount bid, made payable to the clerk of the board of trustees.

Said board reserves the right to reject any bid or proposal.

Dated March 17, 1927.

H. O. WILLIAMS,  
Clerk of the Board,  
King City, California.

## ADVERTISEMENT FOR BIDS

Sealed bids will be received at the Office of the Comptroller, University of California at Los Angeles, at 855 North Vermont Ave., Los Angeles, on or before 10:00 A. M., April 4th, 1927, for construction of bridge on the Westwood Campus of the University of California at Los Angeles, Los Angeles, California.

Drawings and specifications may be obtained by General Contractors from the Comptroller's Office, 855 North Vermont Avenue, Los Angeles, on deposit of Twenty-five (\$25.00) and 90/100 Dollars for each set of drawings and specifications. Deposits will be refunded only on submission of a regular bid and on return of drawings and specifications in good condition.

For the use of Sub-contractors and Material Men, two sets of drawings and specifications are on file in the Secretary's Office of the Builders' Exchange, Builders' Exchange Building, 656 South Los Angeles Street, Los Angeles, and one copy on file in the Office of the Comptroller, 855 North Vermont Avenue, Los Angeles.

No bid will be considered unless accompanied by a certified check or bond in favor of the undersigned, equal to ten per cent of the bid, to secure the execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

Dated March 17, 1927.

## NOTICE TO BIDDERS

(Pump and Motor—Healdsburg, Calif.)

### SUIT AGAINST CONTRACTOR TRANSFERRED TO STOCKTON

On the defendant's motion for a change of venue, the \$27,000 suit filed by the National Surety Company against Spencer D. Miller, Stockton contractor, in San Francisco, has been transferred to the Superior Court of San Joaquin. The case was filed on September 27, 1926.

Under ten separate causes of action, the surety company, as bondsman for Miller in various contracts which he undertook for the Merced Irrigation District in October, 1922, thereafter, seeks to recover various amounts paid out to the irrigation district under its bonding liability.

The bonding company also seeks to collect a sum of \$20,032.70 on an account stated between plaintiff and defendant on September 14, 1925. Interest in the sum of \$1283.79 on this amount is also asked, plus \$371.10 premium on the surety bonds.

The total amount prayed for in the complaint includes \$18,355.31, plus interest in the sum of \$3462.28 and attorney fees amounting to \$5400.

### MASTER PLUMBERS ELECT AT WATSONVILLE

Coast Counties Master Plumbers' Association, meeting in Watsonville, elected the following officers to serve for the ensuing year: A. P. Beck, Watsonville, president; E. Frazier, Watsonville, vice-president; Ed. Simpson, Pacific Grove, secretary; C. M. Ryan, Pacific Grove, financial secretary and treasurer. The executive committee chosen is composed of S. L. Weber, Salinas; G. H. Braden, Hollister; James Muckle, Gilroy; B. E. Underwood, Salinas; C. F. Phillips, Salinas. This association embraces the cities of Watsonville, Salinas, Monterey, Pacific Grove, Hollister and Gilroy.

Wm. Newton of the American Can Company was the principal speaker at the regular weekly luncheon of the Sacramento Valley Electrical Society in the Elks' Temple at Sacramento, March 22. M. P. Cameron, president of the society, presided.

San Francisco Post Office under act of  
Congress of March 3, 1879.

## S. STEEL CORP. TO PRODUCE AT LONG BEACH

The Los Angeles Times announces it has learned that the United States Steel Corporation has completed a deal to take over the site of the Pacific Coast Steel Corporation for a steel plant on the inner channel at Long Beach harbor and will start construction soon.

The iron ore and the lime for the plant will come from the mountains of southern California and Arizona, and the coal, it is reported, from Utah, where a good cooking grade is available. Formal announcement is expected within the next few days that the United States Steel Corporation has made arrangements with the Union Pacific to provide the coal.

More than three years ago a contract was signed in which the city of Long Beach agreed to dredge certain channels of the harbor to a depth of 10 feet and the company promised to build a steel plant to cost not less than \$1,000,000. Failure of the steel corporation and the Santa Fe Railway to reach an agreement for a branch line from Gallup, N. M., to the San Juan coal field was said to have been a chief obstacle in carrying out the contract. This is said to have been overcome now by turning to Utah for coal.

The steel plant site consists of 105 acres of land fronting Long Beach harbor, the remainder of 226 acres originally purchased by the Pacific Coast Steel Corporation syndicate for approximately \$2,000,000.

The harbor construction work which the city of Long Beach agreed to have been completed.

Deposits of hematite in San Bernardino County were tested by the Pacific Coast Steel Corporation.

## 1926 MAGNESITE PRODUCTION

The production of crude magnesite in the United States in 1926 was 133,500 short tons, valued at \$1,200,830, according to statistics compiled by J. M. Hill of the Bureau of Mines, Department of Commerce. Four operators at five mines in four counties in California produced 53,940 tons of crude magnesite, valued at \$604,130; all of them reported only fair business due to foreign competition and lower prices on all products. All of the output in Washington was from the mines of the Northwest Magnesite Company, which operated two of its furnaces at Chewelah, Stevens county, part of the year.

## STATE PLUMBING CODE FOR ILLINOIS IS PROPOSED

A bill providing for a state plumbing code has been introduced in the Illinois Legislature. The proposed code sets forth basic principles which are in substantial accord, states H. F. Ferguson, chief sanitary engineer, Illinois Department of Health, Springfield, Ill., with the Hoover Committee plumbing report. The bill provides that detailed rules and regulations in agreement with the code shall be prepared by the department named. If the bill is enacted the Illinois model plumbing ordinance, adopted in 1919 and revised early in 1927, will probably serve as a guide in framing the rules and regulations just mentioned.

## ELECTRICAL ENGINEERS WILL MEET AT DAVIS

The Sacramento Valley Electrical Society will hold a meeting at the Branch of the College of Agriculture, University of California, at Davis, April 13. This announcement is made by E. D. Moses of the Agricultural Engineering Division, who is in charge of the program for the meeting.

Professor L. E. Reukema of the College of Mechanics, at Berkeley, will be the principal speaker at the meeting, at which the Agricultural Engineering Division will act as host. The members of the society will inspect the new Agricultural Engineering Building, now nearing completion.

A meeting of the California State Committee on the Relation of Agriculture to Electricity is planned at night, following a dinner at the University Inn.

## McMILLAN HEADS RESEARCH BUREAU OF CEMENT ASS'N

F. R. McMillan, manager of the structural and technical bureau of the Portland Cement Association, Chicago, has been appointed director of research to have charge of all investigations in cement and concrete for the association, succeeding Prof. Duff A. Adams, resigned to take up private practice. Mr. McMillan has been a member of the headquarters and laboratory staffs at Chicago since 1924.

## CARNEGIE INSTITUTE ANNOUNCES COURSES IN ARCHITECTURE

Courses in architecture, it is announced, are featured in the plans for the summer session this year at the Carnegie Institute of Technology in Pittsburgh. Under the plans for the coming summer, the Department of Agriculture of the College of Fine Arts will give intensive six weeks' courses from June 13 to July 23 to meet the needs of students who desire to continue their work in architecture in the vacation, whether to make up credit, obtain advanced credit, or to prepare themselves better for entrance.

Among the subjects to be offered are architectural design, outdoor sketching, descriptive geometry, shades and shadows, perspective and mathematics.

Six and eight weeks are announced also in chemistry, physics, mathematics, mechanics, English, economics, commercial law, history, drawing, surveying, psychology and education, charcoal and pastel drawing, water color and oil painting, design, sketching, methods, history of arts, and various shops. Courses of six weeks will be given to teachers and supervisors of public school music, fine and applied arts, and manual and industrial arts.

## NEW SUITS CONTEMPLATED ON PAINT SPRAY MACHINE

Blake F. Hopkins, former painting contractor and now president of a \$1,000,000 manufacturing company, has learned for a fact that the first million is the hardest.

It took him seven years of litigation, after having invented a paint-spraying machine a few years before that, to beat the Standard Oil Company and Henry Ford in \$1,000,000 infringement suits.

As president of the Hopkins Spray Equipment Company, he has left San Francisco for New York to institute similar suits against six other fabulously rich defendants, and for damages amounting in "several millions."

Hopkins' trip east follows organization of his company and the recent purchase of the Decora Manufacturing Company of Richmond, Cal., which has been engaged for some years in making paint spraying equipment.

In addition to filing the new suits, Hopkins announced yesterday, he expects to complete plans for the establishment of a factory in Chicago and another on the Atlantic coast. The Richmond plant will supply his company's needs in the west, he said.

## ARCHITECT SUES FOR FEE

Charles Muhs, Monterey architectural engineer, has commenced suit at Salinas against A. C. Hinkle, prominent resident of the Old Capital, for the recovery of sums totaling \$2140. Of the total, \$870 is alleged a balance due for services rendered in connection with the erection by Hinkle of a new hotel building last year. The balance, \$1270, is claimed due under a contract to superintend the construction of another building. The complaint says the contract was entered into August 28, 1926, and that Hinkle discharged Muhs on October 26 following.

## Bonding Provision Eliminated In Proposed State License Law

Proposed licensing of contractors and other pending legislation occupied the attention of the Construction Industries Council of Southern California and the Public Works Section, known as the Construction Industries Joint Committee, at the Alexandria Hotel, Los Angeles, March 23. A final revised draft of Assembly Bill No. 1050 by Mr. Kelsey, licensing contractors, was considered. This eliminates the bonding provision in the original bill which aroused much opposition, classifies contractors to simplify the matter of determining their qualifications and states more specifically the causes for which a license may be revoked. It applies to all building and engineering contractors and sub-contractors. A board is provided to administer the proposed law instead of creating a new state department.

Definite action was not taken by the council in view of the fact that the revised bill had not yet been submitted to the member organizations, but the consensus of opinion was that it was much more acceptable than the original bill. An expression from the member organizations will be obtained at once as the revised bill will come up before the assembly committee for disposition March 31. Senate Bill 758 by Mr. Weller, also a licensing measure, will not be combined with Assembly Bill 1050 as previously suggested, but an effort will be made by its advocates to secure the enactment of the clause which it contains providing for the filing of notices of intention to build.

Attorney C. C. Carleton, representative of the Construction Industries Joint Committee at Sacramento, described the reaction, as he viewed it, to the proposed licensing of contractors, and pointed out that there appeared to be a very general demand from various business groups for self-regulation. He also indicated the present status of other legislative measures affecting the construction industry. Guests of the council included Attorney J. W. Morin of Pasadena, author of S. B. 758; Sam Humphreys, representing the Oakland Builders Exchange which sponsored A. B. 1050, and Earle G. Lloyd, secretary-manager of a Northern California Chapter, A. G. C.

A resolution was adopted by the Council urging that jurisdiction of elevators and steam boilers be vested in the commission of safety and buildings as intended by the framers of the present city charter.

The Council now consists of 17 member organizations, the applications of the Arbitration Society, Plumbing Supply Dealers and the Portland Cement Association being accepted at the meeting.

Following is a synopsis of the final revised draft of Assembly Bill 1050 providing for the licensing contractors:

Sec. 1. Makes it unlawful for anyone to engage in the work of contracting without first having secured a license as provided in the law.

Sec. 2. Defines contractors as any person, firm, copartnership, association or corporation or any combination of either, who for a fixed sum, price, fee or percentage or other compensation other than wages undertakes with another to do construction work of any kind including the installation of materials.

Sec. 3. Creates a state license board of three members, appointed by the

governor. One member must be a qualified building contractor of five years experience in the business, one must be a highway builder of five years experience, and the other a constructor of public utilities with five years experience. All must continue in their respective lines during their terms of office. Terms of office of the first board expire at the ends of the calendar years 1927, 1928 and 1929. New appointments for terms of three years.

Sec. 4. Board must organize within fifteen days after appointment, elect a chairman, and adopt by-laws and regulations.

Sec. 5. Headquarters office shall be Sacramento, with the right to establish branch offices in San Francisco and Los Angeles. Shall employ an executive secretary together with such other deputies and assistants as may be necessary and fix their compensation. Board must meet not less than four times each year, with such special meetings as may be necessary.

Sec. 6. Each member of the board shall be paid \$15 per day for his compensation, limited to \$150 per month and a maximum of \$1500 per member per year, together with necessary traveling expenses.

Sec. 7. Board shall have the power to regulate and control the issuance, suspension and revocation of licenses subject to the provisions of the act. March 1 and August 1 shall publish directory of licensed contractors for public information.

Sec. 8. For the purpose of the act contractors are classified as follows:

"Class A. Contractors engaged in the construction, improvement, alteration or repair of frame buildings.

"Class B. Contractors engaged in the construction, improvement, alteration or repair of buildings other than frame buildings.

"Class C. Contractors engaged in the construction, improvement, alteration or repair of public utilities within the meaning of the public utilities act.

"Class D. Contractors engaged in the construction, improvement, alteration or repair of streets, highways, roads and bridges.

"Class E. Contractors engaged in the installation or application of materials or the furnishing of appliances, teams, power or labor incidental to the work of any one or more of the foregoing groups, and not involving the technical knowledge or skill required for accomplishing the result of the general contract included in any one or more of said groups.

"The Board shall have power under this act to make such further classifications as it may deem advisable for the issuance of licenses hereunder and may also further classify the licenses issued under each class."

Sec. 9. Application for license must be in writing and be accompanied by the recommendation of two real property owners resident in the applicant's county. Annual fee shall be \$25, divided quarterly. Application shall state the class or classes of contracting in which a license is desired and "shall show therein that the applicant has a fair knowledge of the principles and practice of estimating jobs, the preparation and understanding of blueprints, plans and specifications and the rudiments of building contracts and the obligations between principal and agent so far as applicable to the requirements of the particular class of contracting for which a license is requested." A bona fide contractor in business on Jan. 1, 1927, will automatically be entitled to license without examination by merely filing affidavit to that effect.

Sec. 10. Lapsed licenses may be renewed by the board, which may at its discretion require a new application.

Sec. 11. Fees collected under the act set aside in special fund in state treasury to pay expenses of administration of the act. After retaining 10 per cent for emergency purposes any balance on Dec. 31 of each year shall be paid into the general fund of the state.

Sec. 12. Provides for the proper bonding of employes, submitting of annual reports, etc. Must also file directory of contractors with each county clerk.

Sec. 13. Shall adopt a seal and form of printed certificate.

Sec. 14. Attorney general shall be the legal advisor of the board.

Sec. 15. License must be prominently displayed and each licensee must have a definite headquarters.

Sec. 16. Board shall have the power to revoke licenses for any of the following reasons:

"1. Any substantial fraud, misrepresentation or deceit in obtaining a license under the act.

"2. The improper diversion of funds from the prosecution and completion of the particular contract with the intent to defraud or deceive creditors, or the owner, which funds are received for the performance of the contract.

"3. Gross negligence, incompetency or misconduct in the practice of his profession, or in the conduct of any contract.

"4. The failure to pay any legitimate indebtedness incurred for labor or material, or otherwise in connection with the performance of a contract."

Sec. 17. Before denying, suspending, or revoking any license the board must notify the applicant or holder of the charges and afford him a chance to be heard. Decision of the board shall be subject to review by the superior court of the state in accordance with the code of civil procedure.

Sec. 18. Provides that hearings shall be held in the proper court in the county of the applicant, sets up witness fees, modes of procedure, etc.

Sec. 19. Board given the right to prefer a complaint in any court of competent jurisdiction for violations of the act.

Sec. 20. Penalty for violation of the law by acting as a contractor within the meaning of the act without license is \$500 fine, or six months imprisonment, or both, and applies with like effect to the officers and directors of a corporation or other firm.

Sec. 21. Exempts owners of property who proceed with their own work.

Sec. 22. Exempts public bodies, such as state, counties, cities and municipal corporations.

Sec. 23. Gives the board the right to establish reciprocity relations with other states and countries having a like law in effect and which accord similar provisions to contractors licensed under this act.

Sec. 24. Makes it mandatory on all architects and engineers in calling for bids to include in specifications due notice that bids can be received only from licensed contractors.

Sec. 25. Constitutionality clause.

### CONSTRUCTION SHOWS LOSS

The value of contracts awarded in 37 states for the first seven weeks of this year amounts to \$657,749,800 as compared with \$723,393,500 for the same period last year, according to the F. W. Dodge Corporation. This is a decrease of approximately \$66,000,000 or 10%. However, February showed an increase as compared with January of this year and will serve to set at rest any idea that the construction industry is going to be confronted with a serious depression in 1927.

# \$17,500 Offered For Papers On Development Of Arc Welding

The American Society of Mechanical Engineers has accepted the custody of \$17,500 offered by the Lincoln Electric Company of Cleveland, Ohio, to be awarded, under the rules of the competition, to those contributing the best three papers disclosing new information that will tend to advance the art of arc welding.

The purpose of the competition is to encourage improvements in the art of arc welding, the pointing out of new and wider applications of the process, and indicating advantages and economies to be gained by its use, as these latter will be the chief bases upon which the winning papers will be selected.

The first prize award will be for 10,000, the second of \$5000 and the third for \$2500.

## Rules of Competition

1. Anyone, in any country of the world, may compete for these prizes.
2. All papers must be written in duplicate, in the English language, and submitted to the Council of The American Society of Mechanical Engineers, addressed to the Secretary, Calvin W. Rice, 29 West 39th Street, New York, N. Y. All exhibits shall also be in duplicate, and captions, titles, legends and notes shall also be in the English language. All papers must bear evidence of having been sent before January first, Nineteen Hundred Twenty-eight (1928) in order to be considered in this competition. Any paper arriving after January thirty-first, Nineteen Hundred Twenty-eight, will be disqualified.
3. Every paper should include all necessary drawings, photographs, and other exhibits, in order that the disclosure may completely present the suggestions of the competitor.
  - (a) The utility of the suggestions must be shown not only for the application but also for possible use in connection with other designs and for their purposes.
  - (b) The possible advantages and economies of the methods suggested should be made clear, as these will be the chief bases upon which the winning papers will be selected.
4. The practicability of the suggestions must be evident from the paper. It is not necessary, however, that its actual application be fully shown, if possible uses are made clear.
5. Originality of design is preferable, either in the method of applying the weld or in the design of the welding parts for their arrangement. Designs which are of no practical use will be considered in case they include suggestions which could self-evidently be applied in other ways than those suggested. Methods of applying the arc or the welding art which will prove existing machines, or make commercially possible machines which, in the light of previous engineering, have been regarded as impractical, are especially desired.
6. It is not necessary that all parts of the structure should be made of welded metal. It is only necessary that two or more parts be so made.
7. In case two or more identical suggestions are received, the one bearing

the lowest serial number assigned to the paper on its receipt by the Secretary of The American Society of Mechanical Engineers will have precedence. Because of this rule, competitors are urged to submit their papers as soon as they are prepared.

8. The Council of The American Society of Mechanical Engineers may withhold any or all awards.

9. Each paper must be typewritten on one side of 8½" x 11" paper and bound at the top with a protecting cover or jacket. The name and address of the competitor must appear on the front cover. Both copies of each paper must be enclosed within a sealed envelope, on the outside of which will be placed the name and address of the competitor and the following legend: "Submitted to The American Society of Mechanical Engineers, 29 West 39th Street, New York N. Y., in competition for the Lincoln Arc Welding Prize." This sealed envelope must be enclosed within a mailing wrapper. The receipt of each paper will be acknowledged.

10. The Committee of Judges will not pass upon the acceptability of any apparatus suggested as a proper subject for this competition.

11. In submitting papers, each competitor gives to The American Society of Mechanical Engineers the right to publish his paper, should the Society desire to do so in any of its several publications. No paper will be returned to any competitor.

12. The decision of the Committee of Judges in interpreting the foregoing Rules will be final.

## Time of Award

It is the purpose of The American Society of Mechanical Engineers to present these awards at the stated 1928 Spring Meeting of the Society. All competitors will be properly notified of the action of the judges.

For further information regarding the competition address, American Society of Mechanical Engineers, Calvin W. Rice, Secretary, 29 West 39th St., New York, N. Y.

## LOOSE CEMENT SHIPPED VIA MOTOR TRUCK TO JOB

An innovation of great significance to the cement and building industry is a method of shipping cement in loose bulk instead of in the customary bags, which has recently been adopted and approved by the Peerless Portland Cement Company, according to the March issue of the Autocar Messenger. Although long recognizing the probable economy of such a method in some instances, the industry had not worked out a practical way of shipping the cement loose and yet keeping it protected from the air. Further, it was supposed that any attempt to dump it from a covered truck body would require an 80-degree elevation and possibly a slice-bar as well. The successful new way uses a special truck body mounted on a 5-ton, 120-inch wheel-base chassis. The body is covered and has two manholes in the top for filling. These are protected by water-tight covers. The truck is emptied through a water-proof canvas chute at the rear. The cement flows out freely at a 20 to 25-degree elevation.

## MONEY TALKS! ARCHITECT MOHR RENEW'S CHALLENGE

Renewing his open challenge to any architect who can show priority in the "setback" type of architecture now favored in San Francisco and other cities of the United States, Norman W. Mohr, former San Francisco city architect, offers to place a substantial bet, amount to be determined, on his claim.

New York architects have recently claimed the honors of the "setback" type of architecture for the East. History of this type, they claim, dates back ten years.

Mohr has copyrighted drawings dated 1911, in which the whole proposed plan for the Panama Pacific International Exposition is laid out in "setback" type. San Francisco publications printed these and other drawings of the same type in 1912 and 1914, Mohr states.

"I do not claim that I was the originator of this type of building," Mohr explained, "for it was used in Egyptian, Aztec and Chinese architecture centuries ago. But I do claim to be the first to apply the 'setback' idea to modern buildings, and, as claimant to this honor, I challenge the world."

## CLEVELAND TRADES WORKING WITHOUT AGREEMENTS

The seven major building trades in Cleveland, whose agreements expired on March 1, 1927, are continuing to work. The arbitration committees in these trades are meeting and the employers are hopeful that, in at least three, agreements will be completed within the very near future. In the lathing and plastering trades a three-year agreement was entered into prior to March 1, which provides for an arbitration plan in which provision is made for a board of umpires with the probate judge naming the third member of the board in case of deadlock. The arbitration plan proposed by the employers and the one which they insist must be incorporated in each agreement signed in Cleveland this year, is similar to the one recently adopted in Chicago by the carpenters and which reads as follows: "An umpire shall be selected who is in no wise affiliated with this trade or who is occupying an elective public office and his decision shall be final and binding upon all parties to this agreement."

## BELGIUM STEEL PLANTS FORM CONSORTIUM

Formation of a consortium of four Luxemburg, Belgium, steel plants in order to protect their rights in the international understandings relative to the production of pig iron, steel and rails, and also to take any action necessary to the successful exploitation of the plants involved is reported to the United States Department of Commerce by its representative at Brussels.

## BANKRUPT

Fischer Brothers, a corpartnership of Stockton ditch contractors, Adolph and Henry Fischer being the partners, have a petition in bankruptcy in the United States District Court at Sacramento. They list liabilities of \$18,075 and assets of \$1,500. Henry Fischer, in a separate petition, named himself as having liabilities of \$18,225 with assets of only \$200.

# THE OBSERVER

## WHAT HE HEARS AND SEES ON HIS ROUNDS

Under a decision just handed down by the State Supreme Court, Rodney Messner, county surveyor of Marin County, is without a salary. Under the ruling, Section 4044, of the Political Code, which provides that the salary of county surveyors, not to exceed \$10 a day, shall be fixed by the supervisors of the county, is declared unconstitutional. This means that the salary of the county surveyor can be fixed only by the state legislature, and must be included in the county government bill. In order to include the salary of the Marin county official in the bill, now pending before the legislature, the bill must be amended. A special meeting of the grand jury has been called at which time a recommendation will be adopted, fixing the salary, which will be forwarded at once to Sacramento. In the meantime, Messner will receive no pay until the county government act becomes effective, next August.

Officials of Marlon County Building Trades Council, which includes Indianapolis, have notified the employers that when the present agreements expire on April 1st and May 1st this year, that among the demands which will be made will be one for the five-day week and an increase in wage rates, which, if granted, would bring workers the same weekly income as before. The painters, sheet metal workers and bricklayers signed a two year agreement last year which still has another year to run. The agreements of the plumbers and carpenters expire on May 1st and agreements with all the other trades with the exception of the painters, sheet metal workers and bricklayers expire on April 1st.

Tariff protection against foreign cement is desired by the New England Builders' Supply Association, whose president, Alfred I. Mergold, asked Governor Fuller and Mayor Nichols of Boston, Mass., for their intercession to obtain tariff protection to promote the use of American cement. The resolutions presented state that the cement industry buys annually \$63,000,000 worth of material for the manufacturing processes. The resolution adds: "Of this by far the largest part goes to New England. Without tariff protection, the industry is competing against foreign production where the labor cost is one-fifth its own."

No definite action was taken by the newly organized General Contractors' Association of Reno, Nevada, with regard to proposed changes in the wage scale in the various crafts. A joint meeting of general contractors and sub-contractors was held in Reno several days ago but no details were made public following the meeting. According to reports, a wage increase amounting to \$1.60 a day will be sought by the carpenters on April 4 and an increase of \$1 a day by the plumbers under a new agreement effective June 1. Bricklayers and plasterers will also seek increases, it is reported. Painters and electricians will not seek increases, it is definitely stated.

Lange & Bergstrom, Inc., Los Angeles, bidding \$1,068,045 submitted the lowest bid to the Los Angeles Department of Public Works to construct the main structure of the Glendale-Hyperion Viaduct across the Los Angeles river. The Lynch-Cannon Engineering Co., Los Angeles, bidding \$1,098,500 and Thos. Kelly & Sons, bidding \$1,187,184 were the next two low bidders.

Assembly Bill No. 829 has been passed and provides for issuance of permits for public garages to be located in apartment houses with proper fire protection and makes other minor changes in the State Housing Act.

Earl C. Morris of Denver, has been awarded 1927 Le Brun traveling scholarship, a major award in United States architecture, it was announced by the New York Chapter, American Institute of Architects. The scholarship valued at \$1400, was founded in 1910 by Pierre L. LeBrun, architect of the Metropolitan tower, in memory of his brother. It provides for six months' study abroad. First mention was given W. Ray Winegar of Detroit.

Recommendation has been made by the Sacramento Chamber of Commerce that Sacramento labor be employed in building the new municipal stadium, that construction materials be obtained from Sacramento dealers and that contracts be let to Sacramento contractors.

Berkeley Board of Education has declined to consider the proposal of Berkeley Public School League for a special tax of 25 cents on \$100 assessed valuation to be placed on the ballot at the May 3 election to raise approximately \$150,000 for school improvements. The educational body declares the only feasible solution to the school problem is via a bond issue.

Thos. R. Murphy, San Francisco fire chief, will revive his demand made last July, and many times subsequently, that some action be taken by the Board of Supervisors to extend the fireproof roofing districts of the city to include the newer residential sections.

City Commissioner Frank Colbourn of Oakland has adopted a new rule providing that sheeting boards for roofs must be inspected before the roofs are put on, according to an announcement of A. H. Holmes, city building inspector.

Following a charge that the builders had violated their contract with the city by employing men not residents of San Francisco, City Auditor Thomas F. Boyle, is holding up payment of \$10,040.48 to Anderson & Ringrose, contractors. Payment of the carpenters was protested by the Bay Counties Council of Carpenters. The protest was referred to City Attorney J. J. O'Toole. The money was due the contractors for construction work on the Hearst Moulder School, at Fago and Webster streets.

The San Francisco Board of Public Works will ask for sufficient funds in the next budget to increase the pay of city asphalt workers 50 cents a day.

Preparations for the annual convention of the National Retail Lumbermen's Association to be held in Tacoma, Wash., next August are under way.

The City of Berkeley will postpone the erection of the proposed new library building and reduce expenditures by the library board to provide for the construction of storm sewers to cost \$450,000 if the recommendation of City Manager John N. Edy is adopted. Edy declares that an additional special tax will also be necessary.

## TRADE NOTES

Installation of machinery is now under way at the new factory of the Merco Nordstrom Valve Company at Oakland. The plant, located at 24th and Peralta streets, occupies 30,000 square feet and will be devoted exclusively to the manufacture of plug cock type valves. Heretofore the manufacturing of these valves has been carried out on the Atlantic Coast but growing demands for the product necessitated the establishment of Western factory. Merco Nordstrom Valve Company is a subsidiary of The Merrill Company, Engineers. The valve is the invention of Sven Johan Nordstrom, a mining engineer who introduced it in the mining industry about ten years ago. The valve is now used widely in practically every industry but more particularly in petroleum, gas, chemical and mining fields.

Salinas Hardware Co., operated by J. H. Herring of Fresno and E. T. For of Orosi, Tulare county, will open quarters at 352 South Main St., Salinas within the next ten days.

Schumacher Wall Board Corp., announces removal to new and large quarters at 1007 Financial Center Building, California and Montgomery Sts., San Francisco.

Operations will be resumed at the Atlas Rock Company's plant, west of Oakdale, about April 10, according to Fred Beerman, manager for the company. The plant was recently shut down to permit installation of new equipment and the overhauling of equipment already installed.

E. A. Watson, operating the Watson Electric Co., in Mill Valley, announces that Foster Petrie has become a partner in the business.

G. C. McCann has taken over the business of McCann & Helm, cabinet makers, 3901 East Fourteenth St. Oakland, and will specialize in the manufacture of tables and chairs.

John W. Williams will operate from 527 Laguna street, San Francisco, under the trade name of Security Roofing Company.

Meadowcroft Construction Co. of San Francisco, capitalized for \$10,000 has been incorporated. Headquarters are maintained at 1256 Second Avenue. Directors are: F. E. Meadowcroft, J. A. Himmel and May E. Himmel.

Frank Dixon, operating in the painting and decorating business in Sacramento for the past twenty years, has taken over the business of John G. Exley, Inc., at 1740 Howard Street, San Francisco, and will operate a general painting and decorating business under the name of Frank Dixon Painting Company. Mr. Dixon is a past president of the Master Painters' Association of California and comes from Sacramento with a desire to enter a larger field.

Henry M. Robinson, president of the First National Bank of Los Angeles, has been elected a director of the General Electric Company. This is the first time that the General Electric has come to the Pacific Coast for a member of its board.

Victory Flush Valve Company, of San Francisco, capitalized for \$1,000,000, has been incorporated. Directors are: L. H. Moise, S. Peis and Elsie M. McClure.

The Monolith Portland Cement Company of Los Angeles announces its entry into the midwest manufacture of cement with the organization of the Monolith Portland Cement Midwest company. The company will operate holdings near Laramie, Wyo., where a cement plant will be erected at once.

## ALONG the LINE

J. W. Reagan, Los Angeles County Chief Flood Control Engineer, has resigned upon request of the Board of Supervisors. The resignation was requested "for the purpose of reorganization," according to Supervisor S. T. Graves in charge of flood control work.

Following the action of the San Francisco Board of Supervisors in confirming the appointment of three engineers to study and report on the San Francisco Bay bridge problem, the Board of Public Works has notified 70 Eastern engineers to be in San Francisco April 5 to start the survey. Robert Ridgway of New York and Arthur Newell Talbot of the University of Illinois are the two Eastern engineers. John D. Galloway, San Francisco structural engineer, will be the third member of the party.

Stephen B. Overhiser, traveling salesman for Higginbotham Brothers of Cockton, hardware dealers, died at his home in Sacramento, March 23.

George R. Winslow, former maintenance engineer for the California State Highway Commission, has filed the superior court at Sacramento a petition for a writ of mandamus which will test the powers of the department and to discharge civil service employees. Ralph Bull and J. P. Baumrtner, highway commissioners, are named as defendants. R. M. Morton, state highway engineer, is also a defendant.

City Commissioner Ralph Conley opposes to submit an ordinance to the Sacramento city commissioners seeking to reduce the salary of the city manager from \$15,000 to \$10,000 a year.

# Mortgage Bankers' Association Defends R. E. Bond Mortgage

Receivership of the G. L. Miller Co., a large mortgage bond organization, and the consequent reaction against this type of security, has caused the Mortgage Bankers' Association to rally to the defense of the real estate mortgage bond. Its board of governors has passed a ruling that hereafter it will decline to accept for membership unless firms subscribe to a rule of practice that whenever a loan is made for construction purposes, the fund for such purpose arising from the sale of bonds to the public shall be segregated and kept apart as a separate entity from the funds derived from the sale of bonds for other issues and deposited with a bank or trust company to be used only upon the enterprise for which such bonds are sold. Moreover such trust companies shall have capital and surplus commensurate with amount of such deposit.

In other words the Mortgage Bankers' Assn., which ranks among the dealers of real estate mortgages as high as does the Investment Bankers' Association among the bond men, will see that there is no juggling of the money of investors. If bonds are sold before a building is completed, such moneys collected must be set apart so that the building will be completed from these funds. In some cases the diversion of these bond moneys to other channels prevented the completion of the apartment or hotel or whatever else was being built. The investor was then left out on a limb.

At the Chicago meeting of the mortgage bond men, they rose to the defense of the real estate mortgage bond. The President of the Mortgage Bankers' Association at this meeting declared:

For thousand of years people have borrowed money, pledging as security therefor their lands and dwellings. The "mortgage" is undoubtedly the world's oldest financial device. It has come to be considered as the one most safe and conservative investment for those of small means who are not in position to assume the risks of speculation.

The mortgage business has long been recognized as a reliable branch of financial commerce. The mortgage banker unquestionably has played a major part in inducing the large investors to lend their funds on farms, residences and business property.

No agency, not even the Joint Stock Land banks or Federal Land banks, has provided more funds and given greater assistance to our American citizen in owning their homes, farm and city, than the members of the Mortgage Bankers' Association of America.

A great part of the \$2,000,000,000 farm mortgage and \$3,000,000,000 residence and business loans now held by American insurance companies has been loaned through our members.

Now it happens that in the last few years a very important factor in real estate financing has come into existence known as the real estate first mortgage bond. The bond is merely a device to split up a mortgage so it can be distributed among many people. Conservatively issued, real estate bonds are in no sense speculative, but have investment security with a very high factor of safety.

Without the real estate bond it would be difficult to finance many many of our largest and most needed buildings. In 1926 a large Eastern bond house,

not a member of our association, failed for about \$50,000,000. This was only a drop in the bucket compared with thousands of mortgage and bond firms that continued solvent and handled millions of dollars daily without loss to anyone.

But the man in the street, startled by the well-merited publicity attendant upon this sensational failure, began at once to assume that the first mortgage investment was open to suspicion after enjoying centuries of good repute.

How much actual harm this failure has caused among banks and mortgage companies is debatable. Some feel that the example to the public, painful as it was, improved conditions for the responsible companies. Certain it is, however, that every danger signal in any business must be closely heeded.

So the Mortgage Bankers' Association has studied very carefully the general situation in the real estate bond field—not only with the interests of the members at heart, but also with a view to the welfare of investors large and small who look to us for guidance and on whose good will and confidence our success depends.

The public looks upon our association as having within it financial houses of acknowledged responsibility, reducing first mortgages on real estate (farm or city) and selling there securities in such a manner that the investor comes into possession of a first lien on real property as soon as he writes out his check.

In the case of city property, if the building is already constructed and being used, it is plain to see that the investor has bought something very definite. If, however, the building is only in process of construction he will wisely inquire if his money is to be placed in trust with a separate, disinterested, corporate trustee and be paid out only on the enterprise for which bonds have been sold. Unless this precaution is taken, it is self-evident that until a building is completed the security behind a real estate bond is not the building, but the credit of the bond house.

If a real estate bond house switches an investor's fund from one building project to another at will no harmful result can be expected as long as the bond house remains solvent; but once difficulties are encountered the investor is apt to find that years of litigation are necessary before he can get back any part of his principal.

The advantages of separate trusteeship thus becomes evident. The investor's funds, if deposited at once with a bank or trust company and reserved for a particular building project, are safely removed from the vicissitudes which may be attendant upon the bond house's other building projects.

Much of the comment following the failure of the large Eastern house has been along the lines of trusteeship. As stated in the resolution our association has always looked with disfavor upon the practice followed by some companies of not depositing investors' funds with disinterested corporate trustees, where a building is still under construction.

Before the Mortgage Bankers' Association of America would be called upon to give an account of itself and in order that the public might know our position, we have seen fit to announce our membership policy as stated in the resolution.

It is hopeless to expect that any non-governmental body such as our can dictate business practices to individual firms—especially if they are outside our association.

But we can and do exercise the right to select our members judiciously; and in so doing we thus offer the investing public a certain standard of measurement which would not otherwise be available.

# ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

## 35,588 New Mechanics Needed Annually In Building Industry

Through death of their members, prohibition of apprentices, restrictions on taking in new members and the withdrawal of members to enter other than the building trades, it is estimated that there has been a reduction in the total number of mechanics in building trades of more than 25 per cent during the last five or six years, says the Builder Economist. Today it is estimated that at least 35,000 new skilled mechanics are needed annually in the United States to replace those who die or retire. The loss in the ranks of building labor is even greater than in the skilled trades because restrictions on immigration have curtailed the supply from Europe. The chart below shows the number of new men needed annually in the United States in each of the skilled trades to replace those who die or retire:

Artisans	Death	Retirement	Total
Carpenters .....	15,437	4,258	19,695
Painters, glaziers .....	4,024	943	4,967
Brick and stone masons .....	2,310	656	2,966
Plumbers, gas and steam fitters .....	2,377	165	2,542
Electricians .....	1,980	85	2,065
Tinsmiths and sheet metal workers ..	969	188	1,157
Plasterers .....	634	164	798
Stone cutters .....	362	79	441
Paper hangers .....	297	62	359
Structural iron workers .....	212	9	221
Roofers and slaters .....	159	27	186
Cement finishers .....	106	11	117
Coppersmiths .....	65	9	74
Totals .....	28,932	6,656	35,588

### STATE BUILDING LOAN LEAGUE TO CONVEENE IN S. F.

The annual convention of the Building Loan League of California will be held in San Francisco, May 26 to 28 inclusive. Thousands of delegates from every section of the state will attend the meet. Headquarters will be maintained at the Palace Hotel.

Arthur T. Ehrenpfort, San Francisco architect and vice-president of the Alameda County Loan Association, is taking an active part in the arrangement of a program for the visiting delegates.

In California, according to Mr. Ehrenpfort, there are about two hundred associations with combined assets of over \$200,000,000. The love of home and the desire to own a home, an instinct as old as the race, is one of the most important assets of building and loan associations, Ehrenpfort declares.

### S. F. BUILDERS' EXCHANGE ELECTS DIRECTORS

Wm. H. George was re-elected president of the San Francisco Builders' Exchange at the annual meeting of that organization, March 25. Other officers elected to serve for the ensuing year are: Emil Hogberg, first vice-president; D. J. Sullivan, second vice-president; Jas. H. Plunkerton, third vice-president; R. J. H. Forbes, secretary; Alexander Mennle, treasurer.

### PLAN HOUSE WARMING

Hayward Builders' Exchange (Alameda County) will hold a "house-warming" in the exchange quarters recently opened in the Oakes' Block, Hayward, on April 13, according to E. P. Whitman, secretary of the organization. The exchange, only recently organized, has a membership of thirty, comprising general contractors and material dealers.

### LABOR OUTLOOK BETTER THIS YEAR THAN LAST

Generally speaking the labor outlook this spring is much better than at this time last year. A year ago there was considerable uncertainty as to what the trades would demand and in a number of cities strikes were called on March 1st to force increases in wage rates. Taking the country as a whole, there will be but few wage increases and a minimum of strikes. The five-day week issue apparently is not going to be pressed this year largely on account of the fact that the employers and the public are united in the belief that there is no justification in decreasing the number of hours now being worked by men in the building trades. Practically every city reports a surplus of labor in all of the crafts and with less demand for building this year than there was last it is apparent that there will be some idle labor throughout the country all year. Taking all of these points into consideration it appears at this time that the industry will be entirely free from any serious tie ups this year and that labor will be willing to go along under wage rates and conditions in effect in 1926.—(Bulletin—Nat'l. Ass'n Bldg. Trades Employers).

### MACDONALD RE-ELECTED HEAD OF BUILDING TRADES

Frank C. MacDonald of San Francisco was re-elected president of the State Building Trades' Council at the recent convention in Santa Barbara.

A. G. Gilson, general secretary-treasurer of the council for the past seventeen years, tendered his resignation. He gave as his reasons the failure of the organization to concur in his oft-repeated recommendation that a huge defense and relief fund be raised and also the advisability of getting into private work and providing a compensation for old age.

### OPPOSE FIVE-DAY WEEK

Among the resolutions adopted at the recent annual convention in Washington, D. C., of the National Association of Builders Exchanges, was one opposing the five-day week in the construction industry. In the discussion of factors in building costs it was generally agreed that the time is not far distant when the cost of labor must be stabilized on lower levels than at present. The consensus of opinion at the convention was that wage increases ought to be resisted this year and every possible effort made to oppose the five-day week or any other reduction in the working hours in effect at present.

### BUILDING BUREAU RESEARCH PLAN OF MILLWORK INSTITUTE

Stressed necessity for a more closely knit organization and an industrial research department as a means of improving the building industry in the state featured the closing sessions of the Millwork Institute of California at Hotel Senator, Sacramento.

Two committees were appointed to report at the next gathering, to be held at Long Beach in July. The work of one committee will be to arrange a plan for bringing the entire state up to a single standard in the millwork industry, and is composed of Fred Spencer, San Francisco, chairman; Bert Maul, Los Angeles; Bill Goddard, Oakland; Arthur Bernhauer of Fresno, and Tom Gardner, Stockton.

A standard of quality will be sought by the other committee, which plans to give ratings to member firms according to their class of product. The committee members are Bill Glasson, San Diego, chairman; Harry Gaetjen, San Francisco, and C. G. Chipchase, Sacramento.

### QUARTERLY MEETINGS SET BY FRESNO BUILDERS' EXCHANGE

General meetings of the members of the Fresno Builders' Exchange will be held every four months, with the first scheduled for next May, directors of the organization announce. The meetings will include entertainment and a smoker, according to Secretary-Manager H. L. Hardman.

The election of exchange officers will be held April 6. The directors have elected Henry Hawson, Fresno attorney and vice-president of the Fresno County Chamber of Commerce, to honorary membership in the exchange.

### LUMBERMEN HONOR CHIEF

More than seventy lumbermen, including out-of-town members of the lumber fraternity, were present at the dinner given by the Hoo Hoo Club of Fresno at the California Hotel, the city, March 23, in honor of Arthur A. Hood, snark of the universe of the Concatenated Order of Hoo Hoo. Hood was the principal speaker, his address covering activities of the order in general. Entertainment included songs by Miss Peggy Connolly and selections by Claire Du Bois' High Hatters Orchestra. F. Dean Prescott, president of the San Joaquin Valley Lumbermen's Association, presided.

## APARTMENTS

**Preliminary Plans Being Prepared**  
**APARTMENTS** Cost, \$100,000  
 SAN FRANCISCO, N. W. Broderick and Pacific. Seven-story and basement Class A (7) apartments.  
 Owner—Mrs. Alexander Lilley, 251 Kearny St.  
 Architect—Bakewell & Brown, 251 Kearny St.  
 Permit has been applied for.

**Plans Being Completed**  
**APARTMENTS** Cost, \$300,000  
 SAN FRANCISCO, Richmond District.  
 Six-story reinforced concrete apt. bldg. (46 apartments).  
 Owner—Withheld.  
 Architect—D. M. Crooks, 532 16th St., Oakland.

**Ready for Figures in Three Weeks**  
**APARTMENTS** Cost, \$600,000  
 SAN FRANCISCO, N. W. Union and Leavenworth Sts. Fourteen-story and basement Class A steel and concrete apartment building (22 apartments).  
 Owner—La Mirada Corp., care of W. P. Chipman, 625 Market St.  
 Architects—Reid Bros., 105 Montgomery St.

**APARTMENTS** \$1,000,000 or more  
 SAN FRANCISCO, S. W. Jones and California Sts. Fifteen-story Class A apartment house, 100 two to five-room apartments.  
 Owner—Jones-California, Inc.  
 Architect—Weeks & Day, 315 Montgomery St., San Francisco.  
 Contractor—Cahill Bros., 55 New Montgomery St., San Francisco.  
**Composition Sleepers**—Kellastone Corporation.  
**Finish Hardware**—Baker-Hamilton & Pacific Co., 700 7th St., San Francisco.

Other contracts awarded were published in the issue of Feb. 16, 1927.

**Working Drawings to be Prepared**  
**APARTMENTS** Cost, \$400,000  
 SAN FRANCISCO, Vallejo St., between Octavia and Laguna. Twelve-story Class A reinforced concrete apartment building (12 apartments).  
 Owner—Dr. Percival Dolman, 490 Post Street.  
 Architect—C. A. Muesdorffer, Humboldt Bank Bldg.

**Plans Complete.**  
**APARTMENTS** Cost, \$40,000  
 SAN FRANCISCO, S. E. Octavia & Linden Sts.  
 Three-story and basement frame apts.  
 Owner—Fred Hechter, 1424 Balboa St.  
 Architect—Clausen & Amandes, Hearst Bldg.

**To Be Done by Day's Work**  
**APARTMENTS** Cost, \$40,000  
 OAKLAND, Alameda Co., Cal. N. E. 14th St., opposite 26th Ave.  
 Three-story 48-room frame apartments.  
 Owner—Home Bldg. Co., 2574 E. 14th St., Oakland.  
 Architect—John Wagenet, 2930 E. 23rd St., Oakland.

**Contract Awarded.**  
**APARTMENTS** Cost, \$20,000  
 SAN FRANCISCO, N. Fifteenth St. — W. Church St.  
 Three-story and basement frame and plaster apartment building (6 2-room and 3 3-room apts.)  
 Owner—Julia Mullins.  
 Architect—N. W. Mohr, 4405 20th Ave., San Francisco.  
 Contractor—McCarthy & Johann, 1366 14th Ave., San Francisco.

**Sub-Contracts Awarded**  
**BUILDING** Cost, \$200,000  
 SAN FRANCISCO, S. W. Davis and Vallejo Sts.  
 Two-story reinforced concrete Class C building.  
 Owner—Albers Bros. Milling Co.  
 Architect & Contractor—Geo. Wagner, 181 S. Park St., S. F.  
**Piling**—M. B. McGowan, 180 Jessie St.  
**Electric Work**—Hampton Electric & Mfg. Co., 525 Howard St.  
**Plumbing**—James H. Pinkerton, 180 Jessie St.  
**Lumber**—J. H. McCallum, 748 Bryant St.  
**Brick**—Sacramento Brick Co., Pier No. 54, S. F.

**Owner Taking Figures**  
**APARTMENT** Cost, \$30,000  
 SAN FRANCISCO, S. W. Lake and 2nd Ave. Three-story and basement frame (12) apartments.  
 Owner—Lester Stoff, 26 Montgomery St.  
 Architect—H. C. Baumann, 251 Kearny St.

**To Be Done by Day Work**  
**APARTMENTS** \$50,000 and \$35,000  
 SAN FRANCISCO, W. Broderick St., and 107 S. Grove St. Two 3-story and basement frame apartment buildings (9 apts. each).  
 Owner—V. Gullmes, 323 Chattanooga St.  
 Architect—H. C. Baumann, 251 Kearny St.

**Contract Awarded**  
**APARTMENTS** Cost, \$15,000  
 OAKLAND, Alameda Co., Cal. S. W. 41st & Canning Sts.  
 Two-story 12-room apartments.  
 Owner—Chas. Burgess, 2200 Piedmont Ave., Oakland.  
 Architect—David Horn.  
 Contractor—J. F. Brown, 1325 82nd Av., Oakland.

**Site Being Cleared.**  
**APARTMENTS** Cost, \$60,000  
 SAN JOSE, Santa Clara Co., Cal. NW Magnolia St. and The Alameda.  
 Three-story brick apartment building (20 2 and 3-room apts.)  
 Owner—Andrew Haskell, San Jose.  
 Architect—W. H. Weeks, 369 Pine St., San Francisco, and 246 S-First St., San Jose.

**Contract Awarded**  
**APARTMENTS** Cost, \$25,000  
 OAKLAND, Alameda Co., Cal. N. E. 15th St., 100 W 5th Ave.  
 Two-story 20-room apartments.  
 Owner—T. F. Stokes.  
 Architect—None.  
 Contractor—C. A. Doss, 2028 E. 15th St., Oakland.

**Permit Applied For**  
**APARTMENTS** Cost, \$100,000  
 SAN FRANCISCO, S. E. Pacific & Baker Sts.  
 Six-story and basement brick (24) apartments.  
 Owner—Roy A. Lee, 105 Montgomery St.  
 Architect—Albert H. Larsen, 447 Sutter St.

**Ready for Figures in Two Weeks**  
**APARTMENTS** Cost, \$175,000  
 SAN FRANCISCO, Hyde St near Greenwich.  
 Fourteen-story class A apt. bldg. (12 apts.)  
 Owner—C. Schaffer, 560 Sutter St.  
 Architect—R. C. Sisson, 468 Crescent St., Oakland.

**Sub-Contracts Awarded**  
**APARTMENTS** Cost, \$35,000  
 SAN FRANCISCO, Chestnut St. near Fillmore St.  
 Three-story and basement frame apartments.  
 Owner—Stock, Maas & Sauer, 3300 Washington St.  
 Architect—Albert H. Larsen, 447 Sutter St.  
**Lumber**—Reinhart Lumber & Planing Mills, Jerrold and Barneveld.  
**Plumbing**—Higgins & Kraus, 730 Tehama St.  
**Electrical Work**—Aetna Electric Company, 1337 Webster St.  
**Steel**—Golden Gate Iron Works, 1541 Howard St.  
**Heating**—La Pointe, 119 De Lanos St.  
**Mil. Work**—Henry Harder, 1819 San Bruno Ave.  
**Plastering**—Jos. Marconi, 1747 Mason St.  
**Ornamental Staff**—George Campbell, 3443 17th St.  
**Fire Escapes**—Folsom St. Iron Works, 17th and Missouri.  
**Stairs**—George W. Filbert, 1782 Sanchez St.  
**Sheet Metal**—Washington Square Sheet Metal Works, 684 Filbert St.  
**Roofing**—H. & H. Roofing Co., Inc., 2734 Army St.  
**Painting**—D. Zelinsky, 165 Grove St.

**Plans Ready For Figures in One Week**  
**APARTMENTS** Cost, \$20,000  
 BERKELEY, Alameda Co., Cal. Grove St. — N. Sixty-second St.  
 Two-story frame and stucco store and apartment building (6 3-room apts. and 2 stores).  
 Owner—Withheld.  
 Architect—W. Spivock, 3618 Grand Ave., Oakland.  
**Segregated Figures Being Taken.**  
**APARTMENTS** Cost, \$20,000  
 OAKLAND, Alameda Co., Cal. Sixty-second Ave. — E-14th St.  
 Two-story frame and stucco apartment building (6 3-room apts. and 6 garages).  
 Owner—Miss Hattie Davis.  
 Architect—George Ellinger, 1723 Webster St., Oakland.

SAN FRANCISCO, Cal. — Mangels Bros., 340 Hayes St., owners and builders, recently awarded the electrical contract to the Pacific Elevator and Equipment Co., 45 Rausch St., in connection with the construction of a five-story steel frame and brick apartment building. It is to be erected on Hayes St., west of Franklin, from plans prepared by Architect Albert H. Larsen, 447 Sutter St. Cost, \$150,000.

## ALLIANCE ENGINEERS

Quantity Surveyors

A. I. Q. S.

APPRAISERS

PRELIMINARY ESTIMATES

Phelan Building

760 Market Street  
 Phone Garfield 3541

LOS ANGELES, Cal.—Chas. C. Frye, architect, 406 Grosse Bldg., has applied for building permit to erect a four-story and basement, 134-room, 69-family, Class A apartment house, 59x151 feet, at 2315 S. Flower St., for the Flower St. Income Properties, Inc., 406 Grosse Bldg.; reinforced concrete walls and floor and roof slabs, composition roofing, tile coping, fire escapes, metal stud and lath and hollow tile partitions, skylights, metal frames, and sash, wall beds, structural steel, telephone system, tiled bath and lobby floors and drainboards, steam heating plant, incinerator, electric refrigeration, electric elevator, storage water heater, sprinkler system in basement; \$200,000.

LOS ANGELES, Cal.—Architect C. C. Frye, 406 Grosse Bldg., and Associate L. A. Smith, Film Exchange Bldg., Vermont Ave. and Washington St., are completing plans and will commence taking bids on general contract April 1 for a 4-story class A apartment and store bldg. at N. Broadway and School St., owner's name withheld; reinforced concrete construction, travertine stone front, composition roof, cement, tile & wood floors, tiled baths and sinks, stm. heating system, elevator, fire escapes, refrigeration system, incinerator, copper store fronts, plate glass, marble base.

LOS ANGELES, Cal.—Homer D. Rice, 421 Title Insurance Bldg., is preparing plans for a 3-story Class C apartment house to be erected near La Brea and Sunset Blvd., for R. C. Williams. It will have 72 rooms arranged in 4 and 5-room apartments; dimensions, 60x120 ft., brick walls, stucco exterior, cast stone and terra cotta trim, composition roofing, fire escapes, pine trim, oak floors, tiled baths, wall beds, storage water heater, gas-steam radiators, electric refrigeration, incinerator; \$90,000.

LOS ANGELES, Cal.—W. Douglas Lee, archt. and bldr., 709 Textile Center Bldg., applied for building permit to erect 6-story class A concrete store and apartment building at s. e. cor. Oakwood and N. Vermont Aves. for C. Henry Frost, own., 6136 Vermont Ave.; 100x120 feet, concrete and composition roof, skylights, art stone trim, ornamental iron, plate glass, fire escapes, 1st floor to contain 5 stores, tile baths and drainboards, closet beds, electric radiators, electric elevator, laundry; \$200,000.

LOS ANGELES, Cal.—Evans-Zukin Bldg. Co., 1116 S. Highland Ave., is taking sub-bids for a 4-story and part basement 48-unit class C apartment building to be erected on West Adams St. near Western Ave. for self; plans by Architect Raphael Nicolais, 686½ S. Vermont Ave.; face brick, art stone trim, tile and composition roof, structural steel, tiled baths and drainboards, storage water heaters, electric heating system, hardwood and tile floors, pine trim, wallbeds, refrigeration system, electric elevator; \$125,000.

STOCKTON, San Joaquin Co., Cal.—The following bids were received by Architect Jos. Losekann, Elks Building, Stockton, for the construction of six-story steel frame bldg. with brick walls, to contain 40 two, three and four-room apartments, and a two-story steel frame and brick building, to contain ten offices and a garage in the rear, 90 x 140 feet. Both buildings are to be erected for Senator Frank S. Boggs, on North El Dorado St., and East Acacia, Stockton. Estimated cost of both buildings \$280,000.

Excavating and Concrete—Frederickson Bros., First National Bank Bldg., Stockton, \$24,790.

Brick and Terra Cotta—E. L. Morrison, 1605 Argonne, Stockton, \$52,135.

Structural Steel—Sellers Iron Works, 945 S. Pilgrim, Stockton, \$17,892.

Tile and Marble—H. P. Fischer, 744 E. Webster, Stockton, \$11,598.

Mill Work—Electric Planing Mill, Hazelton and Monroe, Stockton, \$29,861.

Painting—E. J. Blanchard, 616 East Main St., Stockton, \$9264.

Contract will probably be awarded to low bidders. Complete list will follow in a few days.

LOS ANGELES, Cal.—Architect Louis Selden, Byrne Bldg., is preparing plans for a 4-story 86-room 40-family class C apartment house, 60x124 ft., to be built on Serrano Ave., between Wilshire Blvd. and 6th St., for Harry Rogaff, 7222½ N. Wilcox Ave. Mr. Rogaff will probably take bids; face brick, cast stone trim, composition roof, fire escapes, tile coping, tiled bath floors and drainboards, gas-steam radiators, refrigeration system, incinerator; estimated cost, \$100,000.

LOS ANGELES, Cal.—Barkeley & Gould, 2813 Glendale Blvd., have started work on the erection of a two-story class C store and apartment building at Atlantic Ave. and Whittier Blvd. for P. N. Snyder. Plans were prepared by Balch Bros., 934½ South Figueroa St. The building will be L-shaped, 140x250 ft., brick walls, stucco exterior, tile and composition roofing, pine trim, cement and wood floors, tiled baths, plate glass, steel beams, metal skylights, wall beds, gas radiators. The cost will be \$100,000. Work will be started on a class A theatre building on adjoining property as soon as the lease is consummated. It will be of reinforced concrete construction and will cost \$200,000.

LONG BEACH, Los Angeles Co., Cal.—R. E. Campbell, 711 Central Bldg., Los Angeles, will start work in about 2 weeks for the construction of a 12-story and basement class A apartment building on Linden Ave. near 1st St., Long Beach, for self. Architects Wright & Gentry, 316 Marine Bank Bldg., Long Beach, are completing working plans; it will have 81 single, double and three-room apartments; steel frame and reinforced concrete construction, composition, plaster and stone facing, plate glass, electric elevators, steam heating system, hardwood and pine floors, tiled baths and drainboards, wall beds, marble work, ornamental iron, refrigerating system, hardwood and pine trim, Minneapolis Steel & Machinery Co., Chapman Bldg., Los Angeles, have the contract for structural steel.

LOS ANGELES, Cal.—Henry B. Pentland, 329 I. W. Hellman Bldg., is completing plans and will take bids commencing Friday, April 1, on concrete work and rough carpentry, for a 5-story class B store and apartment building at 9th St. and Norton, for Louis Siegel, 1561 Venice Blvd.; five stores and 51 apartments, 42x151 feet, reinforced concrete construction, stucco exterior, composition roof, wrought iron, fire escapes, tiled baths and drainboards, storage water heaters, gas steam radiators, hardwood and tile floors, hardwood and pine trim, wallbeds, elevator, incinerator, refrigeration plant; \$175,000. Bids will be taken by owner on balance of work after April 5 when plans will be completed.

## BONDS.

ORANGE, Cal.—Orange grammar school board has asked electors to meet at the Intermediate school on April 4th at 7 p. m., to discuss advisability of holding bond election to provide funds for a new building to replace the present Lemon St. school.

LANCASTER, Los Angeles Co., Cal.—The Lancaster School District defeated the \$70,000 school bond issue on March 18.

PITTSBURG, Contra Costa Co., Cal.—Antioch and Live Oak High School District defeats proposal to issue bonds of \$175,000 to finance erection of new high school; 458 in favor and 326 against the issue.

SAN MATEO, San Mateo Co., Cal.—Special election will be held April 20 in San Mateo School District to vote tax of \$45,000 to finance auditorium addition to Peninsula Ave. School; remodel upstairs room now used for assembly purposes and as Kindergarten classroom in same structure and two-classroom addition to the Homestead school; 1-classroom addition to Lawrence school and purchase of site for Primary school in San Mateo Park. Wm. F. Turnbull, J. J. Casey and E. C. Lydon are trustees of district.

SAN ANDREAS, Calaveras Co., Cal.—Until April 4, bids will be received by county supervisors for purchase of \$125,000 bond issue of Calaveras Union High School District; proceeds of sale to finance erection of a new school.

MARTINEZ, Contra Costa Co., Cal.—Vine Hall School District votes bonds of \$11,000 to finance erection of new school; issue carried by vote of 53 for and 3 against.

LAGUNA BEACH, Orange Co., Cal.—Laguna Beach School District will hold a bond election soon to vote on question of issuing \$124,500 for the erection of a new 8-room elementary school, repairs to the present building, and the purchase of additional property. Fay R. Spangler, architect, Santa Ana.

VENTURA, Cal.—Avenue School District will hold an election on April 9, at which time it is proposed to vote \$55,000 for erecting an addition to the present school.

VACAVILLE, Solano Co., Cal.—Election will be held April 20 in Vacaville Union High School District to vote bonds of \$100,000 to finance school improvements. Issue will be divided into two proposals, one providing \$25,000 for erection of purchase of equipment for gymnasium and another for \$75,000 to finance alterations and additions to present school.

GLEN ELLEN, Sonoma Co., Cal.—Dunbar Union High School District votes bonds of \$39,000 to finance erection of new school building. An architect will be selected shortly to prepare plans.

EARLIMART, Tulare Co., Cal.—Earlilmart School District votes bonds of \$5000 to finance 2-classroom addition to present school.

COMPTON, Los Angeles Co., Cal.—Bonds in the sum of \$100,000 were voted March 25 by Compton school district for additional school facilities. It is planned to erect a four-room building at the Mayo St. site, a four-room building at the Compton site, and a six-room building in the White Way Vista tract.

BERKELEY, Alameda Co., Cal.—Board of Education refuses to consider proposal of Berkeley Public School League for special tax of 25 cents on \$100 assessed valuation to be placed on ballot at election May 3, thus raising approx. \$150,000 for school improvements. The only solution to the school financing question, the board announces, is via a bond issue.

San Francisco Post Office under Act of  
Congress of March 3, 1879.

## J. S. STEEL CORP. TO PRODUCE AT LONG BEACH

The Los Angeles Times announces it has learned that the United States Steel Corporation has completed a deal to take over the site of the Pacific Coast Steel Corporation for a steel plant on the inner channel at Long Beach harbor and will start construction soon.

The iron ore and the lime for the plant will come from the mountains of Southern California and Arizona, and the coal, it is reported, from Utah, where a good cooking grade is available. Formal announcement is expected within the next few days that the United States Steel Corporation has made arrangements with the Union Pacific to provide the coal.

More than three years ago a contract was signed in which the city of Long Beach agreed to dredge certain channels of the harbor to a depth of 2 feet and the company promised to build a steel plant to cost not less than \$5,000,000. Failure of the steel corporation and the Santa Fe Railway to reach an agreement for a branch line from Gallup, N. M., to the San Juan basin coal field was said to have been the chief obstacle in carrying out the contract. This is said to have been overcome now by turning to Utah for coal.

The steel plant site consists of 105 acres of land fronting Long Beach harbor, the remainder of 226 acres originally purchased by the Pacific Coast Steel Corporation syndicate for approximately \$2,000,000.

The harbor construction work which the city of Long Beach agreed to has been completed.

Deposits of hematite in San Bernardino County were tested by the Pacific Coast Steel Corporation.

## 1926 MAGNESITE PRODUCTION

The production of crude magnesite in the United States in 1926 was 133,500 short tons, valued at \$1,200,830, according to statistics compiled by J. M. Hill of the Bureau of Mines, Department of Commerce. Four operators at five mines in four counties in California produced 53,940 tons of crude magnesite, valued at \$604,130; all of them reported only fair business due to foreign competition and lower prices on all products. All of the output in Washington was from the mines of the Northwest Magnesite Company, which operated two of its furnaces at Chewelah, Stevens county, part of the year.

## STATE PLUMBING CODE FOR ILLINOIS IS PROPOSED

A bill providing for a state plumbing code has been introduced in the Illinois Legislature. The proposed code sets forth basic principles which are in substantial accord, states H. F. Ferguson, chief sanitary engineer, Illinois Department of Health, Springfield, Ill., with the Hoover Committee plumbing report. The bill provides that detailed rules and regulations in agreement with the code shall be prepared by the department named. If the bill is enacted the Illinois model plumbing ordinance, adopted in 1919 and revised early in 1927, will probably serve as a guide in framing the rules and regulations just mentioned.

## ELECTRICAL ENGINEERS WILL MEET AT DAVIS

The Sacramento Valley Electrical Society will hold a meeting at the Branch of the College of Agriculture, University of California, at Davis, April 13. This announcement is made by B. D. Moses of the Agricultural Engineering Division, who is in charge of the program for the meeting.

Professor L. E. Reukema of the College of Mechanics, at Berkeley, will be the principal speaker at the meeting, at which the Agricultural Engineering Division will act as host. The members of the society will inspect the new Agricultural Engineering Building, now nearing completion.

A meeting of the California State Committee on the Relation of Agriculture to Electricity is planned at night, following a dinner at the University Inn.

## McMILLAN HEADS RESEARCH BUREAU OF CEMENT ASS'N

F. R. McMillan, manager of the structural and technical bureau of the Portland Cement Association, Chicago, has been appointed director of research to have charge of all investigations in cement and concrete for the association, succeeding Prof. Duff A. Adams, resigned to take up private practice. Mr. McMillan has been a member of the headquarters and laboratory staffs at Chicago since 1924.

## CARNEGIE INSTITUTE ANNOUNCES COURSES IN ARCHITECTURE

Courses in architecture, it is announced, are featured in the plans for the summer session this year at the Carnegie Institute of Technology in Pittsburgh. Under the plans for the coming summer, the Department of Agriculture of the College of Fine Arts will give intensive six weeks' courses from June 13 to July 23 to meet the needs of students who desire to continue their work in architecture in the vacation, whether to make up credit, obtain advanced credit, or to prepare themselves better for entrance.

Among the subjects to be offered are architectural design, outdoor sketching, descriptive geometry, shades and shadows, perspective and mathematics.

Six and eight weeks are announced also in chemistry, physics, mathematics, mechanics, English, economics, commercial law, history, drawing, surveying, psychology and education, charcoal and pastel drawing, water color and oil painting, design, sketching, methods, history of arts, and various shops. Courses of six weeks will be given to teachers and supervisors of public school music, fine and applied arts, and manual and industrial arts.

## NEW SUITS CONTEMPLATED ON PAINT SPRAY MACHINE

Blake F. Hopkins, former painting contractor and now president of a \$1,000,000 manufacturing company, has learned for a fact that the first million is the hardest.

It took him seven years of litigation, after having invented a paint-spraying machine a few years before that, to beat the Standard Oil Company and Henry Ford in \$1,000,000 infringement suits.

As president of the Hopkins Spray Equipment Company, he has left San Francisco for New York to institute similar suits against six other fabulously rich defendants, and for damages mounting in "several millions."

Hopkins' trip east follows organization of his company and the recent purchase of the Decora Manufacturing Company of Richmond, Cal., which has been engaged for some years in making paint spraying equipment.

In addition to filing the new suits, Hopkins announced yesterday, he expects to complete plans for the establishment of a factory in Chicago and another on the Atlantic coast. The Richmond plant will supply his company's needs in the west, he said.

## ARCHITECT SUES FOR FEE

Charles Muhs, Monterey architectural engineer, has commenced suit at Salinas against A. C. Hinkle, prominent resident of the Old Capital, for the recovery of sums totalling \$2140. Of the total, \$870 is alleged a balance due for services rendered in connection with the erection by Hinkle of a new hotel building last year. The balance, \$1270, is claimed due under a contract to superintend the construction of another building. The complaint says the contract was entered into August 28, 1926, and that Hinkle discharged Muhs on October 26 following.

## Bonding Provision Eliminated In Proposed State License Law

Proposed licensing of contractors and other pending legislation occupied the attention of the Construction Industries Council of Southern California and the Public Works Section, known as the Construction Industries Joint Committee, at the Alexandria Hotel, Los Angeles, March 23. A final revised draft of Assembly Bill No. 1050 by Mr. Kelsey, licensing contractors, was considered. This eliminates the bonding provision in the original bill which aroused much opposition, classifies contractors to simplify the matter of determining their qualifications and states more specifically the causes for which a license may be revoked. It applies to all building and engineering contractors and sub-contractors. A board is provided to administer the proposed law instead of creating a new state department.

Definite action was not taken by the council in view of the fact that the revised bill had not yet been submitted to the member organizations, but the consensus of opinion was that it was much more acceptable than the original bill. An expression from the member organizations will be obtained at once as the revised bill will come up before the assembly committee for disposition March 31. Senate Bill 758 by Mr. Weller, also a licensing measure, will not be combined with Assembly Bill 1050 as previously suggested, but an effort will be made by its advocates to secure the enactment of the clause which it contains providing for the filing of notices of intention to build.

Attorney C. C. Carleton, representative of the Construction Industries Joint Committee at Sacramento, described the reaction, as he viewed it, to the proposed licensing of contractors, and pointed out that there appeared to be a very general demand from various business groups for self-regulation. He also indicated the present status of other legislative measures affecting the construction industry. Guests of the council included Attorney J. W. Morin of Pasadena, author of S. B. 758; Sam Humphreys, representing the Oakland Builders Exchange which sponsored A. B. 1050, and Earle G. Lloyd, secretary-manager of Northern California Chapter, A. G. C.

A resolution was adopted by the Council urging that jurisdiction of elevators and steam boilers be vested in the commission of safety and buildings as intended by the framers of the present city charter.

The Council now consists of 17 member organizations, the applications of the Arbitration Society, Plumbing Supply Dealers and the Portland Cement Association being accepted at the meeting.

Following is a synopsis of the final revised draft of Assembly Bill 1050 providing for the licensing contractors:

Sec. 1. Makes it unlawful for anyone to engage in the work of contracting without first having secured a license as provided in the law.

Sec. 2. Defines contractors as any person, firm, copartnership, association or corporation or any combination of either, who for a fixed sum, price, fee or percentage or other compensation other than wages undertakes with another to do construction work of any kind including the installation of materials.

Sec. 3. Creates a state license board of three members, appointed by the

governor. One member must be a qualified building contractor of five years experience in the business, one must be a highway builder of five years experience, and the other a contractor of public utilities with five years experience. All must continue in their respective lines during their terms of office. Terms of office of the first board expire at the ends of the calendar years 1927, 1928 and 1929. New appointments for terms of three years.

Sec. 4. Board must organize within fifteen days after appointment, elect a chairman, and adopt by-laws and regulations.

Sec. 5. Headquarters office shall be Sacramento, with the right to establish branch offices in San Francisco and Los Angeles. Shall employ an executive secretary together with such other deputies and assistants as may be necessary and fix their compensation. Board must meet not less than four times each year, with such special meetings as may be necessary.

Sec. 6. Each member of the board shall be paid \$15 per day for his compensation, limited to \$150 per month and a maximum of \$1500 per member per year, together with necessary traveling expenses.

Sec. 7. Board shall have the power to regulate and control the issuance, suspension and revocation of licenses subject to the provisions of the act. March 1 and August 1 shall publish directory of licensed contractors for public information.

Sec. 8. For the purpose of the act contractors are classified as follows:

"Class A. Contractors engaged in the construction, improvement, alteration or repair of frame buildings.

"Class B. Contractors engaged in the construction, improvement, alteration or repair of buildings other than frame buildings.

"Class C. Contractors engaged in the construction, improvement, alteration or repair of public utilities within the meaning of the public utilities act.

"Class D. Contractors engaged in the construction, improvement, alteration or repair of streets, highways, roads and bridges.

"Class E. Contractors engaged in the installation or application of materials or the furnishing of appliances, teams, power or labor incidental to the work of any one or more of the foregoing groups, and not involving the technical knowledge or skill required for accomplishing the result of the general contract included in any one or more of said groups.

"The Board shall have power under this act to make such further classifications as it may deem advisable for the issuance of licenses hereunder and may also further classify the licenses issued under each class."

Sec. 9. Application for license must be in writing and be accompanied by the recommendation of two real property owners resident in the applicant's county. Annual fee shall be \$25, divided quarterly. Application shall state the class or classes of contracting in which a license is desired and "shall show therein that the applicant has a fair knowledge of the principles and practice of estimating jobs, the preparation and understanding of blueprints, plans and specifications and the rudiments of building contracts and the obligations between principal and agent so far as applicable to the requirements of the particular class of contracting for which a license is requested." A bona fide contractor in business on Jan. 1, 1927, will automatically be entitled to license without examination by merely filing affidavit to that effect.

Sec. 10. Lapsed licenses may be renewed by the board, which may at its discretion require a new application.

Sec. 11. Fees collected under the act set aside in special fund in state treasury to pay expenses of administration of the act. After retaining 10 per cent for emergency purposes any balance on Dec. 31 of each year shall be paid into the general fund of the state.

Sec. 12. Provides for the proper bonding of employees, submitting of annual reports, etc. Must also file directory of contractors with each county clerk.

Sec. 13. Shall adopt a seal and form of printed certificate.

Sec. 14. Attorney general shall be the legal advisor of the board.

Sec. 15. License must be prominently displayed and each licensee must have a definite headquarters.

Sec. 16. Board shall have the power to revoke licenses for any of the following reasons:

"1. Any substantial fraud, misrepresentation or deceit in obtaining a license under the act.

"2. The improper diversion of funds from the prosecution and completion of the particular contract with the intent to defraud or deceive creditors, or the owner, which funds are received for the performance of the contract.

"3. Gross negligence, incompetency or misconduct in the practice of his profession, or in the conduct of any contract.

"4. The failure to pay any legitimate indebtedness incurred for labor or material, or otherwise in connection with the performance of a contract."

Sec. 17. Before denying, suspending or revoking any license the board must notify the applicant or holder of the charges and afford him a chance to be heard. Decision of the board shall be subject to review by the superior court of the state in accordance with the code of civil procedure.

Sec. 18. Provides that hearings shall be held in the proper court in the county of the applicant, sets up witness fees, modes of procedure, etc.

Sec. 19. Board given the right to prefer a complaint in any court of competent jurisdiction for violations of the act.

Sec. 20. Penalty for violation of the law by acting as a contractor within the meaning of the act without license is \$500 fine, or six months imprisonment, or both, and applies with like effect to the officers and directors of a corporation or other firm.

Sec. 21. Exempts owners of property who proceed with their own work.

Sec. 22. Exempts public bodies, such as state, counties, cities and municipal corporations.

Sec. 23. Gives the board the right to establish reciprocity relations with other states and countries having a like law in effect and which accord similar provisions to contractors licensed under this act.

Sec. 24. Makes it mandatory on all architects and engineers in calling for bids to include in specifications due notice that bids can be received only from licensed contractors.

Sec. 25. Constitutionality clause.

### CONSTRUCTION SHOWS LOSS

The value of contracts awarded in 37 states for the first seven weeks of this year amounts to \$657,749,800 as compared with \$723,393,500 for the same period last year, according to the F. W. Dodge Corporation. This is a decrease of approximately \$66,000,000 or 10%. However, February showed an increase as compared with January of this year and will serve to set at rest any idea that the construction industry is going to be confronted with a serious depression in 1927.

# \$17,500 Offered For Papers On Development Of Arc Welding

The American Society of Mechanical Engineers has accepted the custody of \$17,500 offered by the Lincoln Electric Company of Cleveland, Ohio, to be awarded, under the rules of the competition, to those contributing the best three papers disclosing new information that will tend to advance the art of arc welding.

The purpose of the competition is to encourage improvements in the art of arc welding, the pointing out of new and wider applications of the process, and indicating advantages and economies to be gained by its use, as these latter will be the chief bases upon which the winning papers will be selected.

The first prize award will be for \$10,000, the second of \$5000 and the third for \$2500.

## Rules of Competition

1. Anyone, in any country of the world, may compete for these prizes.

2. All papers must be written in duplicate, in the English language, and submitted to the Council of The American Society of Mechanical Engineers, addressed to the Secretary, Calvin W. Rice, 29 West 39th Street, New York, N. Y. All exhibits shall also be in duplicate, and captions, titles, legends and notes shall also be in the English language. All papers must bear evidence of having been sent before January first, Nineteen Hundred Twenty-eight (1928) in order to be considered in this competition. Any paper arriving after January thirty-first, Nineteen Hundred Twenty-eight, will be disqualified.

3. Every paper should include all necessary drawings, photographs, or other exhibits, in order that the disclosure may completely present the suggestions of the competitor.

(a) The utility of the suggestions must be shown not only for the application but also for possible use in connection with other designs and for their purposes.

(b) The possible advantages and economies of the methods suggested should be made clear, as these will be the chief bases upon which the winning papers will be selected.

4. The practicability of the suggestions must be evident from the paper. It is not necessary, however, at its actual application be fully shown, if possible uses are made clear.

5. Originality of design is preferable, either in the method of applying the weld or in the design of the welded parts for their arrangement. Designs which are of no practical use will not be considered in case they include suggestions which could self-evidently be applied in other ways than those suggested. Methods of applying the arc or the welding art which will improve existing machines, or make commercially possible machines which, in the light of previous engineering, have been regarded as impractical, are especially desired.

6. It is not necessary that all parts of the structure should be made of welded metal. It is only necessary that one or more parts be so made.

7. In case two or more identical suggestions are received, the one bearing

the lowest serial number assigned to the paper on its receipt by the Secretary of The American Society of Mechanical Engineers will have precedence. Because of this rule, competitors are urged to submit their papers as soon as they are prepared.

8. The Council of The American Society of Mechanical Engineers may withhold any or all awards.

9. Each paper must be typewritten on one side of 8½" x 11" paper and bound at the top with a protecting cover or jacket. The name and address of the competitor must appear on the front cover. Both copies of each paper must be enclosed within a sealed envelope, on the outside of which will be placed the name and address of the competitor and the following legend: "Submitted to The American Society of Mechanical Engineers, 29 West 39th Street, New York N. Y., in competition for the Lincoln Arc Welding Prize." This sealed envelope must be enclosed within a mailing wrapper. The receipt of each paper will be acknowledged.

10. The Committee of Judges will not pass upon the acceptability of any apparatus suggested as a proper subject for this competition.

11. In submitting papers, each competitor gives to The American Society of Mechanical Engineers the right to publish his paper, should the Society desire to do so in any of its several publications. No paper will be returned to any competitor.

12. The decision of the Committee of Judges in interpreting the foregoing Rules will be final.

## Time of Award

It is the purpose of The American Society of Mechanical Engineers to present these awards at the stated 1928 Spring Meeting of the Society. All competitors will be properly notified of the action of the judges.

For further information regarding the competition address, American Society of Mechanical Engineers, Calvin W. Rice, Secretary, 29 West 39th St., New York, N. Y.

## LOOSE CEMENT SHIPPED VIA MOTOR TRUCK TO JOB

An innovation of great significance to the cement and building industry is a method of shipping cement in loose bulk instead of in the customary bags, which has recently been adopted and approved by the Peerless Portland Cement Company, according to the March issue of the Autocar Messenger. Although long recognizing the probable economy of such a method in some instances, the industry had not worked out a practical way of shipping the cement loose and yet keeping it protected from the air. Further, it was supposed that any attempt to dump it from a covered truck body would require an 80-degree elevation and possibly a slice-bar as well. The successful new way uses a special truck body mounted on a 5-ton, 120-inch wheel-base chassis. The body is covered and has two manholes in the top for filling. These are protected by water-tight covers. The truck is emptied through a water-proof canvas chute at the rear. The cement flows out freely at a 20 to 25-degree elevation.

## MONEY TALKS! ARCHITECT MOHR RENEWES CHALLENGE

Renewing his open challenge to any architect who can show priority in the "setback" type of architecture now favored in San Francisco and other cities of the United States, Norman W. Mohr, former San Francisco city architect, offers to place a substantial bet, amount to be determined, on his claim.

New York architects have recently claimed the honors of the "setback" type of architecture for the East. History of this type, they claim, dates back ten years.

Mohr has copyrighted drawings dated 1911, in which the whole proposed plan for the Panama Pacific International Exposition is laid out in "setback" type. San Francisco publications printed these and other drawings of the same type in 1912 and 1914, Mohr states.

"I do not claim that I was the originator of this type of building," Mohr explained, "for it was used in Egyptian, Aztec and Chinese architecture centuries ago. But I do claim to be the first to apply the 'setback' idea to modern buildings, and, as claimant to this honor, I challenge the world."

## CLEVELAND TRADES WORKING WITHOUT AGREEMENTS

The seven major building trades in Cleveland, whose agreements expired on March 1, 1927, are continuing to work. The arbitration committees in these trades are meeting and the employers are hopeful that, in at least three, agreements will be completed within the very near future. In the lathing and plastering trades a three-year agreement was entered into prior to March 1, which provides for an arbitration plan in which provision is made for a board of umpires with the probate judge naming the third member of the board in case of deadlock. The arbitration plan proposed by the employers and the one which they insist must be incorporated in each agreement signed in Cleveland this year, is similar to the one recently adopted in Chicago by the carpenters and which reads as follows: "An umpire shall be selected who is in no wise affiliated with this trade or who is occupying an elective public office and his decision shall be final and binding upon all parties to this agreement."

## BELGIUM STEEL PLANTS FORM CONSORTIUM

Formation of a consortium of four Luxemburg, Belgium, steel plants in order to protect their rights in the international understandings relative to the production of pig iron, steel and rails, and also to take any action necessary to the successful exploitation of the plants involved is reported to the United States Department of Commerce by its representative at Brussels.

## BANKRUPT

Fischer Brothers, a corpartnership of Stockton ditch contractors, Adolph and Henry Fischer being the partners, have a petition in bankruptcy in the United States District Court at Sacramento. They list liabilities of \$18,075 and assets of \$1,500. Henry Fischer, in a separate petition, named himself as having liabilities of \$18,225 with assets of only \$200.

# THE OBSERVER

## WHAT HE HEARS AND SEES ON HIS ROUNDS

Under a decision just handed down by the State Supreme Court, Rodney Messner, county surveyor of Marin County, is without a salary. Under the ruling, Section 4044, of the Political Code, which provides that the salary of county surveyors, not to exceed \$10 a day, shall be fixed by the supervisors of the county, is declared unconstitutional. This means that the salary of the county surveyor can be fixed only by the state legislature, and must be included in the county government bill. In order to include the salary of the Marin county official in the bill, now pending before the legislature, the bill must be amended. A special meeting of the grand jury has been called at which time a recommendation will be adopted, fixing the salary, which will be forwarded at once to Sacramento. In the meantime, Messner will receive no pay until the county government act becomes effective, next August.

Officials of Marion County Building Trades Council, which includes Indianapolis, have notified the employers that when the present agreements expire on April 1st and May 1st this year, that among the demands which will be made will be one for the five-day week and an increase in wage rates, which, if granted, would bring workers the same weekly income as before. The painters, sheet metal workers and bricklayers signed a two year agreement last year which still has another year to run. The agreements of the plumbers and carpenters expire on May 1st and agreements with all the other trades with the exception of the painters, sheet metal workers and bricklayers expire on April 1st.

Tariff protection against foreign cement is desired by the New England Builders' Supply Association, whose president, Alfred I. Mergold, asked Governor Fuller and Mayor Nichols of Boston, Mass., for their intercession to obtain tariff protection to promote the use of American cement. The resolutions presented state that the cement industry buys annually \$63,000,000 worth of material for the manufacturing processes. The resolution adds: "Of this by far the largest part goes to New England. Without tariff protection, the industry is competing against foreign production where the labor cost is one-fifth its own."

No definite action was taken by the newly organized General Contractors' Association of Reno, Nevada, with regard to proposed changes in the wage scale in the various crafts. A joint meeting of general contractors and sub-contractors was held in Reno several days ago but no details were made public following the meeting. According to reports, a wage increase amounting to \$1.60 a day will be sought by the carpenters on April 4 and an increase of \$1 a day by the plumbers under a new agreement effective June 1. Bricklayers and plasterers will also seek increases, it is reported. Painters and electricians will not seek increases, it is definitely stated.

Lange & Bergstrom, Inc., Los Angeles, bidding \$1,068,045 submitted the lowest bid to the Los Angeles Department of Public Works to construct the main structure of the Glendale-Hyperion Viaduct across the Los Angeles river. The Lynch-Cannon Engineering Co., Los Angeles, bidding \$1,098,500 and Thos. Kelly & Sons, bidding \$1,187,184 were the next two low bidders.

Assembly Bill No. 829 has been passed and provides for issuance of permits for public garages to be located in apartment houses with proper fire protection and makes other minor changes in the State Housing Act.

Earl C. Morris of Denver, has been awarded 1927 Le Brun traveling scholarship, a major award in United States architecture, it was announced by the New York Chapter, American Institute of Architects. The scholarship valued at \$1400, was founded in 1910 by Pierre L. LeBrun, architect of the Metropolitan tower, in memory of his brother. It provides for six months' study abroad. First mention was given W. Ray Vinegar of Detroit.

Recommendation has been made by the Sacramento Chamber of Commerce that Sacramento labor be employed in building the new municipal stadium, that construction materials be obtained from Sacramento dealers and that contracts be let to Sacramento contractors.

Berkeley Board of Education has declined to consider the proposal of Berkeley Public School League for a special tax of 25 cents on \$100 assessed valuation to be placed on the ballot at the May 3 election to raise approximately \$150,000 for school improvements. The educational body declares the only feasible solution to the school problem is via a bond issue.

Thos. R. Murphy, San Francisco fire chief, will revive his demand made last July, and many times subsequently, that some action be taken by the Board of Supervisors to extend the fireproof roofing districts of the city to include the newer residential sections.

City Commissioner Frank Colbourn of Oakland has adopted a new rule providing that sheeting boards for roofs must be inspected before the roofs are put on, according to an announcement of A. H. Holmes, city building inspector.

Following a charge that the builders had violated their contract with the city by employing men not residents of San Francisco, City Auditor Thomas F. Boyle, is holding up payment of \$10,040.48 to Anderson & Ringrose, contractors. Payment of the carpenters was protested by the Bay Counties Council of Carpenters. The protest was referred to City Attorney J. J. O'Toole. The money was due the contractors for construction work on the Hearst Moulder School, at Page and Webster streets.

The San Francisco Board of Public Works will ask for sufficient funds in the next budget to increase the pay of city asphalt workers 50 cents a day.

Preparations for the annual convention of the National Retail Lumbermen's Association to be held in Tacoma, Wash., next August are under way.

The City of Berkeley will postpone the erection of the proposed new library building and reduce expenditures by the library board to provide for the construction of storm sewers to cost \$450,000 if the recommendation of City Manager John N. Edy is adopted. Edy declares that an additional special tax will also be necessary.

## TRADE NOTES

Installation of machinery is now under way at the new factory of the Merco Nordstrom Valve Company at Oakland. The plant, located at 24th and Peralta streets, occupies 30,000 square feet and will be devoted exclusively to the manufacture of plug cock type valves. Heretofore the manufacturing of these valves has been carried out on the Atlantic Coast but growing demands for the product necessitated the establishment of a Western factory. Merco Nordstrom Valve Company is a subsidiary of The Merrill Company, Engineers. The valve is the invention of Sven Johan Nordstrom, a mining engineer who introduced it in the mining industry about ten years ago. The valve is now used widely in practically every industry, but more particularly in petroleum, gas, chemical and mining fields.

Salinas Hardware Co., operated by J. H. Herring of Fresno and E. T. Ford of Orosi, Tulare county, will open quarters at 352 South Main St., Salinas within the next ten days.

Schumacher Wall Board Corp., announces removal to new and large quarters at 1007 Financial Center Building, California and Montgomery Sts., San Francisco.

Operations will be resumed at the Atlas Rock Company's plant, west of Oakland, about April 10, according to Fred Beerman, manager for the company. The plant was recently shut down to permit installation of new equipment and the overhauling of equipment already installed.

E. A. Watson, operating the Watson Electric Co., in Mill Valley, announces that Foster Petrie has become a partner in the business.

G. C. McCann has taken over the business of McCann & Helm, cabinet makers, 3901 East Fourteenth St. Oakland, and will specialize in the manufacture of tables and chairs.

John W. Williams will operate from 527 Laguna street, San Francisco, under the trade name of Security Roofing Company.

Meadowcroft Construction Co. of San Francisco, capitalized for \$10,000 has been incorporated. Headquarters are maintained at 1256 Second Avenue. Directors are: F. E. Meadowcroft, J. A. Himmel and May E. Himmel.

## Mortgage Bankers' Association Defends R. E. Bond Mortgage

Frank Dixon, operating in the painting and decorating business in Sacramento for the past twenty years, has taken over the business of John G. Exley, Inc., at 1740 Howard Street, San Francisco, and will operate a general painting and decorating business under the name of Frank Dixon Painting Company. Mr. Dixon is a past president of the Master Painters' Association of California and comes from Sacramento with a desire to enter a larger field.

Henry M. Robinson, president of the First National Bank of Los Angeles, has been elected a director of the General Electric Company. This is the first time that the General Electric has come to the Pacific Coast for a member of its board.

Victory Flush Valve Company, of San Francisco, capitalized for \$1,000,000, has been incorporated. Directors are: L. H. Moise, S. Peis and Elsie M. McClure.

The Monolith Portland Cement Company of Los Angeles announces its entry into the midwest manufacture of cement with the organization of the Monolith Portland Cement Midwest Company. The company will operate holdings near Laramie, Wyo., where a cement plant will be erected at once.

### ALONG the LINE

J. W. Reagan, Los Angeles County Chief Flood Control Engineer, has resigned upon request of the Board of Supervisors. The resignation was requested "for the purpose of reorganization," according to Supervisor S. T. Graves in charge of flood control work.

Following the action of the San Francisco Board of Supervisors in confirming the appointment of three engineers to study and report on the San Francisco Bay bridge problem, the Board of Public Works has notified two Eastern engineers to be in San Francisco April 5 to start the survey. Robert Ridgway of New York and Arthur Newell Talbot of the University of Illinois are the two Eastern Engineers. John D. Galloway, San Francisco structural engineer, will be the third member of the party.

Stephen B. Overhiser, traveling salesman for Higginbotham Brothers of Stockton, hardware dealers, died at his home in Sacramento, March 28.

George R. Winslow, former maintenance engineer for the California State Highway Commission, has filed in the superior court at Sacramento a petition for a writ of mandamus which may test the powers of the department heads to discharge civil service employees. Ralph Bull and J. P. Baumgartner, highway commissioners, are named as defendants. R. M. Morton, state highway engineer, is also a defendant.

City Commissioner Ralph Conley proposes to submit an ordinance to the Sacramento city commissioners seeking to reduce the salary of the city manager from \$15,000 to \$10,000 a year.

Receivership of the G. L. Miller Co., a large mortgage bond organization, and the consequent reaction against this type of security, has caused the Mortgage Bankers' Association to rally to the defense of the real estate mortgage bond. Its board of governors has passed a ruling that hereafter it will decline to accept for membership unless firms subscribe to a rule of practice that whenever a loan is made for construction purposes, the fund for such purpose arising from the sale of bonds to the public shall be segregated and kept apart as a separate entity from the funds derived from the sale of bonds for other issues and deposited with a bank or trust company to be used only upon the enterprise for which such bonds are sold. Moreover such trust companies shall have capital and surplus commensurate with amount of such deposit.

In other words the Mortgage Bankers' Assn., which ranks among the dealers of real estate mortgages as high as does the Investment Bankers' Association among the bond men, will see that there is no juggling of the money of investors. If bonds are sold before a building is completed, such moneys collected must be set apart so that the building will be completed from these funds. In some cases the diversion of these bond moneys to other channels prevented the completion of the apartment or hotel or whatever else was being built. The investor was then left out on a limb.

At the Chicago meeting of the mortgage bond men, they rose to the defense of the real estate mortgage bond. The President of the Mortgage Bankers' Association at this meeting declared:

For thousand of years people have borrowed money, pledging as security therefor their lands and dwellings. The "mortgage" is undoubtedly the world's oldest financial device. It has come to be considered as the one most safe and conservative investment for those of small means who are not in position to assume the risks of speculation.

The mortgage business has long been recognized as a reliable branch of financial commerce. The mortgage banker unquestionably has played a major part in inducing the large investors to lend their funds on farms, residences and business property.

No agency, not even the Joint Stock Land banks or Federal Land banks, has provided more funds and given greater assistance to our American citizen in owning their homes, farm and city, than the members of the Mortgage Bankers' Association of America.

A great part of the \$2,000,000,000 farm mortgage and \$3,000,000,000 residence and business loans now held by American insurance companies has been loaned through our members.

Now it happens that in the last few years a very important factor in real estate financing has come into existence known as the real estate first mortgage bond. The bond is merely a device to split up a mortgage so it can be distributed among many people. Conservatively issued, real estate bonds are in no sense speculative, but have investment security with a very high factor of safety.

Without the real estate bond it would be difficult to finance many many of our largest and most needed buildings. In 1926 a large Eastern bond house,

not a member of our association, failed for about \$50,000,000. This was only a drop in the bucket compared with thousands of mortgage and bond firms that continued solvent and handled millions of dollars daily without loss to anyone.

But the man in the street, startled by the well-merited publicity attendant upon this sensational failure, began at once to assume that the first mortgage investment was open to suspicion after enjoying centuries of good repute.

How much actual harm this failure has caused among banks and mortgage companies is debatable. Some feel that the example to the public, painful as it was, improved conditions for the responsible companies. Certain it is, however, that every danger signal in any business must be closely heeded.

So the Mortgage Bankers' Association has studied very carefully the general situation in the real estate bond field—not only with the interests of the members at heart, but also with a view to the welfare of investors large and small who look to us for guidance and on whose good will and confidence our success depends.

The public looks upon our association as having within it financial houses of acknowledged responsibility, reducing first mortgages on real estate (farm or city) and selling these securities in such a manner that the investor comes into possession of a first lien on real property as soon as he writes out his check.

In the case of city property, if the building is already constructed and being used, it is plain to see that the investor has bought something very definite. If, however, the building is only in process of construction he will wisely inquire if his money is to be placed in trust with a separate, disinterested, corporate trustee and be paid out only on the enterprise for which bonds have been sold. Unless this precaution is taken, it is self-evident that until a building is completed the security behind a real estate bond is not the building, but the credit of the bond house.

If a real estate bond house switches an investor's fund from one building project to another at will no harmful result can be expected as long as the bond house remains solvent; but once difficulties are encountered the investor is apt to find that years of litigation are necessary before he can get back any part of his principal.

The advantages of separate trusteeship thus becomes evident. The investor's funds, if deposited at once with a bank or trust company and reserved for a particular building project, are safely removed from the vicissitudes which may be attendant upon the bond house's other building projects.

Much of the comment following the failure of the large Eastern house has been along the lines of trusteeship. As stated in the resolution our association has always looked with disfavor upon the practice followed by some companies of not depositing investors' funds with disinterested corporate trustees, where a building is still under construction.

Before the Mortgage Bankers' Association of America would be called upon to give an account of itself and in order that the public might know our position, we have seen fit to announce our membership policy as stated in the resolution.

It is hopeless to expect that any non-governmental body such as our can dictate business practices to individual firms—especially if they are outside our association.

But we can and do exercise the right to select our members judiciously; and in so doing we thus offer the investing public a certain standard of measurement which would not otherwise be available.

# ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

## 35,588 New Mechanics Needed Annually In Building Industry

Through death of their members, prohibition of apprentices, restrictions on taking in new members and the withdrawal of members to enter other than the building trades, it is estimated that there has been a reduction in the total number of mechanics in building trades of more than 25 per cent during the last five or six years, says the Builder Economist. Today it is estimated that at least 35,000 new skilled mechanics are needed annually in the United States to replace those who die or retire. The loss in the ranks of building labor is even greater than in the skilled trades because restrictions on immigration have curtailed the supply from Europe. The chart below shows the number of new men needed annually in the United States in each of the skilled trades to replace those who die or retire:

Artisans	Death	Retirement	Total
Carpenters .....	15,437	4,253	19,695
Painters, glaziers .....	4,024	943	4,967
Brick and stone masons .....	2,310	656	2,966
Plumbers, gas and steam fitters .....	2,377	165	2,542
Electricians .....	1,980	85	2,065
Tinsmiths and sheet metal workers ..	969	188	1,157
Plasterers .....	634	164	798
Stone cutters .....	362	79	441
Paper hangers .....	297	62	359
Structural iron workers .....	212	9	221
Roofers and slaters .....	159	27	186
Cement finishers .....	106	11	117
Coppersmiths .....	65	9	74
Totals .....	28,932	6,656	35,588

### STATE BUILDING LOAN LEAGUE TO CONVEIN IN S. F.

The annual convention of the Building Loan League of California will be held in San Francisco, May 26 to 28 inclusive. Thousands of delegates from every section of the state will attend the meet. Headquarters will be maintained at the Palace Hotel.

Arthur T. Ehrenpfort, San Francisco architect and vice-president of the Alameda County Loan Association, is taking an active part in the arrangement of a program for the visiting delegates.

In California, according to Mr. Ehrenpfort, there are about two hundred associations with combined assets of over \$200,000,000. The love of home and the desire to own a home, an instinct as old as the race, is one of the most important assets of building and loan associations, Ehrenpfort declares.

### S. F. BUILDERS' EXCHANGE ELECTS DIRECTORS

Wm. H. George was re-elected president of the San Francisco Builders' Exchange at the annual meeting of that organization, March 25. Other officers elected to serve for the ensuing year are: Emil Hogberg, first vice-president; D. J. Sullivan, second vice-president; Jas. H. Pinkerton, third vice-president; R. J. H. Forbes, secretary; Alexander Mennie, treasurer.

### PLAN HOUSE WARMING

Hayward Builders' Exchange (Alameda County) will hold a "house-warming" in the exchange quarters recently opened in the Oakes' Block, Hayward, on April 13, according to E. P. Whitman, secretary of the organization. The exchange, only recently organized, has a membership of thirty, comprising general contractors and material dealers.

### LABOR OUTLOOK BETTER THIS YEAR THAN LAST

Generally speaking the labor outlook this spring is much better than at this time last year. A year ago there was considerable uncertainty as to what the trades would demand and in a number of cities strikes were called on March 1st to force increases in wage rates. Taking the country as a whole, there will be but few wage increases and a minimum of strikes. The five-day week issue apparently is not going to be pressed this year largely on account of the fact that the employers and the public are united in the belief that there is no justification in decreasing the number of hours now being worked by men in the building trades. Practically every city reports a surplus of labor in all of the crafts and with less demand for building this year than there was last it is apparent that there will be some idle labor throughout the country all year. Taking all of these points into consideration it appears at this time that the industry will be entirely free from any serious tie ups this year and that labor will be willing to go along under wage rates and conditions in effect in 1926.—(Bulletin—Nat'l. Ass'n Bldg. Trades Employers).

### MACDONALD RE-ELECTED HEAD OF BUILDING TRADES

Frank C. MacDonald of San Francisco was re-elected president of the State Building Trades' Council at the recent convention in Santa Barbara.

A. G. Gilson, general secretary-treasurer of the council for the past seventeen years, tendered his resignation. He gave as his reasons the failure of the organization to concur in his oft-repeated recommendation that a huge defense and relief fund be raised and also the advisability of getting into private work and providing a compensation for old age.

### OPPOSE FIVE-DAY WEEK

Among the resolutions adopted at the recent annual convention in Washington, D. C., of the National Association of Builders Exchanges, was one opposing the five-day week in the construction industry. In the discussion of factors in building costs it was generally agreed that the time is not far distant when the cost of labor must be stabilized on lower levels than at present. The consensus of opinion at the convention was that wage increases ought to be resisted this year and every possible effort made to oppose the five-day week or any other reduction in the working hours in effect at present.

### BUILDING BUREAU RESEARCH PLAN OF MILLWORK INSTITUTE

Stressed necessity for a more closely knit organization and an industrial research department as a means of improving the building industry in the state featured the closing sessions of the Millwork Institute of California at Hotel Senator, Sacramento.

Two committees were appointed to report at the next gathering, to be held at Long Beach in July. The work of one committee will be to arrange a plan for bringing the entire state up to a single standard in the millwork industry, and is composed of Fred Spencer, San Francisco, chairman; Bert Maul, Los Angeles; Bill Goddard, Oakland; Arthur Bernhauer of Fresno, and Tom Gardner, Stockton.

A standard of quality will be sought by the other committee, which plans to give ratings to member firms according to their class of product. The committee members are Bill Glasson, San Diego, chairman; Harry Gaetjen, San Francisco, and C. G. Chipchase, Sacramento.

### QUARTERLY MEETINGS SET BY FRESNO BUILDERS' EXCHANGE

General meetings of the members of the Fresno Builders' Exchange will be held every four months, with the first scheduled for next May, directors of the organization announce. The meetings will include entertainment and a smoker, according to Secretary-Manager H. L. Hardman.

The election of exchange officers will be held April 6. The directors have elected Henry Hawson, Fresno attorney and vice-president of the Fresno County Chamber of Commerce, to honorary membership in the exchange.

### LUMBERMEN HONOR CHIEF

More than seventy lumbermen, including out-of-town members of the lumber fraternity, were present at the dinner given by the Hoo Hoo Club of Fresno at the California Hotel, that city, March 23, in honor of Arthur A. Hood, snark of the universe of the Concatenated Order of Hoo Hoo. Hood was the principal speaker, his address covering activities of the order in general. Entertainment included songs by Miss Peggy Connolly and selections by Claire Du Bois' High Hatters Orchestra. F. Dean Prescott, president of the San Joaquin Valley Lumbermen's Association, presided.

## APARTMENTS

**Preliminary Plans Being Prepared**  
**APARTMENT BLDG.** Cost, \$100,000  
 SAN FRANCISCO, N. W. Broderick and Pacific. Seven-story and basement Class A (7) apartments.  
 Owner—Mrs. Alexander Lilley, 251 Kearny St.  
 Architect—Bakewell & Brown, 251 Kearny St.  
 Permit has been applied for.

**Plans Being Completed**  
**APARTMENTS** Cost, \$300,000  
 SAN FRANCISCO, Richmond District. Six-story reinforced concrete apt. bldg. (46 apartments).  
 Owner—Withheld.  
 Architect—D. M. Crooks, 532 16th St., Oakland.

**Ready for Figures in Three Weeks**  
**APARTMENTS** Cost, \$600,000  
 SAN FRANCISCO, N W Union and Leavenworth Sts. Fourteen-story and basement Class A steel and concrete apartment building (22 apartments).  
 Owner—La Mirada Corp., care of W. P. Chipman, 625 Market St.  
 Architects—Reid Bros., 105 Montgomery St.

**APARTMENTS** \$1,000,000 or more  
 SAN FRANCISCO, S W Jones and California Sts. Fifteen-story Class A apartment house, 100 two to five-room apartments.  
 Owner—Jones-California, Inc.  
 Architect—Weeks & Day, 315 Montgomery St., San Francisco.  
 Contractor—Cahill Bros., 55 New Montgomery St., San Francisco.  
**Composition Sleepers**—Kellastone Corporation.  
**Finish Hardware**—Baker-Hamilton & Pacific Co., 700 7th St., San Francisco.

Other contracts awarded were published in the issue of Feb. 16, 1927.

**Working Drawings to be Prepared**  
**APARTMENTS** Cost, \$400,000  
 SAN FRANCISCO, Vallejo St., between Octavia and Laguna. Twelve-story Class A reinforced concrete apartment building (12 apartments).  
 Owner—Dr. Percival Dolman, 490 Post Street.  
 Architect—C. A. Muesdorffer, Humboldt Bank Bldg.

**Plans Complete.**  
**APARTMENTS** Cost, \$40,000  
 SAN FRANCISCO, S E Octavia & Linden Sts.  
 Three-story and basement frame apts.  
 Owner—Fred Hechter, 1424 Balboa St.  
 Architect—Clausen & Amandes, Hearst Bldg.

**To Be Done by Day's Work**  
**APARTMENTS** Cost, \$40,000  
 OAKLAND, Alameda Co., Cal. N E 14th St., opposite 26th Ave.  
 Three-story 48-room frame apartments.  
 Owner—Home Bldg. Co., 2574 E. 14th St., Oakland.  
 Architect—John Wagenet, 2930 E. 23rd St., Oakland.

**Contract Awarded.**  
**APARTMENTS** Cost, \$20,000  
 SAN FRANCISCO, N Fifteenth St. — W Church St.  
 Three-story and basement frame and plaster apartment building (6 2-room and 3 3-room apts.)  
 Owner—Julia Mullins.  
 Architect—N. W. Mohr, 4405 20th Ave., San Francisco.  
 Contractor—McCarthy & Johann, 1366 14th Ave., San Francisco.

**Sub-Contracts Awarded**  
**BUILDING** Cost, \$200,000  
 SAN FRANCISCO, S W Davis and Vallejo Sts.  
 Two-story reinforced concrete Class C building.  
 Owner—Albers Bros. Milling Co.  
 Architect & Contractor—Geo. Wagner, 181 S. Park St., S. F.  
**Piling**—M. B. McGowan, 180 Jessie St.  
**Electric Work**—Hampton Electric & Mfg. Co., 525 Howard St.  
**Plumbing**—James H. Pinkerton, 180 Jessie St.  
**Lumber**—J. H. McCallum, 748 Bryant St.  
**Brick**—Sacramento Brick Co., Pier No. 54, S. F.

**Owner Taking Figures**  
**APARTMENT** Cost, \$30,000  
 SAN FRANCISCO, S. W. Lake and 2nd Ave. Three-story and basement frame (12) apartments.  
 Owner—Lester Stoff, 26 Montgomery St.  
 Architect—H. C. Baumann, 251 Kearny St.

**To Be Done by Day Work**  
**APARTMENTS** \$50,000 and \$35,000  
 SAN FRANCISCO, W. Broderick St., and 107 S. Grove St. Two 3-story and basement frame apartment buildings (9 apts. each).  
 Owner—V. Gullmes, 323 Chattanooga St.  
 Architect—H. C. Baumann, 251 Kearny St.

**Contract Awarded**  
**APARTMENTS** Cost, \$15,000  
 OAKLAND, Alameda Co., Cal. S W 51st & Canning Sts.  
 Two-story 12-room apartments.  
 Owner—Chas. Burgess, 2200 Piedmont Ave., Oakland.  
 Architect—David Horn.  
 Contractor—J. F. Brown, 1325 82nd Av., Oakland.

**Site Being Cleared.**  
**APARTMENTS** Cost, \$60,000  
 SAN JOSE, Santa Clara Co., Cal. NW Magnolia St. and The Alameda.  
 Three-story brick apartment building (20 2 and 3-room apts.)  
 Owner—Andrew Haskell, San Jose.  
 Architect—W. H. Weeks, 369 Pine St., San Francisco, and 246 S-First St., San Jose.

**Contract Awarded**  
**APARTMENTS** Cost, \$25,000  
 OAKLAND, Alameda Co., Cal. N E 15th St., 100 W 5th Ave.  
 Two-story 20-room apartments.  
 Owner—T. F. Stokes.  
 Architect—None.  
 Contractor—C. A. Doss, 2028 E. 15th St., Oakland.

**Permit Applied For**  
**APARTMENTS** Cost, \$100,000  
 SAN FRANCISCO, S E Pacific & Baker Sts.  
 Six-story and basement brick (24) apartments.  
 Owner—Roy A. Lee, 105 Montgomery St.  
 Architect—Albert H. Larsen, 447 Sutter St.

**Ready for Figures in Two Weeks**  
**APARTMENTS** Cost, \$175,000  
 SAN FRANCISCO, Hyde St near Greenwich.  
 Fourteen-story class A apt. bldg. (12 apts.)  
 Owner—C. Schaffer, 560 Sutter St.  
 Architect—R. C. Sisson, 468 Crescent St., Oakland.

**Sub-Contracts Awarded**  
**APARTMENTS** Cost, \$35,000  
 SAN FRANCISCO, Chestnut St. near Fillmore St.  
 Three-story and basement frame apartments.  
 Owner—Stock, Maas & Sauer, 3300 Washington St.  
 Architect—Albert H. Larsen, 447 Sutter St.  
**Lumber**—Reinhart Lumber & Planing Mills, Jerrold and Barneveld.  
**Plumbing**—Higgins & Kraus, 730 Tehama St.  
**Electrical Work**—Aetna Electric Company, 1337 Webster St.  
**Steel**—Golden Gate Iron Works, 1541 Howard St.  
**Heating**—La Pointe, 119 De Lan St.  
**Mil. Work**—Henry Harder, 1819 San Bruno Ave.  
**Plastering**—Jos. Marconi, 1747 Mason St.  
**Ornamental Staff**—George Campbell, 3443 17th St.  
**Fire Escapes**—Folsom St. Iron Works, 17th and Missouri.  
**Stairs**—George W. Filbert, 1782 Sanchez St.  
**Sheet Metal**—Washington Square Sheet Metal Works, 684 Filbert St.  
**Roofing**—H. & H. Roofing Co., Inc., 2734 Army St.  
**Painting**—D. Zelinsky, 165 Grove St.

**Plans Ready For Figures in One Week**  
**APARTMENTS** Cost, \$20,000  
 BERKELEY, Alameda Co., Cal. Grove St. — N Sixty-second St.  
 Two-story frame and stucco store and apartment building (6 3-room apts. and 2 stores).  
 Owner—Withheld.  
 Architect—W. Spivock, 3618 Grand Ave., Oakland.  
**Segregated Figures Being Taken.**  
**APARTMENTS** Cost, \$20,000  
 OAKLAND, Alameda Co., Cal. Sixty-second Ave. — E-14th St.  
 Two-story frame and stucco apartment building (6 3-room apts. and 6 garages).  
 Owner—Miss Hattie Davis.  
 Architect—George Ellinger, 1723 Webster St., Oakland.

SAN FRANCISCO, Cal. — Mangels Bros., 340 Hayes St., owners and builders, recently awarded the electrical contract to the Pacific Elevator and Equipment Co., 45 Rausch St., in connection with the construction of a five-story steel frame and brick apartment building. It is to be erected on Hayes St., west of Franklin, from plans prepared by Architect Albert H. Larsen, 447 Sutter St. Cost, \$150,000.

**LOS ANGELES, Cal.**—Chas. C. Frye, architect, 406 Grosse Bldg., has applied for building permit to erect a four-story and basement, 134-room, 69-family, Class A apartment house, 59x151 feet, at 2315 S. Flower St., for the Flower St. Income Properties, Inc., 406 Grosse Bldg.; reinforced concrete walls and floor and roof slabs, composition roofing, tile coping, fire escapes, metal stud and lath and hollow tile partitions, skylights, metal frames, and sash, wall beds, structural steel, telephone system, tiled bath and lobby floors and drainboards, steam heating plant, incinerator, electric refrigeration, electric elevator, storage water heater, sprinkler system in basement; \$200,000.

**LOS ANGELES, Cal.**—Architect C. C. Frye, 406 Grosse Bldg., and Associate L. A. Smith, Film Exchange Bldg., Vermont Ave. and Washington St., are completing plans and will commence taking bids on general contract April 1 for a 4-story class A apartment and store bldg. at N. Broadway and School St., owner's name withheld; reinforced concrete construction, travertine stone front, composition roof, cement, tile & wood floors, tiled baths and sinks, stn. heating system, elevator, fire escapes, refrigeration system, incinerator, copper store fronts, plate glass, marble base.

**LOS ANGELES, Cal.**—Homer D. Rice, 421 Title Insurance Bldg., is preparing plans for a 3-story Class C apartment house to be erected near La Brea and Sunset Blvd., for R. C. Williams. It will have 72 rooms arranged in 4 and 5-room apartments; dimensions, 60x120 ft., brick walls, stucco exterior, cast stone and terra cotta trim, composition roofing, fire escapes, pine trim, oak floors, tiled baths, wall beds, storage water heater, gas-steam radiators, electric refrigeration, incinerator; \$90,000.

**LOS ANGELES, Cal.**—W. Douglas Lee, archt. and bldr., 709 Textile Center Bldg., applied for building permit to erect 6-story class A concrete store and apartment building at s. e. cor. Oakwood and N. Vermont Aves. for C. Henry Frost, own., 6136 Vermont Ave.; 100x120 feet, concrete and composition roof, skylights, art stone trim, ornamental iron, plate glass, fire escapes, 1st floor to contain 5 stores, tile baths and drainboards, closet beds, electric radiators, electric elevator, laundry; \$200,000.

**LOS ANGELES, Cal.**—Evans-Zukin Bldg. Co., 1116 S. Highland Ave., is taking sub-bids for a 4-story and part basement 48-unit class C apartment building to be erected on West Adams St. near Western Ave. for self; plans by Architect Raphael Nicolais, 636½ S. Vermont Ave.; face brick, art stone trim, tile and composition roof, structural steel, tiled baths and drainboards, storage water heaters, electric heating system, hardwood and tile floors, pine trim, wallbeds, refrigeration system, electric elevator; \$125,000.

**STOCKTON, San Joaquin Co., Cal.**—The following bids were received by Architect Jos. Losekann, Elks Building, Stockton, for the construction of six-story steel frame bldg. with brick walls, to contain 40 two, three and four-room apartments, and a two-story steel frame and brick building, to contain ten offices and a garage in the rear, 90 x 140 feet. Both buildings are to be erected for Senator Frank S. Boggs, on North El Dorado St. and East Acacia, Stockton. Estimated cost of both buildings \$280,000.

**Excavating and Concrete**—Frederickson Bros., First National Bank Bldg., Stockton, \$24,790.

**Brick and Terra Cotta**—E. L. Morrison, 1605 Argonne, Stockton, \$52,135.

**Structural Steel**—Sellers Iron Works, 945 S. Illinois, Stockton, \$17,892.

**Tile and Marble**—H. P. Fischer, 744 E. Webster, Stockton, \$11,598.

**Mill Work**—Electric Planing Mill, Hazelton and Monroe, Stockton, \$29,861.

**Painting**—E. J. Blanchard, 616 East Main St., Stockton, \$9264.

Contract will probably be awarded to low bidders. Complete list will follow in a few days.

**LOS ANGELES, Cal.**—Architect Louis Selden, Byrne Bldg., is preparing plans for a 4-story 86-room 40-family class C apartment house, 60x124 ft., to be built on Serrano Ave., between Wilshire Blvd. and 6th St., for Harry Rogaff, 7222½ N. Wilcox Ave. Mr. Rogaff will probably take bids; face brick, cast stone trim, composition roof, fire escapes, tile coping, tiled bath floors and drainboards, gas-steam radiators, refrigeration system, incinerator; estimated cost, \$100,000.

**LOS ANGELES, Cal.**—Barkeley & Gould, 2813 Glendale Blvd., have started work on the erection of a two-story class C store and apartment building at Atlantic Ave. and Whittier Blvd. for P. N. Snyder. Plans were prepared by Balch Bros., 934½ South Figueroa St. The building will be L-shaped, 140x250 ft., brick walls, stucco exterior, tile and composition roofing, pine trim, cement and wood floors, tiled baths, plate glass, steel beams, metal skylights, wall beds, gas radiators. The cost will be \$100,000. Work will be started on a class A theatre building on adjoining property as soon as the lease is consummated. It will be of reinforced concrete construction and will cost \$200,000.

**LONG BEACH, Los Angeles Co., Cal.**—R. E. Campbell, 711 Central Bldg., Los Angeles, will start work in about 2 weeks for the construction of a 12-story and basement class A apartment building on Linden Ave. near 1st St., Long Beach, for self. Architects Wright & Gentry, 316 Marine Bank Bldg., Long Beach, are completing working plans; it will have 81 single, double and three-room apartments; steel frame and reinforced concrete construction, composition, plaster and stone facing, plate glass, electric elevators, steam heating system, hardwood and pine floors, tiled baths and drainboards, wall beds, marble work, ornamental iron, refrigerating system, hardwood and pine trim. Minneapolis Steel & Machinery Co., Chapman Bldg., Los Angeles, have the contract for structural steel.

**LOS ANGELES, Cal.**—Henry B. Pentland, 329 I. W. Hellman Bldg., is completing plans and will take bids commencing Friday, April 1, on concrete work and rough carpentry, for a 5-story class B store and apartment building at 9th St. and Norton, for Louis Siegel, 1561 Venice Blvd.; five stores and 51 apartments, 42x151 feet, reinforced concrete construction, stucco exterior, composition roof, wrought iron, fire escapes, tiled baths and drainboards, storage water heaters, gas steam radiators, hardwood and tile floors, hardwood and pine trim, wallbeds, elevator, incinerator, refrigeration plant; \$175,000. Bids will be taken by owner on balance of work after April 5 when plans will be completed.
